THE COMPANY

## ABOUT EKSEPTION

HB Aesthetics Group was founded on a deep-rooted passion for promoting exceptional skin health and results. Raphael Duerinck, the founder, entered the cosmetics industry with a solid background in aesthetic medicine, driven by the ambition to challenge the traditional market. His innovative concept involved developing skincare products inspired by aesthetic medicine treatments and active ingredients. Drawing on his extensive experience in biochemistry, Raphael crafted results-driven products and professional treatments grounded in proven scientific research.

Raphael Duerinck studied chemistry, engineering processes, dermatology, and biochemistry at the University of Montpellier, France. After working for prestigious pharmaceutical companies, he was inspired to create his own skincare company from scratch, fueled by his passion and creativity. The Ekseption brand is dedicated to peels and skin resurfacing skincare.

With over 20 years of experience in developing professional-grade skincare products, Raphael remains deeply involved in product development. His unwavering values are ingrained in every aspect of Ekseption's operations, culminating in a globally renowned skincare brand that challenges conventional norms.

Our mission is to cater to all skin types, preserving a youthful and healthy appearance by delivering only the highest quality products to our customers. There is no need to settle for anything less than skincare solutions that offer visible results and a unique sensory experience. Ekseption skincare strives to develop personalized and professional routines that lead to radiant, healthy skin. Our products are formulated based on the properties of natural organic acids, available in various concentrations, combinations, and pH levels, allowing customers to progressively build on their results.

Ekseption is a professional skincare brand available in over 45 countries and 13,000 centers worldwide. The product assortment is divided into professional products, such as peels, pre- and post-treatment products, and maintenance products.

We offer comprehensive cosmetic solutions characterized by a high level of innovation and significant scientific contributions. Our company is ISO 9001 and GMP certified for the production and distribution of skincare products.

- 20 years of experience in aesthetic medicine.
- Over 13,000 clinics and beauty salons worldwide, with 37% being doctors and dermatologists.
- 40 official distributors worldwide and available in 45 countries.
- 5.000 sqm production facilities.
- GMP and ISO 9001 certifications.
- Exclusive formulations.

THE COMPANY

## ABOUT EKSEPTION

Our research and observations have revealed that healthy skin is closely linked to an optimal surface pH and a regular renewal process.

All our products aim to maintain or restore optimal pH levels and regulate the skin renewal process. We achieve this by combining cutting-edge in-office procedures with advanced home care. Ekseption is a brand built around this concept.

Significant skin improvement requires professional treatments that address critical issues such as wrinkles, sagging, and unwanted discoloration.

Home care prepares, complements, and protects these results by helping to prevent future damage, preserving healthy skin, and further correcting visible signs of aging.

By combining a personalized at-home regimen with powerful professional treatments like chemical peels, the result is youthful, glowing skin.

Organic acid peels are highly effective treatments for reducing wrinkles, minimizing acne, diminishing pigmentation, and brightening skin tone. After just one session, they improve skin texture for a radiant complexion. They can be used as a standalone treatment or as part of a program.

Unlike peels based on phenol or TCA, these treatments do not present any risks.

We are committed to creating highly effective products that are suitable even for sensitive skin, with the goal of improving the quality of life for those with various skin concerns, ranging from acne to aging. We also aim to raise awareness about the hazards of UV exposure and the importance of using high-quality sunscreens.

THE COMPANY

## THE SKIN pH

The key to healthy skin: superficial skin pH

Under normal conditions, the skin has a superficial pH between 4.7 and 5.2, which gradually increases to a pH of 7 in the dermis.

Under normal physiological conditions, the density of the corneal layer results from the quality of corneocytes (keratin filaments, amorphous substances) and their intercellular cohesion (lipid cement) to form an effective diffusion barrier. The construction of a robust and healthy skin barrier in the epidermis is controlled by enzymes, and the activity of these enzymes depends directly on pH.

Enzymes are activated or deactivated based on the pH level. Consequently, changes in the pH gradient can lead to the degradation of the structure and functions of the epidermis.

Various factors can significantly increase the skin's pH: soaps and many cosmetic products are often too alkaline with a pH above 5; environmental conditions; or even the water we use daily to rinse our face. The consequence is a slowdown in the natural exfoliation cycle. The corneal layer becomes thicker, resulting in reduced mitotic activity of basal cells and an overproduction of lipids. If the skin is not mechanically exfoliated, it becomes oily and prone to imperfections due to the disorder of the skin microflora, which is also regulated by pH.

Conversely, excessive use of products that are too acidic, environmental conditions, or the use of hard water (acidic) to rinse the face can reduce the superficial pH. The consequence is an acceleration of the natural exfoliation cycle. The corneal layer becomes thinner, speeding up the mitotic activity of basal cells and causing underproduction of lipids. This leads to dry, hypersensitive skin and redness.

