AESTHETIC MEDICINE FORMULATIONS

FUSION
MESO

ABOUT FUSION MESO

HB Aesthetics Group was founded with a passion for promoting better skin health and delivering effective skincare products. Raphael, with a medical and chemical background, aimed to challenge the beauty market by creating skincare products inspired by aesthetic medicine treatments and its active ingredients, a unique idea at the time.

With his experience in biochemistry, he developed science-backed, results-driven products and professional treatments that cater to all skin types, promoting healthy and youthful skin. His mission is to provide only the best products to professionals, leaving no reason to choose any other brand.

Fusion Meso, the brand under HB Aesthetics Group, creates both home and professional protocols that focus on promoting healthy skin condition through the use of active ingredients sourced from aesthetic medicine and injectable products.

Raphael has over 20 years of experience in developing professional-grade skincare products. He is still heavily involved in product development, and his strong values run through everything Fusion Meso does, resulting in a world-renowned skincare brand that challenges the norm.

Raphael Duerinck studied chemistry, engineering processes, dermatology, and biochemistry at the University of Montpellier (France). After working for prestigious pharmaceutical companies, he was inspired to create his own skincare company from scratch, driven by his passion and creativity. The Fusion Meso brand is dedicated to aesthetic medicine products, including sterile cosmetic vials.

Fusion Meso is an aesthetic medicine skincare brand that is available in more than 61 countries and 15,000 centers worldwide. The product assortment is divided into sterile vials and skincare for pre- and post-treatments. The sterile vials are designed for non-invasive treatments like micro-needling or transdermal devices, while the skincare products are based on active ingredients sourced from aesthetic medicine, such as hyaluronic acid, retinol, vitamin C, growth factors, peptides, and more. These products can be used daily or to prepare and restore the skin before and after procedures.

We offer comprehensive cosmetic solutions that are highly innovative and scientifically advanced. Our company is ISO 9001 and GMP certified for the production and distribution of skincare products.

- 17 years experience in aesthetic medicine.
- More than 15.000 clinics and beauty salons worldwide from which 57% are doctors and dermatologists.
- 58 official distributors worldwide and available in 61 countries.
- Own production facilities.
- GMP and ISO 9001 certifications.
- Exclusive formulations.

THE COMPANY
ABOUT FUSION MESO

Our research and observations have led us to the conclusion that fibroblast activity is closely linked to young and healthy skin.

In the dermis, fibroblasts are the main source of proteins that make up the extracellular matrix, giving the skin its suppleness, elasticity, and firmness.

Mesotherapy is a well-known technique in the field of aesthetic medicine that stimulates the mesoderm and fibroblasts to improve or repair skin functions. This technique involves superficial micro-injections with solutions rich in active ingredients.

In recent years, mesotherapy has been replaced by micro-needling and various devices, which provide better results, can be performed by a wider range of professionals (such as doctors or estheticians), and have extremely rare side effects.

However, specific products must be used to avoid allergies or infections when administering products beyond the epidermis with or without a needle. Fusion Meso sterile vials have been specifically formulated for this purpose and manufactured to pharmaceutical industry standards. Our products are the guarantee of effective procedures with high added value.

Our advanced skincare prepares, complements, and protects these results by helping to prevent future damage, protect healthy skin, and further correct visible signs of aging. By combining a customized at-home regimen with powerful in-office treatments, the result is youthful-looking skin.

EDUCATION

Fusion Meso has a strong online educational program and a network of learning centers worldwide. Our educational courses, like our products, ensure that the Fusion Meso experience is consistent globally. Since our brand is primarily sold through professionals, it is essential for everyone using our products to have the same level of knowledge. This provides customers with the best experience with our products for their skin condition.

We have a dedicated team for education and support who conduct training events at our educational center near Barcelona. We also travel worldwide to train professionals on Fusion Meso products and protocols.

Our education managers have worked within the aesthetic medicine industry for many years. Through their experience in the industry with various technical skincare brands, they successfully treated clients and developed training programs and educational strategies worldwide. Their goal is to empower and inspire professionals by sharing their knowledge and experiences to help them reach their full potential.

Fusion Meso treatments can be performed as a single procedure or as a series of sessions, depending on the specific indications and the individual's skin condition.

Set-up objectives of the treatment

During your consultation, our therapist will evaluate your skin type and any specific skin concerns you have. Based on this assessment, they will recommend a type of product and technique that will best suit your needs.

Skin conditioning (3 to 7 days)

Before any type of treatment, it is recommended to carry out skin conditioning. Skin that is well-hydrated, nourished, and has reduced exposure to UV rays prior to treatment will respond much better to treatments.

Meso shield 50 + Night cream

First treatment

The first treatment with the therapist is conservative in order to observe how the skin reacts to the product and the skin stimulation.

Repair (7 to 10 days)

After the treatments, it is recommended to protect the skin with a high protection sunscreen during the day and to apply a cream in the evening that promotes healing.

Meso shield 50 + Night cream

Consecutive treatments

The therapist can perform additional treatments as needed, in a safe and controlled manner.

Remodelling (7 to 14 days)

After the last treatment, it is recommended to protect the skin from UV rays by using our SPF and to apply a repair cream at night. A booster may also be recommended, such as Retinol 1.0 or Vitamin C 5.0.

Meso shield 50 + Night cream

Skincare regimen

The therapist will recommend using Fusion Meso skincare products for maintenance in order to help you keep your skin healthy.

THE COMPANY

RESEARCH, DEVELOPMENT

Our team is composed of a unique group of chemists, pharmacists, and doctors who are committed to creating and testing new formulations every year. We continuously seek out and review new powerful active ingredients and incorporate them into our formulations to ensure that our products are the most effective in the market. For example, we have developed revolutionary products such as the transdermal PPC for the treatment of cellulite and localized fat deposits without injection, as well as stabilized pure retinol 1% and stabilized vitamin C 5%.

We stay up-to-date with the latest developments in the industry to ensure that our products are always innovative and effective.

Our HB Aesthetics technical director, studied pharmacy at the University of Barcelona and has been with the group for eight years. She started as a product formulator and is now leading the R&D department. She has developed many unique formulations throughout her career in personal care and is an industry expert in emulsion technologies. She is also the mastermind behind many of our ground breaking technologies.

MANUFACTURING

All of our products are manufactured in our own facilities in Spain. We use the best practices and equipment for the production of Fusion Meso skincare. We also manage our logistics to ensure a high level of service, from start to finish for every order. As a European company, we comply with European manufacturing standards ISO and GMP regulations, so you can be confident in the consistent quality you will find in each and every product.

Using external audits, we continually monitor the quality of our services and processes to refine every step. The result is the highest quality made by people who are passionate about effective and performing products.

SCIENCE & TRUTH

We are committed to using only active ingredients that have been scientifically proven to be effective, rather than blindly following trends. Our formulation philosophy is centred on a clean and minimalist approach, utilizing only the necessary ingredients to enhance skin health while preserving the integrity of our products. We prioritize high-quality raw materials, primarily from natural sources or sustainably produced.

We believe that skincare should be grounded in research and clinical evidence, and that our customers deserve the very best in terms of quality and results. All of our ingredients are carefully selected based on their proven efficacy in clinical studies. We work closely with leading dermatologists and scientists to identify the most effective ingredients.

HIGHLY EFFECTIVE BUT NON-IRRITATING

Our products are highly effective yet non-irritating, and while we cannot promise miracles, we guarantee results. We formulate our products with active ingredients in appropriate concentrations and optimal pH levels, using only what the skin needs and nothing more.

ENVIRONMENTALLY CONSCIOUS

We are also environmentally conscious and actively seek out sustainable and environmentally-friendly ingredients to reduce our carbon footprint.

INGREDIENTS WE AVOID

To ensure the safety of our customers, we avoid using ingredients such as 1,4 dioxane, abrasive particles, aluminum, formaldehyde or formaldehyde-releasing preservatives (DMDM hydantoin, Diazolidyl urea, Quaternium 15), phthalates, sodium lauryl sulfate, dyes and coloring, talc, toluene, harmful solvents, parabens, thiazolone, paraffin oils, triethanolamine, ammonium hydroxide, or chelating agents (EDTA).

SMART & SAFE BEAUTY

We believe in smart and safe beauty, using only the best natural and synthetic ingredients that have proven benefits. Our products are cruelty-free and vegan, and recommended by over 15,000 professionals worldwide, and sold in over 64 countries. We offer a unique range of daily skincare products that meet the highest standards in efficacy and tolerance, with elegant textures that are pleasant to use. All of our products are fully labelled and feature a use-by date to ensure their freshness.

ESG

PACKAGING

We are committed to using sustainable packaging. All plastics we use are 100% recyclable. We have replaced some plastic packaging with glass packaging and continuously seek to use lighter and more eco-friendly packaging.

UP-CYCLING

In our factory, all plastic materials typically used to pack orders, such as tape, filling, and wrapping materials, have been replaced by recycled cardboard. Additionally, our cardboard waste is up-cycled into filling materials.

POWERED BY SOLAR ENERGY

Our new factory is equipped with 50 kW of solar panels and is totally self-sufficient in energy. Our carbon footprint is negative, and we even supply green electricity to the network, allowing us to offset our overall carbon footprint.

INGREDIENTS

We are committed to reducing our carbon footprint and actively seeking sustainable and environmentally friendly ingredients. We do not use any raw materials that could pose a danger to the environment. All our wastewater is filtered, and all the cleaning products we use are 100% biodegradable and ecological.

SOCIAL

We are committed to responsible social policies and offer the best working conditions to our employees. We offer reduced working time and an optimal schedule to allow all our employees to balance their personal and professional lives as well as possible. At HB Aesthetics, we have a strong company culture that is passed down from experienced staff to new hires. We collaborate on meaningful projects and products with a focus on motivation and happiness.

HB aesthetics is dedicated to operating responsibly, and is motivated to build an organization based on uncompromising ethics, integrity, fairness, diversity, and trust. We aspire to foster a culture of respect for people and the environment in order to be a positive influence in every community we serve.

SMART MIX

Fusion Meso sterile vials have been specifically formulated and are manufactured to pharmaceutical industry standards. Our products are the guarantee of effective procedures with high added value.

Formulations key points:

- Pharmaceutical-grade active ingredients,
- Ultra-pure water (Water For Injection),
- Isotonic formulations fully compatible with plasma,
- Stable and optimal pH,
- Sterilized by micro-filtration to preserve effectiveness.
- We ensure that our products meet the extended quality control before release,
- Endotoxin levels <0.05UI/ml as per pharmaceutical standards.

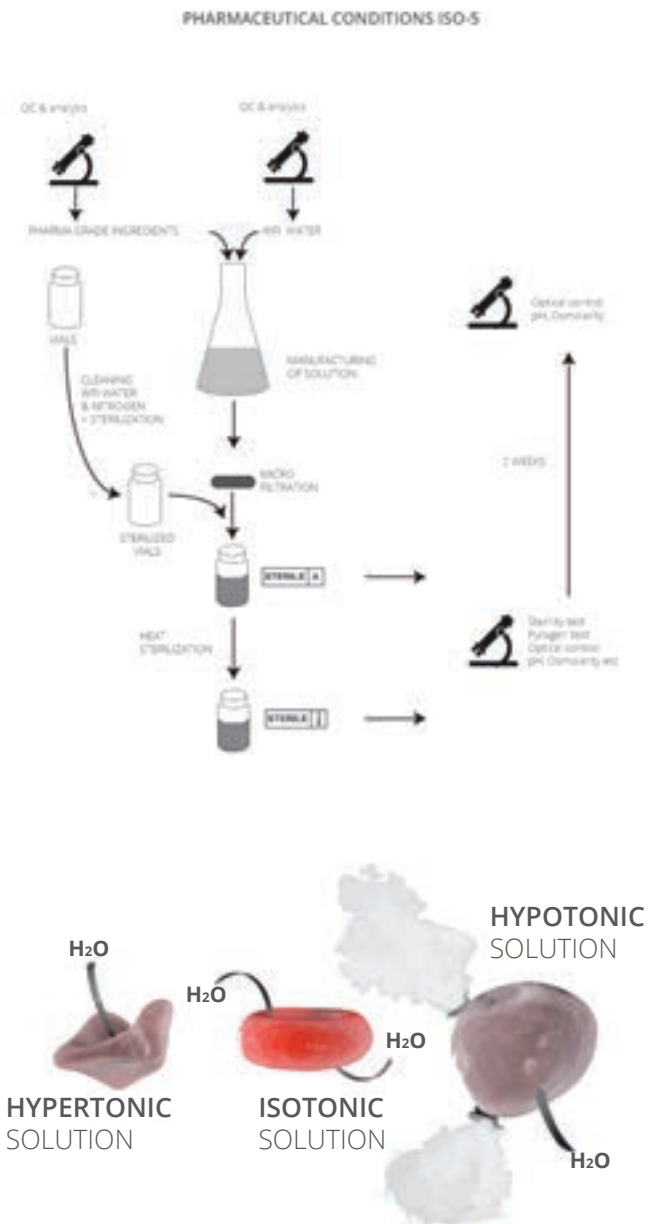

Recommended use:

- Micro-needling,
- RF micro-needling,
- Mezotix,
- Fractionated lasers,
- Ultrasounds,
- Electroporation,
- Galvanic currents,
- Post derma-planning,
- Jet-peel,
- Hydrafacial.

It's important to note that any skincare treatment should be recommended and performed by a qualified and experienced professional who can assess the individual's skin type, concerns, and medical history to determine the most appropriate treatment plan.

Additionally, it's important to follow proper after-care instructions and be aware of any potential risks or side effects associated with each treatment.

At Fusion Meso, quality comes first. By using our products for your treatments, you are choosing safety and results.

STERILE VIAL

F-XFC

ACTIVE INGREDIENTS

NCTC 135* (4 Minerals, 23 amino acids, 18 vitamins, 6 co-enzymes, 5 nucleic acids, 2 reducing agents).

INDICATIONS

- Revitalisation.
- Cellular nutrition.
- Prevent and reduce the signs of skin ageing.

NCTC 135 is a mixture of ingredients derived entirely from plant or synthetic sources. It includes amino acids, minerals, vitamins, co-enzymes and nucleic acids.

Free radicals are known to contribute to aging, and NCTC 135 contains a number of radical scavengers and quenchers that offer protection against radicals in both the aqueous part of tissue and cells. NCTC 135 is also highly effective as a moisturiser and can activate cell metabolism, including the respiratory oxygen consumption in the cell's mitochondria, which in turn increases the production of intracellular adenosine triphosphate. This biochemical energy serves as fuel for numerous vital cell functions, such as cell division, protein synthesis, and cell locomotion.

NCTC 135 offers several benefits, including:

- Scavenging of oxygen radicals and hydroxyl radicals
- Stimulation of oxygen consumption and cell activity
- Increase in the biosynthesis of dermal collagen
- Reduction of fine lines and wrinkles
- Increase in skin density, thickness, and re-epithelialization
- Effective skin remodelling, for example, against scars and stretch marks.

F-XFC formula is a sterile and isotonic solution that contains NCTC135. It is designed to rejuvenate the skin by providing essential nutrients and promoting cellular regeneration. It can be used on various parts of the body including the face, neck, décolleté, and hands. The treatment usually requires multiple sessions, with results becoming visible after a few weeks.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté and hands.

○ PROTOCOL:

- Dose: 5 ml per treatment (face & neck)
- Technique: nappage.
- Targeted tissue: epidermis, superficial dermis.
- Targeted cells: fibroblast, keratinocytes.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-XFC+

ACTIVE INGREDIENTS

NCTC 135* (4 Minerals, 23 amino acids, 18 vitamins, 6 co-enzymes, 5 nucleic acids, 2 reducing agents), EGF growth factor (1%)*, FGF growth factor (1%)*, Hyaluronic acid MW (0,5%)*.

INDICATIONS

- Revitalisation.
- Cellular nutrition.
- Prevent and reduce the signs of skin ageing.
- Reduce deep wrinkles and fine lines.

NCTC 135 is a mixture of ingredients derived entirely from plant or synthetic sources. It includes amino acids, minerals, vitamins, co-enzymes and nucleic acids.

Free radicals are known to contribute to aging, and NCTC 135 contains a number of radical scavengers and quenchers that offer protection against radicals in both the aqueous part of tissue and cells. NCTC 135 is also highly effective as a moisturiser and can activate cell metabolism, including the respiratory oxygen consumption in the cell's mitochondria, which in turn increases the production of intracellular adenosine triphosphate. This biochemical energy serves as fuel for numerous vital cell functions, such as cell division, protein synthesis, and cell locomotion.

NCTC 135 offers several benefits, including:

- Scavenging of oxygen radicals and hydroxyl radicals
- Stimulation of oxygen consumption and cell activity
- Increase in the biosynthesis of dermal collagen
- Reduction of fine lines and wrinkles
- Increase in skin density, thickness, and re-epithelialization
- Effective skin remodelling, for example, against scars and stretch marks.

F-XFC+ formula is a sterile and isotonic solution that contains NCTC135 enhanced with growth factors and hyaluronic acid. It is designed to rejuvenate the skin by providing essential nutrients and promoting cellular regeneration. It can be used on various parts of the body including the face, neck, décolleté, and hands. The treatment usually requires multiple sessions, with results becoming visible after a few weeks.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté and hands.

○ PROTOCOL:

- Dose: 5 ml per treatment (face & neck)
- Technique: nappage, papulas.
- Targeted tissue: epidermis, superficial dermis.
- Targeted cells: fibroblast, keratinocytes.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-XFC+ FACE

ACTIVE INGREDIENTS

Organic silicium skin (5%)*, DMAE (0,5%)*, Hyaluronic acid HW (0,5%)*.

INDICATIONS

- Lift and firm the skin.
- Reduce deep wrinkles and fine lines.
- Improve skin volumes.

The active ingredients in «XFC+ FACE» are well known among anti-aging doctors, who often use them in mesotherapy to treat wrinkles and volume loss. Organic silicium is the primary ingredient in this formula, which has several effects, including cyto stimulation, free radical blocking, anti-glycation, anti-wrinkle, firming, collagen boosting, and anti-inflammatory properties.

DMAE, an analogue of the B vitamin choline, is used in dermatology for its potent anti-inflammatory effect and ability to stimulate muscle tone, reducing wrinkles and skin sagging.

Hyaluronic acid provides moisture and helps to restore skin volume, making it an excellent ingredient for addressing the visible signs of aging.

Together, these ingredients work to provide a powerful anti-aging effect, helping to reduce the appearance of fine lines and wrinkles, increase skin firmness and elasticity, and restore the skin's natural volume and moisture levels.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté and hands.

○ PROTOCOL:

- Dose: 5 ml per treatment (face & neck).
- Technique: nappage, papulas.
- Targeted tissue: epidermis, superficial dermis.
- Targeted cells: fibroblast, keratinocytes, myocytes (muscle cells).

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-LIFT+ FACE

ACTIVE INGREDIENTS

Hyaluronic acid MW (0,5%)*, EGF+FGF+TRX growth factors (1%)*, Carcinine (0,25%)*, Oligopeptide-24 (0,25%)*, Oligopeptide-34 (0,25%)*, Hexapeptide-10 (0,2%)*.

INDICATIONS

- Lift and firm the skin.
- Reduce deep wrinkles and fine lines.
- Improve skin volumes.
- Improve the skin tone.

Introducing the ultimate non-surgical facelift product, designed to improve skin condition and reduce skin sagging. This powerful formula contains a high concentration of 4 biomimetic peptides and 3 growth factors (Fibroblast GF, Epidermal GF, Thioredoxin GF) that work together to energize the skin, stimulate cellular growth and metabolism, protect against free radicals, reduce inflammation, control pigmentation, and firm the skin (with up to 50% reduction of wrinkles after 3 treatments).

Carcinine, a peptidic compound, helps protect the skin's components such as collagen from external aggressions such as UV, free radicals, and stress. It also maintains the metabolic activities of the exposed cells. Carcinine acts in four different, non-exclusive, ways for maximum efficiency: anti-oxidation, anti-stress, anti-glycation, and metabolism stimulation.

Hexapeptide-10 is a firming active that promotes double-cellular activity on both keratinocytes and fibroblasts. It increases the synthesis of laminin-5, 6-integrin, and hemidesmosomes, thus strengthening the dermo-epidermal junction. As we age, the adhesion between the epidermal and dermal cells is reduced, resulting in loss of skin elasticity.

Finally, Hyaluronic acid 500k Daltons provides intense skin volume and moisture while stimulating collagen synthesis, promoting the regeneration of dermal structure and elasticity.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté and hands.

○ PROTOCOL:

- Dose: 5 ml per treatment (face & neck)
- Technique: nappage, papulas.
- Targeted tissue: epidermis, superficial dermis.
- Targeted cells: fibroblast, keratinocytes.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-SLIM LIFT

ACTIVE INGREDIENTS

NCTC 135* (4 Minerals, 23 amino acids, 18 vitamins, 6 co-enzymes, 5 nucleic acids, 2 reducing agents), Caffeine (0,25%), Hyaluronic acid MW (0,5%)*.

INDICATIONS

- Revitalisation.
- Cellular nutrition.
- Prevent and reduce the signs of skin ageing.
- Reduce deep wrinkles and fine lines.
- Reduce facial fat volumes.

NCTC 135 is a mixture of ingredients derived entirely from plant or synthetic sources. It includes amino acids, minerals, vitamins, co-enzymes and nucleic acids.

Free radicals are known to contribute to aging, and NCTC 135 contains a number of radical scavengers and quenchers that offer protection against radicals in both the aqueous part of tissue and cells. NCTC 135 is also highly effective as a moisturiser and can activate cell metabolism, including the respiratory oxygen consumption in the cell's mitochondria, which in turn increases the production of intracellular adenosine triphosphate. This biochemical energy serves as fuel for numerous vital cell functions, such as cell division, protein synthesis, and cell locomotion.

NCTC 135 offers several benefits, including:

- Scavenging of oxygen radicals and hydroxyl radicals
- Stimulation of oxygen consumption and cell activity
- Increase in the biosynthesis of dermal collagen
- Reduction of fine lines and wrinkles
- Increase in skin density, thickness, and re-epithelialization
- Effective skin remodelling, for example, against scars and stretch marks.

F-SLIM LIFT formula is a sterile and isotonic solution that contains NCTC135, caffeine and hyaluronic acid. It is designed to rejuvenate the skin appearance and reduce the accumulated fat on the facial area. It can be used on various parts of the body including the face, neck, décolleté, and hands. The treatment usually requires multiple sessions, with results becoming visible after a few weeks.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté and hands.

○ PROTOCOL:

- Dose: 5 ml per treatment (face & neck).
- Technique: nappage, papulas.
- Targeted tissue: epidermis, superficial dermis.
- Targeted cells: fibroblast, keratinocytes, adipocytes (fat cells).

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-GLOW LIFT

ACTIVE INGREDIENTS

Organic silicium skin (1%)*, Hyaluronic acid MW (0,5%)*, FGF growth factor (0,3%)*, Tranexamic acid (0,2%)*, DMAE (0,2%)*, Niacinamide (0,2%)*, Vitamin C (0,1%), Glutathione (0,05%)*, Acetyl Glycyl Beta-Alanine peptide (0,1%)*.

INDICATIONS

- Lift and firm the skin.
- Reduce deep wrinkles and fine lines.
- Reduce overall pigmentation.
- Improve the skin tone & reduce brown spots.

