

Your body needs electrolytes & micro-nutrients to operate

Especially if you are on a Keto diet!

Keto diets deplete your cells of electrolytes & micro-nutrients

You must supplement to get what you need!

BEST ELECTROLYTES - and - MICRO-NUTRIENTS

ELECTROLYZE FULVIC ELECTROLYTES

ELECTROLYTE POWER

As the strongest known electrolytes – fulvic complexes are just what’s needed for a healthy ketogenic experience.

pH BALANCER

Balance the acidifying effects of a Keto diet with naturally alkalizing fulvic minerals.

NUTRITIONAL MAXIMIZER

Fulvic complexes stimulate nutrient uptake by providing transport for nutrients into and bio-waste out of the cells.

METABOLIC STIMULATOR

Fulvic complexes assist the body’s metabolism and extend the time nutrients are active in your body.

MICRO-BOOST HUMIC MINERALS

MICRO-NUTRIENT BOOST

During ketosis your body flushes minerals. Humic complexes provide 70+ micro-nutrients you need to support optimum cellular function.

CHELATOR & DETOXIFIER

The Keto diet burns fat deposits, releasing stored heavy metals and toxins. Humic complexes help remove these from your body.

INFLAMMATION QUENCHER

Humic complexes support the decrease of inflammation-causing issues in the body through pH balance and detoxification.

ANTI-OXIDANT POWER

With their unique molecular structure, humic complexes are the best antioxidants you can give your body.

“ The key to a successful Keto experience is in the proper supplementation of Electrolytes & Minerals.”

Dr. Gary Price Todd, Author of Nutrition, Health and Disease
