LED Grow Light

The product has reserved dimming holes

About touch keys and display

1. Technical Specifications

PRODUCT CODE	PGLE-N 800W	PGLE-N 680W
Wattage	800W	680W
PPF	2400umol/S	2040umol/S
PPE	3.0 umol/J	
Input Voltage/frequency	100-277V/AC	
Dimming (Optional)	PWM/485	
Light angle	120 degree	
Height	10~30 inch	
Operating Temperature	-20~45 C , 20~95%RH No condensation	
Storage Temp & Humidity	-20~85 C , 10~95%RH No condensation	
IP Grade	IP65	
Warranty	3 years	
Dimension	1127 X 1151 X 57.5mm	
Packing Size	1170 X 215 X 228mm	
Net Weight	18kg	
Gross Weight	19kg	

LED Grow Light

2. Usage Scenario

- Rate of photosynthesis and transpiration are directly affected by temperature, humidity and air flow.
- The perfect temperature and humidity for your plants are found between 75-85 °F and 50%-70% humidity, with plenty of airflow to replenish CO2. PH is 6-6.5. You may add more calcium and magnesium than normally needed.

3. Installation Steps

3.1 Easy to install, only three steps to complete the product assembly.

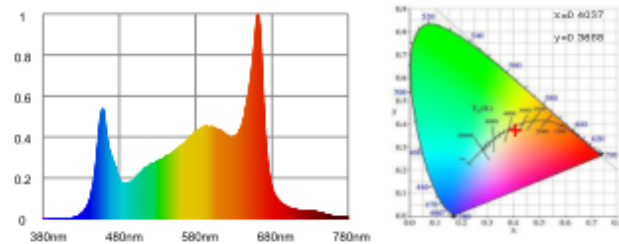

3.2 The holes at both ends of the lamp holder are convenient for using hooks or as fixing holes.

Increase Your Yield

Photosynthetic photon flux:
 PPF=2961.3897 μ mol/s Ef(PPF)=2.9205 μ molVs/W
 Electrical parameter:
 U=15.0240V I=4.6180A P=1014.0000W PF=0.9960

3 Channels Dimmers Design

Freely adjust the lighting according to different growing stages

Light Source	LED
Spectrum	PhysioSpec Indoor™
Light Output PPF	2961.3897 μ mol/s
Efficacy	2.9205 μ mol/J @ 230V AC
AC Input Power	1100W @ 220V AC
AC Input Voltage	120-277V AC, 50/60Hz
Light Distribution	120°
Mounting Height	6" - 12" (15.2-30.5cm) Above Canopy
Thermal Management	Passive
Max. Ambient Temperature	95° F / 35° C
Dimming	0-10V PWM
Total Harmonic Distortion (THD)	< 10%
Lifetime	L90: > 50,000hrs
IP Rating	IP65
Certifications	FCC ETL CE
Warranty	3 Year Standard Warranty

Use Top Bin brands LM301 LEDs, full spectrum, high efficiency and energy saving. addultra-high efficiency deep red 660 nm , IR 730nm and 395nm UV LED

- Light transmittance up to 95%.
- Well protection for the leds.
- Lens diffuses direct light from led.
- This is advantageous for the plant.
- All natural light and grow lights are diffused.
- Nobody has thought of this.
- Lens using Korea brand LOTTE HOPELEX PC-1100 material.

- Wattage: 400w
- Veg coverage: 5x5ft
- Flowering coverage: 4x4ft

Integrated Ventilation System

Features

-Compact and Quiet

Try this unit, you will see how quiet it is. Even at its powerful high speed level, you can only hear the quiet and smooth wind sound. The whole unit is compact, neat, and aesthetic and it gives 400CFM powerful airflow. It is a properly integrated ventilation system that differs from another messy fan+ducts+filter combo. The carbon filter is made of 1050+ Australia Vigin Charcoal with amazing performance to control the odors.