F-GLOW LIFT is an outstanding treatment that helps reduce dark spots, even out skin tone, minimize deep wrinkles and skin sagging. Pigmentation is a complex process and mainly results from melanocyte stimulation, primarily by UV exposure. Melanogenesis includes three significant processes: melanosome formation, melanin synthesis, and melanosome transport. The synergy of Acetyl Glycyl Beta-Alanine peptide, glutathione, vitamin C, niacinamide, and tranexamic acid acts at various levels:

- Inhibition of melanin-generating enzymes (tyrosinase, TRP-1, and TRP-2)
- Inhibition of melanosome transport by down-regulation of melanophilin.
- Inhibition of melanin production

The synergy of hyaluronic acid, DMAE, FGF, and organic silicium skin acts on the fibroblast to create an intense firming action on the dermis, reducing wrinkles and skin sagging. After a few applications, the skin tone becomes brighter, and impressive results are achieved in the long run. For a maximum and long-lasting result, F-GLOW LIFT requires the synergistic use of Meso-shield 50 every morning.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté and hands.

○ PROTOCOL:

- Dose: 5 ml per treatment (face & neck)
- Technique: nappage, papulas.
- Targeted tissue: epidermis, superficial dermis.
- Targeted cells: fibroblast, keratinocytes, melanocytes.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-BTX

ACTIVE INGREDIENTS

Octapeptides & Pentapeptides (10%)*, Hyaluronic acid MW (0,1%)*.

INDICATIONS

- Prolong the effectiveness of botox.
- Reduce expression wrinkles and fine lines.
- Improve skin volumes.

Botox injections are a popular dermatological treatment that temporarily smooths moderate to severe frown lines. The botulinum toxin, which is injected into the skin, blocks the release of the neurotransmitter ACh by cleaving the SNAP-25 protein, preventing the assembly of the SNARE complex. As a result, the nerve signal cannot be relayed, the muscle cannot contract, and it becomes paralyzed. However, such injections need to be reapplied every six months.

F-BTX peptides act on the modulation of muscle contraction by reducing ACh release at the synapse, as it competes for a position in the SNARE complex while also blocking the entrance of calcium ions, which are necessary for vesicle fusion with the membrane.

This is the perfect complement to injections as it can potentiate and maintain the effect of toxin micro-injections for a more extended period. The anti-wrinkle effect of F-BTX + Botox increased by three times compared to only Botox in the frontal region after six months, and it decelerated the reappearance of expression lines in the crow's feet area.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Forehead, crow's feet.

○ PROTOCOL:

- Dose: 5 ml per treatment (forehead and temples).
- Technique: nappage, papulas.
- Targeted tissue: superficial & medium dermis.
- Targeted cells: myocytes (muscle cells).

FREQUENCY OF TREATMENTS:

First session 2 months after botox injection, then repeat once per month.

STERILE VIAL

F-HA

ACTIVE INGREDIENTS

Hyaluronic acid HW (1,5%)*.

INDICATIONS

- Reduce deep wrinkles and fine lines.
- Improve skin volumes.
- Hydrate the skin at dermal level.

Hyaluronic acid is an effective treatment for extreme dryness, deep static wrinkles, and loss of volume. It is a natural polysaccharide with incredible properties, which are further enhanced by the specific form used:

- high molecular weight for immediate and long-lasting results.

Dehydration and loss of firmness are signs of skin aging that lead to wrinkle formation and sagging of certain facial areas. Hyaluronic acid helps maintain moisturized and firm skin by improving cellular cohesion and preventing transepidermal water loss, as well as stimulating collagen I synthesis. This results in progressively tighter and moisturized skin, making it look younger and more attractive, with both flexibility and firmness.

F-HA is a topical dermal filler that provides a natural and cost-effective alternative to injected dermal fillers. It does not contain reticulation agents such as DVS or BDDE, making it a safer and more natural option.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté and hands.

○ PROTOCOL:

- Dose: 5 ml per treatment (face & neck)
- Technique: papulas.
- Targeted tissue: dermis.
- Targeted cells: fibroblast.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-HA ULTRA

ACTIVE INGREDIENTS

Hyaluronic acid HW (1,5%)*, EGF growth factor (0,5%)*, FGF growth factor (0,5%)*.

INDICATIONS

- Reduce deep wrinkles and fine lines.
- Improve skin volumes.
- Hydrate the skin at dermal level.

Hyaluronic acid is an effective treatment for extreme dryness, deep static wrinkles, and loss of volume. It is a natural polysaccharide with incredible properties, which are further enhanced by the specific form used:

- high molecular weight for immediate and long-lasting results.

Dehydration and loss of firmness are signs of skin aging that lead to wrinkle formation and sagging of certain facial areas. Hyaluronic acid helps maintain moisturized and firm skin by improving cellular cohesion and preventing transepidermal water loss, as well as stimulating collagen I synthesis. This results in progressively tighter and moisturized skin, making it look younger and more attractive, with both flexibility and firmness.

F-HA ULTRA is a topical dermal filler that provides a natural and cost-effective alternative to injected dermal fillers. It does not contain reticulation agents such as DVS or BDDE, making it a safer and more natural option.

F-HA ULTRA is a boosted version of F-HA that incorporates FGF and EGF to stimulate the cellular proliferation of keratinocytes and fibroblasts.

- **HOW TO USE:**
 - meso-needling, transdermal delivery devices, post laser.

- **AREAS:**
 - Face, neck, décolleté and hands.

- **PROTOCOL:**
 - Dose: 5 ml per treatment (face & neck)
 - Technique: papulas.
 - Targeted tissue: dermis.
 - Targeted cells: fibroblast.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-DMAE

ACTIVE INGREDIENTS

DMAE (1%)*.

INDICATIONS

- Reduce deep wrinkles and fine lines.

DMAE, also known as Norcholine, is a natural compound found in our body that has started to be used in external products to produce a lifting effect. It is a precursor of acetylcholine, a neurotransmitter that plays an important role in the skin. Cells such as keratinocytes, fibroblasts, myofibroblasts, sweat cells, and endothelial cells have membrane receptors that respond to acetylcholine.

The tensile effect of DMAE results in cholinergic stimulation of fibroblast membrane receptors, leading to the progressive concentration of myofilaments in their cytosol. DMAE also has anti-radical and anti-lipofuscin activities, and it repairs protein cross-linking (collagen and elastin).

The mode of action of DMAE can result in a synergistic combination of actions at different levels, including tension of dermal non-muscle cells, cohesion and displacement of keratinocytes, hydration and elasticity of the stratum corneum, improved nutrition and skin defenses, and free radical scavenging. DMAE has both immediate and long-lasting effects.

However, note that DMAE is not compatible with Botox and F-BTX treatments.

○ HOW TO USE:

○ meso-needling, transdermal delivery devices, post laser.

○ AREAS:

○ Face, neck, décolleté.

○ PROTOCOL:

○ Dose: 5 ml per treatment (face & neck)

○ Technique: papulas.

○ Targeted tissue: deep dermis.

+ Targeted cells: myocytes (muscle cells).

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.

One treatment every 6 weeks as maintenance.

STERILE VIAL

F-RADIANCE

ACTIVE INGREDIENTS

Retinyl palmitate (1%), Oligopeptide-34 (0,5%)*, Acetyl glyceryl beta-alanine peptide (0,5%)*, TRX growth factor (0,5%)*, Glutathione (0,1%)*, Vitamin C (0,2%).

INDICATIONS

- Treatment for melasma.
- Reduce overall pigmentation.
- Improve the skin tone & reduce brown spots.

F-RADIANCE is an outstanding treatment that reduces dark spots, evens out skin tone, and brightens the skin without causing irritation. Pigmentation is a complex process that is mostly stimulated by UV radiation on melanocytes. Melanogenesis involves three major processes: melanosome formation, melanin synthesis, and melanosome transport. The synthesized melanin in mature melanosomes is subsequently distributed to neighboring keratinocytes in the upper skin layer, resulting in pigmented skin.

The synergy of glutathione, vitamin C, peptides, and Thioredoxin growth factor acts at various levels, including:

- Inhibition of melanin-generating enzymes (tyrosinase, TRP-1, and TRP-2)
- Inhibition of melanosome transport by down-regulation of melanophilin
- Inhibition of melanin production
- Retinol accelerates the mitosis of basal cells, leading to faster skin renewal. By accelerating the skin turnover, we eliminate keratinocytes that are charged with melanin.

After a few applications, F-RADIANCE treatment brightens the skin tone, and impressive long-term results are achieved. To achieve maximum and long-lasting results, it is recommended to use the Meso-shield 50 every morning.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté and hands.

○ PROTOCOL:

- Dose: 5 ml per treatment (face & neck)
- Technique: nappage.
- Targeted tissue: epidermis.
- Targeted cells: melanocytes, keratinocytes.

FREQUENCY OF TREATMENTS:

Initial course of 5 to 8 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-MELACLEAR

ACTIVE INGREDIENTS

Niacinamide (0,5%)*, Tranexamic acid (0,5%)*, Resorcinol (0,1%), Glutathione (0,15%)*, Arbutin (0,1%)*.

INDICATIONS

- Treatment for melasma.
- Reduce localized dark spots.

F-MELACLEAR is a potent treatment specifically formulated for reducing dark spots on localized facial areas. The main component of the formula is tranexamic acid, traditionally used as a hemostatic medicine. In the skin, tranexamic acid inhibits UV-induced plasmin activity in keratinocytes by preventing the binding of plasminogen to the cells. This ultimately decreases melanocyte tyrosinase activity, making tranexamic acid effective for removing pigmentation, whitening the skin, and reducing spots.

One study published in the Journal of Cosmetic Dermatology in 2018 evaluated the efficacy of tranexamic acid in mesotherapy for treating melasma. The study included 30 patients who received mesotherapy with tranexamic acid twice a week for 8 weeks. The results showed a significant reduction in melasma severity and improvement in skin tone.

Another study published in the Journal of Drugs in Dermatology in 2013 evaluated the efficacy and safety of tranexamic acid in mesotherapy for skin whitening. The study included 50 patients who received mesotherapy with tranexamic acid once a week for 4 weeks. The results showed a significant improvement in skin lightening and reduction in skin pigmentation.

However, to achieve the best results, we have combined tranexamic acid with safe and effective skin lightening ingredients such as resorcinol, glutathione, niacinamide, and arbutin, which do not directly affect tyrosinase. To achieve maximum and long-lasting results, use Meso-shield 50 every morning. Caution should be taken when using the product on the entire face, as it may result in excessive skin whitening. Dilute the product for such treatment.

- **HOW TO USE:**
- meso-needling, transdermal delivery devices, post laser.

- **AREAS:**
- Face, neck, décolleté.

- **PROTOCOL:**
- Dose: 1 to 3 ml per treatment (face & neck)
- Technique: nappage.
- Targeted tissue: epidermis.
- Targeted cells: melanocytes.

FREQUENCY OF TREATMENTS:

Initial course of 5 to 8 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-ANTI-OX

ACTIVE INGREDIENTS

Super oxide dismutase (0,05%)*, Vitamin C (0,2%), Glutathione (0,2%), Sodium pyruvate (0,2%).

INDICATIONS

- Reduce oxidative stress.
- Enlighten the complexion.
- Prevent photoaging.
- Neutralize free radicals.
- Stimulate the production of collagen.

This potent product targets free radicals, photo-aging, and hyperpigmentation, and is based on Superoxide dismutase, an enzyme found in all living cells that breaks down potentially harmful oxygen molecules in cells to prevent damage.

Enzymes are substances that speed up certain chemical reactions in the body. Superoxide dismutase is also effective against wrinkles, for rebuilding tissue, and reducing inflammation.

Vitamin C and glutathione are strong antioxidants that reduce pigmentation and increase collagen levels. To complete this potent blend of antioxidants, we have added sodium pyruvate as a source of energy for cellular metabolism. Sodium pyruvate stimulates collagen synthesis. The concept of anti-ox is to reinforce the endogenous antioxidant defenses to more effectively protect against oxidative stress.

- **HOW TO USE:**
 - meso-needling, transdermal delivery devices, post laser.
- **AREAS:**
 - Face, neck, décolleté and hands.
- **PROTOCOL:**
 - Dose: 5 ml per treatment (face & neck)
 - Technique: nappage.
 - Targeted tissue: superficial dermis and epidermis.
 - Targeted cells: fibroblasts, keratinocytes, melanocytes.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-VITAMIN C

ACTIVE INGREDIENTS

Vitamin C (10%).

INDICATIONS

- Enlighten the complexion.
- Prevent photoaging.
- Neutralize free radicals.
- Stimulate the production of collagen.

* EVIDENCE OF CLINICAL EFFICACY

F-Vitamin C is an excellent treatment for preventing skin ageing, combating free radicals, reducing pigmentation, and achieving skin lightening. Vitamin C is a potent antioxidant that helps prevent free radical damage, the primary cause of skin ageing.

When applied correctly, vitamin C can penetrate the deeper layers of the epidermis, replenishing the vitamin supply. This way, free radicals can be scavenged, collagen synthesis can be restored, melanin can be reduced to inhibit the formation of brown spots, and the skin can be lightened.

Mesotherapy with vitamin C can be used to address a variety of skin concerns such as photoaging, dullness, and uneven skin tone.

○ HOW TO USE:

○ meso-needling, transdermal delivery devices, post laser.

○ AREAS:

○ Face, neck, décolleté.

○ PROTOCOL:

○ Dose: 1 ml per treatment diluted with 4 ml of saline solution or another vial.

○ Technique: nappage.

○ Targeted tissue: superficial dermis and epidermis.

○ Targeted cells: fibroblasts, keratinocytes, melanocytes.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.

One treatment every 6 weeks as maintenance.

STERILE VIAL

F-VITAMIN ACE

ACTIVE INGREDIENTS

Retinyl palmitate (1%), Vitamin C (0,2%), Vitamin E (0,1%).

INDICATIONS

- Reduce oxidative stress.
- Enlighten the complexion.
- Prevent photoaging.
- Neutralize free radicals.
- Treat oily skin and open pores.

F-Vitamin ACE is an effective treatment for photoaging, free radical damage, pigmentation, and oily skin. Vitamin A, C, and E are all powerful antioxidants that work to prevent free radical damage, the primary cause of photoaging.

The combination of these vitamins synergistically provides a potent defense system against aging. When properly applied, vitamin C can penetrate the deeper layers of the epidermis and replenish the supply of this important vitamin. This process helps to scavenge free radicals, restore collagen synthesis, and significantly reduce melanin production.

Retinyl palmitate, a form of vitamin A, is an ester of retinol and palmitic acid that can be converted to retinol once it penetrates the skin. Retinol has been shown to have anti-aging effects, as it stimulates collagen production, reduces fine lines and wrinkles, and improves skin texture and tone.

Retinyl palmitate is also known to have skin-lightening properties, as it inhibits tyrosinase activity, which is responsible for melanin production in the skin. This makes it useful in the treatment of hyperpigmentation and melasma.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté and hands.

○ PROTOCOL:

- Dose: 5 ml per treatment (face & neck)
- Technique: nappage.
- Targeted tissue: superficial dermis and epidermis.
- Targeted cells: fibroblasts, keratinocytes, melanocytes.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-MESOMATRIX

ACTIVE INGREDIENTS

Organic silicium skin (2%)*, Hyaluronic acid MW (0,5%)*, EGF growth factor (0,5%)*, FGF growth factor (0,5%)*, Cica - Centella Asiatica extract (0,5%)*.

INDICATIONS

- Reduce scars & stretch marks.
- Lift and firm the skin.
- Reduce deep wrinkles and fine lines.

Our F-MESOMATRIX formula is exclusively designed to restructure and regenerate the dermal matrix. It is highly recommended for the treatment of deep wrinkles, scars, and stretch marks. The epidermal and fibroblast growth factors work in synergy with the Centella Asiatica extract, hyaluronic acid, and organic silicium to stimulate the formation of new cells and increase cellular metabolism. Treatment after treatment, the skin recovers its normal and youthful appearance.

Centella Asiatica has been highly valued in pharmaceutical applications due to its reparative properties. It accelerates the skin repair process on damaged skin and restores its integrity. Centella Asiatica is also referred to as «cica», «tiger grass», or «tiger herb». Its benefits for skincare and post-medical procedures are highly significant. Its faster repairing properties are ideal for damaged skin, remodelling, redensifying, and anti-stretch marks. Our products can be used to repair the skin faster after laser treatments, peeling, meso-needling, and many other treatments where skin integrity is compromised.

- **HOW TO USE:**
meso-needling, transdermal delivery devices, post laser.

- **AREAS:**
Face, neck, décolleté.

- **PROTOCOL:**
 - Dose: 5 ml per treatment.
 - Technique: nappage, papules.
 - Targeted tissue: epidermis, superficial & medium dermis.
- +
- Targeted cells: fibroblast, keratinocytes.

FREQUENCY OF TREATMENTS:

6 to 10 treatments every 2 weeks.

STERILE VIAL

F-ACN

ACTIVE INGREDIENTS

Hyaluronic acid MW (0,5%)*, Niacinamide (0,3%)*, ZnPCA (0,1%)*, Panthenol (0,3%)*.

INDICATIONS

- Reduce acne.
- Treat oily skin and open pores.
- Reduce redness and inflammation.

F-ACN is a targeted treatment for impure skin, oily skin conditions, and open pores. Hyperseborrhea, which results from hormonal modifications, suboptimal hygiene, dietary imbalances, circulation disorders, or lack of exfoliation, is a cause of acne. It is characterized by increased activity and size of the sebaceous glands, followed by the proliferation of microbial flora, particularly *Propionibacterium acnes*. This leads to irritation, which can sometimes result in inflammation. F-ACN contains vitamins B5 and niacinamide to reduce inflammation and redness related to acne. Hyaluronic acid provides hydration, while ZnPCA addresses the problems of oily skin with a tendency to acne.

Zinc is a mineral widely studied and used in acne treatments due to its anti-inflammatory and antibacterial properties. Zinc helps with healing rashes, rejuvenation, wards off the itchy scalp, and works as an antioxidant. Considerable scientific research has shown that zinc reduces sebum secretion by inhibiting 5-alpha-reductase. Seborrhea regulation is androgen-dependent, in particular by testosterone. Every target cell of the sebaceous gland contains an enzyme, 5 alpha-reductase, that converts testosterone into dihydroxytestosterone (DHT). DHT acts on the activity of the hair follicle, causing the stimulation of the sebaceous gland and the resulting increase in sebum production.

To increase its efficacy and bioavailability to cells, we combine zinc with L-pyrrolidone carboxylic acid (L-PCA), a natural physiological molecule that also has a fundamental place in the biochemistry of the skin. PCA is considered a physiological moisturizer in cosmetology. Carboxylic acids are used for several skincare benefits, including topical treatments like acne, rosacea, warts, eczema, and psoriasis. Zinc PCA controls acne and reduces the secretion of sebum (a physio-sebo regulator) by oily skin, and helps in retaining skin moisture by strengthening the skin barrier.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté.

○ PROTOCOL:

- Dose: 5 ml per treatment (face & neck)
- Technique: nappage.
- Targeted tissue: superficial epidermis.
- Targeted cells: keratinocytes, micro-flore.

FREQUENCY OF TREATMENTS:

Initial course of 2 to 4 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-HYDRALIX

ACTIVE INGREDIENTS

Acetyl hexapeptide-37 (1%)*, Hyaluronic acid MW (0,5%)*, Sodium lactate (0,2%)

INDICATIONS

- Skin renewal.
- Reduce transepidermic water loss.
- Improve long-term skin hydration.

Innovative product designed to improve skin volume and enhance moisture levels. Our advanced formula contains a potent blend of hyaluronic acid, sodium lactate, and acetyl hexapeptide-37, which work together to provide deep hydration and promote a more youthful, plump appearance.

Hyaluronic acid is a naturally occurring substance in the skin that helps to retain moisture and improve skin elasticity. It acts as a magnet for water, drawing it to the skin's surface to keep it hydrated and supple.

Sodium lactate is a powerful humectant that helps to attract moisture to the skin and lock it in. It also has gentle exfoliating properties that help to slough off dead skin cells, revealing a smoother, more radiant complexion. This ingredient is especially effective at improving skin texture and reducing the appearance of fine lines and wrinkles.

Acetyl hexapeptide-37 improves skin hydration by enhancing the expression of aquaporin 3 (AQP3), a membrane protein involved in water transport through the different tissue layers. An increased concentration of the protein improves water flux from the basal layer of the epidermis to the stratum corneum, as shown by various in vivo studies. Acetyl hexapeptide-37 can improve skin hydration by up to 131%.

With regular use, you can expect to see significant improvements in skin texture, hydration, and volume.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté.

○ PROTOCOL:

- Dose: 5 ml per treatment.
- Technique: nappage.
- Targeted tissue: epidermis, superficial dermis.
- Targeted cells: fibroblast, keratinocytes.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-COUPERIX

ACTIVE INGREDIENTS

Acetyl tetrapeptide-40 (1%)*, Organic silicium skin (1%)*, VEGF growth factor (0,25%)*, Phytic acid (0,2%), Ginkgo extract (0,1%)*.

INDICATIONS

- Reduce redness.
- Reduce couperosis.
- Reduce spider veins.

Skin redness linked to inflammatory reactions affects millions of people, causing discomfort and influencing our personal wellness in daily and social life. Flushing skin, temporary or persistent erythema, telangiectasia, pustules, papules and itching can be experienced. Evidence shows that people affected by facial redness and spider veins have increased skin inflammatory metabolites and reactions, suggesting that inflammation and its metabolites play a central role in these manifestations and disorders.

Couperix is an innovative product designed to specifically decrease the appearance of facial redness and telangiectasia induced by an excessive inflammatory response. The adverse effects of inflammation, such as redness, dilated blood vessels, and hyperpigmentation, are visibly reduced. The red areas are less numerous and wide, and the intensity is reduced. The skin appears more uniform and less marked.

This powerful skin treatment that combines a unique blend of potent ingredients to fortify blood vessels and prevent skin redness. This innovative formula contains a combination of peptide, organic silicon, VEGF, phytic acid, and ginkgo extract to provide a winning solution for those looking to improve their skin's appearance and overall health.

VEGF, or vascular endothelial growth factor, is a protein that helps to stimulate the growth of new blood vessels, improving circulation and oxygen delivery to the skin.

Phytic acid is a natural antioxidant that helps to protect the skin from environmental stressors, while ginkgo extract has anti-inflammatory properties that can help to soothe and calm irritated skin.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté.

○ PROTOCOL:

- Dose: 5 ml per treatment (face & neck)
- Technique: nappage.
- Targeted tissue: epidermis, superficial dermis.
- Targeted cells: fibroblast, keratinocytes, endothelial cells.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions.
One treatment every 8 weeks as maintenance.

STERILE VIAL

F-EYE CONTOUR

ACTIVE INGREDIENTS

Acetyl tetrapeptide-5 (5%)*, Organic silicium skin (2%)*, Hexapeptide-10 (1%)*, Hyaluronic acid MW (0,1%)*, Vitamin C (0,1%), Caffeine (0,1%).

INDICATIONS

- Reduce eye bags.
- Reduce dark circles.
- Reduce wrinkles and fine lines.