THE COMPANY

## SKIN RESURFACING WITH EKSEPTION

In our R&D process, we consider all the factors: risks, side effects, customer social life, treatment discomfort, and external factors (UV, pollution) to deliver state-of-the-art formulations.

Unlike other brands involved in peeling and skin resurfacing, we decided to adopt a more progressive, safe, and efficient approach to skin renewal.

We developed a full range of products offering immediate and long-lasting results without downtime and discomfort. From cleansers to serums or peels, we provide a complete line to build an efficient routine at home and with your beauty therapist.

### 1- Treatment objectives setup

Based on your skin type and concerns, the therapist will suggest an appropriate type of peeling and products to use before and after each treatment.

### 2- Activation (7 to 14 days)

An activator prepares the skin for the peeling application by reducing the superficial pH to around 4.5, micro-exfoliating dead cells on the surface, and decreasing melanocyte activity.

### 3- Photo protection

During the entire activation period, protect your skin from solar radiation and free radicals with a specially formulated low-pH SPF.

### 4- First peeling

The initial peeling session with the therapist is conservative to assess the skin's reaction to the product during application and the first repair phase.

### 5- Repair (7 days)

In the morning, apply our SPF to shield the skin from UV rays. At night, use a repair cream to regulate cellular renewal and minimize potential redness.

### 6- Subsequent peelings

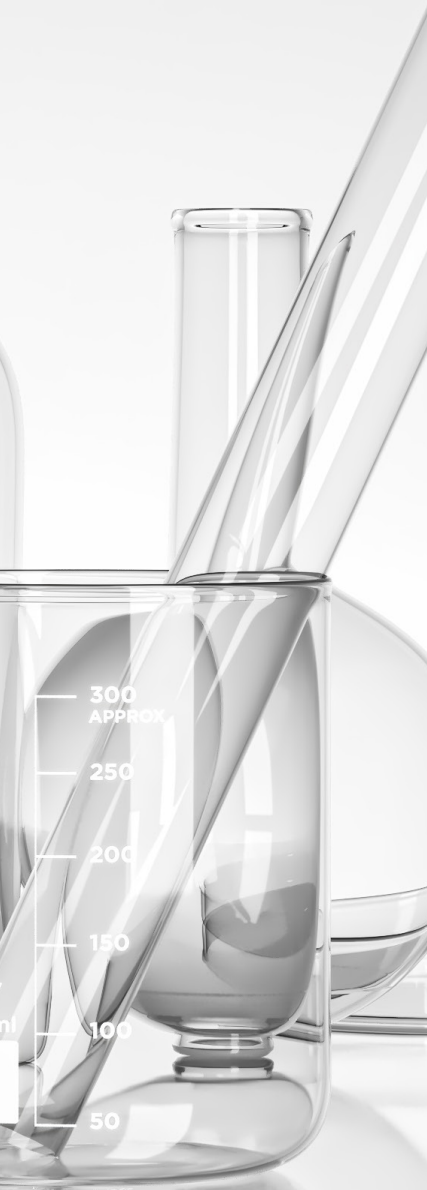

As needed, the therapist will perform additional peeling sessions to safely and gradually reach deeper skin layers in a controlled manner.

### 7- Remodelling (7 to 14 days)

After the final peeling, protect your skin from UV exposure with our SPF during the day and apply a repair cream at night until the skin is fully regenerated.

### 8- Skincare regimen

The therapist will recommend ekseption skincare products for ongoing maintenance. Using these products will help maintain healthy skin with an optimized pH.

THE COMPANY

## RESEARCH, DEVELOPMENT

Our team is composed of a unique group of chemists, pharmacists, and doctors who are committed to creating and testing new formulations every year. We continuously seek out and review new powerful active ingredients and incorporate them into our formulations to ensure that our products are the most effective in the market. For example, we have developed revolutionary products such as the DMKS delivery system in our peels, as well as skin cooling textures, ice cream textures and much more.

We stay up-to-date with the latest developments in the industry to ensure that our products are always innovative and effective.