-Easy to Install

You can use the hanging kits included in the package to suspend the unit freely and you can also simply place it on the ground or shelf. The filter is built in so you don't need to connect the filter and the fan with duct. No need to hang the filter separately.

-Filter Replacement

This unit comes with a carbon filter included in the box. It's easy to replace the filter, just take off the bottom plate and replace it with a new filter.

-Safe and Efficient

The motor is EC type, working with AC110-240V, no need external adapter very safe and reliable. The unit only consumes 24W at its highest speed level. fan speed with 3000RPM. It comes with a variable step-less speed controller, so you can adjust the running speed according to your needs.

-Durable and Versatile

Because of the high quality, the unit can easily be used for over 5 years. It is designed mainly for grow tent use, but it is also perfect for any other applications where cooling ventilation, and odor control are required.

Smart Controller

The Smart Controller is the all-in-one platform for controlling, monitoring, and improving your indoor growth. Bring all your smart devices together onto a single controller that does it all: change airflow, air circulation, light intensity, and light spectrum with the touchable screen.

- Intelligent control of grow lights, inline fans, and clip-on fans based on different growth stages and environmental data.
- independent control for each piece of equipment.
- Complete light dimmer control with touchable screen.
- Supports different brand smart devices.
- With Auto mode and manual mode control

Unify Your Equipment: Unify all your smart devices through the Controller and simplify the science of growing down to a manageable level that is easy for beginners and powerful enough for experts, synthesize all equipment together or operate them individually, and stabilize your growing environment.

Smart Multi-task WiFi Controller

Complete Hub

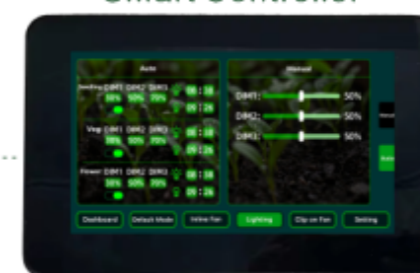

Monitor and control all devices like lights and fans; no need for multiple controllers.

Dual Sensors

Dual temp. & RH sensors monitor inside/outside of grow environment.

Smart Controller

Simple to Use

Simple, touch button interface specially designed for growers of all levels.

Easy Installation

Creative magnetic mounting for easy installation anywhere.

PROGRAMMING DAISY CHAIN

- One controller can link 2 fans of the same size
- Control 2 fans at the same time
- Share the same programming

Features

-Inline Duct Fan

A smart inline duct fan designed to quietly ventilate hydroponic grow rooms, boost heating/cooling to rooms, circulate fresh air, exhaust projects, and cool AV closets. Featuring an inline mixed-flow design, the duct fan can maintain airflow even in high static pressure applications. Contains an EC-motor with PWM-control for a quiet and energy-efficient performance. Includes an intelligent controller that features advanced programming and functions. Complete kit includes one duct fan unit, one thermal controller, one corded thermal probe, two duct clamps, installation manual, all necessary mounting hardware, and all necessary mounting hardware.

-Intelligent Controller

The controller can be programmed to adjust fan speeds to respond to varying high and low temperatures, and humidity. For ventilation applications, the controller can be set to run continuously or triggered to run at customizable speeds when given power, due to its backup memory capability. Additional features include a countdown timer, alarm system, and eco-mode. Includes a detachable 12-foot precision probe that is water-resistant.