This product is the ultimate solution for all concerns related to the sensitive eye area, including eye bags, dark circles, wrinkles, flaccidity and dryness. Peptides and hyaluronic acid work together to reinforce firmness, increase moisture, and reduce wrinkles. Caffeine activates the elimination of liquids and blood-originated pigments that cause dark circle coloration and also helps to reduce local inflammation. Organic silicium and vitamin C restore the dermal matrix to firm the skin. The unique synergy of these ingredients achieves a beautiful and enlightened eye contour.

Acetyl tetrapeptide-5 fights against edema-forming mechanisms and shows a decongestant effect, enhancing elasticity and skin smoothness.

Hexapeptide-10 is a firming active that promotes double-cellular activity on both keratinocytes and fibroblasts. It increases the synthesis of laminin-5, alpha-6-integrin, and hemidesmosomes, thus strengthening the dermo-epidermal junction. As we age, the adhesion between the epidermal and dermal cells is reduced, resulting in the loss of skin elasticity.

- **HOW TO USE:**
 - meso-needling, transdermal delivery devices, post laser.

- **AREAS:**
 - Eye contours.

- **PROTOCOL:**
 - Dose: 1 ml per treatment.
 - Technique: papules.
 - Targeted tissue: superficial dermis.
 - Targeted cells: endothelial cells, fibroblasts.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 4 treatments with 3 weeks in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-PERFECT LIPS

ACTIVE INGREDIENTS

Hyaluronic acid MW(0,75%)*, Acetyl hexapeptide-38 (1%)*, VEGF growth factor (0,25%)*.

INDICATIONS

- Improve lips volume.
- Improve lips color.
- Prolong the effect of lips dermal fillers.

Perfect Lips is a product dedicated to improving the definition, volume, and color of the lips. The volume and hydration of the lips are increased with hyaluronic acid and acetyl hexapeptide-38. The peptide has a targeted action that enhances the rate of adipogenesis, leading to a higher lipid accumulation and volume growth in the lips. It stimulates the expression of peroxisome proliferator-activated receptor Gamma coactivator 1a (PGC-1a), which enhances the rate of adipogenesis, leading to higher lipid accumulation and volume growth in desired areas like the lips. VEGF boosts cutaneous blood micro-circulation to provide intense coloration of the lips.

«Perfect lips» is a natural alternative to dermal fillers. It does not contain harmful reticulation agents such as DVS or BDDE, and it does not accumulate in the lips or present any risk of granuloma when applied. «Perfect lips» can also be used to complement dermal filler injections, resulting in a more natural look, although it may require more frequent application.

- **HOW TO USE:**
- meso-needling, transdermal delivery devices, post laser.

- **AREAS:**
- Lips.

- **PROTOCOL:**
- Dose: 1 to 2 ml per treatment (face & neck)
- Technique: nappage, papules.
- Targeted tissue: dermis, adipose tissue.
- Targeted cells: adipocytes, endothelial cells.

FREQUENCY OF TREATMENTS:

Every 4 weeks. One treatment every 12 weeks as maintenance. Can be combined with dermal fillers injection, wait 4 to 6 weeks after dermal filler injections.

STERILE VIAL

F-GINKGO

ACTIVE INGREDIENTS

Ginkgo extract (1%)*.

INDICATIONS

- Reduce redness.
- Improves micro circulation.

Ginkgo leaves contain two main groups of compounds: flavonoids and terpenes, which are the basis for its therapeutic actions. Ginkgo's most powerful effect is on the circulatory system. Ginkgo flavonoids directly dilate the micro-capillaries, which increases blood circulation. Ginkgo biloba reduces capillary permeability and has notable anti-edematous and anti-varicose effects, as well as eutrophic action on connective tissue, increasing the synthesis of collagen along the vessel walls. Ginkgo biloba is also an anti-inflammatory veinotonic agent.

Studies have shown that ginkgo extracts are more effective than beta-carotene and vitamin E in reducing UV-induced oxidative stress in epidermal cells. Ginkgo also increases the creation of fibroblasts, collagen, and extracellular fibronectin. Additionally, ginkgo contains glycosides or ginkgo heterosides, including quercetin, kaempferol, and isohamnetin. Quercetin is a more potent antioxidant than vitamin C and has membrane-stabilizing, antioxidant, and free-radical scavenging effects. It also enhances the utilization of oxygen and glucose.

○ HOW TO USE:

- meso-needling, transdermal delivery devices, post laser.

○ AREAS:

- Face, neck, décolleté, scalp.

○ PROTOCOL:

- Dose: 5 ml per treatment.
- Technique: nappage.
- Targeted tissue: superficial dermis.
- Targeted cells: fibroblasts, keratinocytes, endothelial cells.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 6 treatments with 2 week in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-HAIR

ACTIVE INGREDIENTS

Dexpanthenol (0,25%)*, Hyaluronic acid MW (0,25%)*, Carnosine (0,25%)*, Organic silicium hair (0,25%)*, Biotin (0,2%), Pyruvic acid (0,1%), Cica - Centella Asiatica extract (0,1%)*, Ginkgo extract (0,1%)*, Copper (0,01%), Iron (0,01%), Magnesium (0,01%), Zinc (0,01%).

INDICATIONS

- Hair revitalization & fortification.
- Thinning hair.
- Hair loss.

F-HAIR is a revolutionary hair growth treatment that is designed to stimulate hair follicles, improve hair density, and promote healthy hair growth. This innovative treatment utilizes a combination of advanced technologies and high-performance ingredients to provide effective and long-lasting results.

F-HAIR contains a unique blend of various ingredients that work together to nourish and stimulate the hair follicles. These ingredients help to improve circulation to the scalp, promote new hair growth, and strengthen existing hair strands.

The treatment is applied using meso-needling technique, which involves the micro injection of small amounts of the solution directly into the scalp. This technique ensures that the solution is delivered precisely where it is needed, ensuring maximum efficacy.

F-HAIR is suitable for both men and women who are experiencing hair loss or thinning hair. It is safe, minimally invasive, and produces visible results in just a few sessions. With regular treatments, patients can expect to see improvements in hair density, texture, and overall quality.

If you are looking for a safe and effective way to address hair loss, thinning hair, or other hair-related concerns, F-HAIR is the perfect solution.

○ HOW TO USE:

- meso-needling, transdermal delivery devices.

○ AREAS:

- Scalp.

○ PROTOCOL:

- Dose: 5 ml per treatment
- Technique: nappage, papules.
- Targeted tissue: superficial dermis, hair follicles.
- Targeted cells: fibroblasts, follicles cells, endothelial cells.

FREQUENCY OF TREATMENTS:

Initial course of 10 treatments with 1 week in between sessions.
One treatment every 4 weeks as maintenance.

STERILE VIAL

F-HAIR MEN

ACTIVE INGREDIENTS

Acetyl tetrapeptide-3 & Clover extract (1%)*, EGF growth factor (0,5%)*, FGF growth factor (0,25%)*, VEGF growth factor (0,25%)*, Copper tripeptide-1 (0,5%)*, Decapeptide-4 (0,5%)*, Organic silicium hair (0,5%)*, Carnosine (0,5%)*, Dexpanthenol (0,25%)*, Hyaluronic acid MW(0,1%)*.

INDICATIONS

- Reduce redness.
- Improves micro circulation.

Alopecia is a common problem affecting both men and women, with androgenic alopecia representing 95% of cases. Hair is composed of two structures: the hair shaft and the hair follicle. At the base of the follicle is the dermal papilla and ECM. As new cells grow in the papilla and ECM, they push the previous cells upwards to form the hair. The dermal papilla plays a crucial role in dermal-epidermal interactions and is of great importance for hair formation and the growth cycle.

F-HAIR MEN effectively treats alopecia with a blend of peptides, growth factors, organic silicon, panthenol, and hyaluronic acid. It preserves hair follicle stem cell (HFSC) activity, modulates DHT via 5-alpha-reductase activity inhibition, stimulates ECM renewal and anchoring proteins synthesis, and decreases pro-inflammatory cytokines. The acetyl tetrapeptide-3 is a highly innovative active ingredient that combines a patented four-amino-acid biomimetic peptide with a red clover extract rich in Biochanin A. Its efficacy is based on the combined action of these two ingredients, allowing direct action on DHT, preventing the hair cycle from shortening and hair follicle miniaturization, and improving the ECM proteins in the dermal papilla surrounding the hair bulb for better anchoring in the scalp. It also prevents inflammation, which is a contributing factor in hair loss.

The treatment is applied using meso-needling technique, which involves the micro injection of small amounts of the solution directly into the scalp. This technique ensures that the solution is delivered precisely where it is needed, ensuring maximum efficacy.

F-HAIR MEN is suitable for both men and women who are experiencing hair loss or androgenic alopecia. It is safe, minimally invasive, and produces visible results in just a few sessions.

○ HOW TO USE:

- meso-needling, transdermal delivery devices.

○ AREAS:

- Scalp.

○ PROTOCOL:

- Dose: 5 ml per treatment
- Technique: nappage, papules.
- Targeted tissue: superficial dermis, hair follicles.
- Targeted cells: fibroblasts, follicles cells, endothelial cells.

FREQUENCY OF TREATMENTS:

Initial course of 10 treatments with 1 week in between sessions.
One treatment every 4 weeks as maintenance.

STERILE VIAL

F-XBC

ACTIVE INGREDIENTS

Caffeine (2%), Carnitine (2%), Taurine (1%), Vectorized lipase and hyaluronidase (0,2%)*, Cica - Centella Asiatica extract (0,5%)*, Ginkgo extract (0,5%)*, Artichoke extract (0,5%), Coumarin (0,05%), Troxerutin (0,05%).

INDICATIONS

- Reduce fat deposits by lipolysis.
- Reduce compact and oedematous cellulite.
- Drainage.

Introducing our best selling cocktail, specially formulated to reduce cellulite and activate lipolysis for a smoother, more toned appearance. Our powerful formula contains a combination of active ingredients, including caffeine, L-carnitine, taurine, vectorized lipase, hyaluronidase, Centella Asiatica extract, ginkgo extract, artichoke extract, coumarin, and troxerutin, that work together to provide a comprehensive solution for cellulite reduction.

Caffeine and L-carnitine are key ingredients in our cocktail that work together to activate lipolysis, the process by which fat cells release their triglycerides. Taurine and vectorized lipase help to support this process by promoting the release of stored fats, while hyaluronidase reduces the compression of blood vessels by breaking down hyaluronic acid in the dermis.

Centella Asiatica extract and ginkgo extract are natural plant extracts that have been shown to improve blood circulation and reduce fluid retention, which can contribute to the appearance of cellulite. Artichoke extract has a diuretic effect that can help to eliminate excess water from the body, while coumarin and troxerutin have anti-inflammatory properties.

Our meso cocktail is easy to use and can be applied topically to areas of concern, such as the thighs, hips, and abdomen. With regular use, you can expect to see visible improvements in the appearance of cellulite, as well as smoother, more toned skin.

○ HOW TO USE:

- meso-needling, transdermal delivery devices.

○ AREAS:

- Body, double chin, eye bags.

○ PROTOCOL:

- **Dose: No more than 5 ml the first session and 10 ml for consecutive sessions.**

○ Technique: nappage, papules.

○ Targeted tissue: dermis, adipose tissue.

○ Targeted cells: adipocytes.

FREQUENCY OF TREATMENTS:

Course of 5 to 10 treatments with 1 week in between sessions for body.

Course of 2 to 3 treatments for eye bags and double chin.

STERILE VIAL

F-MAGISTRAL

ACTIVE INGREDIENTS

Organic silicium skin (4%)*, Artichoke extract (1,5%), Coumarin (0,05%), Troxerutin (0,05%).

INDICATIONS

- Drainage.
- Heavy legs.
- Body firming.

Specially formulated to improve skin texture and tone while reducing the appearance of cellulite. This powerful product is concentrated in organic silicium, Cynara extract, coumarin, and troxerutin to provide a targeted approach to body contouring.

Organic silicium, a key ingredient in our product, is known for its ability to improve skin elasticity and firmness. It helps to stimulate collagen production, which in turn supports healthy skin cells and reduces the appearance of wrinkles and fine lines.

Cynara extract, derived from artichokes, is a potent antioxidant that helps to protect the skin from damage caused by free radicals. It also promotes lymphatic drainage, which can help to reduce the appearance of cellulite and other unwanted bulges.

Coumarin, a natural compound found in several plants, has been shown to enhance blood circulation and improve the appearance of skin. It has anti-inflammatory properties that can help to soothe and calm irritated skin, making it an excellent ingredient for those with sensitive or reactive skin.

Troxerutin is a flavonoid that is known for its ability to improve micro-circulation and reduce the appearance of spider veins and varicose veins. It also has antioxidant properties that help to protect the skin from environmental stressors and promote a more youthful appearance.

Our product for body is easy to use and can be applied topically to areas of concern, such as the thighs, hips, and abdomen. With regular use, you can expect to see visible improvements in skin texture and tone, as well as a reduction in the appearance of cellulite and other unwanted bulges.

○ HOW TO USE:

- meso-needling, transdermal delivery devices.

○ AREAS:

- Body.

○ PROTOCOL:

- Dose: 10 ml per treatment.
- Technique: nappage, papules.
- Targeted tissue: superficial dermis, conjunctive tissue.
- Targeted cells: adipocytes, fibroblasts.

FREQUENCY OF TREATMENTS:

Course of 5 to 10 treatments with 1 week in between sessions.

STERILE VIAL

F-CARNITINE

ACTIVE INGREDIENTS

L-carnitine (10%).

INDICATIONS

- Increase fat burning.

L-Carnitine is a compound consisting of two essential amino acids, lysine and methionine, that naturally occur in cells and play a role in lipid metabolism for muscles. The most well-known function of carnitine is its essential role in transporting long-chain fatty acids into mitochondria for beta-oxidation, which is crucial for lipid metabolism and energy production in the myocardium and muscles.

A deficiency in L-Carnitine prevents fats from being transported to the mitochondria for energy production. This can result in the accumulation of fat and the appearance of cellulite. Conversely, having sufficient levels of L-Carnitine can help burn fat, resulting in weight loss, increased energy levels, and improved resistance to cold and fatigue.

L-Carnitine is sometimes used in mesotherapy as an ingredient in injections to target localized fat deposits and promote fat loss. The idea behind using L-Carnitine in mesotherapy is that it can help transport fatty acids into cells to be burned for energy, which can result in a reduction in fat accumulation. Some practitioners also believe that L-Carnitine can help improve skin texture and tone.

○ HOW TO USE:

○ meso-needling, transdermal delivery devices.

○ AREAS:

○ Body.

○ PROTOCOL:

○ Dose: 5 ml per treatment diluted with 5 ml of saline solution or other product.

○ Technique: nappage, papules.

○ Targeted tissue: dermis.

○ Targeted cells: adipocytes.

FREQUENCY OF TREATMENTS:

Course of 5 to 10 treatments with 1 week in between sessions.

STERILE VIAL

F-ARTICHOKE

ACTIVE INGREDIENTS

Artichoke extract (10%).

INDICATIONS

- Heavy legs.
- Body detox.
- Stimulate lymphatic system.
- Drainage.

Artichoke, also known as *Cynara scolymus*, has been used in traditional medicine for centuries as a specific remedy for liver and gallbladder ailments. Artichoke is known to mobilize fatty stores in the liver and aid in its detoxification, making it a natural aid for lowering cholesterol levels.

Cynarin, a compound found in artichoke, has demonstrated properties against oxidative stress induced by inflammatory mediators. In addition, it helps in controlling lipolysis by favouring the synthesis of energy-transporting enzymes such as NAD-NADH₂ and NADP-NADPH₂. It also acts as a diuretic and vasoconstrictor, stimulating the lymphatic drainage system. Artichoke mobilizes fat stores from tissues such as white adipose tissue, and these fats are subsequently excreted from the body through the bloodstream.

Artichoke is commonly used in mesotherapy for its lipolytic and diuretic properties. It can help mobilize and eliminate fat deposits, especially in areas like the thighs, hips, and abdomen. Artichoke extract is also believed to stimulate lymphatic drainage, improve circulation, and detoxify the liver. These properties make it a popular ingredient in mesotherapy cocktails designed to target cellulite, localized fat deposits, and fluid retention. Additionally, artichoke extract is sometimes combined with other ingredients like caffeine and L-carnitine to enhance its lipolytic effects.

○ HOW TO USE:

○ meso-needling, transdermal delivery devices.

○ AREAS:

○ Body.

○ PROTOCOL:

○ Dose: 10 ml per treatment.

○ Technique: nappage, papules.

○ Targeted tissue: dermis.

○ Targeted cells: adipocytes.

FREQUENCY OF TREATMENTS:

Course of 5 to 10 treatments with 1 week in between sessions.

STERILE VIAL

F-MELIRUTIN

ACTIVE INGREDIENTS

Coumarin (0,5%), Troxerutin (0,5%).

INDICATIONS

- Body veins.
- Micro circulation problems.
- Oedematous Cellulite.

The beneficial effects of this mixture of active ingredients are centred on the lymphatic and venous levels, essential for every cellulite treatment.

Troxerutin and coumarin are often used in mesotherapy as active ingredients for their beneficial effects on the circulatory system.

Troxerutin is a flavonoid with antioxidant, anti-inflammatory, and venotonic properties. It helps strengthen the walls of blood vessels and capillaries, reducing their permeability and preventing leakage of fluids into surrounding tissues. It also promotes lymphatic drainage and can reduce swelling and inflammation.

Coumarin, on the other hand, is a natural anticoagulant that can help improve blood flow and prevent blood clots. It can also have anti-inflammatory and pain-relieving effects. In combination, these two ingredients can work synergistically to improve circulation and reduce symptoms of venous insufficiency, such as varicose veins and edema.

They are often used together in mesotherapy formulations targeting these conditions.

○ HOW TO USE:

- meso-needling, transdermal delivery devices.

○ AREAS:

- Body.

○ PROTOCOL:

- Dose: 10 ml per treatment.
- Technique: nappage, papules.
- Targeted tissue: superficial dermis.
- Targeted cells: endothelial cells.

FREQUENCY OF TREATMENTS:

Course of 5 to 10 treatments with 1 week in between sessions.

STERILE VIAL

F-LIFT+ BODY

ACTIVE INGREDIENTS

Organic silicium skin (2%)*, FGF growth factor (0,5%)*, DMAE (0,5%)*, Hyaluronic acid MW(0,1%)*.

INDICATIONS

- Body firming.
- Body lifting.

With age, not only does the skin on the face lose firmness and elasticity, but skin sagging on the body is also a major concern for customers over 40, particularly under the arms and inside the legs. There are few effective solutions available on the market for body firming apart from firming body creams, and most body products target cellulite and fat.

Fusion Meso is offering a cutting-edge product to respond to this major concern with effectiveness. Our advanced formula contains a potent blend of hyaluronic acid, DMAE, FGF growth factor, and organic silicon, which work together to provide a comprehensive solution for skin firming and tightening.

Hyaluronic acid is a natural component of the skin that helps to maintain moisture and improve skin elasticity. It acts as a magnet for water, drawing it to the skin's surface to keep it hydrated and supple. DMAE is a naturally occurring compound that has been shown to have skin-firming properties. It works by promoting the production of acetylcholine, a neurotransmitter that helps to tighten and firm the skin.

FGF growth factor is a protein that helps to stimulate the production of collagen and elastin, which are essential for maintaining healthy, youthful-looking skin. Organic silicium helps to support collagen synthesis and strengthen the skin's connective tissues. Together, these ingredients work synergistically to provide a powerful solution for skin firming and tightening.

Our cocktail is easy to use and can be applied topically to areas of concern, such as the arms, legs, and abdomen. With regular use, you can expect to see visible improvements in skin firmness, tightness, and overall quality.

○ HOW TO USE:

- meso-needling, transdermal delivery devices.

○ AREAS:

- Body.

○ PROTOCOL:

- Dose: 10 ml per treatment.
- Technique: nappage, papules.
- Targeted tissue: superficial dermis.
- Targeted cells: fibroblasts..

FREQUENCY OF TREATMENTS:

Initial course of 5 to 10 treatments with 1 week in between sessions.
One treatment every 6 weeks as maintenance.

STERILE VIAL

F-SILORG

ACTIVE INGREDIENTS

Organic silicium skin (5%)*.

INDICATIONS

- Body firming.
- Stretch marks.

Organic silicium is a polysaccharide extracted from algae and combined with silanol groups. Water-soluble and biologically active, it has multiple activities such as restructuring effects, prevention, protection, reparation, and metabolism stimulation.

Organic silicon is used in mesotherapy for several reasons. Firstly, it has restructuring effects on the skin and helps to reinforce the connective tissue, collagen, and elastin fibers. This helps to improve the elasticity and firmness of the skin. Additionally, organic silicon has a strong skin tightening and moisturizing activity, which can help to reduce the appearance of fine lines and wrinkles.

Organic silicon is also known for its ability to stimulate metabolism and act as an antioxidant to prevent skin aging. It has excellent skin tolerance, meaning it is non-toxic and non-allergenic, making it a safe ingredient to use in mesotherapy formulations.

Overall, the benefits of organic silicon make it a popular ingredient in mesotherapy treatments aimed at improving skin texture, firmness, and anti-aging effects.

○ HOW TO USE:

- meso-needling, transdermal delivery devices.

○ AREAS:

- Body.

○ PROTOCOL:

- Dose: 10 ml per treatment.
- Technique: nappage, papules.
- Targeted tissue: superficial dermis.
- Targeted cells: fibroblasts.

FREQUENCY OF TREATMENTS:

Initial course of 3 to 5 treatments with 2 weeks in between sessions, up to 10 treatments can be required for stretch marks.

STERILE VIAL

SMART MIX

ACTIVE INGREDIENTS

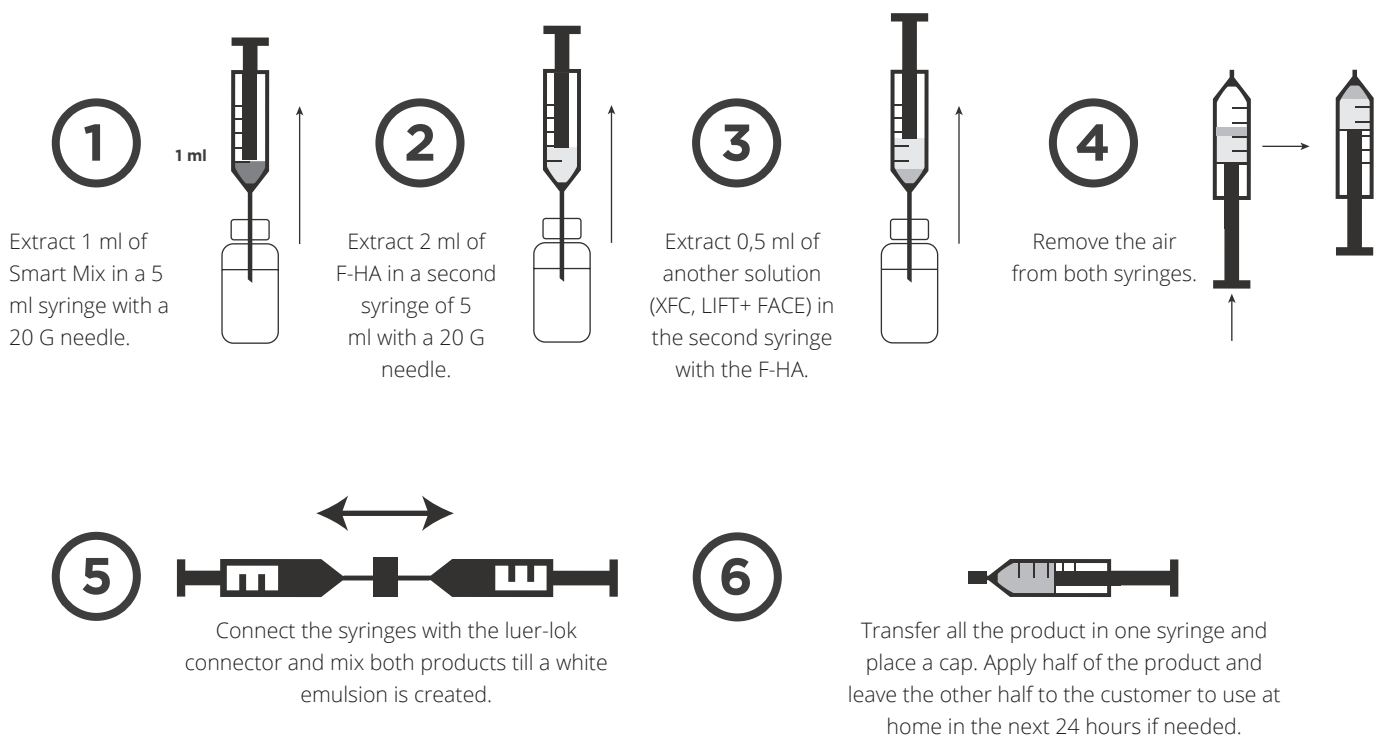

Natural emulsifier, Emollients.

