SECTION 6 - ACCIDENTAL RELEASE MEASURES

Remove sources of ignition. Ventilate area of spill. Use personal protective equipment and dust suppressants to avoid exposure to airborne dusts. Scoop up waste and place in a closed container for recovery or disposal.

SECTION 7 - HANDLING AND STORAGE

Avoid dust generation. Use containment and personal protective equipment where significant dust generation potential exists. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking or smoking. Keep in a tightly closed container, stored in a dry, cool, ventilated area. Separate from incompatibles.

SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION

ENGINEERING CONTROLS:	Use containment, general and local exhaust ventilation to minimize dust concentrations.
PERSONAL PROTECTIVE EQUIPMENT:	<p>Hand and Eye Protection : Use protective gloves (leather, neoprene or rubber) when handling product extensively. Wear chemical safety goggles where potential for significant dust generation.</p> <p>Clothing: Wear coveralls to protect street clothing.</p> <p>Respirator: Wear NIOSH approved respirator with dual cartridge type F filters, or N95-100 particulate filters if dusty conditions present.</p> <p><i>Note: Under normal conditions of use (small quantities, for personal use) it is not anticipated that personal protective equipment will be required. If large quantities are being handled, a risk assessment should be conducted to determine if personal protective equipment is appropriate.</i></p>