-Quiet and Energy Efficient Design

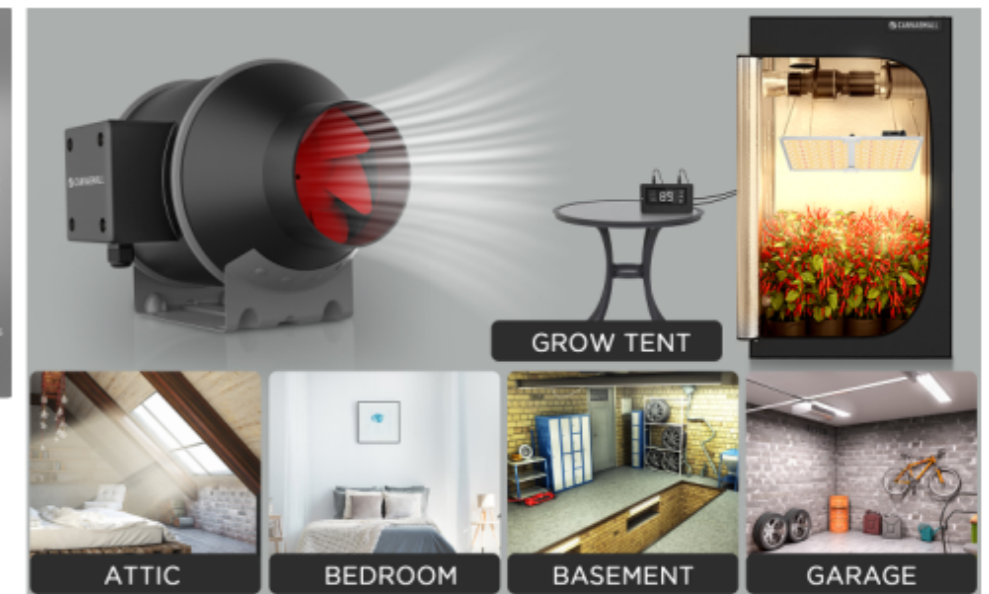

Features an EC-motor that is controlled using PWM (Pulse Width Modulation). This technology enables motors to be able to run smoothly at extremely low RPM speeds without generating additional heat or noise. In addition, the duct fan uses a mixed-flow design using a stator blade and dual hydrodynamic wind circles. This gives it a high static pressure rating, enabling it to deliver airflow even in applications where air movement is being restricted. The motor houses dual ball bearings rated at 67,000 hours which allows the duct fan unit to be mounted in any direction. The unit is IP44 rated to be highly resistant to dust and liquids, and performs well even in harsh

Inline Duct Fan Smart Speed Control: 0-100% with Automatic temperature and humidity monitoring

Inline Ventilation Fan

Features

- The shell is made of polypropylene plastic, one-time disposable molded, with high anti-acid function.
- Using ABS blades, design by hydromechanics to reach the optimal air and pressure.
- High-quality imported ball bearings, motor with overload protector, more flexible use, longer life.
- High performance, low energy consumption and low noise.
- The thickened mounting bracket is more sturdy and practical, and the screws are fixed, which is quick and convenient to install.

Inline Duct Fan Smart Speed Control 0-100%

Features

- 6" clip on fan made to fit all grow tent pole sizes between 15mm to 25mm, with high quality 20W motor to provide optimal air circulation for all stages of a plant's growth and a healthy growing environment, suitable for hydroponic grow rooms, greenhouses, indoor gardens.
- Automatic oscillation with 2 speeds adjustable to meet the specific needs of your plants, producing gentle breezes and powerful airflow, provides efficient and quiet operation, making it ideal for use in noise-sensitive environments.
- The grow tent fan supports 90° horizontal oscillations and 120° vertical oscillations, which can guide the airflow exactly where you need it, making it a reliable and long-lasting addition to your growing setup.
- The fan clip with the square rubberized clamp prevents slippage and mountable to any shape of pole and doesn't scratch surfaces, for perfect placement in every corner of your grow tent.
- The durability and longevity fan is an excellent air circulation supplement for indoor grow tents but also works well for greenhouses, patio spaces, offices, bedrooms, kitchens, workspaces, and anywhere you need discreet, quiet, powerful, comfortable airflow.

Features

- 35mm Carbon Layer of thickness for higher absorption and performance.
- The air carbon purifier will soak up and eliminate some of the most undesirable odors and additional harmful and potentially ill-fating chemicals in the air.
- Resisting chemical irritants and eliminates odors. Absorbs odors from pets and smoking as well.
- Reversible flange and base intended for extended service life, up to 2 years in life expectancy.
- This air carbon filter suits for indoor grow operations to bathrooms, basements, plants grow tents and kitchens.