INDICATIONS

- Moisturising.
- Protect the skin after medical treatments.

Smart Mix is a patented formula, an exclusive concept from FUSION MESO that allows the creation of a personalized sterile cream from any meso solution. Smart Mix is a micro-emulsion based on 100% natural emulsifiers and emollients. Applying a sterile cream after treatment when the skin barrier has been compromised helps to minimize the risk of infection. All cosmetics contain trace amounts of pathogens that can enter the pores created by meso-needling. Once in the skin, these pathogens can cause redness or infection. It is recommended to apply only sterile cream within 24 hours of meso-needling treatment.

HOW TO USE:

The products can be applied after skin meso-needling or any other medical treatment after mixing it with other vials.

AREAS:

Face, body and scalp.

SKIN CARE

Fusion Meso is a science-based skincare brand that offers a range of products designed to target various skin concerns.

One of Fusion Meso's strengths is their anti-aging products, including creams, serums, and masks that specifically target fine lines, wrinkles, and other signs of aging. The brand incorporates active ingredients used in aesthetic medicine treatments, utilizing encapsulation technology to ensure their efficient skin penetration. Peptides and growth factors in particular.

Fusion Meso's products also offer high levels of hydration, thanks to their hyaluronic acid technology that helps improve skin texture and appearance.

The brand's radiance range is aimed at brightening the skin and reducing the appearance of dark spots and pigmentation.

Fusion Meso was originally founded as a medical skincare brand and has since expanded into offering home care products to support professional procedures. The brand's products are formulated using the latest scientific research and technologies and are dermatologically tested for both safety and effectiveness.

Other unique characteristics of Fusion Meso's products include high concentrations of active ingredients, effective formulations to be used before and after aesthetic treatments, and unique textures and formulation technology.

Active ingredients have evidence of clinical efficacy.

SKINCARE

DEEP CLEANSER

ACTIVE INGREDIENTS

Hyaluronic acid XS (1%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Hydrate the skin.
- Remove make-up on face, eyes and lips.

Make-up removal is a crucial step in any skincare routine, as it helps to keep the skin healthy and free from dirt and impurities. The Deep Cleanser is a melting micro-emulsion designed for all skin types, formulated to remove make-up and impurities while nourishing and moisturizing the skin. Suitable for both cabin treatments and home care, it can be used on the face, eyes, and lips. The feel of the product is light and cool, providing a melting sensation upon application. The film residue left behind is fine but noticeable, non-greasy, and non-tacky.

Hyaluronic acid is a naturally occurring substance in the body, known for its ability to retain moisture and keep the skin hydrated. Low molecular weight hyaluronic acid is a smaller molecule size that can penetrate deeper into the skin, making it an effective ingredient in skincare products. The sodium hyaluronate used in this product is derived from a biotechnological safe process, free of contaminants and GMO.

This makes it a great option for those with dry or dehydrated skin . Additionally, low molecular weight hyaluronic acid can help to plump and firm the skin, reducing the appearance of fine lines and wrinkles over time. This makes the deep cleanser a great choice for those concerned about aging skin.

It's important to note that when using a make-up remover with hyaluronic acid, it's essential to follow up with a moisturizer to lock in the hydrating effects. This will help to keep the skin looking healthy and radiant.

Overall, deep cleanser can be a great addition to your skincare routine. It offers effective make-up removal while providing hydration and anti-aging benefits, making it a versatile and beneficial option for all skin types.

○ WHAT IS DIFFERENT?

- - Contains hyaluronic acid to provide hydration to the skin.
- - Completes a thorough cleanse on the face, eyes, and lips.
- - Does not contain any soap or detergent, instead, make-up is gently removed using a polar oil.
- - The formulation has a cream-like texture.
- - The comfortable and melting texture is due to the absence of polymer thickeners in the formula.
- - Does not cause any stinging sensation in the eyes.

○

○

DEEP CLEANSER

HOW TO USE?

Begin by wetting your face, then apply a small amount of the cleanser to your face and eye area. Gently massage in circular motions, then rinse thoroughly with water. For heavy makeup, repeat or use with a clean, wet washcloth. Follow up with a toner and your regular serums and creams for a complete skincare routine.

ABOUT FORMULATION:

Our company places a strong emphasis on creating products that are not only functional but also enjoyable to use. Our cleanser has a unique sensory experience, with a creamy, rich appearance and a light, thin feel. It spreads easily and smoothly over the skin, thanks to the very fine and homogeneous dispersion of oil droplets, with an average size in the range of one micron. This extreme fineness of emulsion is one of the key factors in efficiently removing all types of makeup on the face, eyes, and lips without the need for soap or detergents.

The cleanser is an oil-in-water micro-emulsion, with an emulsifier derived from behenic acid, a saturated fatty acid that is extracted from the seeds of the Pentaclethra maculoba tree. This ingredient has emollient and soothing properties that help to restore the skin's natural oils and improve overall levels of hydration. Behenic acid is particularly beneficial for dry and sensitive skin types, as it helps to maintain the integrity of the skin barrier, enhancing moisture retention and skin hydration.

Another important component of our cleanser is the carefully selected emollient, which is a very polar oil that dissolves all types of makeup with ease. It leaves a light, silky feeling on the skin, without clogging pores or contributing to blemishes.

Our cleanser is well-tolerated by all skin and mucous membranes and does not sting the eyes or skin. The product is paraben-free, sulfate-free, and soap-free, making it a gentle and effective choice for all skin types.

FRAGRANCE:

Rose and Mocha Coffee fragrance.

INGREDIENTS:

Aqua (Water), Isohexadecane, Propylene glycol, Tribehenin PEG-20 esters, Cetyl alcohol, Sodium hyaluronate, Triethylene glycol, Phenoxyethanol, Parfum.

SKINCARE

GLYCOLIC B3 FOAM

ACTIVE INGREDIENTS

Glycolic acid (7%), Niacinamide (1%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Skin renewal.
- Reduce acne & impurities.
- Reduce pigmentation & wrinkles.
- Remove makeup & impurities.

Introducing our Glycolic Acid and Niacinamide Washing Foam, the perfect solution for achieving a brighter and clearer complexion. This gentle yet effective face wash is specifically formulated to exfoliate dead skin cells and promote a healthy skin barrier, leaving your skin looking fresh and revitalized.

The key ingredient, glycolic acid, is an alpha-hydroxy acid that works to break down dead skin cells on the surface of the skin, revealing a smoother and more even complexion. It also helps to reduce the appearance of fine lines and wrinkles, making it an excellent anti-aging ingredient.

Niacinamide, on the other hand, is a form of vitamin B3 that has been shown to improve the skin's texture and tone. It helps to reduce inflammation and redness, while also regulating sebum production, which can help to prevent breakouts.

Together, these two powerhouse ingredients work to deeply cleanse and brighten the skin, while also providing anti-aging and anti-inflammatory benefits. Our gentle washing foam is suitable for all skin types and is free from harsh chemicals and fragrances, making it the perfect addition to your daily skincare routine.

Caprylyl/Capryl Glucoside is a surfactant derived from coconut oil and glucose. It is a gentle and mild cleansing agent, biodegradable and environmentally friendly. Caprylyl/Capryl Glucoside helps to lower the surface tension between water and oil, allowing for a more effective and thorough cleansing. It creates a luxurious foam that gently removes dirt, oil, and impurities from the skin without stripping away its natural oils. An ideal ingredient for eco-conscious consumers looking for effective, yet gentle, cleansing products.

Experience the benefits of glycolic acid and niacinamide for yourself with our gentle and effective washing foam, and achieve a brighter and clearer complexion in no time.

○ WHAT IS DIFFERENT?

- - Contains high concentration of glycolic acid and niacinamide.
- - Contains a natural and environmentally friendly cleansing agent.
- - Luxurious foam.

-
-
-
-
-

GLYCOLIC B3 FOAM

HOW TO USE?

Simply wet your face with warm water, apply a small amount of the washing foam to your hands, and massage onto your face in circular motions. Rinse thoroughly with water and pat dry. For best results, use twice daily, morning and night, and follow up with your favorite moisturizer.

ABOUT FORMULATION:

Our company places a strong emphasis on creating products that are not only functional but also enjoyable to use. Our cleansing foam has a unique sensory experience, with a delicate and rich foam.

Caprylyl/Capryl Glucoside is a surfactant derived from coconut oil and glucose. It is a gentle and mild cleansing agent commonly used in personal care and household cleaning products. It is also biodegradable and environmentally friendly.

As a surfactant, Caprylyl/Capryl Glucoside helps to lower the surface tension between water and oil, allowing for a more effective and thorough cleansing. It is often used in skincare products such as face washes, cleansers, and body washes to create a luxurious foam that gently removes dirt, oil, and impurities from the skin without stripping away its natural oils.

Caprylyl/Capryl Glucoside is an alternative to harsh cleansing agents like sodium laureth sulfate.

FRAGRANCE:

Fresh leaves.

INGREDIENTS:

Aqua (water), Caprylyl/Capryl glucoside, Glycolic acid, Niacinamide, Triethylene glycol, Phenoxyethanol, Parfum.

SKINCARE

VITAMIN C MICRO-WATER

ACTIVE INGREDIENTS

ET-vitamin C (1%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Hydrate the skin.
- Neutralize free radicals and protect cellular DNA.
- Anti-pollution.
- Collagen booster.
- Even out skin tone.
- Prevent photo-ageing.

Our ultra-refreshing and hydrating 2-in-1 micellar water and lotion is a game-changer for those seeking a simplified and efficient skincare routine. This innovative product is designed to cleanse and tone your skin in one easy step.

Formulated with Et-Vitamin C, a multi-functional vitamin C derivative, this product provides excellent skin benefits such as whitening, anti-oxidation, free radical-scavenging, and collagen-boosting effects. Unlike other ascorbic acid derivatives, Et-Vitamin C is highly stable, ensuring that its benefits are delivered effectively to the skin.

Et-Vitamin C also has a strong inhibiting effect on melanogenesis, reducing the appearance of dark spots and age spots. Its ability to interfere with inflammatory cytokines also makes it an effective solution to fight against photoaging. Furthermore, Et-Vitamin C can reverse ROS production, achieving the purpose of free radical scavenging.

Our micellar water and lotion formula is suitable for all skin types and works in synergy with other products. It is also alcohol-free, making it gentle on the skin and suitable for daily use.

Experience the benefits of our ultra-refreshing and hydrating micellar water and lotion with Et-Vitamin C. Achieve a brighter, more even complexion with just one easy step.

○ **WHAT IS DIFFERENT?**

- - 2 in 1 product.
- - Contains a natural and environmentally friendly cleansing agent.
- - Minimalist formulation.

VITAMIN C MICRO-WATER

HOW TO USE?

Micro-water is an effective way to remove makeup and impurities from your skin. Here are the steps to use micro-water to remove makeup: Begin by shaking the bottle well to ensure the formula is mixed thoroughly.

Take a cotton pad and soak it with micro-water. Make sure the cotton pad is saturated but not dripping.

Gently wipe the cotton pad over your face in circular motions, starting from the centre of your face and working your way outward. Focus on areas where you have applied makeup.

Continue wiping until all makeup and impurities are removed from your skin. You may need to use more than one cotton pad to achieve this.

Once you have removed all makeup and impurities, you can follow up directly with your regular skincare routine. Some people like to rinse their face with water after using micellar water, but this is optional.

After use, dispose of the used cotton pad and reseal the bottle tightly to avoid evaporation and keep the formula fresh. Overall, micro-water is a quick and easy way to remove makeup and cleanse your skin without the need for additional cleansing steps.

ABOUT FORMULATION:

Our company places a strong emphasis on creating products that are not only functional but also enjoyable to use. Our micro-water has a unique and natural formulation rich in ET-vitamin C.

Caprylyl/Capryl Glucoside is a surfactant derived from coconut oil and glucose. It is a gentle and mild cleansing agent commonly used in personal care and household cleaning products. It is also biodegradable and environmentally friendly.

As a surfactant, Caprylyl/Capryl Glucoside helps to lower the surface tension between water and oil, allowing for a more effective and thorough cleansing. It is often used in skincare products such as face washes, cleansers, and body washes to create a luxurious foam that gently removes dirt, oil, and impurities from the skin without stripping away its natural oils.

SKINCARE

ESSENTIAL LOTION

ACTIVE INGREDIENTS

Hyaluronic acid MW (1%)*, Natural glycerin (4%).

*Evidence of clinical efficacy available

INDICATIONS

- Hydrate the skin.

Our face lotion with hyaluronic acid is the ultimate solution for achieving smooth, hydrated, and youthful-looking skin. This lightweight moisturizer is specifically formulated to deliver long-lasting hydration while also plumping and firming the skin.

Hyaluronic acid is a powerful humectant that is naturally found in the skin. It has the ability to hold up to 1000 times its weight in water, making it an excellent ingredient for hydrating and plumping the skin. As we age, our skin's natural hyaluronic acid production decreases, leading to dryness and the formation of fine lines and wrinkles. Our face lotion contains a high concentration of hyaluronic acid, which helps to replenish the skin's moisture levels and improve its overall texture and tone. The lightweight formula absorbs quickly and is non-greasy, making it suitable for all skin types, including oily and acne-prone skin. It can be used as a daily moisturizer to hydrate and plump the skin.

Experience the benefits of hyaluronic acid for yourself with our lightweight and nourishing face lotion. Achieve smooth, hydrated, and youthful-looking skin in no time.

The essential lotion can be personalized by incorporating meso solutions. Simply add 5 to 10 ml of meso solution in order to create a personalised product for face, hair or body.

Examples of personalised lotions:

- Add 5 ml of F-HAIR to prepare a hair revitalizing lotion.
- Add 5 ml of F-HAIR MEN to prepare an anti hair loss lotion.
- Add 5 ml of F-ACN to prepare an anti-acne lotion.
- Add 5 ml of XFC to prepare an revitalizing lotion.
- Add 10 ml of F-XBC to prepare slimming lotion.

○ WHAT IS DIFFERENT?

- - Perfume free.
- - Can be personalized.
- - High concentration of hyaluronic acid.
- - Minimalist formulation.

○

○

○

ESSENTIAL LOTION

HOW TO USE?

Apply a small amount of the lotion to your face and neck, gently massaging it into your skin in circular motions. Use daily for best results, and pair with our hyaluronic acid products for an even more powerful hydration boost.

ABOUT FORMULATION:

Our minimalist formulation contains only moisturizing ingredients and is free from any added perfumes or fragrances. This makes it an ideal choice for individuals with all skin types, particularly those with sensitive or reactive skin.

By using a minimalist approach, we have carefully crafted a moisturizer that focuses on providing the essential hydration that your skin needs without any unnecessary additives. This means that you can feel confident in the safety and effectiveness of our product.

Our formulation is designed to protect the skin, leaving it feeling soft and supple. It contains high-quality ingredients that have been proven to hydrate the skin, such as glycerin and hyaluronic acid. These ingredients work together to help your skin retain moisture, leaving it feeling plump and refreshed.

Perfect for those looking for a simple yet effective skincare solution. Formulated with only the highest quality ingredients to provide essential hydration without any added fragrances.

FRAGRANCE:

Perfume free.

INGREDIENTS:

Aqua (Water), Glycerin, Sodium hyaluronate, Triethylene glycol, Phenoxyethanol.

HYALURONIC PEEL

ACTIVE INGREDIENTS

Gluconolactone (5%)*, Hyaluronic acid MW (1%)*, Natural glycerin (10%).

*Evidence of clinical efficacy available

INDICATIONS

- Exfoliate the skin.
- Hydrate the skin.
- Reduce acne and impurities.
- Even out skin tone.

Introducing our new peeling solution, enriched with the powerful combination of gluconolactone and hyaluronic acid. This advanced formula offers gentle yet effective exfoliation, leaving your skin feeling refreshed, rejuvenated, and deeply hydrated. It improves the efficacy of skin meso-needling and transdermal delivery treatments by eliminating dead skin cells, which can impede the penetration of meso solutions into the skin.

Our hyaluronic peel combines the benefits of gluconolactone and hyaluronic acid to provide a synergistic exfoliation in a slow-drying gel formula. Polyhydroxy acids have a relatively large molecular mass, which allows them to gradually penetrate the skin layer by layer. This gentle approach removes dead skin cells without causing irritation.

Gluconolactone is a natural antioxidant that is just as effective as vitamins C and E. It also blocks the synthesis of pro-interleukin-1, which is responsible for inflammation. Additionally, gluconolactone's ability to transfer water molecules plays a central role in skin hydration. When water enters the granular layer of the skin, it causes a decline in calcium ions concentration, which signals the body to stimulate lipid synthesis in keratinocytes.

Gluconolactone, a polyhydroxy acid (PHA), is a milder form of alpha hydroxy acid (AHA) that offers a more gentle exfoliation compared to other AHAs. This makes it ideal for those with sensitive skin. It helps to remove dead skin cells, unclog pores, and improve skin texture, leaving your skin looking brighter and more even.

Hyaluronic acid, a powerful humectant helps to retain moisture in the skin, keeping it hydrated and plump. This potent combination of ingredients works together to provide a deeply nourishing and revitalizing experience.

○ WHAT IS DIFFERENT?

- - This peeling is based solely on PHA.
- - Contains hyaluronic acid and natural glycerin, gel texture to maximize moisturizing effect.
- - The formulation is minimalist, with only essential ingredients included.
- - The peeling comes in a large 250 ml format.
- - It does not require neutralization after application.

○

○

○

HYALURONIC PEEL

HOW TO USE?

Apply the product with a fan brush avoiding the eye contours. Leave-on for 5 minutes and remove with humid cotton pads.

ABOUT FORMULATION:

Experience an efficient and gentle peeling with a unique gel texture, buffered with sodium lactate. Our peeling solution does not contain any chemical thickening agents or harmful buffers, such as ammonia.

Formulated with only PHA, our peeling solution does not require neutralization. This is because the high molecular weight acid molecules do not penetrate beyond the first layers of the epidermis. As a result, the peeling solution provides a safe and gentle exfoliation, without causing any irritation.

Our minimalist approach to formulation ensures that only essential ingredients, such as hyaluronic acid and natural glycerin, are included. These ingredients work together to provide a deeply moisturizing effect, leaving your skin feeling soft and smooth.

FRAGRANCE:

Perfume free.

INGREDIENTS:

Aqua (Water), Glycerin, Gluconolactone, Sodium lactate, Sodium hyaluronate, Triethylene glycol, Phenoxyethanol.

SKINCARE

ESSENTIAL CREAM

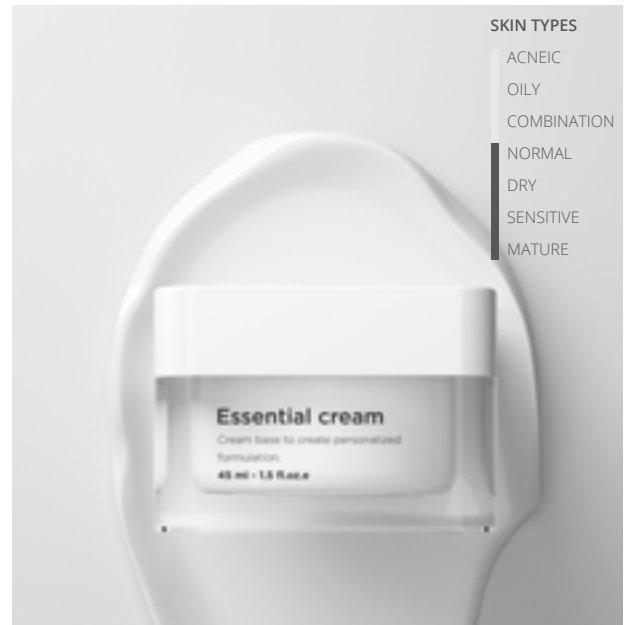

ACTIVE INGREDIENTS

Vitamin E (0,5%).

*Evidence of clinical efficacy available

INDICATIONS

- Neutralize free radicals.
- Prepare personalised formulation.

Introducing our unique base cream, designed to prepare personalized treatments with meso solutions. This cream can be customized based on your specific skin indication, making it a highly versatile and effective solution for a variety of skin concerns.

Our essential cream is formulated with a water-in-oil emulsion, which is highly resistant to electrolytes. This technology enables the cream to easily incorporate any meso solutions, while remaining highly stable and nourishing. The rich texture of the cream provides excellent hydration and nourishment to the skin, making it the perfect post-treatment skincare solution after mesotherapy or skin meso-needling.

Our cream features a fresh and energizing scent, composed of a blend of citrus fruits. After preparation, the cream can be stored at room temperature for up to eight weeks, making it convenient and easy to use.

Try our unique base cream today and experience the benefits of personalized skincare treatments with meso solutions.

○ WHAT IS DIFFERENT?

- - Nutritive water-in-oil formulation.
- - Can be personalized by adding meso solutions.
- - Exclusive concept on the market for a formulation 100% based on mesotherapy products.
- - Isotonic formulation.
- - Nutritive texture for night use.

○

○

○

ESSENTIAL CREAM

HOW TO PREPARE?

You can incorporate up to 5 ml of meso solutions into the Essential Cream, which allows for the customization of the product according to individual needs. The 5 ml of meso solutions can consist of one or various types, and they should be blended in a 5 ml syringe before adding to the Essential Cream.

It is important to ensure that the Essential Cream is at room temperature and not too cold before blending. To properly mix the cream, we recommend using the Mixlab Skincare Blender. While a spatula can be used, it may result in an uneven blend.

The cream should be mixed in 3 to 4 stages, adding a small amount of the meso solution blend and blending it thoroughly with the cream using the blender. If desired, the contents of the jar can be transferred to another container to avoid spoiling the cream.

Continue mixing until all the meso solutions are properly blended into the base cream. This process typically takes between 3 to 5 minutes to prepare the personalized cream.

HOW TO USE?

