Provide a result-driven facial experience for your clients, whether it be a manual facial or advanced facial. There is never enough time to spend on the active part of the facial where we massage to work in the specific serum, boost circulation, etc. By using the facial cups, your client will feel instantly relaxed while you are addressing her concerns, product penetration is increased as well, ensuring that you get the most from your products.

This treatment was created to offer support for improving blood and lymph circulation relieving fine lines and wrinkles by stimulating collagen regeneration. The treatment also firms the skin and restores its health of the skin. Therapeutically infused with beneficial essential oils like Neroli, Geranium, and Carrot Seed, and homeopathic remedies that offer support.

This treatment offers little to no overheads, no expensive machines needed, the oils do not stain towels or become rancid and our technique gives the therapist's wrists a well-deserved break while the clients benefit from tangible results.

## SAMPLE MENU DESCRIPTION:

The Bellabaci Cupping technique combines positive and negative pressure massage performed with hands and the innovative silicon cups, for the benefit of optimizing collagen and elastin production to improve circulation and minimize fine lines and wrinkles around the mouth and on the upper lip.

## CHROMA & AROMA SELECTION

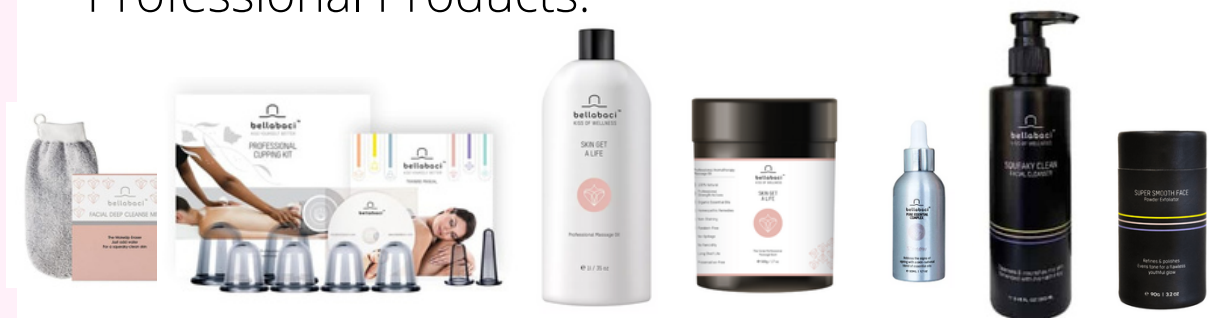

For the full Bellabaci experience, have the client view all 6 of the Genies. Using periphery vision, the client should choose the color which appears most vibrant. Should there be 2, then the chosen Genie is detected via smell. In true Aromatherapy, your olfactory memory will guide you to which blend your body and mind needs. If the Genie smells wonderful, it is the correct formula. If the Genie does not smell as great, it is not what your body is in need of. Humans are intelligent beings, and we have the ability to know what we need, we just need to learn how to revive this ability. For a practical parable, when you are sick with a virus, you may crave orange juice (immune-boosting) or chocolate for its calcium and uplifting element value during times of pain.

## TREATMENT PROTOCOL

Step 1 - Complete client consultation. Ensure the client is not contraindicated.

Basic Phase

Step 2 - Remove makeup with the Facial Deep-Cleanse Mitt. Dampen the mitt with water and gently wipe off all traces of makeup, including mascara.

Step 3 - If needed cleanse the skin with 2-3 pumps of the Squeaky-Clean Gel Cleanser for all skin types. Remove cleanser with damp facial Deep-Cleanse Mitt.

Step 4 - Exfoliate the skin with Super Smooth Face Powder Exfoliator. Add half to a full teaspoon of the powder to your hand and add water to create a fizzy paste. The more sensitive the skin, the more water is added to reduce the exfoliation action that may not be tolerated by sensitive skin. Male or rough textured skins may prefer less water added for deeper exfoliation. Do not use on open lesions, pustules, or inflamed skin. Steam may be incorporated during exfoliation. Remove the exfoliator with a damp facial Deep-Cleanse Mitt.

Step 5 - Tone the skin with Essential Facial Toner. Spray onto damp cotton rounds and apply evenly onto the skin.

Step 6 - Perform Bellabaci Lip Plumping Cupping Massage (see massage sequence)

Step 7 - Remove massage oil if needed with a damp facial Deep-Cleanse Mitt or a steamed towel. Tone the skin with Essential Facial Toner. Spray onto damp cotton rounds and apply evenly onto the skin.

Step 8 - Apply the recommended Genie Crème and follow with Sunkissed UVA/UVB SPF20.