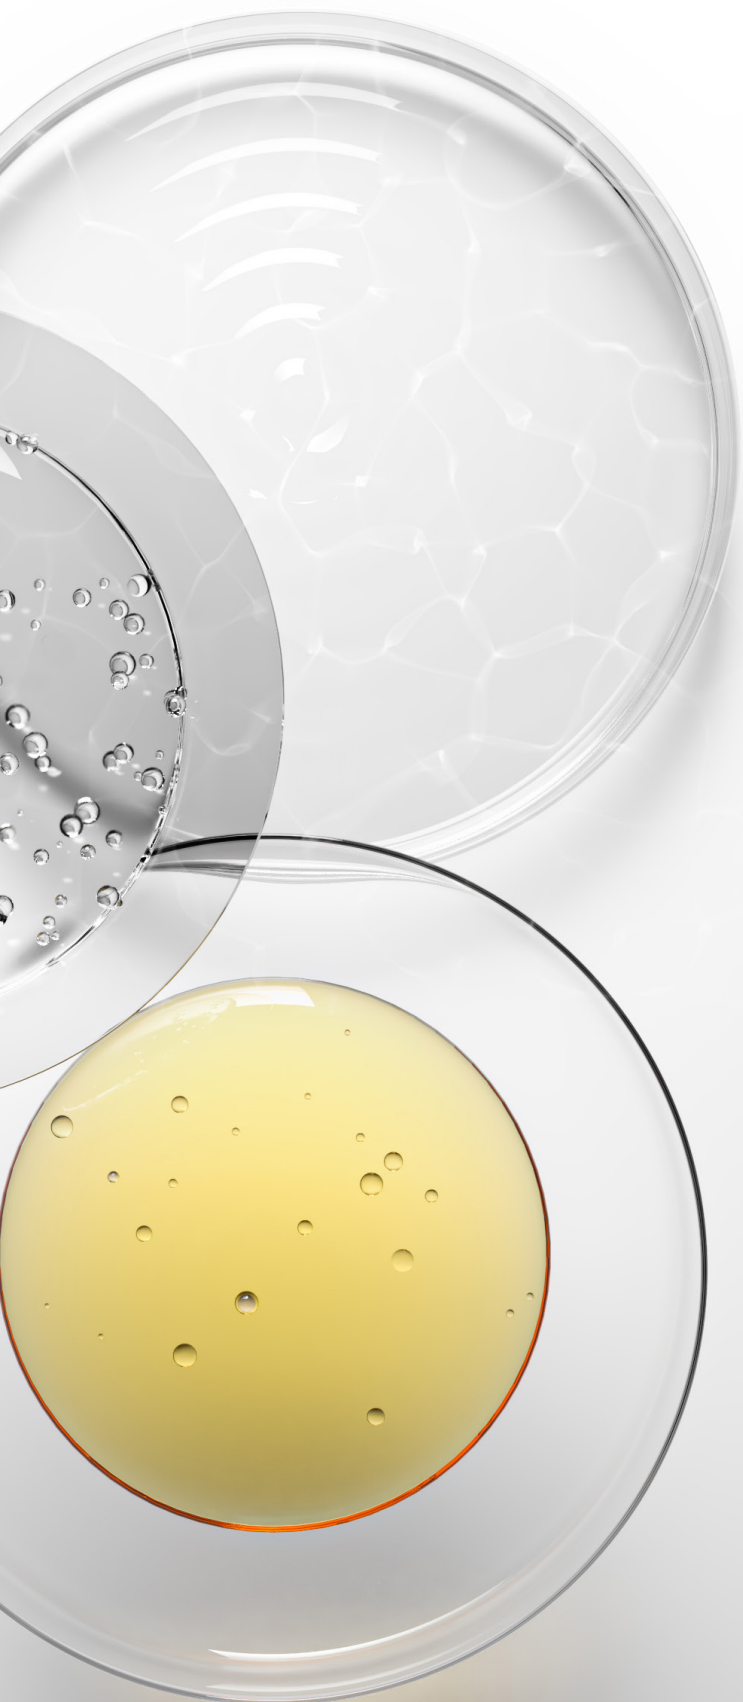

Our HB Aesthetics technical director, studied pharmacy at the University of Barcelona and has been with the group for eight years. She started as a product formulator and is now leading the R&D department. She has developed many unique formulations throughout her career in personal care and is an industry expert in emulsion technologies. She is also the mastermind behind many of our ground breaking technologies.

## MANUFACTURING

All of our products are manufactured in our own facilities in Spain. We use the best practices and equipment for the production of ekseption skincare. We also manage our logistics to ensure a high level of service, from start to finish for every order. As a European company, we comply with European manufacturing standards ISO and GMP regulations, so you can be confident in the consistent quality you will find in each and every product.

Using external audits, we continually monitor the quality of our services and processes to refine every step. The result is the highest quality made by people who are passionate about effective and performing products.

### **SCIENCE & TRUTH**

We are committed to using only active ingredients that have been scientifically proven to be effective, rather than blindly following trends. Our formulation philosophy is centred on a clean and minimalist approach, utilizing only the necessary ingredients to enhance skin health while preserving the integrity of our products. We prioritize high-quality raw materials, primarily from natural sources or sustainably produced.