Before applying your night cream, ensure that your face is clean and free from any makeup or impurities. Use a cleanser to remove any dirt or oil from your skin, then pat dry with a clean towel.

Take a small amount of your night cream and gently apply it onto your face and neck, using your fingertips. Use circular motions to massage the cream into your skin, working from the center of your face outwards.

If you have specific areas of concern, such as fine lines or dark spots, spend extra time massaging the night cream into those areas. Once you have applied the night cream, allow it to absorb into your skin for a few minutes before going to bed. Avoid touching your face or applying any other products on top of the night cream.

In the morning, rinse your face with water and a gentle cleanser to remove any residue from the night cream. Remember to choose a night cream that is appropriate for your skin type and concerns. Night creams are usually richer and more nourishing than day creams, as they are designed to provide deep hydration and repair while you sleep.

ABOUT FORMULATION:

Water-in-oil emulsion with a high tolerance for electrolytes, making it suitable for use with meso solutions. The cream has an isotonic formulation that provides long-lasting skin hydration and optimal water transfer to the superficial epidermis, which can help to maintain healthy and well-hydrated skin.

The emollients used in this cream are three different types of esters derived from natural sources, making it non-comedogenic and gentle on the skin. They work to soften and smooth the skin, improving its texture and appearance. Additionally, these emollients help to improve the spreadability and consistency of the product, making it easier to apply and more comfortable to wear. They also act as a thickening agent, which helps to create a more luxurious and rich texture that feels indulgent on the skin.

FRAGRANCE:

Ceylan tea & citrics.

INGREDIENTS:

Aqua (Water), Stearyl heptanoate, Octyldodecyl myristate, Propylene glycol, Stearyl caprylate, Cera microcristallina, Cetyl PEG/PPG-10/1 dimethicone, Tocopheryl acetate, Sodium chloride, Triethylene glycol, Phenoxyethanol, Parfum, Citral, Limonene.

MESO LIFT CREAM

ACTIVE INGREDIENTS

Cross-linked hyaluronic acid (0,5%)*, Bio-placenta (5%)*, Natural glycerin (2%).

*Evidence of clinical efficacy available

INDICATIONS

- Lift and firm the skin.
- Reduce deep wrinkles and fine lines.
- Improve skin volumes.

A cream formulated with active ingredients derived from mesotherapy and dermal fillers for effective reduction of skin sagging and wrinkles. The cream redefines the contours of the face and gives it a more youthful and firm appearance.

The cross-linked hyaluronic acid in the cream is a polymer derived from natural hyaluronic acid (HA) similar to that used in dermal fillers. The viscosity of the reticulated hyaluronic acid solution is 2-3 times higher than that of HA solution at the same concentration, which indicates that it can bind more water molecules due to its cross-linked structure. It acts like a «micro-reservoir,» continuously delivering water to the skin. It can also form a 3D «breathable» layer on the surface of the skin that improves the skin barrier function, fills wrinkles, reduces water evaporation, and prevents skin damage caused by external aggressors such as UV rays, pollution, etc.

The Bio-placenta in the cream has a composition similar to human placenta and is rich in growth factors, folic acid, and acetyl glutamine. It is a global anti-aging solution with multiple effects such as skin repair, stimulation of cell growth, anti-wrinkling, skin firming, and moisturizing.

○ WHAT IS DIFFERENT?

- - Contains cross-linked hyaluronic acid from dermal fillers.
- - Contains a high concentration of growth factors.
- - Ultra-fine emulsion with bright appearance and high gloss.
- - Light wear for day & night use.

-
-
-

MESO LIFT CREAM

HOW TO USE?

Day use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Give your skin a few minutes to absorb the cream before applying any makeup.

Night use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of night cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Allow the night cream to work on your skin overnight.

Here are some additional tips to keep in mind when using day and night creams:

Always start with a clean face to maximize the benefits of the cream.

Use a gentle cleanser that is appropriate for your skin type.

Apply the cream in a gentle, circular motion to help improve blood circulation and ensure even distribution.

Use a sunscreen with an SPF of at least 30 during the day to protect your skin from harmful UV rays.

ABOUT FORMULATION:

This oil-in-water emulsion has a fine, bright appearance and a nourishing after-feel. The specific composition of the cream results in optimal emulsion stability while providing a smooth and velvety skin feel. The fine emulsion technology used gives the cream a bright and shiny appearance, making it a pleasant and easily absorbed cream.

We have used only one type of emollient in high concentration in this formulation. It is made using vegetable glycerol and medium-chain fatty acids from coconut oil, making it a natural non-greasy emollient with good dermatological compatibility, moisturising and conditioning properties. It easily penetrates into the skin, offering nourishing benefits and making the skin soft and supple. Octyldodecanol has a high compatibility for sphingolipids such as phytosphingosine and ceramides. It has a high polarity and impart a soft non-greasy feel to skin.

FRAGRANCE:

Ceylan tea & citrics.

INGREDIENTS:

Aqua (Water), Octyldodecanol, Butylene glycol, Glycerin, Hydroxyethyl acrylate/Sodium acryloyldimethyl taurate copolymer, Bis-PEG/PPG-20/5 PEG/PPG-20/5 dimethicone, Methoxy PEG/PPG-25/4 dimethicone, Sodium hyaluronate crosspolymer, sh-Oligopeptide-1, sh-Oligopeptide-2, sh-Polypeptide-1, sh-Polypeptide-9, sh-Polypeptide-11, Bacillus/Folic acid ferment filtrate extract, Sodium hyaluronate, Lecithin, Acetyl glutamine, Caprylic/Capric triglyceride, Caprylyl glycol, 1,2-Hexanediol, Phenoxyethanol, Triethylene glycol, Parfum, Citral, Limonene.

SKINCARE

MESO REPAIR CREAM

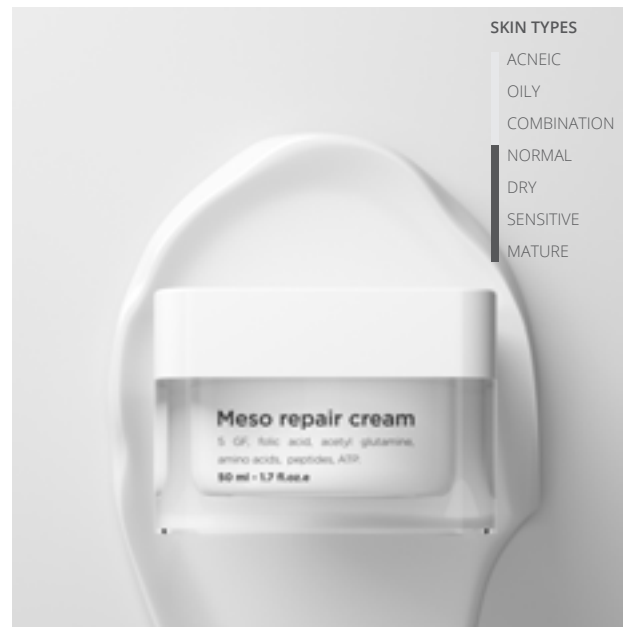

ACTIVE INGREDIENTS

Repair blend with ATP + amino acids + proline + acetyl tyrosine (2%)*, Bio-placenta (5%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Repair the skin after procedures.
- Lift and firm the skin.
- Reduce deep wrinkles and fine lines.

A cream formulated with mesotherapy active ingredients for effective skin healing and repair after aesthetic procedures. The bio-placenta has a composition similar to human placenta, rich in growth factors, folic acid, and acetyl glutamine, making it a global anti-aging solution with multiple effects, including skin repair, stimulation of cell growth, anti-wrinkle properties, and skin firming and moisturizing effects.

The repair complex accelerates the healing process by reducing redness and inflammation up to 37% after only 24 hours and 52% after 48 hours compared to a placebo. It also acts at the DNA level to reverse damage, particularly UV-induced damage.

The cream's unique ice cream texture also plays an important role in this product. By melting on the skin, it reduces skin temperature, reduces redness, and soothes the skin. The different waxes in the composition create an ultra-protective layer on the skin. For an even greater soothing effect, it is possible to store the cream in a cool place between 7 and 15 degrees Celsius.

○ WHAT IS DIFFERENT?

- - Contains nutritive and repairing complex.
- - Contains a high concentration of growth factors.
- - Ice cream texture with cooling effect.
- - Nutritive texture for night use.

MESO REPAIR CREAM

HOW TO USE?

Before applying your night cream, ensure that your face is clean and free from any makeup or impurities. Use a cleanser to remove any dirt or oil from your skin, then pat dry with a clean towel.

Take a small amount of your night cream and gently apply it onto your face and neck, using your fingertips. Use circular motions to massage the cream into your skin, working from the centre of your face outwards.

If you have specific areas of concern, such as fine lines or dark spots, spend extra time massaging the night cream into those areas. Once you have applied the night cream, allow it to absorb into your skin for a few minutes before going to bed. Avoid touching your face or applying any other products on top of the night cream.

In the morning, rinse your face with water and a gentle cleanser to remove any residue from the night cream. Remember to choose a night cream that is appropriate for your skin type and concerns. Night creams are usually richer and more nourishing than day creams, as they are designed to provide deep hydration and repair while you sleep.

ABOUT FORMULATION:

The cream has a rich and melting texture upon application, with an ice-cream-like feel and ultra-comfortable, nutritive after-effect. Its fresh and energizing scent is composed of a mixture of citrus fruits. The Meso Repair Cream is an oil-in-water cream that combines two technologies: ice cream texture and micro-emulsion.

The micro-emulsion emulsifier is derived from behenic acid, a saturated fatty acid that comes from the seeds of the indigenous Amazon tree species *Pentaclethra macroloba*. It has emollient and soothing properties that help to restore the skin's natural oils and improve overall levels of hydration. In skincare, behenic acid is most commonly used to provide soothing relief for dry and sensitive skin. This sebaceous fatty acid plays a role in maintaining the integrity of the skin barrier, thereby improving moisture retention and enhancing skin hydration.

The main emollients are silicone waxes that offer excellent skin protection without forming an occlusive film. They have been shown to be effective in protecting and soothing the skin.

FRAGRANCE:

Ceylan tea & citrics.

INGREDIENTS:

Aqua (Water), Bis-stearyl dimethicone, C30-45 Alkyldimethylsilyl polypropyl- silsesquioxane, Tribehenin PEG-20 esters, Lecithin, Acetyl glutamine, sh-Oligopeptide-1, sh-Oligopeptide-2, sh-Polypeptide-1, sh-Polypeptide-9, sh-Polypeptide-11, Bacillus/Folic acid ferment filtrate extract, Sodium hyaluronate, Acetyl tyrosine, Proline, Hydrolyzed vegetable protein, Adenosine triphosphate, Butylene glycol, Caprylyl glycol, 1,2-Hexanediol, Sodium acrylate/Acryloyldimethyltaurate/Dimethylacrylamide crosspolymer, Isohexadecane, Polysorbate 60, Phenoxyethanol, Triethylene glycol, Parfum, Citral, Limonene.

SKINCARE

HYALURONIC DROPS

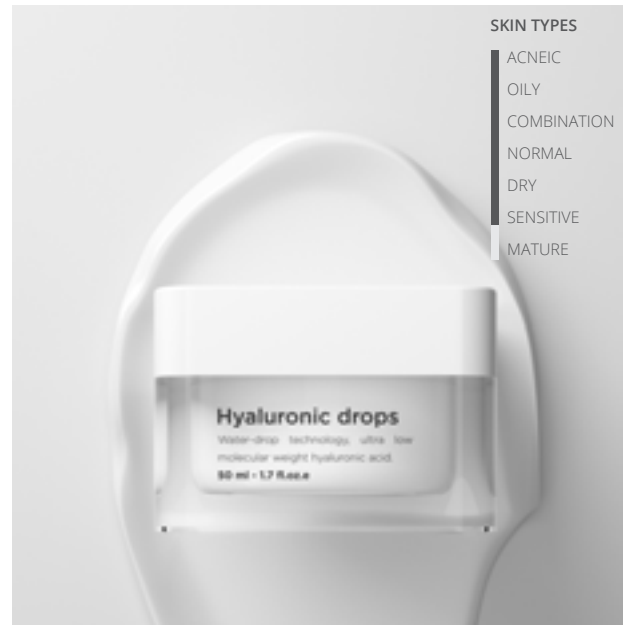

ACTIVE INGREDIENTS

Hyaluronic acid XS (1%)*, Natural glycerin (2%).

*Evidence of clinical efficacy available

INDICATIONS

- Moisture the skin.
- Reduce deep wrinkles and fine lines.

Refreshingly light cream formulated with XS hyaluronic acid to provide maximal skin hydration. The texture is surprising as it feels extremely light and refreshing upon application, yet it leaves behind a protective and nutritive film on the skin's surface for several hours. This film helps to prevent transepidermal water loss, preserving maximal comfort and high hydration.

XS hyaluronic acid has a very low molecular weight, serving as a connective tissue organizer and water holding substance. The sodium hyaluronate used in this product is obtained from a biotechnological process that is safe, contaminant-free, and non-GMO. This innovation in anti-aging skincare is known for its increased permeation through the skin compared to high molecular weight hyaluronic acid. It rejuvenates the skin by improving its viscoelastic properties and significantly decreasing the appearance of deep wrinkles.

This exclusive water-drop formulation immediately reduces fine lines and plumps up the skin. It is specially designed for all skin types and serves as an incredible moisturizer. The product has a fresh scent with notes of green leaves, grass, and fruits.

- **WHAT IS DIFFERENT?**
- - Water-drop technology from Japan.
- - Water-in-oil emulsion.
- - Maximal hydration.
- - Minimalist formulation.
- - Isotonic formulation.
- - Light wear for day & night use.

HYALURONIC DROPS

HOW TO USE?

Day use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Give your skin a few minutes to absorb the cream before applying any makeup.

Night use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of night cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Allow the night cream to work on your skin overnight.

Here are some additional tips to keep in mind when using day and night creams:

Always start with a clean face to maximize the benefits of the cream.

Use a gentle cleanser that is appropriate for your skin type.

Apply the cream in a gentle, circular motion to help improve blood circulation and ensure even distribution.

Use a sunscreen with an SPF of at least 30 during the day to protect your skin from harmful UV rays.

ABOUT FORMULATION:

A water-in-oil cream based on Japanese technology, this cream has a matte appearance and consists of an oil phase saturated with ultra-fine water droplets. The result is a cream that breaks upon contact with the skin, releasing water droplets that provide a unique refreshing sensation upon application. However, after application, the skin is nourished by the oil phase that remains on the skin, thanks to the external phase composed of oil, which creates a lipid protective film on the skin.

The main emollient has been selected for its high molecular weight, which is too large to penetrate the skin. This emollient maintains water on the surface for better hydration, while improving smoothness and preventing the appearance of dry and flaky skin, thus protecting the skin's natural barrier.

FRAGRANCE:

Fresh leaves.

INGREDIENTS:

Aqua (Water), Isohexadecane, Glycerin, Sodium hyaluronate, Triethylene glycol, Sodium chloride, Cetyl PEG/PPG-10/1 dimethicone, Phenoxyethanol, Parfum.

SKINCARE

RADIANCE CREAM

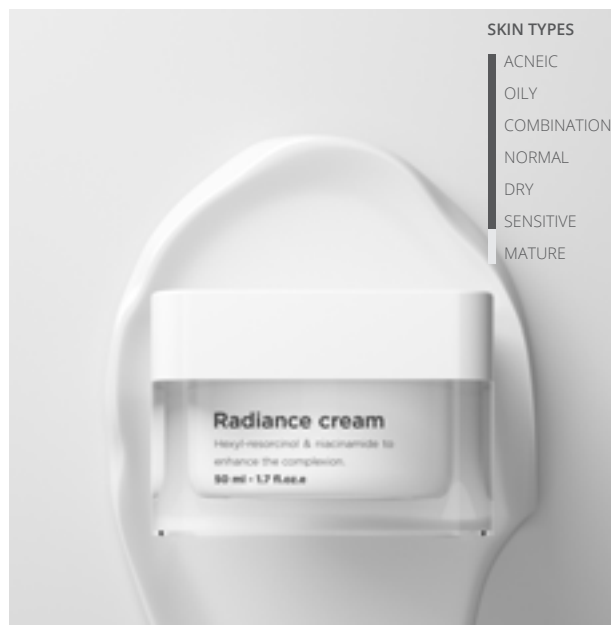

ACTIVE INGREDIENTS

Niacinamide (2%)*, Hexyl-resorcinol (0,5%)*, Moisture release system (2,4%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Reduce pigmentation.
- Reduce dark spots.
- Improve the overall skin tone.
- Moisture the skin.

Refreshingly light gel cream formulated with active ingredients derived from aesthetic medicine for intensive skin lightening effect. This gel cream contains hexyl-resorcinol and niacinamide boosted by a transdermal delivery system, quickly reducing pigmented spots, blemishes and pigmentation.

Hexyl-resorcinol has been proven to be four times more effective than hydroquinone, working by modulating multiple sites in the melanogenesis pathway. Additionally, it increases levels of glutathione and stimulates the antioxidant defense enzymes - glutathione peroxidase and glutathione reductase, exhibiting other surprising functions.

Niacinamide is an excellent active ingredient to improve skin moisture, upregulating the expression of aquaporin-3 (AQP3). In this product, it exhibits a synergistic effect with hexyl-resorcinol to enhance skin tone and reduce pigmentation.

The gel cream is formulated with a transdermal delivery system that ensures better penetration of the active ingredients for optimal results.

Always combine with a SPF 50 for faster and long-lasting results.

○ WHAT IS DIFFERENT?

- - Gel-cream texture.
- - Maximal hydration.
- - Silky after-feel.
- - Transdermal delivery system.
- - Soft-focus effect to reduce wrinkles.
- - Skin cooling technology.
- - Light wear for day & night use.

○

RADIANCE CREAM

HOW TO USE?

Day use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Give your skin a few minutes to absorb the cream before applying any makeup.

Night use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of night cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Allow the night cream to work on your skin overnight.

Here are some additional tips to keep in mind when using day and night creams:

Always start with a clean face to maximize the benefits of the cream.

Use a gentle cleanser that is appropriate for your skin type.

Apply the cream in a gentle, circular motion to help improve blood circulation and ensure even distribution.

Use a sunscreen with an SPF of at least 30 during the day to protect your skin from harmful UV rays.

ABOUT FORMULATION:

This product has an oil-in-water gel cream texture with a blurring effect that reduces the skin's temperature upon application and smooths out wrinkles. The texture is highly hydrating and refreshing, suitable for all skin types, including oily or combination skin.

The emulsion is an oil-in-water type with a specific polymeric emulsifier used at a very low concentration. A specific water-absorbing powder is also added to fix all the water in the emulsion by osmotic pressure. The water is trapped in capsules that remain on the skin's surface upon application, gradually diffusing water and active ingredients to improve efficiency and hydration. This technology provides a cooling effect on the skin and a soft-focus effect that reduces the appearance of wrinkles.

The emollients are a mixture of high molecular weight silicones selected for their mattifying and sebum-absorbing properties.

FRAGRANCE:

Mandarin.

INGREDIENTS:

Aqua (Water), Dimethylisobutylsiloxane, Dimethicone, Sodium acrylates crosspolymer-2, Niacinamide, Dimethicone/Vinyl dimethicone crosspolymer, Hexylresorcinol, Bis-PEG/PPG-20/5 PEG/PPG-20/5 dimethicone, Methoxy PEG/PPG-25/4 dimethicone, Caprylic/Capric triglyceride, Sodium acrylate/Acryloyldimethyltaurate/Dimethylacrylamide crosspolymer, Isohexadecane, Polysorbate 60, Phenoxyethanol, Triethylene glycol, Citrus Nobilis oil, Limonene.

SKINCARE

PROBIOTIX CREAM

ACTIVE INGREDIENTS

Hyaluronic acid XS (1%)*, Probiotic complex (2%)*, Natural glycerin (5%).

*Evidence of clinical efficacy available

INDICATIONS

- Nourish the skin.
- Restore the micro-flora.
- Improve biological defences.
- Reduce hypersensitivity.
- Reduce redness and couperosis.

This water-in-oil cream is rich and nutritive, specifically designed to treat dry and sensitive skin. The pre/probiotic complex in this cream is made up of alpha-glucooligosaccharides, which are obtained through enzymatic synthesis from vegetable substrates, made of 100% pure plant juice, and Lactobacillus Probiotic Bacteria, which are inactivated by tyndallization and freeze-dried. This cream promotes the balance of the skin's microbiota by acting as a substrate for commensal bacteria and by strengthening the skin's natural defenses. Thanks to its richness in natural sugars (GOS and FOS), it improves the appearance and comfort of the skin, enhancing the radiance of the complexion and attenuating the sensations of discomfort characteristic of sensitive and dry skin.

Hyaluronic acid XS has a very low molecular weight, serving as a connective tissue organizer and water holding substance. The sodium hyaluronate is coming from a biotechnological safe process; it is free of contaminants and GMO. It is an innovation in anti-aging skincare due to its increased permeation through the skin compared to high molecular weight hyaluronic acid. It rejuvenates the skin by improving its viscoelastic properties and significantly decreasing deep wrinkles.

○ WHAT IS DIFFERENT?

- - Water-in-oil emulsion.

PROBIOTIX CREAM

HOW TO USE?

Before applying your night cream, ensure that your face is clean and free from any makeup or impurities. Use a cleanser to remove any dirt or oil from your skin, then pat dry with a clean towel.

Take a small amount of your night cream and gently apply it onto your face and neck, using your fingertips. Use circular motions to massage the cream into your skin, working from the center of your face outwards.

If you have specific areas of concern, such as fine lines or dark spots, spend extra time massaging the night cream into those areas. Once you have applied the night cream, allow it to absorb into your skin for a few minutes before going to bed. Avoid touching your face or applying any other products on top of the night cream.

In the morning, rinse your face with water and a gentle cleanser to remove any residue from the night cream. Remember to choose a night cream that is appropriate for your skin type and concerns. Night creams are usually richer and more nourishing than day creams, as they are designed to provide deep hydration and repair while you sleep.

ABOUT FORMULATION:

The texture is an ultra-soft and comforting water-in-oil emulsion that provides intense nutrition to the skin.

The water phase of the probiotic cream is also isotonic and balanced in salt to optimize water transfer into the skin. Water-in-oil emulsions are highly recommended for dry and sensitive skin as they provide a good balance between nutrition and hydration, long-lasting protection, and high water diffusion into the skin.

The emollients are a mixture of long-chain fatty acid esters that melt at skin temperature. They create a soft, pleasant, and smooth skin feel. They have high levels of re-fattening potential and strong water-repellent properties that form a film, protecting the skin from drying out.

FRAGRANCE:

Mandarin.

INGREDIENTS:

Aqua (Water), Caprylic/Capric triglyceride, Glycerin, Stearyl heptanoate, Cetyl PEG/PPG-10/1 dimethicone, Alpha-glucan oligosaccharide, Polymnia Sonchifolia root juice, Maltodextrin, Lactobacillus, Sodium hyaluronate, Stearyl caprylate, Sodium chloride, Phenoxyethanol, Triethylene glycol, Citrus Nobilis oil, Limonene.

SKINCARE

CICA POST-CARE

ACTIVE INGREDIENTS

CICA Asiaticoside + Madecassic Acid + Asiatic Acid (1%)*,
Panthenol (1%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Heal the skin.
- Reduce redness and inflammation.
- Faster repair of damaged skins.
- Skin remodelling.
- Redensifying.
- Anti stretch marks.

