

KENT
THE FLAME OF THE FUTURE

WOOD HEATING COLLECTION

There's nothing more comforting than sitting in front of a roaring wood fire and enjoying the warmth it brings to your home.

At Kent, we have designed a wide range of heaters to suit any space, style and budget to ensure your family is kept warm on even the coldest nights.

Sleek, modern design or rustic traditional charm – you'll find a Kent wood heater that's right for you.

10 YEAR
FIREBOX STRUCTURAL
WARRANTY
★★★★★

3 speed fan control helps boost heat. Available on all convection heaters

Firebox is lined with **firebricks** or **SKAMOLEX™**

Self-cleaning large door glass for an unobstructed view of your fire

Kent heaters are more efficient than ever and better for you and the environment!

Our range of heaters burn up to 3 times cleaner than the national standard for emissions of 1.5g/kg. Plus, the increased efficiency means your heater will burn less fuel to heat your home.

Installation

We strongly recommend the use of a Maxiheat flue system and professional installation. Maxiheat flue systems are designed, tested and are in accordance with Australian Standard AS2918. It is important to check local regulations prior to installation as well as specifications provided in the instruction manual.

Calisto

Striking in design with minimalist lines, the 'Calisto' series will add a touch of modern style to any home.

This stunning range features some of the cleanest burning models on the market, burning up to 2 x cleaner than the national standard for emissions of 1.5g/kg.

Zero Clearance installation.

Transform a dull blank wall into a magnificent fireplace without major structural alterations or existing brick chimney. Simply purchase a Zero Clearance box and flue kit with any Kent Calisto heater and enjoy the benefits of a built in fireplace without the extensive construction.

Air vents need openings of no less than 10,000mm² at the base and top of the zero clearance enclosure.

* Refer to Kent Fairlight instruction manual for additional hearth specifications. We recommend using the Maxiheat Square Tiled Hearth (MXTHSQ12BLK/GRY) or equivalent.

Refer to your local dealer for clearance information

With all freestanding and inbuilt heaters, it is imperative to use a non-combustible hearth to protect your flooring and its surrounding area. We recommend following our minimum hearth clearance diagrams as outlined:

Refer to the product installation manual for final specifications.

*Refer to Instruction manual for installation specifications such as clearances to combustible materials and hearth construction. Peak heat output and burn times may vary depending on fuel type, moisture content and loading. When installed, Kent wood heaters have been tested with Maxiheat flue systems and comply with the MOST RECENT Australian Standards ASNZS2918. Heating output may vary depending on climate conditions and house design.

All insert heaters must be installed in a full masonry cavity as per the MOST RECENT Australian Standards ASNZS2918. In general, no combustible material should be closer than 600mm above the hot air outlet or 300mm from the sides of the outer side of the heater box. Details provided in this brochure regarding the installation of a Zero Clearance system are for information purposes only and should not be relied upon as full installation instructions. Due to on-going product development, details and specifications for the wood heater collection may be subject to change without notice. Please check with your local retailer.
