Andrew Selby, UK

Music Limited Edition

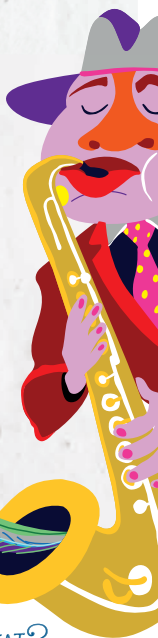

Nothing activates the whole brain like music

Music has a transformative power that modern medicine cannot yet fully explain. Through music, those who cannot speak can sing, those who cannot move can dance, those who have forgotten can remember.

With the power to unlock a child's left and right brain music touches humans across cultures and religions, bridging political and ideological divides.

Let there be music...

Did you know?

- Early humans had music before language
- Your heart beat synchronizes to music as you listen
- Whale song can help cure insomnia
- Vanuatu women create rhythmic music called water drumming
- None of the Beatles could read music
- Music activates neural pathways for Creativity, Memory, Language, Mathematics, Emotion, Motor skills, Visual Intelligence