As our first line of defense, our skin needs time to repair when it is damaged. The process of returning to its normal, healthy appearance is not immediate, and difficulties can arise during the repair, which may further prolong the process. This is particularly evident during pregnancy, where stretch marks can occur, and the skin is unable to restructure itself correctly and lacks firmness.

To address this, we use Titrated Extract of Centella Asiatica, also known as CICA or Tiger grass, which is a highly purified composition of some of the most potent molecules found in this plant. CICA works to repair damaged skin more quickly and restore skin integrity by boosting the vital proteins within the dermis and by its soothing effect. Our extract is made from wild Centella Asiatica harvested in Madagascar, which is more stable in composition of pentacyclic triterpenes (actives), has a higher amount of those actives, and grows wild. Cultivated Centella Asiatica loses its pharmacological profile and has a low content of actives.

We combine CICA with Provitamin B5 (panthenol) in our formulation. Panthenol is known for its restorative, healing, anti-inflammatory, soothing, and regenerating actions. When applied locally, panthenol penetrates the epidermis, where it is absorbed by the skin cells and transformed into pantothenic acid. This is where it acts on the hydration of the stratum corneum. It also helps to strengthen the hydrolipidic film, fighting against water loss and dehydration. Creams containing panthenol help the skin regain its softness and elasticity. Panthenol is also used to treat superficial lesions of the skin and mucous membranes. It can indeed help to repair the skin barrier, accelerates and improves healing by stimulating the proliferation of fibroblasts, and promotes rapid cell renewal. As a soothing agent, it also calms irritations, inflammations, and redness. Its anti-inflammatory action is comparable to hydrocortisone.

○ WHAT IS DIFFERENT?

- CICA pharmaceutical grade extract.
- Light wear for day & night use.

CICA POST-CARE

HOW TO USE?

Day use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Give your skin a few minutes to absorb the cream before applying any makeup.

Night use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of night cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Allow the night cream to work on your skin overnight.

Here are some additional tips to keep in mind when using day and night creams:

Always start with a clean face to maximize the benefits of the cream.

Use a gentle cleanser that is appropriate for your skin type.

Apply the cream in a gentle, circular motion to help improve blood circulation and ensure even distribution.

Use a sunscreen with an SPF of at least 30 during the day to protect your skin from harmful UV rays.

ABOUT FORMULATION:

The texture of our product is an ultra-soft and comforting oil-in-water emulsion that provides intense nourishment to the skin. The emulsifier used in our product is based on Glyceryl Stearate, a biodegradable and safe ingredient that makes the skin softer and smoother and improves the feel of the product. Glyceryl stearate is a naturally derived fatty acid that is commonly used as a thickener and emollient in various cosmetics and skincare products. While its primary function is to improve the texture and sensory feel of the product, it also helps to hydrate and protect the skin, leaving it with a healthy glow.

In addition, Glyceryl stearate offers various benefits to the skin, including improving hydration and supporting the Natural Moisturizing Factors found in the skin. These benefits are mainly attributed to the glycerol component of glyceryl stearate.

FRAGRANCE:

Perfume free.

INGREDIENTS:

Aqua (Water), Octyldodecyl myristate, Propylene glycol, Ethoxydiglycol, Hydroxyethyl acrylate/Sodium acryloyldimethyl taurate copolymer, Dimethicone, Panthenol, Asiaticoside, Madecassic acid, Asiatic acid, Dimethicone/Vinyl dimethicone crosspolymer, Cetareth-15, Glyceryl stearate, Phenoxyethanol, Triethylene glycol.

SKINCARE

CERAMID MOISTURIZER

ACTIVE INGREDIENTS

Vegan ceramids (2%)*, Natural glycerin (3%).

*Evidence of clinical efficacy available

INDICATIONS

- Moisturise the skin.
- Regulate the trans-epidermal water flow.
- Protect the skin.
- Restore of the lipid barrier.

Our water-in-oil rich and nutritive cream is specifically formulated to treat dry and sensitive skin. It contains Vegan Ceramids, which is a rice extract made using a process that optimizes the sphingolipids and phospholipids fraction. Ceramids are essential components of the stratum corneum and play a crucial role in maintaining its structure and quality.

In fact, Ceramids make up 40% of the intercellular lipid cement and are responsible for regulating trans-epidermal water flow, maintaining the cohesion of the stratum corneum layers, protecting the skin, and restoring the skin barrier.

A clinical study conducted on 11 healthy volunteers demonstrated the effectiveness of Vegan Ceramids in improving skin hydration. After just 30 minutes, the cream was found to improve skin hydration by 73% compared to the placebo, and after 8 hours, it improved hydration by 53% compared to the placebo. These results are highly significant and demonstrate the powerful hydrating and barrier-restoring properties of Vegan Ceramids.

○ WHAT IS DIFFERENT?

- - Water-in-oil emulsion.
- - Isotonic formulation.
- - Nutritive texture for night use.
- - Vegan ceramids.

HYALURONIC MOISTURIZER

ACTIVE INGREDIENTS

Hyaluronic acid XS (1%)*, Natural glycerin (2%).

*Evidence of clinical efficacy available

INDICATIONS

- Moisture the skin.
- Reduce deep wrinkles and fine lines.

Introducing our Hyaluronic Acid Moisturizer, the ultimate solution for achieving high levels of skin hydration and reducing the appearance of fine lines and wrinkles.

Our moisturizer is formulated with hyaluronic acid derived from aesthetic medicine, ensuring the highest quality and effectiveness. The low molecular weight hyaluronic acid in our formula penetrates deep into the skin, leaving it feeling smooth, soft, and intensely hydrated.

Hyaluronic acid is a powerful biopolymer known for its incredible water-holding properties. In living tissues, it serves as a connective tissue organizer, helping to keep the skin plump and firm. Our sodium hyaluronate is derived from a biotechnological process that is free of contaminants and GMOs, making it a safe and sustainable option for your skincare routine.

With increased permeation through the skin compared to high molecular weight hyaluronic acid, our moisturizer is a breakthrough in anti-aging properties. It helps to rejuvenate the skin by improving its viscoelastic properties, resulting in a reduction in the appearance of deep wrinkles.

Our Hyaluronic Acid Moisturizer has a unique melting micro-emulsion texture that feels fresh and luxurious on the skin. It provides the perfect balance between hydration and nourishment, leaving your skin feeling soft, smooth, and radiant.

○ WHAT IS DIFFERENT?

- Exclusive texture.
- High concentration of hyaluronic acid.
- Long lasting hydration.
- Light wear for day & night use.

HYALURONIC MOISTURIZER

HOW TO USE?

Day use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Give your skin a few minutes to absorb the cream before applying any makeup.

Night use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of night cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Allow the night cream to work on your skin overnight.

Here are some additional tips to keep in mind when using day and night creams:

Always start with a clean face to maximize the benefits of the cream.

Use a gentle cleanser that is appropriate for your skin type.

Apply the cream in a gentle, circular motion to help improve blood circulation and ensure even distribution.

Use a sunscreen with an SPF of at least 30 during the day to protect your skin from harmful UV rays.

ABOUT FORMULATION:

Our moisturizer has a unique creamy and rich appearance with a fresh and energizing scent composed of a blend of citrus fruits. It has an unexpected light and thin texture that feels evanescent on the skin. The cream is an oil-in-water micro-emulsion with ultra-soft touch that spreads easily on the skin. The fine and homogeneous dispersion of the oil droplets gives it its unique characteristics. The average droplet size is one micron, making it feel light, cool, and melting when applied to the skin. The residual protective layer left on the skin after application is thin, non-greasy, and non-tacky.

The micro-emulsion emulsifier is derived from behenic acid, a saturated fatty acid obtained from the seeds of the indigenous Amazon tree species, *Pentaclethra macroloba*. It has emollient and soothing properties that help restore the skin's natural oils and improve overall hydration. Behenic acid is commonly used in skincare to provide relief for dry and sensitive skin. Sebaceous fatty acids play a vital role in maintaining the skin barrier's integrity, improving moisture retention and enhancing skin hydration.

The primary emollient in our moisturizer is an ester that provides a rich feel and improves the cream's spreadability on the skin. It is non-comedogenic and certified natural by ECOCERT.

FRAGRANCE:

Ceylan tea & citrics.

INGREDIENTS:

Aqua (Water), Octyldodecyl myristate, Butylene glycol, Tribehenin PEG-20 esters, Cetyl alcohol, Glycerin, Sodium hyaluronate, Sodium acrylate/Acryloyldimethyltaurate/Dimethylacrylamide crosspolymer, Isohexadecane, Polysorbate 60, Triethylene glycol, Phenoxyethanol, Parfum, Citral, Limonene.

EYE SORBET**ACTIVE INGREDIENTS**

Cross-linked hyaluronic acid (0,5%)*, Bio-placenta (5%)*, Moisture release system (2,5%), Natural glycerin (6%).

*Evidence of clinical efficacy available

INDICATIONS

- Reduce wrinkles.
- Reduce eye bags.
- Reduce dark circles.

This ultra-refreshing eye cream is formulated with active ingredients derived from aesthetic medicine that can help to erase wrinkles in just a minute. The exclusive texture of this product has the ability to reduce skin temperature, increase hydration, and create a soft-focus effect on wrinkles to hide their appearance, much like a make-up primer. The cooling effect of the cream stimulates micro-circulation, which can accelerate the drainage of accumulated fluids, thereby reducing eye bags and dark circles.

This eye cream is supported by a blend of active ingredients that moisturize and reduce wrinkles in this delicate area. Cross-linked hyaluronic acid is a polymer derived from natural hyaluronic acid, similar to what is used in dermal fillers. The viscosity of the reticulated hyaluronic acid solution is 2-3 times that of HA solution at the same concentration, which indicates that it can bind more water molecules because of its cross-linked structure. It behaves like a «micro-reservoir,» continuously delivering water to the skin. It can form a 3D «breathable» layer on the surface of the skin that improves the skin barrier function, fills wrinkles, reduces water evaporation, and prevents skin damage caused by external aggressions like UV rays and pollution.

The bio-placenta in the eye cream has a composition similar to that of human placenta, rich in growth factors, folic acid, and acetyl glutamine. It is a global anti-aging solution with multiple effects, including skin repair, stimulation of cell growth, anti-wrinkles, skin firming, and moisturizing.

○ **WHAT IS DIFFERENT?**

- - Exclusive texture.
- - Maximal hydration.
- - Silky after-feel.
- - Long lasting hydration.
- - Soft-focus effect to reduce wrinkles.
- - Skin cooling technology.

○

○

EYE SORBET

HOW TO USE?

Wash your face with a gentle cleanser and pat dry with a towel. Take a small amount of the eye cream onto your ring finger. Gently tap the cream around your eye area, starting from the inner corner and working your way outwards. Be careful not to rub the cream into your skin as the skin around your eyes is delicate.

Allow the cream to absorb into your skin before applying any other skincare products or makeup.

It's important to note that you should only use a small amount of eye cream, as using too much can cause irritation or puffiness. Also, it's recommended to use an eye cream twice a day, in the morning and before going to bed, for best results.

ABOUT FORMULATION:

The oil-in-water gel cream texture of this product has a blurred appearance that reduces the skin temperature upon application and diminishes wrinkles. A specific polymeric emulsifier is used at a low concentration, while a water-absorbing powder is added to fix all the water in the emulsion through osmotic pressure.

This technology encapsulates the water and active ingredients, allowing for gradual diffusion to improve efficiency and hydration. Upon application, the cooling effect and soft-focus effect reduce the appearance of wrinkles. The emollients are a mixture of high molecular weight silicones selected for their mattifying properties.

RATINGS

SPF50

Critical wavelength: 380 nm

UVA-PF=16.4

Boot stars: ****

PA++++

Blue light reduction: 62.5%

Free radical reduction: 93.6%

INDICATIONS

- Protect from UV & prevent photo-ageing.

This high-protection sunscreen is specially formulated to be applied after aesthetic medicine procedures. It offers a surprising light texture for a 50+ protection against UVA/UVB, and is conveniently packaged in an airless container for easy portability throughout the day. This protective day cream represents an innovation on several levels.

The formulation creates a long-lasting film over the skin that resists sweating, provides a base for makeup, and prevents the penetration of sunscreens into the skin. It does not sting the eyes and is suitable even for the most sensitive skin types.

The most important factor in UV protection products is ensuring the same level of protection against UVA and UVB, without leaving any breaches in the radiation spectrum that could allow certain types of UV to reach and damage the skin. An «ideal sunscreen» must perform like a uniform density filter, providing the same protection at any wavelength.

Our formulation achieves this ideal by using four types of UV filters in order to reach the best ratio and protection against UVA and UVB. We use the latest and most effective UV filters on the market, which have the highest efficiency ratio and are not classified as endocrine disruptors. Our SPF offers extremely high efficiency compared to other SPFs, with an effective ratio of 2.8 SPF points for 1% of UV filter.

○ WHAT IS DIFFERENT?

- - Does not irritate the skin or sting the eyes.
- - High and uniform protection across the entire UV spectrum.
- - Does not contain endocrine disruptor filters (such as Benzophenones, Octocrylene, and Camphor derivatives).
- - Does not contain derivatives of salicylic acid or filters that cause skin irritation (such as Ethylhexyl Salicylate and Homomenthyl Salicylate).
- - Oil-in-water light formulation with excellent spreadability.
- - Does not leave any white residue.

○

MESO SHIELD 50

HOW TO USE?

Apply before sun exposure: Apply sunscreen 15-30 minutes before going out in the sun. This allows the sunscreen to fully absorb into the skin.

Apply enough sunscreen: Most people don't apply enough sunscreen, so it's important to use a generous amount. As a general rule, use at least 4 ml for the entire face and neck.

Reapply every two hours: Sunscreen wears off over time, so it's important to reapply every two hours, or more often if you're swimming, sweating, or towel-drying.

Use sunscreen every day: Even if you're not spending time outside, UV rays can still reach you through windows and other sources. Make sunscreen a part of your daily routine to protect your skin from damage.

Other sun protection measures: Sunscreen is just one part of sun protection. Other measures include seeking shade, wearing protective clothing, and avoiding sun exposure during peak hours (10am-4pm).

Remember, proper application and use of sunscreen is essential for protecting your skin from the harmful effects of UV radiation.

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Give your skin a few minutes to absorb the cream before applying any makeup.

ABOUT FORMULATION:

This is an oil-in-water emulsion with a lightweight texture and high SPF protection that doesn't leave the skin feeling oily or appear white after application. The primary emollient has been selected for its high molecular weight, which is too large to penetrate the skin, and therefore, it helps maintain sunscreens on the surface of the skin for maximum protection. Additionally, this emollient improves skin smoothness and prevents dry and flaky skin, thereby protecting the skin's natural barrier.

FRAGRANCE:

Aloe vera.

INGREDIENTS:

Aqua (Water), Isohexadecane, Ethylhexyl methoxycinnamate, Butylene glycol, Methylene bis-benzotriazolyl tetramethylbutylphenol, Bis-ethylhexyloxyphenol methoxyphenyl triazine, Hydroxyethyl Acrylate/ Sodium Acryloyldimethyl Taurate Copolymer, Bis-PEG/PPG-20/5 PEG/PPG-20/5 Dimethicone, Methoxy PEG/PPG-25/4 Dimethicone, Ethylhexyl triazone, Decyl glucoside, Propylene glycol, Caprylic/capric triglyceride, Xanthan gum, Phenoxyethanol, Triethylene glycol, Parfum, Hexyl cinnamal, Linalool, Benzyl salicylate.

ABOUT SPF

Why is UV Radiation Harmful to Skin?

Although ultraviolet (UV) radiation only accounts for a small percentage of total solar radiation, it is the most damaging because shorter wavelengths of light contain more energy. Chromophores, such as DNA and melanin, absorb UV radiation in the skin. UV radiation can cause DNA damage, which can lead to genetic mutations and skin cancer if not corrected by the body's natural defenses. UVA and UVB rays damage DNA in different ways. UVB rays are directly absorbed by DNA, whereas UVA rays cause indirect DNA damage through the generation of free radicals.

Why Does UV Radiation Cause Tanning?

Melanin acts as a natural defense against UV radiation by absorbing UV radiation and reducing the transmission of UV rays into the nucleus to be absorbed by DNA. The more melanin in the skin, the better the skin's natural protection.

Why Does UV Radiation Cause Premature Aging?

UV radiation causes the generation of free radicals that activate enzymes that degrade collagen and elastin, which are contained within the dermis. UVA can penetrate the dermis, so the premature aging associated with UV radiation is predominantly due to UVA.

How Do Sunscreens Protect Against UV Radiation?

Sunscreens absorb UV radiation instead of the natural chromophores, reducing the amount of UV radiation able to enter the skin and be absorbed by DNA and melanin.

How Is Sunscreen Tested?

The effectiveness of sunscreen against UV radiation has traditionally been measured by the sun protection factor (SPF), which is a measure of a sunscreen's ability to protect skin from UVB radiation. However, UVA-induced skin damage has been overlooked until recently, so there is no standardized measure of UVA protection.

SPF

SPF measures a sunscreen's ability to protect skin from UVB radiation. A higher SPF theoretically provides more protection than a lower SPF. SPF is measured as a ratio of the amount of UVB radiation required to burn protected skin compared to unprotected skin. Sunscreen needs to be applied in the correct amount (2mg/cm²), reapplied frequently (every 2 hours), and reapplied after swimming or excessive sweating to achieve and maintain the stated SPF.

UVA Protection

The in vivo methods that have been suggested to measure UVA protection are Immediate Pigment Darkening (IPD), Persistent Pigment Darkening (PPD), and UVA Protection Factor (UVA-PF). The IPD method measures the amount of UVA radiation required to produce a darkening of the skin with a clearly defined margin, observed immediately after exposure. The IPD protection factor (IPD-PF) is the ratio of the UVA dose required to produce IPD when skin is protected with the sunscreen to the dose required when the skin is not protected.

PPD stands for Persistent Pigment Darkening, which is a skin response to UV radiation that occurs after exposure to UVB and UVA radiation. It lasts around 3-5 days and is particularly sensitive to the UVA spectrum. The PPD response requires large doses of UVA (>10 J/cm² – the equivalent of 40 minutes of midday summer sunlight), which means that the PPD method can also challenge a sunscreen's stability. The PPD method measures the amount of UVA radiation required to produce the first unambiguous pigmented reaction. The PPD protection factor (PPD-PF) is the ratio of the minimal UVA dose to produce PPD when the skin is protected with the sunscreen (MPDp) to the dose required when the skin is not protected (MPDu). European Union (COLIPA), and one from the United Kingdom (Boots).

UVA-PF stands for UVA protection factor and is a measure of how much UVA protection is offered by a sunscreen. There are three different in vitro methods for assessing UVA-PF; one from the United States (FDA), one from the European Union (COLIPA), and one from the United Kingdom (Boots).

In vitro testing determines the amount of protection a sunscreen offers by spreading the sunscreen onto a quartz, acrylic, or plastic (PMMA) slide and measuring how much UV radiation passes through the slide. The less radiation that passes through the slide, the higher the protection factor.

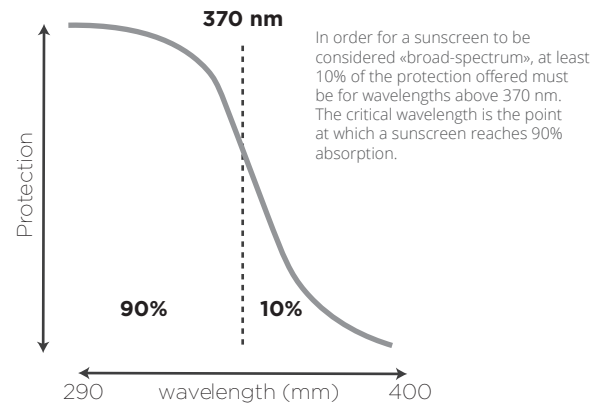

ABOUT SPF

US FDA Critical Wavelength Method:

The FDA uses the critical wavelength method to determine whether a sunscreen can be classified as broad-spectrum. The critical wavelength method measures the breadth of protection of a sunscreen across the UV spectrum (290-400nm). For a sunscreen to be considered broad-spectrum, **it must have a critical wavelength of 370nm or more**. This means that at least 90% of the protection that the sunscreen offers has to be for wavelengths above 370nm [4].

However, the critical wavelength method does not provide information about the level of UVA protection offered by a sunscreen, only that it offers some UVA protection.

CRITICAL WAVELENGTH
Method for determining whether a sunscreen meets the «broad-spectrum requirement».

EU COLIPA Method UVA-PF/SPF Ratio:

The EU COLIPA method requires that the UVA-PF offered by a sunscreen be at least 1/3 of the stated SPF, in addition to requiring a critical wavelength of 370nm and above. For example, a sunscreen with an SPF of 50 must have at least a UVA-PF of 16.

UK Boots Method UVA/UVB Ratio:

The UK Boots method classifies products into categories from 0-5 stars based on the initial mean UVA/UVB ratio and the post-exposure mean UVA/UVB ratio, using the final UVA-PF value and the SPF value (UVA-PF/SPF). This method provides a better idea of how stable the UVA protection is. To achieve the highest rating (5 stars), the UVA/UVB ratio must be at least 0.9. In other words, a sunscreen would have to offer a UVA-PF of more than 90% of the stated SPF. (80-90% would be 4 stars and 60-80% would be 3 stars).

What does PA system mean?

The PA System categorizes sunscreens into groups based on their PPD value, which stands for Persistent Pigment Darkening. The more plus signs (+), the higher the PPD value. This means that you can determine the minimum PPD value as follows:

PA+ = PPD/UVA-PF 2-4

PA++ = PPD/UVA-PF 4-8

PA+++ = PPD/UVA-PF 8-16

PA++++ = PPD/UVA-PF 16+

PPD and UVA-PF values are highly correlated and are usually roughly the same.

Summary

Unlike SPF, there is no internationally universal method for measuring a sunscreen's protection against UVA radiation. However, if a sunscreen is labelled as broad-spectrum, it has to offer both UVA and UVB protection. Some measurement methods help us determine a sunscreen's UVA protection better than others.

The PA system of measuring UVA protection through a PPD response is consistent, meaning any sunscreen with a rating of PA++++ offers at least a PPD-PF (UVA-PF) of 16. The UVA seal and star rating systems of measuring UVA protection are relative to the sunscreen's SPF and, as such, require more understanding. However, sunscreens with SPF 50 and a five-star UVA-PF rating are considered to offer very close to ideal protection currently available.

SKINCARE

HA DEEP FILLER

ACTIVE INGREDIENTS

Cross-linked hyaluronic acid (0,5%)*, Natural glycerin (2%).

*Evidence of clinical efficacy available

INDICATIONS

- Lift and firm the skin.
- Reduce deep wrinkles and fine lines.
- Improve skin volumes.

The product is specifically designed to prolong the effects of hyaluronic acid filler injections. The formula contains cross-linked hyaluronic acid, similar to the one injected by doctors to recreate skin volume and fill wrinkles.

The formulation is a light and silky touch serum with a long-lasting after-feel. It also incorporates soft-focus technology to reduce the appearance of wrinkles and brighten the skin tone. The scent is fresh and energizing, composed of a mixture of citrus fruits.

