Want, need, now: For the week's most exciting buys, read between the lines

With most of us now back in the office, the workwear wardrobe is back in full swing. As we head into cooler autumn weather, you might be thinking about updating your wardrobe for the new season. Pops of colour will look great with more muted separates - The Fold have great options and interesting shapes - and bag brand Lawful London will make sure everything you need is neatly packed away. Happy shopping!

Practical and chic work bags

Beautiful work bags are hard to come by. Practicality often trumps style, but these bags from Lawful London are made with both in mind. Designed to fit a whole range of work essentials (laptop, ring binder, gym kit, shoes, umbrella...), you won't have to worry about carrying around multiple bags.

(£170, [Lawful London](#))