Features

- The built-in intelligent pipeline fan is designed to maximize circulation, minimize noise, and automatically adjust the wind speed based on temperature and humidity.
- Porous activated carbon helps to eliminate bad smell, Volatile organic compound and other gaseous pollutants.
- This combination is mainly used for various air circulation and ventilation projects to move and deliver air.
- High quality materials ensure a longer service life.
- The compact design is suitable for small and medium-sized planting tents.

10 Fan Speeds | Set Trigger Value

5 MODES: ON, OFF, TIMER, AUTO(4 triggers), ALARM(4 triggers)

TEMP & HUMIDITY SENSOR
AUTOMATICALLY DETECTED (Plug-and-Play)

- Temperature measurement range: 32°F-158°F
- Humidity measurement range: 1%-100%
- Cord Length: 8.2 ft

1 Inner and outer mesh with 53% open area, better ventilation and air flow

2 RC412 Australian virgin activated carbon offer best filtration and absorption

3 Reversible flange to double the life of the filter

4 Comes with pre-filter

WIDE VARIETY OF APPLICATION

Grow Tents

Grow Rooms

Basements

Kitchens

Features

- Effective Light Protection: Double-stitched and equipped with heavy-duty zippers, which greatly prevent light leakage.
- Great Design: The plant growth room is equipped with observation window for easy tracking of plant growth. Interior features multiple vents, removable trays and toolpockets for easy tool storage.
- High-quality Materials: The exterior is made of high-quality Oxford fabric that resists tears and water and abrasion. On the inside, 99% reflective mylar makes your lighting setup more effective.
- Sturdy Construction: The frame is made of stainless-steel metal rods, which can withstand 110 pounds of pressure. The surface has an anti-rust layer to increase the service life of the product
- Tool Free Installation: The metal rod is specially designed with protrusions on the surface, which can be inserted into the connector by pressing the protrusions during installation without tools.

APPLICATIONS

PACKAGE CONTENTS

OBSERVATION WINDOW

- ◆ Easy view window without step into your tent
- ◆ Sealed window with transparent plastic
- ◆ Covered with removable mylar sheet

CONVENIENT TOOL BAG

- ◆ Used heavy duty material same as grow tent
- ◆ Keep energy saving promise
- ◆ Convenient for most accessory tools

STURDY ALL-METAL FRAME

- ◆ Rated to handle at least 110 lbs
- ◆ Great for your grow lights, filters, fans
- ◆ Sturdy and durable construction

REMOVABLE WATERPROOF TRAY

- ◆ With security straps to secure tray to frame
- ◆ Easy to set up
- ◆ Easy cleaning

Complete Grow Tent Kits

PROFESSIONAL & CONVENIENT ALL-IN-ONE GROW TENT KIT

- Full Spectrum LED Lighting
- Higher Quality Grow Tent
- Convenient & Easy Setup
- Effective Filtration System

- Thermo-Hygrometer**
Fahrenheit and Celsius swappable
Alarm, clock, calendar, functions
Max and min value records
No battery included
- 24 Hour Timer**
Customizable design
Easy to operate
Plugs directly into wall
- Rope Clip Hanger**
Heavy duty and well made
Very easy to adjust and set-up
Weight capacity: 150 pounds per pair
- 5 Gallon Grow Bags**
Heavy duty fabric and sturdy stitching
Easy to move with the handles
Improve growth of plants
Reusable, Eco-friendly
- Mesh Trellis Netting**
Strong but soft, long-lasting
Keeps the crop neat and organized