The cross-linked hyaluronic acid is a polymer derived from natural hyaluronic acid (HA), similar to the one used in dermal fillers. The viscosity of the reticulated hyaluronic acid solution is 2-3 times that of the HA solution at the same concentration, indicating that it can bind more water molecules due to its cross-linked structure. It acts like a «micro-reservoir,» continuously delivering water to the skin. It can form a 3D «breathable» layer on the skin's surface, which improves the skin barrier function, fills wrinkles, reduces water evaporation, and prevents skin damage caused by external aggressors such as UV rays and pollution.

The cream combines two different soft-focus technologies to immediately reduce the appearance of wrinkles: micro-silica and a high molecular weight polymer that fills the wrinkles from the outside.

○ WHAT IS DIFFERENT?

- - Contains cross-linked hyaluronic acid identical to dermal fillers.
- - Soft-focus effect to reduce the appearance of wrinkles.
- - Long lasting hydration.
- - Light wear for day & night use.

○

○

○

HA DEEP FILLER

HOW TO USE?

It is suitable for all skin types and can be used both in the morning and at night.

Cleanse your face thoroughly and pat dry. Apply a small amount of the serum to your face, focusing on areas with wrinkles or fine lines. Gently massage the serum into your skin using upward circular motions until fully absorbed.

Wait a few moments before applying any other skincare products or makeup on top of the serum.

For best results, it is recommended to use the serum consistently as part of your daily skincare routine. Be sure to follow the instructions on the product label and consult with a dermatologist if you have any concerns or specific skin conditions.

ABOUT FORMULATION:

The specific composition of this oil-in-water emulsion enables optimal emulsion stability while providing a smooth and velvety skin feel. The emulsion has a bright appearance due to the small size of oil droplets. The result is a pleasant cream that feels fresh at application and is easily absorbed by the skin.

FRAGRANCE:

Ceylan tea & citrics.

INGREDIENTS:

Aqua (Water), Caprylic/capric triglyceride, Dimethicone, Silica, Glycerin, Bis-PEG/PPG-20/5 PEG/PPG-20/5 Dimethicone, Methoxy PEG/PPG-25/4 Dimethicone, Hydroxyethyl acrylate/Sodium acryloyldimethyl taurate copolymer, Sodium hyaluronate crosspolymer, Dimethicone/ Vinyltrimethylsiloxysilicate crosspolymer, Phenoxyethanol, Triethylene glycol, Titanium dioxide, Parfum, Citral, Limonene.

SKINCARE

RETINOL 1.0

ACTIVE INGREDIENTS

Retinol (1%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Lift and firm the skin.
- Reduce photo-ageing.
- Accelerate skin renewal.

Highly effective serum with 1% retinol, the ultimate solution for achieving smoother, firmer, and more youthful-looking skin. This lightweight, fast-absorbing formula delivers powerful results, and the fresh and energizing scent is composed of a blend of citrus fruits.

Retinol (Vitamin A) has been proven effective in numerous scientific studies, confirming its broad range of action across all major skin care applications, including reduction of pigment spots and wrinkles, as well as improvement of skin elasticity and smoothness. Retinol improves cell renewal, reduces collagen degradation, and normalizes keratinization. It regenerates skin and provides a smooth, firm, and radiant look. Dermatologists and other experts have relied on the many positive effects of Vitamin A in cosmetic products for decades.

The innovation in this product lies in our ability to stabilize the pure form of retinol using a specific blend of oils and antioxidants. Typically, the pure form of retinol loses its properties in skincare after a short period of time due to oxidation caused by light, dissolved oxygen in the product, and storage temperature. Many brands use retinol derivatives, which show poor efficiency. Our specific blend of oils protects the retinol from oxidation, preserving over 80% of active retinol even after 12 months of storage. During the manufacturing process, all the oxygen is removed from the product using a vacuum process, and the product is filled into airless bottles. The formulation also incorporates a transdermal booster to increase the penetration of retinol in the deepest layers of the epidermis.

Regular use of this serum can help minimize the appearance of fine lines and wrinkles while also improving skin texture and tone. It can also help reduce the appearance of pores and smooth out rough patches for a more radiant, even complexion. For best results, use this serum at night after cleansing and toning your skin. We recommend using a broad-spectrum sunscreen during the day to protect your skin from UV damage.

Experience the transformative power of 1% retinol with our expertly formulated serum, and unlock the secret to more youthful, radiant-looking skin.

- **WHAT IS DIFFERENT?**
- - High concentration of pure retinol.
- - Stabilized retinol in the formulation.
- - High efficiency.
- - Transdermal booster.
- - Only through professionals.

○

○

RETINOL 1.0

HOW TO USE?

It is suitable for all skin types and can be used at night.

Cleanse your face thoroughly and pat dry. Take a small amount of serum (about a pea-sized amount) and apply it to your face, avoiding the eye area. Gently massage the serum into your skin using upward circular motions until fully absorbed.

Wait a few moments before applying any other skincare products on top of the serum.

It's important to start using a serum with 1% retinol gradually, especially if you have sensitive skin. Begin by using it once or twice a week, and then gradually increase the frequency as your skin adjusts. Additionally, it's best to use retinol products at night, as it can make your skin more sensitive to sunlight. Always use a broad-spectrum sunscreen during the day to protect your skin from UV damage. We recommend creating a skin cycling routine by alternating the use of a retinol serum with a moisturizer.

Be sure to follow the instructions on the product label and consult with a dermatologist if you have any concerns or specific skin conditions.

ABOUT FORMULATION:

The specific composition of this water-in-oil emulsion leads to optimal emulsion stability while also providing a smooth and velvety skin feel. The emulsion has a bright appearance due to the small size of water droplets. The result is a very pleasant cream that feels fresh upon application and is easily absorbed by the skin.

FRAGRANCE:

Ceylan tea & citrics.

INGREDIENTS:

Aqua (Water), Octyldodecanol, Diisopropyl adipate, Ethoxydiglycol, Hydroxyethyl Acrylate/ Sodium Acryloyldimethyl Taurate Copolymer, Bis-ethylhexyloxyphenol methoxyphenyl triazine, Bis-PEG/PPG-20/5 PEG/PPG-20/5 Dimethicone, Methoxy PEG/PPG-25/4 Dimethicone, Retinol, Polysorbate 20, Caprylic/Capric triglyceride, Phenoxyethanol, Triethylene glycol, BHT, BHA, Parfum, Citral, Limonene.

SKINCARE

VITAMIN C 5.0

ACTIVE INGREDIENTS

ET-vitamin C (5%)*, Hyaluronic acid XS (0,5%).

*Evidence of clinical efficacy available

INDICATIONS

- Reduce pigmentation.
- Reduce brown spots.
- Neutralize free radicals and protect cellular DNA.
- Anti-pollution.
- Collagen booster.
- Even out skin tone.
- Prevent photo-ageing.

5% ET-Vitamin C Serum with Hyaluronic Acid - the perfect solution for achieving brighter, more even-toned skin. This powerful serum is specially formulated with a stable form of Vitamin C, which helps to target free radical damage and photoaging. Our serum is also enriched with natural orange peel essential oil, which provides a fresh, invigorating scent. The lightweight, fast-absorbing formula delivers powerful results without leaving any sticky residue.

The innovation in this product is the use of a new form of vitamin C at a very high concentration, which remains stable in the formulation over time and does not leave a sticky after-feel like many other vitamin C products. This vitamin C derivative, Et-Vitamin C, has excellent whitening, anti-oxidation, free radical scavenging, and collagen-boosting effects. Its stability is superior to other ascorbic acid derivatives, and it inhibits melanogenesis, reducing dark spots and age spots, and fights photo-aging by interfering with inflammatory cytokines and reversing ROS production to achieve free radical scavenging purposes.

Hyaluronic acid XS has a very low molecular weight, which allows it to penetrate the skin more deeply, providing increased hydration and helping to improve the skin's elasticity. The sodium hyaluronate is derived from a biotechnological process that is free of contaminants and GMOs. It is an innovation in anti-aging skincare for its ability to penetrate the skin more effectively than high molecular weight hyaluronic acid. It rejuvenates the skin by improving its viscoelastic properties and significantly reducing the appearance of deep wrinkles.

Regular use of this serum can help to reduce the appearance of fine lines and wrinkles, while also improving skin texture and tone. It can also help to reduce the appearance of dark spots and age spots, and fight against photoaging.

○ WHAT IS DIFFERENT?

- - Stable form of vitamin C in high concentration.
- - Low molecular weight hyaluronic acid.
- - No sticky residue.
- - Hydrating and whitening.
- - Pleasant texture.

Additionally, it's best to use products with high concentration of vitamin C at night, as it can make your skin more sensitive to sunlight. Always use a broad-spectrum sunscreen during the day to protect your skin from UV damage. We recommend creating a skin cycling routine by alternating the use of a vitamin C serum with a moisturizer.

Be sure to follow the instructions on the product label and consult with a dermatologist if you have any concerns or specific skin conditions.

ABOUT FORMULATION:

The specific composition of this oil-in-water emulsion leads to optimal emulsion stability while also providing a smooth and velvety skin feel. The emulsion has a bright appearance due to the small size of oil droplets, resulting in a pleasant cream that feels fresh upon application and is easily absorbed by the skin. The main emollient is a non-comedogenic ester that provides a rich feel and improves spreadability on the skin. This product is certified natural by ECOCERT.

FRAGRANCE:

Orange.

INGREDIENTS:

Aqua (Water), Octyldodecyl myristate, 3-O-Ethyl ascorbic acid, Dimethicone, Bis-PEG/ PPG-20/ 5 PEG/ PPG-20/ 5 Dimethicone, Methoxy PEG/ PPG-25/ 4 Dimethicone, Polyacrylate-13, Sodium hyaluronate, Caprylic/ Capric triglyceride, Polyisobutene, Polysorbate 20, Phenoxyethanol, Triethylene glycol, Citrus aurantium dulcis peel oil, Limonene.

SKINCARE

NIACINAMIDE 5.0

ACTIVE INGREDIENTS

Niacinamide USP (5%)*, Olive oil squalane (10%).

*Evidence of clinical efficacy available

INDICATIONS

- Reduce pigmentation.
- Reduce redness and inflammation.
- Prevent photo-ageing.
- Hydrate the skin.
- Prevent photo-ageing.
- Reduce acne.

Skincare serums are a popular addition to many people's beauty routines, and one containing niacinamide and olive oil squalane is particularly noteworthy. Niacinamide, also known as vitamin B3, is a water-soluble vitamin that has been shown to have numerous benefits for the skin. Meanwhile, squalane is a type of oil that is similar in structure to the natural oils found in our skin, making it an effective moisturizer.

This serum has a many positive effect on reducing redness, inflammation, pigmentation, acne and improve skin texture. Niacinamide is one of the most widely studied topical skincare ingredients, with numerous peer-reviewed studies revealing its many benefits on the skin. Clinically proven to brighten the skin, reduce acne and blemishes, improve the skin barrier, and rebalance the skin's microbiome.

When combined in a serum with 5% niacinamide and 10% olive oil squalane, this powerful duo can help to hydrate, soothe, and brighten the skin. Niacinamide has been shown to reduce inflammation, which can help to minimize redness and irritation, while also helping to regulate oil production and reduce the appearance of pores and acne.

The addition of olive oil squalane helps to lock in moisture and restore the skin's natural barrier function, helping to prevent moisture loss and improve overall skin texture. It's also high in antioxidants, which can help to protect the skin against environmental stressors like pollution and UV rays.

Together, these ingredients can be incredibly effective for addressing a range of skin concerns, including dryness, uneven skin tone, and fine lines and wrinkles.

○ WHAT IS DIFFERENT?

- - Minimalist formulation.
- - Emulsifier free.
- - Premium grade of niacinamide in high concentration.
- - High concentration of olive oil squalane.

NIACINAMIDE 5.0

HOW TO USE?

It is suitable for all skin types and can be used both in the morning and at night.

Cleanse your face thoroughly and pat dry. Apply a small amount of the serum to your face, focusing on areas with wrinkles or fine lines. Gently massage the serum into your skin using upward circular motions until fully absorbed.

Wait a few moments before applying any other skincare products or makeup on top of the serum.

For best results, it is recommended to use the serum consistently as part of your daily skincare routine. Be sure to follow the instructions on the product label and consult with a dermatologist if you have any concerns or specific skin conditions.

ABOUT FORMULATION:

The specific composition of this oil-in-water emulsion provides optimal stability while delivering a smooth and velvety skin feel. The emulsion contains only squalane, a stable derivative of squalene, found naturally in sebum, as an emollient. Squalane is renowned for its anti-inflammatory properties, making it popular among customers with acne, eczema, and other sensitizing conditions. Moreover, squalane is non-comedogenic, meaning it does not clog pores, and is therefore suitable for oily and/or acne-prone skin. The use of olive squalane in this product aligns with the principles of green chemistry and supports sustainable development practices.

FRAGRANCE:

Ceylan tea & citrics.

SKINCARE

ACN CORRECTOR

ACTIVE INGREDIENTS

Hyaluronic acid XS (1%)*, Acetyl-glucosamine (1%)*, ZincPCA (1%)*, Niacinamide USP (5%)*, Betaine salicylate (0,5%)*, Panthenol (0,25%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Intensive treatment to treat imperfections.
- Acne spots.
- Improve skin tone.
- Intense hydration.

Introducing our revolutionary serum packed with powerful skin-loving ingredients, including hyaluronic acid, acetyl-glucosamine, ZincPCA, niacinamide, betaine salicylate, and panthenol.

Hyaluronic acid, known for its ability to attract and retain moisture, helps to hydrate the skin and plump up fine lines and wrinkles. Acetyl-glucosamine is a building block of hyaluronic acid and helps to support its production in the skin, further promoting hydration and suppleness.

ZincPCA is a natural astringent that helps to regulate sebum production, reducing the appearance of pores and promoting a clearer complexion. Niacinamide, also known as Vitamin B3, helps to brighten and even out skin tone, while also strengthening the skin barrier. Betaine salicylate is a gentle exfoliant that helps to unclog pores and reduce the appearance of blemishes, without causing irritation or dryness. Panthenol, also known as Vitamin B5, helps to soothe and calm the skin, reducing redness and inflammation.

Together, these powerhouse ingredients work synergistically to provide intense hydration, improve skin texture and tone, and promote a healthy, glowing complexion.

Our serum is lightweight, oil-free and fast-absorbing, making it perfect for oily and acne-prone skin. With consistent use, you'll notice a visible improvement in the look and feel of your skin, leaving you with a radiant and youthful glow.

○ WHAT IS DIFFERENT?

- - Minimalist formulation.
- - Oil-free.
- - Emulsifier-free.
- - Thickener-free.
- - Natural formulation.
- - High load of active ingredients (8,5%).

ACN CORRECTOR

HOW TO USE?

It is suitable for all skin types, but particularly beneficial for those with acneic and oily skin. This versatile serum can be used both in the morning and at night.

Cleanse your face thoroughly and pat dry. Apply a small amount of the serum to your face, focusing on areas with wrinkles or fine lines. Gently massage the serum into your skin using upward circular motions until fully absorbed.

Wait a few moments before applying any other skincare products or makeup on top of the serum.

For best results, it is recommended to use the serum consistently as part of your daily skincare routine.

Be sure to follow the instructions on the product label and consult with a dermatologist if you have any concerns or specific skin conditions.

ABOUT FORMULATION:

Our product boasts a minimalist formulation that contains only active ingredients, transdermal boosters, and a preservative for optimal skin care benefits. Specifically designed for acneic and oily skin types, our oil-free formula is perfect for those looking to combat breakouts and achieve a clearer complexion.

With our unique transdermal boosters, our formulation is able to deliver active ingredients deep into the skin for maximum effectiveness. And with no unnecessary filler ingredients, you can be confident that you're getting the most potent skin care solution possible.

Our preservative ensures that our product remains safe and effective for use, without compromising the integrity of the active ingredients. You can trust that our product is not only effective but also safe for your skin.

Experience the transformative power of our minimalist formulation and achieve a healthier, clearer, and more radiant complexion. Say goodbye to oil and acne, and hello to the best skin of your life.

FRAGRANCE:

Perfume-free.

SKINCARE

MELA DROPS

ACTIVE INGREDIENTS

Tranexamic acid (1%)*, Hexyl-resorcinol (1%)*, Glycolic acid (1%)*, Niacinamide USP (5%)*, Vitamin E (0,2%), Olive oil squalane (5%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Intensive treatment to treat pigmentation.
- Brown spots.
- Skin whitening.

Experience the ultimate skin-brightening solution with our powerful skin care serum. Formulated with a potent blend of glycolic acid, niacinamide, tranexamic acid, hexyl-resorcinol, vitamin E, and squalane, this serum is designed to lighten and even out skin tone while providing intense hydration and nourishment.

Glycolic acid, a type of alpha-hydroxy acid, helps to gently exfoliate the skin, removing dead skin cells and revealing a brighter, smoother complexion. Niacinamide, also known as Vitamin B3, helps to reduce the appearance of hyperpigmentation and dark spots, while also strengthening the skin barrier.

Tranexamic acid and hexyl-resorcinol are powerful skin-brightening agents that work together to fade dark spots and promote a more even skin tone. Vitamin E and squalane provide intense hydration and nourishment, helping to improve texture and leaving your skin feeling soft and supple.

This serum is perfect for anyone looking to brighten and even out their skin tone, whether you're dealing with dark spots, acne scars, or just want a more radiant complexion. With regular use, you'll notice a visible improvement in the appearance of your skin, leaving you with a more youthful and luminous glow.

Our serum is lightweight and fast-absorbing, making it perfect for use in your daily skin care routine. Simply apply a small amount to your face and neck after cleansing and toning, and follow with your favorite moisturizer.

○ WHAT IS DIFFERENT?

- Minimalist formulation.
- Natural emulsifier (phospholipids).
- High load of active ingredients.
- Refreshing at application.
- Perfume-free.

MELA DROPS

HOW TO USE?

It is suitable for all skin types. This versatile serum can be used both in the morning and at night.

Cleanse your face thoroughly and pat dry. Apply a small amount of the serum to your face, focusing on areas with hyperpigmentation. Gently massage the serum into your skin using upward circular motions until fully absorbed.

Wait a few moments before applying any other skincare products or makeup on top of the serum.

For best results, it is recommended to use the serum consistently as part of your daily skincare routine. Always use a sunscreen SPF50 in the morning while using the product.

Be sure to follow the instructions on the product label and consult with a dermatologist if you have any concerns or specific skin conditions.

ABOUT FORMULATION:

Our product features a minimalist, potent, and natural formulation that combines the power of phospholipids, skin-identical molecules to deliver active properties to the skin. The unique emulsifying system not only provides hydration and soothing benefits but also acts as a powerful delivery system, improving the penetration and bioavailability of active ingredients for faster and more effective results.

Studies have shown that our formulation also has a cooling effect on the skin, reducing skin temperature and leaving a refreshing texture. With its impressive performance and natural ingredients, our product is the perfect addition to your daily skincare routine.

Experience the benefits of our powerful yet gentle formulation that is designed to improve the look and feel of your skin. Say goodbye to dull, tired-looking skin and hello to a more radiant and youthful complexion.

FRAGRANCE:

Perfume-free.

INGREDIENTS:

Aqua (Water), Niacinamide, Squalane, Propylene glycol, Sodium acrylates copolymer, Tranexamic acid, Hexylresorcinol, Glycolic acid, Tocopheryl acetate, Lecithin, Triethylene glycol, Phenoxyethanol.

HAIR MIST

ACTIVE INGREDIENTS

Dexpanthenol (0,5%), Hyaluronic acid XS (0,1%)*, Carnosine (0,5%)*, Organic silicium hair (1%)*, Zinc & Calcium & Copper & Magnesium multi-mineral complex (3%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Hair revitalization & fortification.
- Thinning hair.
- Hair loss.
- Reduce dandruff.

Introducing our innovative hair serum in spray, formulated to revitalize and nourish your hair. Our unique blend of active ingredients, including Dexpanthenol, hyaluronic acid, carnosine, organic silicium, Zinc, calcium, copper and magnesium, is inspired by the powerful mesotherapy treatments.

Our hair serum is designed to deeply penetrate the hair shaft, providing essential nutrients to restore and strengthen damaged and weak hair. Dexpanthenol, also known as Provitamin B5, helps to improve hair elasticity, leaving it looking healthier and more resilient. Hyaluronic acid provides intense hydration to the hair, helping to combat dryness and breakage.

Carnosine, an amino acid, has antioxidant properties, protecting the hair from environmental stressors and preventing further damage. Organic silicium improves hair texture and promotes hair growth. Zinc, calcium, copper, and magnesium work together to provide essential minerals for strong and healthy hair.

Our serum is conveniently packaged in a spray bottle, making it easy to apply and distribute evenly throughout the hair. Use it on damp hair before blow-drying or on dry hair to revitalize and refresh throughout the day.

Experience the transformative power of mesotherapy-inspired hair care with our hair serum in spray, enriched with a potent blend of active ingredients to nourish, strengthen, and revitalize your hair. Based on our F-HAIR formulation.

○ WHAT IS DIFFERENT?

- - Minimalist formulation.
- - Natural formulation.
- - Same formulation as our famous F-HAIR.

HAIR MIST

HOW TO USE?

Our hair serum in spray is suitable for all hair types and can be used by anyone looking to revitalize and nourish their hair. It is especially beneficial for those with damaged, weak, or dry hair, as well as those experiencing hair loss or thinning.

To use, simply spray the serum onto clean, damp hair, focusing on the ends and areas that require extra attention. Gently massage the serum into the hair, and style as desired. For best results, use the serum regularly, either daily or as needed.

Our hair serum in spray is designed to provide long-lasting nourishment and protection for your hair, so you can enjoy healthy, strong, and revitalized locks. Whether you're looking to repair damage, boost hydration, or promote hair growth, our serum is a versatile and effective solution for all your hair care needs.

ABOUT FORMULATION:

Our product boasts a minimalist formulation that contains only pharmaceutical grade active ingredients, and a preservative for optimal scalp and hair benefits. Specifically designed for hair our formula is oil-free.

With no unnecessary chemical ingredients, you can be confident that you're getting the most potent hair care solution possible.

Our preservative ensures that our product remains safe and effective for use, without compromising the integrity of the active ingredients. You can trust that our product is not only effective but also safe for your hair.

Experience the transformative power of our minimalist formulation and achieve healthy hair.

HAIR MEN MIST

ACTIVE INGREDIENTS

Hyaluronic acid XS (0,1%), Acetyl tetrapeptide-3 + Clover extract (0,5%)*, Bio-placenta (5%)*, Carnosine (0,5%)*, Organic silicium (1%)*, Dexpanthenol (0,5%), Zinc & Calcium & Copper & Magnesium multi-mineral complex (3%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Androgenic alopecia.
- Hair regrowth.

Introducing our revolutionary hair men mist, specially formulated to treat and prevent hair loss, including androgenic alopecia. Our serum contains a powerful blend of active ingredients, including Hyaluronic acid, Acetyl tetrapeptide-3, clover extract, EGF, FGF, and VEGF growth factors, carnosine, organic silicom, panthenol, Zinc, calcium, copper, and magnesium.

