## MASSAGE TABLE PROTOCOL

### How to Clean & Disinfect Massage Tables with Prevention<sup>™</sup> Wipes or Ready-to-Use Spray

1

If required, pre-clean any visible dirt or debris from the table.

Use of linens does not replace disinfection between each treatment, as linens do not protect against all pathogens or body oils.

2

Wipe or spray the table and face cradle evenly with Prevention.

3

Allow to remain visibly wet for **1 minute** to kill bacteria, viruses & fungi.

4

Allow to air dry. If excess solution is present, wipe using a clean damp cloth.

An occasional wipe with a clean cloth and water after the contact time, can easily remove safe detergents residues if stickiness or streakiness occurs.
