- Prepare the treatment table by covering it with a heavy towel or blanket, then placing a large plastic sheet over the table.
- Exfoliate the client’s skin using two tablespoons of the **Himalayan Crystal Salt Glow** mixed with one tablespoon of **Complete Oil**.
- Add 5 drops of **Aromabalancing Formula C** to the salt mixture to enhance the effects of the treatment.
- Apply the salt mixture using your hands and work towards the heart, using vigorous but gentle movements.
- During the treatment, the **Complete Oil** will be fully absorbed, leaving the dry salt on the skin, making for easy removal.
- Brush off the salt using a dry towel, or help the client to the in-room shower to rinse off the salt fully.
- If the treatment is not followed by a body wrap, finish by applying the **Body Lotion** to the client’s body in flowing massage motions.