Our serum works by nourishing and revitalizing the hair follicles, stimulating new hair growth, and preventing further hair loss. Hyaluronic acid provides intense hydration to the scalp, helping to combat dryness and irritation. Acetyl tetrapeptide-3, clover extract, EGF, FGF, and VEGF growth factors work together to promote hair growth, improve hair thickness and density, and strengthen hair follicles.

Carnosine, an amino acid, has antioxidant properties, protecting the hair from environmental stressors and preventing further damage. Organic silicium improves hair texture and promotes hair growth. Panthenol, also known as Provitamin B5, helps to improve hair elasticity, leaving it looking healthier and more resilient. PPC+ CREAM

ACTIVE INGREDIENTS

PPC+ nanosomes (2%)*, L-carnitine (1%), Caffeine (0,2%).

*Evidence of clinical efficacy available

INDICATIONS

- Reduce cellulite.
- Reduce fat deposits.

Introducing our innovative mesotherapy-inspired cream formulated with PPC (phosphatidylcholine) to reduce fat deposits and cellulite. Our cream contains a unique blend of active ingredients, including PPC, L-carnitine, and caffeine, commonly used in mesotherapy treatments to reduce fat deposits and cellulite. Our cream has a fresh and unique texture, providing an ultra-soft skin finish. It is a melting micro-emulsion with a transdermal booster that deeply penetrates the skin, targeting fat cells and reducing the appearance of cellulite. Cellulite involves changes in the dermis and subcutaneous tissue caused by the irregular proliferation of fat cells, known as adipocytes. It is associated with lifestyle, diet, and the use of different types of pharmaceuticals.

While injected PPC is an effective treatment to reduce cellulite and fat deposits, it can be uncomfortable and involve potential side effects. Our cream offers a perfect alternative by encapsulating transdermal PPC in vesicles of approximately 100 nm in diameter. We also include three synergistic active ingredients - L-carnitine, caffeine, and sodium deoxycholate - commonly used in invasive aesthetic medicine treatments. These ingredients work together to effectively reduce fat tissue while improving skin elasticity and firmness.

L-carnitine speeds up the energetic metabolism of fatty acids and acts as a detoxificant for skin cells. Sodium deoxycholate effectively liquefies the cell membranes of fat cells, allowing the release of the unnecessary products of metabolism, leading to lipolysis. Caffeine stimulates microcirculation, strengthening the action of the other active ingredients. It also speeds up lipolysis, leading to an increase in the blood level of glycerol and free fatty acids.

Our cream is easy to apply and can be used on the areas of the body where cellulite is most prominent. With regular use, it can help reduce the appearance of cellulite and improve skin texture and firmness. Experience the transformative power of mesotherapy-inspired skincare with our innovative PPC cream.

- **WHAT IS DIFFERENT?**
- - Minimalist formulation.
- - Based on aesthetic medicine.
- - Safe alternative to lipolytic injections.
- - Pharmaceutical grade active ingredients.
- - Refreshing at application.

PPC+ CREAM

HOW TO USE?

To use our body cream to reduce cellulite and fat deposits, apply a generous amount to the targeted areas, such as the thighs, hips, and buttocks, and massage the cream into the skin using circular motions. For best results, use twice daily, in the morning and evening, and continue use for at least 8 weeks.

For optimal absorption and effectiveness, it is recommended to apply our body cream to clean, dry skin. To enhance the benefits of the cream, we also recommend maintaining a healthy lifestyle, including regular exercise and a balanced diet, as well as staying well-hydrated by drinking plenty of water throughout the day.

ABOUT FORMULATION:

Our body cream is characterized by an unexpectedly light and creamy texture, with a bright and rich appearance. It has an evanescent feel that is light and thin, and features a 100% natural scent based on mandarin essential oil.

The ultra-soft touch and easy spreading of our body cream are thanks to the very fine and homogeneous dispersion of oil droplets. The emulsion is perfectly homogeneous, with an average droplet size in the range of one micron. Despite its light texture, our cream offers a cooling and melting sensation when applied to the skin, leaving behind a fine, non-greasy, and non-tacky residue.

Our micro-emulsion emulsifier is derived from behenic acid, a saturated fatty acid sourced from the seeds of the indigenous Amazon tree species, *Pentaclethra macroloba*. Behenic acid has emollient and soothing properties that help to restore the skin's natural oils and improve overall hydration levels. In skincare, behenic acid is commonly used to provide soothing relief for dry and sensitive skin. It plays a crucial role in maintaining the integrity of the skin barrier, thereby improving moisture retention and enhancing skin hydration.

FRAGRANCE:

Mandarin.

INGREDIENTS:

Aqua (Water), Isohexadecane, Tribehenin PEG-20 esters, Ethoxydiglycol, Hydroxyethyl acrylate/Sodium acryloyldimethyl taurate copolymer, Phosphatidylcholine, Carnitine HCl, Propylene glycol, Caffeine, Sodium deoxycholate, Cholesterol, Xanthan gum, Dehydroacetic acid, Benzyl alcohol, Tocopherol, Phenoxyethanol, Triethylene glycol, Citrus Nobilis oil, Limonene.

SKINCARE

HYALURONIC ACID CRYO-MASK

ACTIVE INGREDIENTS

Hyaluronic acid XS (1%)*, Moisture release system (3%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Moisture the skin.
- Reduce deep wrinkles and fine lines.

Our skincare mask is specially formulated with XS hyaluronic acid, derived from aesthetic medicine, to deliver a complete anti-aging effect and reduce the appearance of wrinkles. With a fresh and unique texture that leaves skin ultra-soft, this cryo-mask also incorporates skin cooling technology, which can decrease the skin temperature by up to 2 degrees after application.

The scent is fresh and energizing, featuring a blend of citrus fruits that invigorates the senses.

XS hyaluronic acid has an extremely low molecular weight, acting as a connective tissue organizer and water holding substance. Our sodium hyaluronate is produced through a biotechnological process that is free of contaminants and GMOs, making it a safe and innovative ingredient in anti-aging skincare.

Compared to high molecular weight hyaluronic acid, XS hyaluronic acid has increased permeation through the skin, rejuvenating skin by improving its viscoelastic properties and significantly reducing the appearance of deep wrinkles. With our skincare mask, you can hydrate your skin and achieve a youthful, radiant complexion.

○ WHAT IS DIFFERENT?

- Gel-cream texture.
- Maximal hydration.
- Silky after-feel.
- Soft-focus effect to reduce wrinkles.
- Skin cooling technology.

HYALURONIC ACID CRYO-MASK

HOW TO USE?

Start by cleansing your face with your Fusion Meso cleanser and pat dry with a towel.

Apply a thin, even layer of mask to your face, avoiding the eye and mouth areas.

Leave the mask on for 10 to 20 minutes. During the time the mask is on, relax and let the nourishing ingredients work their magic.

After the recommended time has passed, remove the mask using lukewarm water and a soft cloth.

Pat your skin dry with a towel and follow up with your regular skincare routine, such as applying serum and moisturizer.

For best results, use the moisturizing mask once or twice a week. With proper use, our moisturizing mask can help hydrate and nourish your skin, leaving it soft, supple, and radiant.

ABOUT FORMULATION:

The emulsion is an oil-in-water formula that does not require an emulsifier. We add a specific water-absorbing powder to the formula that fixes all the water in the emulsion through osmotic pressure. The water is trapped in capsules that remain on the skin surface upon application. The water and active ingredients are gradually diffused to improve efficiency and hydration. This innovative technology provides a cooling effect on the skin upon application and a soft-focus effect that reduces the appearance of wrinkles.

Our emollient is certified ECOCERT and made using glycerol sourced from vegetable oils with medium-chain fatty acids derived from coconut oil.

FRAGRANCE:

Ceylan tea & citrics.

INGREDIENTS:

Aqua (Water), Caprylic/Capric triglyceride, Sodium acrylates crosspolymer-2, Sodium hyaluronate, Sodium acrylate/Acryloyldimethyltaurate/Dimethylacrylamide crosspolymer, Isohexadecane, Polysorbate 60, Phenoxyethanol, Triethylene glycol, Parfum, Citral, Limonene.

SKINCARE

LIFT SLEEPING MASK

ACTIVE INGREDIENTS

Bio-placenta (3%)*, Hyaluronic acid XS (1%)*, Lactic acid ester (4%), Natural glycerin (4%).

*Evidence of clinical efficacy available

INDICATIONS

- Lift and firm the skin.
- Reduce deep wrinkles and fine lines.
- Improve skin volumes.

This anti-ageing sleeping mask is a nutritive powerhouse that helps reduce wrinkles and promote skin regeneration. It contains a rejuvenation complex, formulated with hyaluronic acid, growth factors, glutamine, and folic acid - ingredients commonly used in aesthetic medicine. The mask's rich water-in-oil texture delivers intense overnight nourishment, while the skin is free from external factors.

The product's scent is 100% natural, infused with mandarin essential oil. The rejuvenation complex has a similar composition to placenta, a rich source of growth factors, folic acid, and acetyl glutamine. It's a global anti-ageing solution that helps repair and stimulate cell growth, reduce wrinkles, firm and moisturize the skin.

The mask features XS hyaluronic acid, which has a low molecular weight and acts as a connective tissue organizer and water holding substance. The sodium hyaluronate used in the product comes from a biotechnological process that's safe and free from contaminants and GMOs. This innovative ingredient can penetrate the skin more effectively than high molecular weight hyaluronic acid, improving the skin's viscoelastic properties and significantly reducing deep wrinkles.

Overall, this sleeping mask is a complete anti-ageing solution that provides intense overnight nourishment, rejuvenation, and reduction of wrinkles.

○ WHAT IS DIFFERENT?

- - Water-in-oil mask based on gel-trap technology.
- - Maximal hydration and nutrition.
- - Ideal for over-night nutrition.

LIFT SLEEPING MASK

HOW TO USE?

Apply the sleeping mask at night, after cleansing and toning your skin. It's best to use it as the last step in your skincare routine, as it's formulated to be left on overnight.

Take a pea-sized amount of the sleeping mask and apply it evenly onto your face, avoiding the eye and lip area. Use gentle circular motions to massage the product into your skin.

Leave the mask on overnight and let it work its magic. The rich water-in-oil texture ensures that your skin receives intense hydration and nourishment throughout the night.

In the morning, rinse off the sleeping mask with lukewarm water and follow your usual morning skincare routine.

Use the sleeping mask 2-3 times a week, or as often as your skin needs it. It's particularly beneficial for those with dry or mature skin, but can be used by anyone looking to reduce the appearance of wrinkles and improve skin hydration and elasticity.

Store the sleeping mask in a cool, dry place, away from direct sunlight and heat. Remember to always close the lid tightly after use to prevent contamination.

ABOUT FORMULATION:

This water-in-oil mask has a rich and fine texture that provides lasting hydration and protection to the skin. It contains a specific blend of oils and waxes that create a long-lasting protective film over the skin. The mask feels light and easy to apply upon application, and the after-feel is long-lasting and nutritive.

The formula includes two emollients that help to moisturize and soften the skin:

-Octyldodecyl myristate is a liquid emollient that provides a rich feel and improves the spreadability of the cream on the skin. It's non-comedogenic and has been certified natural by ECOCERT.

-Myristyl lactate is an ester of myristyl alcohol and lactic acid that acts as a skin lubricant and emollient. It has excellent softening properties and is a lipid with low fatty character. It's a high-quality ester specifically developed for personal care and pharmaceutical applications, based on natural fatty acids, offering many functional benefits.

FRAGRANCE:

Mandarin.

INGREDIENTS:

Aqua (Water), Octyldodecyl myristate, Myristyl lactate, Glycerin, Cera microcristallina, Isohexadecane, Cetyl PEG/PPG-10/1 dimethicone, Sodium hyaluronate, sh-Oligopeptide-1, sh-Oligopeptide-2, sh-Polypeptide-1, sh-Polypeptide-9, sh-Polypeptide-11, Bacillus/Folic acid ferment filtrate extract, Lecithin, Acetyl glutamine, Caprylyl glycol, Butylene glycol, 1,2-Hexanediol, Polyacrylate-13, Polyisobutene, Polysorbate-20, Triethylene glycol, Phenoxyethanol, Citrus Nobilis oil, Limonene.

GLOW SLEEPING MASK

ACTIVE INGREDIENTS

Tranexamic acid (1%), Niacinamide (3%), HMC Flavonoids (0,1%)*, Lactic acid ester (4%), Natural glycerin (4%).

*Evidence of clinical efficacy available

INDICATIONS

- Enlighten the skin tone.
- Reduce age spots and pigmentation.
- Reduce deep wrinkles and fine lines.
- Nourishing.

Introducing our Glow Sleeping Mask - the perfect solution for those looking to improve their skin tone and reduce pigmentation. This highly effective sleeping mask is formulated with a blend of powerful ingredients, including niacinamide, tranexamic acid, and glycerin.

Niacinamide is a potent ingredient that helps to brighten the skin and reduce the appearance of pigmentation. It also helps to improve the skin's elasticity and hydration levels, leaving it looking smoother and more radiant.

Tranexamic acid is a highly effective ingredient that helps to reduce the production of melanin in the skin, thereby reducing the appearance of dark spots and hyperpigmentation. It's also been shown to improve the overall appearance of the skin, leaving it looking brighter and more even-toned.

Glycerin is a powerful humectant that helps to draw moisture into the skin, leaving it feeling hydrated and supple. It also helps to protect the skin from external aggressors, such as pollution and free radicals.

This glow sleeping mask has a fresh aloe vera fragrance that will leave your skin feeling refreshed and rejuvenated. It's the perfect addition to your night time skincare routine, helping to nourish and replenish your skin while you sleep.

With regular use, this glow sleeping mask will help to improve your skin tone and reduce pigmentation, leaving your skin looking brighter, more even-toned, and beautifully radiant.

HYALURONIC MIX-MASK

ACTIVE INGREDIENTS

Hyaluronic acid XS (1%)*.

*Evidence of clinical efficacy available

INDICATIONS

- Hydrate the skin.
- Reduce deep wrinkles and fine lines.
- Personalize masks.

Create your own personalized hyaluronic acid masks with our 100% natural base powder. Our mixlab mask blender allows you to easily blend the powder with water, and you can enhance the mask's benefits by adding 1-2 ml of any meso solution. The resulting mask has a firm, refreshing, and highly moisturizing texture, thanks to its low molecular weight hyaluronic acid and sorbitol content.

Our hyaluronic mix-mask is a new generation of face masks that can be customized for each skin type and treatment. They're safe to use after any medical or aesthetic procedures, as they don't cause inflammation or allergies.

Our masks are fresh and prepared on the go for each customer, offering an extremely cost-effective solution. The formulation of our hyaluronic mix-mask is the most natural and skin-friendly on the market, composed of specific natural gums, hyaluronic acid, sorbitol, and potassium.

The gel that forms after mixing the powder with water is thermo-reversible, meaning that it becomes fluid at high temperatures and turns into a stronger gel as the temperature decreases. If the mask breaks during application, it can be melted again to create a new one.

Unlike other similar products that use compressed tablets, our formulation is presented as a free powder, which allows us to avoid incorporating a blend of sodium bicarbonate and citric acid to produce the tablet's disintegration. Our mask has the perfect balance between elasticity and firmness, ensuring that it's gentle on the skin while still providing optimal hydration and nourishment.

○ WHAT IS DIFFERENT?

- - Cost-effective.
- - Unique hyaluronic acid gel mask.
- - 100% natural.
- - Low carbon footprint product.
- - Preservative free.
- - Can be personalized.
- - Different spring water can be added for each skin type.

○

HYALURONIC MIX-MASK

HOW TO USE?

To create your personalized hyaluronic acid mask using our mixlab blender, follow these simple steps:

- Place the mixing tool without the spring into the blender.
- Add 100 ml of water into the mask blender and start the blender.
- Add the content of the sachet at once, while the blender is running. Mix until the powder is fully dissolved.
- Avoid incorporating air into the mask, wait for 30 seconds after the mixing process stops for the bubbles to rise.
- If desired, add meso solutions, up to 1-2 ml maximum, and mix with the spatula.
- Pour the gel into the mold and place it in the fridge for approximately 5 minutes, until the mask sets.
- Once the mask is set, it's ready to be applied to the skin. Avoid leaving the mask in the fridge for too long, as it may become too cold and lose its elasticity, leading to breakage during application.

By following these simple steps, you can create your personalized hyaluronic acid mask, tailored to specific skincare needs. Enjoy the benefits of a professional-grade mask.

Leave the mask on the skin between 7 to 10 minutes. Pat your skin dry with a towel and follow up with your regular skincare routine, such as applying serum and moisturizer.

ABOUT FORMULATION:

Our hyaluronic acid mask formulation is 100% natural and eco-responsible, with no added preservatives required due to its powder form. This cost-effective and low carbon footprint formulation contains only natural ingredients that dissolve easily and create a unique professional-grade mask on the market.

In addition to its natural ingredients, our hyaluronic acid mask is also safe to use after aesthetic medicine procedures, such as laser treatments, mesotherapy, or chemical peels. Its gentle and nourishing formula helps to soothe and hydrate the skin, promoting faster healing and reducing inflammation.

By using our hyaluronic acid mask, you can enjoy the benefits of a professional-grade product, without compromising on quality or effectiveness. Our natural and eco-responsible formulation ensures that you're not only taking care of your skin, but also the planet.

FRAGRANCE:

Perfume free.

INGREDIENTS:

Sorbitol, Carrageenan, Potassium chloride, Ceratonia siliqua gum, Xanthan gum, Sodium hyaluronate.

MESO-T MASK

ACTIVE INGREDIENTS

Silk, Cellulose..

*Evidence of clinical efficacy available

INDICATIONS

- Moisture the skin.
- Personalize masks.
- Sterile masks.

- SKIN TYPES**
- ACNEIC
 - OILY
 - COMBINATION
 - NORMAL
 - DRY
 - SENSITIVE
 - MATURE

Introducing our MESO-T masks - a compacted cellulose and silk mask that's perfect for post-aesthetic treatments. These masks are activated just before application by adding 15-25 ml of sterile saline solution and 1-2 ml of meso solution. Our masks do not contain any preservatives or chemicals, making them a safe and natural option for your skin.

Our MESO-T masks can be personalized for each treatment by simply activating them with the desired meso solution. This customization allows you to tailor the mask to your specific skincare needs, promoting faster healing and reducing inflammation.

The mask provides an extreme refreshing effect that soothes the skin, leaving it feeling revitalized and nourished. Its gentle formula ensures that it's suitable for all skin types, even the most sensitive ones.

With our MESO-T masks, you can enjoy the benefits of a professional-grade product in the comfort of your own home. They're easy to use, effective, and perfect for those looking for a natural and safe option for their post-aesthetic treatment skincare routine.

○ WHAT IS DIFFERENT?

- - Cost-effective.
- - Prepare sterile mask.
- - Low carbon footprint product.
- - Preservative free.
- - Can be personalized.
- - Different spring water can be added for each skin type.

-
-

MESO-T MASK

HOW TO USE?

Open the packaging of the tissue compacted mask and carefully remove the mask from its protective sheet.

Prepare the activating solution according to the instructions provided. This typically involves adding 15 to 25 ml of liquid (such as water, toner, or serum) to the mask to activate it.

Gently unfold the mask and apply it to your face, starting with the forehead and working your way down to your chin. Make sure the mask is evenly applied and that all areas of your face are covered, including your nose and under your eyes.

Smooth out any air pockets or wrinkles in the mask, so that it fits snugly against your skin.

Relax and leave the mask on for the recommended amount of time, typically between 10-20 minutes.

After the recommended time, carefully remove the mask from your face and discard it. Do not rinse your face, as the remaining product on your skin will continue to absorb and provide benefits.

Gently pat your face to help the remaining product absorb into your skin.

Follow up with your usual skincare routine, such as applying a moisturizer or serum, if desired.

ABOUT FORMULATION:

Compacted tissue mask.

FRAGRANCE:

Perfume free.

INGREDIENTS:

Silk, cellulose.

DEVICES

SKINCARE BLENDER

TECHNICAL INFORMATIONS

- Available in 110 & 220 V.
- CE certified.

KEY FEATURES

- Container with dosage indication.
- Turbo-mix agitator as the one used in laboratory.
- Effective blending.
- Fine dispersion.

The Mixlab skin care blender is a revolutionary device in the beauty industry that effectively mixes skin care products, allowing you to prepare personalized essential creams and much more. The device is ergonomic and user-friendly, with a graduate container for precise dosage of each product used in the formulation.

○ HOW TO USE?

- The blender can be used directly in the jar with the essential cream.
- To prepare the essential cream, add 1 to 5 ml of meso solution into the base.
- The cream base must be at room temperature and not too cold.
- Extract the meso solution using a syringe of 5 ml.
- Proceed in 2 to 3 times to incorporate the meso solution into the cream.
- Mix until the texture is completely uniform.
- Please read the instruction manual carefully before use, to ensure the correct use of the device and to achieve the best results.

DEVICES

MASK BLENDER

TECHNICAL INFORMATIONS

- Available in 110 & 220 V.
- CE certified.

KEY FEATURES

- Heat the product up to 70C degree.
- Magnetic mixing system.
- Easy to clean.
- Short operation time.
- Cold or hot mixing.

The Mixlab mask blender is a revolutionary device in the beauty industry that prepares exclusive and unique masks for professional treatments or home use. It's the first device of its kind and offers an ergonomic and user-friendly design with an efficient heating and magnetic mixing system. The device's quick preparation time and competitive price (less than 1 euro per mask) make it an excellent alternative to collagen sheets or alginates masks.

Our masks are based on 100% natural ingredients and hyaluronic acid, providing nourishing and moisturizing benefits for the skin. They can also be enhanced by adding any meso solution to provide additional skin benefits that are tailored to your unique needs.

With Mixlab mask blender, you can create a personalized and professional-grade mask in the comfort of your own home, or use it in a professional setting for a unique treatment experience. Enjoy the benefits of a natural and effective mask that's tailored to your unique skincare needs.

○ HOW TO USE?

- 1. Put the blending accessory without spring into the cup.
- 2. Put 100 ml of water into the cup.
- 3. Press the function button once so that it lights red.
- 4. Add the powder in one time.
- 5. Wait about 90 seconds till the device stops.
- 6. Check that the mixture is homogeneous, otherwise repeat the operation.
- 7. If needed add 1 ml of meso solution and mix with the spatula.
- 8. Wait 30 seconds for the air to go out of the liquid to avoid bubbles in the mask.
- 9. Unplug the appliance, and pour the liquid into a mould.
- 10. Place the mould into a fridge for 5 minutes.

Please read the instruction manual carefully before use, to ensure the correct use of the device and to achieve the best results.

PRODUCT PORTFOLIO 2023

FUSION MESO was founded in 2007, and our company offers the latest innovations in cosmeceuticals with the highest quality standards. As a multinational company, we specialize in the development, manufacturing, and marketing of aesthetic medicine skincare products.

Our mission is to provide our customers with the highest quality and most effective aesthetic treatments possible. To achieve this goal, we offer maximum technical and educational support to our customers, ensuring that they receive the best possible results from our products.

We're proud to be certified ISO 9001, and our installations comply with European Good Manufacturing practices (GMP). Additionally, our facilities are authorized by the competent health authorities, ensuring that our products meet the highest safety and quality standards.

At FUSION MESO, we're dedicated to providing the best possible skincare solutions for our customers. We're constantly pushing the boundaries of what's possible in cosmeceuticals, and we're committed to staying at the forefront of the industry with our innovative products and exceptional customer support.