Item	VRM-1-2T	VRM-2-2T	VRM-3-2T	VRM-4-2T	VRM-5-2T	VRM-6-2T	VRM-7-2T
Rack Set	1	2	3	4	5	6	7
Tiers	2	2	2	2	2	2	2
Size - W/L/H (ft)	4*8*8	4*16*8	4*24*8	4*32*8	4*40*8	4*48*8	4*56*8
Size - W/L/H(m)	1.22*2.44*2.44	1.22*4.88*2.44	1.22*7.32*2.44	1.22*9.76*2.44	1.22*12.2*2.44	1.22*14.64*2.44	1.22*17.08*2.44
Rack Material:	Galvanized Steel						
Maximum Load	500kg/tier						
Way of Moving	Mechanic Assist						
Bearing	Dual bearing						
Grow Tray	ABS						
Grow Tray Size	4*8*0.26ft (1.22*2.44*0.08m) / 3.5mm thickness						
Total QTY of Tray	2	4	6	8	10	12	14

* Customized design and room layout solution is supported.

Mobile Grow Racks

Room Layout Service

Rolling Bench

Item	RB-1
Tiers	1
Size - W/L/H (ft)	4*8*2.3 ft
Size - W/L/H(m)	1.22*2.44*0.7m
Rack Material:	Galvanized Steel
Rack Thickness(mm)	1.0
Maximum Load/Tier	300KG
Scalable	Yes
Grow Tray	ABS
Grow Tray size- W/L/H(m)	4*8*0.26ft (1.22*2.44*0.08m) / 3.5mm thickness
Total QTY of Tray	1

* Each Set can be scalable to 20m
 * Customized design and room layout solution is supported.

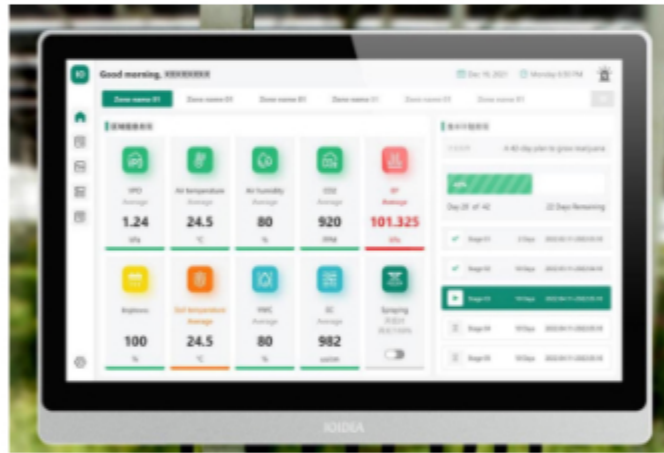

Container

Overview

Crops: Lettuce, Leafy greens, etc
 Growing space: Up to 80m²
 Software: Smart Master controller
 Geographic regions: Worldwide
 Power Consumption: 15KW/Day
 Water Consumption: 300L
 Branding: Support customized logo on the container

Feature 1. Smart Master Controller

Mix fresh air, cold air, Co₂ and dehumidifier together, to ensure plants get enough nutrition.

Feature 2. Independent Operation Room

Independent rooms for operations, inside have glass door to separate the operation room and growing room, avoid contaminate inside plants, reach the completely enclosed environment.

Feature 3. Special Growing Rack

Special design growing rack without a vertical support in the growing area to maximize to use of the container space with a growing capacity up to **7200 small roots plants** in a growing space of **80m²**.

Feature 4. Reliable Ventilation System

Mix fresh air, cold air, Co₂ and dehumidifier together, to ensure plants get enough nutrition.

Container&Climate Specification

Container

Dimension: 40ft(L)* 8ft(W)*9.5ft(H)

LED

Light intensity: 200-250umol/m²/s

Climate control unit

Capacity: 36000 BTU
 Cooling: 18° C-30° C return
 Air condition Fan: 1500m³/h
 Ventilation: 1000m³/h
 Air exchange rate: 6mins full atmosphere recycle
 Air Distribution: Ducted

Cultivation area

Growing capacity: Up to 80m² growing space
 Racking dimension: 1020* 830* 2400mm
 Tray's dimension: 1020*407* 70mm, 40 plants per tray
 Racking qty: 18pcs
 Tray's qty: 180pcs

Others

Emergency lighting: Use for power off case
 UVC lighting: For inside air disinfection
