

SHELLAC™ Brand Over Enhancements

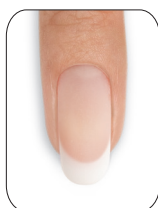

90 MIN SHELLAC™ Brand 14+ Day Nail Color combines the ease of polish with high-performance wear and stunning shine. A true innovation in chip-resistant, long-lasting nail color that can also be worn over Liquid & Powder or Gel Enhancements.

Application:

STEP 1:

Create the Enhancement

1. Create the enhancement of your choice following application guidelines, up to final finishing.

- a. For **Liquid & Powder** enhancements, smooth and refine the nail with a **240-grit buffer** followed by a **1200-grit buffer like the Koala Buffer™** and thoroughly dust the nail with a disinfectable brush and a plastic-backed lint-free pad saturated with **99% Isopropyl Alcohol** to ensure there are no tiny dust particles left.

- b. For **BRISA™ Gel** enhancements, seal with **BRISA™ Gloss** and **cure for one minute (preset button 3)** in the **CND™ LED Lamp.*** Do not remove the top film after removing the nails from the lamp.

2. **Remove** any dust with a disinfectable brush and lightly go over nails with a plastic-backed lint-free pad and **99% Isopropyl Alcohol**.

It is not necessary to apply SHELLAC™ Base Coat.

STEP 2:

SHELLAC™ Color Coat Application

Enhance service and speed with the **CND 5 Point Polish Method** - an easy, systematic approach for polish perfection that will bring out the best in SHELLAC Brand 14+ Day Nail Color. (For more detailed information see the **CND 5 Point Polish Method** Step-by-Step.)

1. Shake vigorously to blend.

2. Apply one thin layer of **SHELLAC™ Color Coat** to extension edge and nail surface (this layer will be slightly semi-sheer if applied correctly).

3. Apply to **five nails** and **cure** each hand for **one minute (preset button 2S)** in the **CND™ LED Lamp.*** Do not remove the top film after removing the nails from the lamp.

4. Apply a second thin layer of Color Coat to the nail surface. The second layer will provide additional coverage and color, refining and perfecting the tiny free margins with each layer.

*If using the **CND™ UV Lamp**, cure for two minutes.

- Apply to **five nails** and **cure** each hand for **one minute** (**preset button 2S**) in the **CND™ LED Lamp**.* Do not remove the top film after removing the nails from the lamp.

STEP 3:

SHELLAC™ Top Coat Application

- Shake to blend.
- Apply one thin layer of **SHELLAC™ Top Coat** to extension edge and nail surface.

- Apply to **five nails** and **cure** each hand for **one minute** (**preset button 3**) in the **CND™ LED Lamp**.*

- Remove the top film with a plastic-backed, lint-free pad saturated with **99% Isopropyl Alcohol**.

- Condition the nails and surrounding soft tissue with **SOLAROIL™ Nail & Cuticle Care** and send a bottle home with the client for daily conditioning.

Removal:

STEP 1:

Buff off Color

- To remove **SHELLAC™ Brand Nail Color** from Liquid & Powder or Gel enhancements, file off the color with a **180-grit file** such as a **Blizzard™ File** or **Hot Shot™ File**. As with all enhancement rebalances, be careful to avoid filing the finger and natural nail.

- Rebalance the enhancement or repeat **SHELLAC™ Brand Nail Color** application steps.

PRODUCTS REQUIRED

CND™ Files and Buffers
SHELLAC™ Color Coat
SHELLAC™ Top Coat
SOLAROIL™ Nail & Cuticle Care

ACCESSORIES/EQUIPMENT REQUIRED

CND™ LED Lamp
 Hand towels
 Hand soap