We believe that skincare should be grounded in research and clinical evidence, and that our customers deserve the very best in terms of quality and results. All of our ingredients are carefully selected based on their proven efficacy in clinical studies. We work closely with leading dermatologists and scientists to identify the most effective ingredients.

### **HIGHLY EFFECTIVE BUT NON-IRRITATING**

Our products are highly effective yet non-irritating, and while we cannot promise miracles, we guarantee results. We formulate our products with active ingredients in appropriate concentrations and optimal pH levels, using only what the skin needs and nothing more.

### **ENVIRONMENTALLY CONSCIOUS**

We are also environmentally conscious and actively seek out sustainable and environmentally-friendly ingredients to reduce our carbon footprint.

### **INGREDIENTS WE AVOID**

To ensure the safety of our customers, we avoid using ingredients such as 1,4 dioxane, abrasive particles, aluminum, formaldehyde or formaldehyde-releasing preservatives (DMDM hydantoin, Diazolidinyl urea, Quaternium 15), phthalates, sodium lauryl sulfate, dyes and coloring, talc, toluene, harmful solvents, parabens, thiazolone, paraffin oils, triethanolamine, ammonium hydroxide, or chelating agents (EDTA).

### **SMART & SAFE BEAUTY**

We believe in smart and safe beauty, using only the best natural and synthetic ingredients that have proven benefits. Our products are cruelty-free and vegan, and recommended by over 15,000 professionals worldwide, and sold in over 64 countries. We offer a unique range of daily skincare products that meet the highest standards in efficacy and tolerance, with elegant textures that are pleasant to use. All of our products are fully labelled and feature a use-by date to ensure their freshness.

THE COMPANY

## EDUCATION

Ekseption has a strong online educational program and a network of learning centres worldwide. Our educational courses, like our products, ensure that the Ekseption brand experience is consistent globally. Since our brand is primarily sold through professionals, it is essential for everyone using our products to have the same level of knowledge. This provides customers with the best experience with our products for their skin condition.

We have a dedicated team for education and support who conduct training events at our educational centre near Barcelona. We also travel worldwide to train professionals on Fusion Meso products and protocols.

Our education managers have worked within the aesthetic medicine industry for many years. Through their experience in the industry with various technical skincare brands, they successfully treated clients and developed training programs and educational strategies worldwide. Their goal is to empower and inspire professionals by sharing their knowledge and experiences to help them reach their full potential.

### **PACKAGING**

We are committed to using sustainable packaging. All plastics we use are 100% recyclable. We have replaced some plastic packaging with glass packaging and continuously seek to use lighter and more eco-friendly packaging.

### **UP-CYCLING**

In our factory, all plastic materials typically used to pack orders, such as tape, filling, and wrapping materials, have been replaced by recycled cardboard. Additionally, our cardboard waste is up-cycled into filling materials.

### **POWERED BY SOLAR ENERGY**

Our new factory is equipped with 50 kW of solar panels and is totally self-sufficient in energy. Our carbon footprint is negative, and we even supply green electricity to the network, allowing us to offset our overall carbon footprint.

### **INGREDIENTS**

We are committed to reducing our carbon footprint and actively seeking sustainable and environmentally friendly ingredients. We do not use any raw materials that could pose a danger to the environment. All our wastewater is filtered, and all the cleaning products we use are 100% biodegradable and ecological.

### **SOCIAL**

We are committed to responsible social policies and offer the best working conditions to our employees. We offer reduced working time and an optimal schedule to allow all our employees to balance their personal and professional lives as well as possible. At HB Aesthetics, we have a strong company culture that is passed down from experienced staff to new hires. We collaborate on meaningful projects and products with a focus on motivation and happiness.

HB aesthetics is dedicated to operating responsibly, and is motivated to build an organization based on uncompromising ethics, integrity, fairness, diversity, and trust. We aspire to foster a culture of respect for people and the environment in order to be a positive influence in every community we serve.

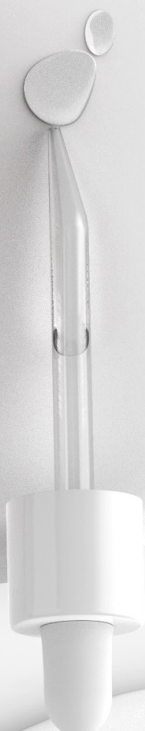

PEELINGS

THE PRODUCTS

Ingredients: Aqua (Water), Lactic acid, Gluconolactone, Dimethylisoborbide, Mandelic acid, Ethoxydiglycol, Sodium acetate, Lactobionic acid, PEG/PPG-14/4 Dimethicone, Sodium hyaluronate, Acetyl hexapeptide-51 amide, Palmitoyl hexapeptide-12, Palmitoyl tripeptide-1, Glycerin, Butylene glycol.

