

# LURE CLASS CHART

Follow this simple to use lure class chart to make sure you have the right size tackle for the job. Any questions, just call us and ask! 910-399-6882

LURE SIZE	REEL CLASS	MONO LINE	STRIKE DRAG	LEADER SIZE / LENGTH	HOOK SIZE	TROLL SPEED
Small	20-30lb	30lbs	8-12lbs	100-150lbs, 5-8'	6/0 or 7/0	5-8 knots
Medium	25-50lb	30-50lbs	10-14lbs	200-300lbs, 8-12'	8/0 to 10/0	5-10 knots
Large	50-80lb	50-100lbs	14-18lbs	350-500lbs, 20-25+	10/0 to 11/0	7-12 knots
Extra-Large	80-130lb	80-130lbs	16-20lbs	500-600lbs, 20-25+	11/0 to 12/0	7 - 12knots

# FATHOM OFFSHORE

WHY MANY CHOOSE FATHOM:

FOLLOW US:

**FIND THE FISH:** Troll faster and farther up to 12+ knots. When trolling at recommended speeds of 7-9 knots with small, light tackle lures (compared to 4-6 knots with dead bait) you will cover +25% more open water in the same time with Fathom Offshore lures.

**BETTER HOOK UP:** How many times have you had a strike, reel in your bait only to be left with a head and a hook; just another short strike on a ballyhoo. With our trailing cable hook sets, the hook is always in the area that matters most. Built with Fathom's own Trolling Lance hooks, our hooksets are made to withstand countless attacks from toothy predators.

**MORE STRIKES:** The aggressive swimming action of Fathom Offshore lures draw an irresistible reaction strike from most pelagic game fish. Our lures are designed, perfected, and used by some of the top captains around the world.

**NO PREP:** No more long nights rigging/prepping bait or those expensive last minute stops to the frozen bait section. When you choose a Fathom lure, it's ready when you are. Fathom Offshore lures are intended to be pulled as-is, without bait.

**BUILT TO LAST:** Fathom Offshore lures are constructed from the highest quality ballistic resin. Your favorite lure will withstand countless years of punishment from saltwater and vicious strikes. All Fathom replacement skirts are hand-tied and ready to be replaced when you want to change colors.

**FISHING MADE SIMPLE:** You simply connect the leader of the lure to your 25-30lb class tackle (for small/medium lures), let the lure out to the 2nd or 3rd wave behind the boat, and set the drag at strike. Lures will begin to pop and dive leaving a long bubble trail in their wake (designed to mimic the look of fleeing or escaping bait fish.)

SPREAD CHARTS INCLUDED INSIDE

# PRO TIP:

"Keep your spread to a manageable number of baits for you and your crew. More lures won't necessarily result in more fish if you are un-able to quickly and efficiently react."

**CAPT. MATT MAULDWIN**  
Gulf Breeze, FL

## SIZE AND PLACEMENT:

Typically larger more aggressive lures are run closer to the boat. For example: if you are running a small lure spread for meatfish, mix in a few mediums on the flat lines. This offers the occasional larger fish a more sizable alternative and acts as a teaser to help your smaller offerings get noticed. Smaller lures with less action are run further back with bullets heads producing well in the shotgun.

## LURE HEAD ACTIONS:

**Concave and Flat:** Designed to grab water and pop prior to diving back down expending a sizable bubble trail. 6 - 7 second period.

**Slant and Angled:** When surfacing, slant heads will push water upwards in a skiing motion before re-entering the water. 4 - 5 second period.

**Bullets:** Kept sub-surface, these straight running lures won't be seen often. However, a slight surface ripple produced on top is irresistible to prey.

## CHART KEY

SR Squid Chain

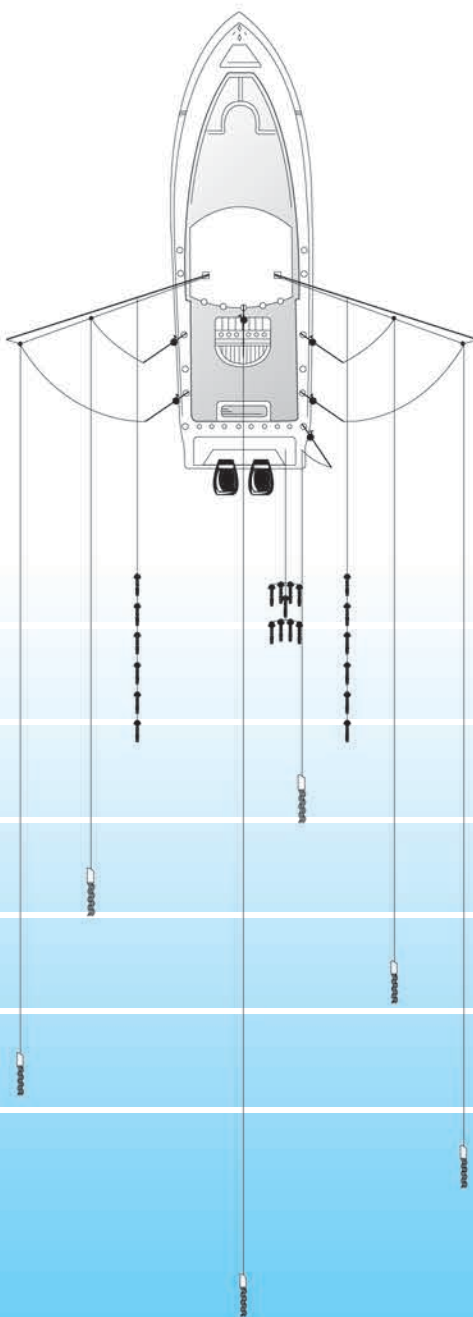

2 Tier Dredge

Fathom Lures

## WITH OUTRIGGERS

6 lure, 2 Squid Chains, 1 dredge.

## WITHOUT OUTRIGGERS

5 lures, 1 dredge.
