## Say Good-Bye to the '90s

A frameless mirror the size of a card table was all the rage just a decade ago; now, not so much. MirrorMate, a brilliant new product, is custom cut to your specs and covers all manner of ugly-as-sin; plastic hanging clips, worn edges, you name it. It even works if the existing mirror runs wall-to-wall or sits on the backsplash. You go online, choose your design options and measurements and the custom mitered pieces arrive ready with a strong adhesive tape on the back. Simply peel and stick and that motel-esque mirror has entered a new era. Priced from \$109. Available at [www.mirrormate.com](http://www.mirrormate.com).