Ingredients: Diisopropyl adipate, Butylene glycol, Dimethylisoborbide, Lactic acid, Ferulic acid, Ethoxydiglycol, Water (aqua), Nonapeptide-1, Acetyl hexapeptide-51 amide, Palmitoyl hexapeptide-12, Palmitoyl tripeptide-1, Dextran, Sodium lactate, Glycerin.

PEELINGS

- degreasing solution
- carboxy neutralizer
- hyaluronic carboxy neutralizer
- age-less+ peptide peel
- white-up+ peptide peel
- ferulic peptide peel
- couperix peptide peel
- caviar peptide peel
- pure skin peel
- retin-oil peel
- soft touch peel
- water infusion peel

Chemical peels are cosmetic treatments that involve applying a chemical solution to the skin, causing it to exfoliate and eventually peel off. The goal is to reveal a smoother, more even, and younger-looking layer of skin underneath. Chemical peels can address various skin concerns, including fine lines, wrinkles, hyperpigmentation, acne, and uneven skin tone.

There are three primary types of chemical peels, which vary in strength and the depth of the exfoliation they provide:

**Light (superficial) peels:** These peels use mild acids, such as alpha-hydroxy acids (AHAs) like phytic, lactic, or mandelic acid. Light peels only target the outer layer of the skin (epidermis) and are suitable for treating mild skin issues, improving skin texture, and providing a refreshed appearance. They generally have minimal downtime and can be repeated every few weeks.

**Medium peels:** Medium-depth peels use stronger acids, such as trichloroacetic acid (TCA), to penetrate the outer and middle layers of the skin. They are more effective in treating moderate skin concerns, such as deeper wrinkles, uneven pigmentation, and acne scars. Medium peels require some downtime for recovery, and the treatments can be repeated once a year.

**Deep peels:** These peels use the strongest chemical solutions, like phenol, to reach the deeper layers of the skin. Deep peels are highly effective in treating severe skin issues, including deep wrinkles, extensive sun damage, and severe hyperpigmentation. Due to their intensity, deep peels typically have a longer recovery period and may cause significant discomfort. They are often a one-time treatment, as the results can be long-lasting.

#### **What sets ekseption peelings apart?**

- Alcohol-free, preservative-free, and without harmful buffers.
- Utilizes only organic acids (excluding TCA and Phenol).
- Contains polyhydroxy acids.
- Minimizes irritation and ensures maximum comfort during application.
- No risk of hyperpigmentation or side effects.
- Features active peels with peptides, and natural extracts.
- Exclusive DMKS delivery system.
- Low surface tension for optimal skin covering.
- Gel-infused with hyaluronic acid for even application and enhanced hydration.

## PEELINGS

### degreasing **solution**

#### ACTIVE INGREDIENTS

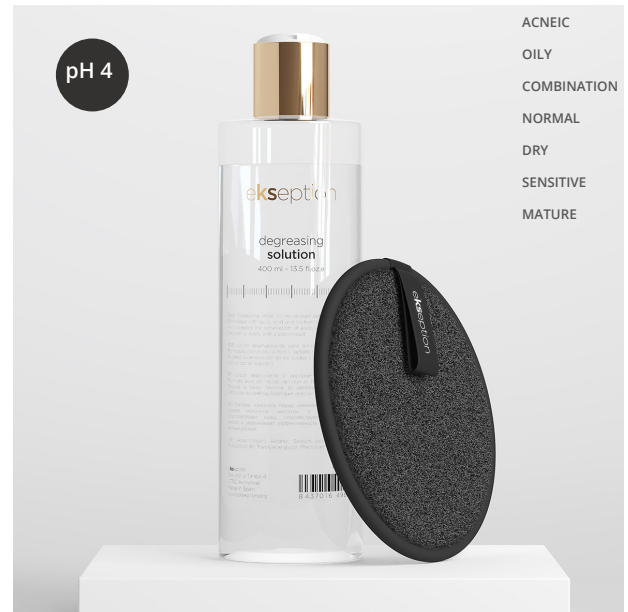

Lactic acid (0,25%), Sodium lactate (1.5%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Remove oil on the skin before peelings.
- Remove dead cells and impurities.

If you are planning to do a chemical peel or other type of exfoliation, make sure to thoroughly cleanse your skin beforehand to remove any oil.

Before applying a chemical peel, it is crucial to thoroughly cleanse the skin and remove any excess oils. The best way to prepare the skin for a peel is to use a degreasing solution, which is a gentle lotion that contains lactic acid, sodium lactate, and alcohol. This solution helps to remove any excess oils and prepare the skin for the peel.

Sodium lactate is the sodium salt of lactic acid and has keratolytic properties. It is produced by fermenting a sugar source, such as corn or beets, and then neutralizing the resulting lactic acid. Sodium lactate is a natural moisturizing factor (NMF) constituent of the skin and is essential for maintaining natural hydration. It is a superior moisturizer that can increase the moisture content of the skin by up to 84%. Compared to other commonly used moisturizers, its water-holding capacity is second only to hyaluronic acid. Sodium lactate effectively forces cells to hold water, which helps to deeply hydrate the skin.

As an alpha-hydroxy acid (AHA), lactic acid works by breaking down the bonds between dead skin cells, helping to slough off the outermost layer of the skin and revealing newer, fresher skin underneath.

Using a degreasing solution prior to peels not only removes excess oils but also increases skin moisture content. This helps to improve the penetration of acids into the epidermis and provides a more intense, even, and effective peeling. By removing excess oils and deeply moisturizing the skin, the degreasing solution prepares the skin for the peel and ensures the best possible results.

#### WHAT IS DIFFERENT?

- Much softer than acetone or 90 alcohol.
- Contains lactic acid to remove dead cells.

PEELINGS

## degreasing **solution**

### **HOW TO USE?**

- Start by washing the face with a cleanser and patting it dry with a clean towel.
- Apply a small amount of the skin degreasing solution to a cotton pad or ball.
- Gently swipe the cotton pad or ball over your face, focusing on areas where there is excess oil or buildup. Be sure to avoid the eye area.
- Allow the solution to dry completely before applying the peeling.

By using a skin degreasing solution prior to a chemical peel or other exfoliation, you can ensure that your skin is thoroughly cleansed and prepared for the treatment. This will help to improve the penetration of the exfoliating agents into the skin, resulting in a more even and effective treatment.

### **ABOUT FORMULATION:**

Degreasing solution is a water-like lotion, it offers excellent tolerance profile on skin and mucous membranes despite the alcohol in the formulation.

### **FRAGRANCE:**

Energetic, green, fresh leaves.

### **INGREDIENTS:**

Aqua (Water), Alcohol., Sodium lactate, Lactic acid, Polysorbate 80, Triethylene glycol, Phenoxyethanol, Parfum.

## PEELINGS

### carboxy **neutralizer**

#### ACTIVE INGREDIENTS

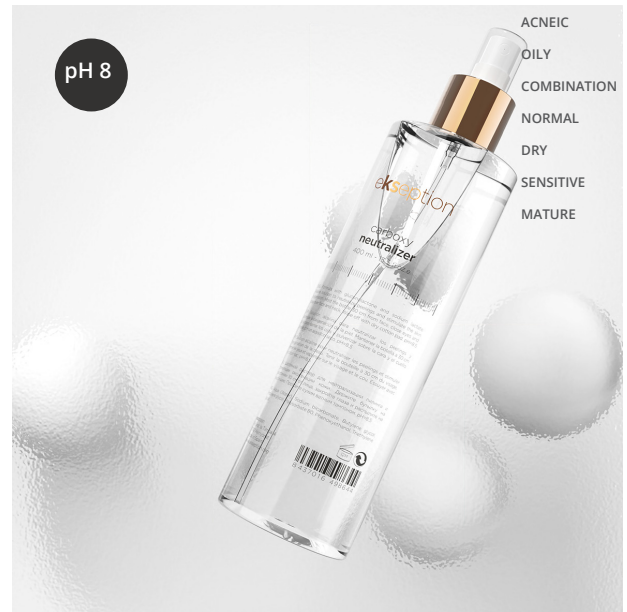

Sodium bicarbonate.

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Neutralize free acids after peels.
- Enhance skin oxygenation through the carboxy effect.

Avoid applying an excessive amount of neutralizer. After neutralization, do not let the neutralizer remain on the skin. Instead, remove it with a sponge and rinse the skin with cold water.

Alkaline lotion with sodium bicarbonate neutralizes chemical peels. The reaction between sodium bicarbonate and an acid produces a salt and carbonic acid, which decomposes into carbon dioxide and water.

For example, with lactic acid, sodium bicarbonate reacts to produce sodium lactate, CO<sub>2</sub>, and water.

Neutralizing a chemical peel is necessary to halt its action on the skin. If a peel is not neutralized or only rinsed with water, unreacted free acids can remain on the skin. The reaction between the acid and skin proteins will continue until all the acid is consumed, resulting in further penetration of the peel into the epidermis over the following hours.

This may lead to uncontrolled post-exfoliation and skin inflammation. Neutralizing the peel during the procedure ensures no additional redness or inflammation occurs.

We developed a carboxy neutralizer containing sodium bicarbonate that can be easily sprayed onto the face to stop the action of chemical peels. Upon contact with free acids, the chemical reaction with sodium bicarbonate is instantaneous, and bubbles can be observed. These bubbles are due to the release of CO<sub>2</sub>. If you don't see bubbles when applying the neutralizer, it means all the applied acid has already reacted with the skin proteins and no free acid is left.

The release of CO<sub>2</sub> benefits the skin, as the body responds by producing an intense skin oxygenation known as the "Bohr effect." When the CO<sub>2</sub> concentration in the skin increases, hemoglobin proteins release their oxygen load, making it bio-available for cells.

Due to its alkaline pH, it's essential not to apply too much neutralizer or leave it on the skin, as doing so could reduce the effectiveness of the peel.

#### WHAT IS DIFFERENT?

- Does not contain sodium hydroxide or ammonia.
- Promotes skin oxygenation.

PEELINGS

## carboxy **neutralizer**

### **HOW TO USE?**

- Ensure the chemical peel has been applied and left on the skin for the recommended duration specified.
- Shake the spray bottle of neutralizer well before use.
- Hold the bottle about 15 to 20 centimeters away from your face, ensuring eyes are closed and mouth is covered.
- Spray the neutralizer evenly over the treated area, making sure to cover all the areas where the peel was applied. You may notice bubbling as the neutralizer reacts with the remaining acid, which is normal.
- Allow the neutralizer to sit on your skin for the recommended time, typically about 30 seconds to 1 minute.
- After the neutralizer has had time to react with the remaining acid, gently remove it from the skin using a soft, damp sponge or cloth. Make sure to use cold or lukewarm water to rinse the skin thoroughly, removing all traces of the peel and neutralizer.
- Gently pat your skin dry with a clean towel, and follow up with any recommended post-treatment skincare products.

### **ABOUT FORMULATION:**

Carboxy neutraliser is a water-like lotion with an alkaline pH.

### **FRAGRANCE:**

Neutral, perfume free.

### **INGREDIENTS:**

Aqua (Water), Butylene glycol, Propylene glycol, Sodium bicarbonate, Polysorbate 80, Phenoxyethanol, Triethylene glycol.

## PEELINGS

# hyaluronic carboxy **neutralizer**

### ACTIVE INGREDIENTS

Sodium bicarbonate, Hyaluronic acid MW (1%)\*.

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Neutralize free acids after peels.
- Enhance skin oxygenation through the carboxy effect.

Avoid applying an excessive amount of neutralizer. After neutralization, do not let the neutralizer remain on the skin. Instead, remove it with a sponge and rinse the skin with cold water.

Alkaline gel with sodium bicarbonate neutralizes chemical peels. The reaction between sodium bicarbonate and an acid produces a salt and carbonic acid, which decomposes into carbon dioxide and water.

For example, with lactic acid, sodium bicarbonate reacts to produce sodium lactate, CO<sub>2</sub>, and water.

Neutralizing a chemical peel is necessary to halt its action on the skin. If a peel is not neutralized or only rinsed with water, unreacted free acids can remain on the skin. The reaction between the acid and skin proteins will continue until all the acid is consumed, resulting in further penetration of the peel into the epidermis over the following hours.

This may lead to uncontrolled post-exfoliation and skin inflammation. Neutralizing the peel during the procedure ensures no additional redness or inflammation occurs.

We developed a carboxy neutralizer containing sodium bicarbonate and hyaluronic acid in a gel-like texture, which can be easily massaged onto the face to halt the action of chemical peels. Upon contact with free acids, the chemical reaction with sodium bicarbonate occurs instantly, and bubbles may be observed. These bubbles result from the release of CO<sub>2</sub>. If you don't see bubbles when applying the neutralizer, it indicates that all the applied acid has already reacted with the skin proteins, leaving no free acid behind.

The release of CO<sub>2</sub> benefits the skin, as the body responds by producing an intense skin oxygenation known as the "Bohr effect." When the CO<sub>2</sub> concentration in the skin increases, hemoglobin proteins release their oxygen load, making it bio-available for cells.

Due to its alkaline pH, it's essential not to apply too much neutralizer or leave it on the skin, as doing so could reduce the effectiveness of the peel.

## PEELINGS

### age-less+ peptide peel

#### ACTIVE INGREDIENTS

Total acid concentration: 29%.

Lactic acid\*, Gluconolactone\*, Lactobionic acid\*, Mandelic acid\*, Sodium lactate, Acetyl hexapeptide-51\* (1%), Palmitoyl Tripeptide-1\* (1%), Palmitoyl Hexapeptide-12\* (1%), Hyaluronic acid XS\* (1%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Skin aging.
- Skin sagging and wrinkles.
- Skin hydration.
- Restore the skin pH gradient.
- Activate exfoliating enzymes.
- Overall skin radiance.

Mid-Superficial Peel for Age-Defying Results: Address signs of skin aging, loss of firmness, sagging, and wrinkles with this professional treatment that combines a potent blend of acids (AHA, AAHA & PHA) with a high concentration of hyaluronic acid and peptides. Our exclusive DMKS delivery system ensures maximum comfort during application, optimal delivery of free acids, and minimal redness and inflammation.

This treatment initiates a pH shock that stimulates skin renewal functions in both the dermis and epidermis. With repeated applications, deep wrinkles become less visible, and fine lines are eliminated. It also provides a noticeable lifting effect and enhances skin hydration. Peptide-active peels are an ideal solution for mature, aging skin.

The effectiveness of this treatment stems from the synergy between various acids, hyaluronic acid, and peptides. Acids help moisturize the skin and exfoliate dead cells, while also facilitating the penetration of low molecular weight peptides into the dermis. Once there, peptides activate fibroblasts to increase the synthesis of collagen, elastin, and hyaluronic acid, resulting in a rejuvenated complexion.

#### WHAT IS DIFFERENT?

- Features a blend of 4 different acids.
- Gel formulation enriched with hyaluronic acid.
- Includes peptides.
- Utilizes the DMKS delivery system.
- Alcohol-free.
- Low surface tension for even peeling.
- Minimizes redness and inflammation.
- No burning sensation upon application.
- Free of harmful buffers (sodium hydroxide, ammonia, ammonium hydroxide, etc.).
- Preservative-free.

## PEELINGS

### age-less+ **peptide peel**

#### **THE ACIDS:**

Lactic acid: Low molecular weight, to penetrate deep layers and promote keratolysis.

Gluconolactone and lactobionic acid: High molecular weight to treat very superficial layers with anti-aging properties.

Mandelic acid: Medium molecular weight to treat intermediate layers with anti-aging properties.

Sodium lactate: To stabilize the product pH and moisturize the skin.

Please refer to the ingredient glossary for more information on each acid.

#### **STRENGTH:**

Mid-superficial

#### **PROTOCOL:**

Contact time between layers: 3 minutes.

Maximum layers: 2

Recommended sessions: 3

Downtime between peels: 7 to 10 days.

#### **HOW TO USE?**

Cleanse and degrease the face and neck. Place 4 to 5 pipettes of product in a glass cup. With a fan brush, apply to the face starting with the less sensitive areas (neck, forehead, cheeks, nose, chin, jawlines, and lip contours). Do not apply close to the eyes.

Wait for the indicated contact time, and if needed, apply more layers. Never exceed the recommended contact time or layers. When the skin becomes slightly pink, neutralize the peeling.

For one-time peel or the first peeling without activation protocol:

We recommend applying a pre-peel when there was no skin conditioning. Cleanse and degrease the face and neck.

Place 4 to 5 pipettes of Soft Touch Peel in a glass cup. With a fan brush, apply to the face starting with the less sensitive areas (neck, forehead, cheeks, nose, chin, jawlines, and lip contours). Do not apply close to the eyes.

Leave for 3 minutes. Remove with a damp towel and dry the skin with a cotton pad.

Then apply the peeling as per the previous protocol.

#### **RECOMMENDED PRODUCTS:**

Activation: all-day shield + PHA Activator

Repair: all-day shield + ice cream repair or caviar repair depending on the skin type.

#### **ABOUT FORMULATION:**

The formulation is a gel with hyaluronic acid and DMKS delivery system.

#### **FRAGRANCE:**

Neutral, fragrance-free.

#### **INGREDIENTS:**

Aqua (Water), Lactic Acid, Gluconolactone, Dimethyl Isosorbide, Mandelic Acid, Ethoxydiglycol, Sodium Lactate, Lactobionic Acid, PEG/PPG-14/4 Dimethicone, Sodium Hyaluronate, Acetyl Hexapeptide-51 Amide, Palmitoyl Tripeptide-1, Palmitoyl Hexapeptide-12, Glycerin, Butylene Glycol.

## PEELINGS

### white-up+ peptide peel

#### ACTIVE INGREDIENTS

Total concentration of acids: 29%.

Phytic acid\*, Mandelic acid\*, Gluconolactone\*, Lactobionic acid\*, Tranexamic acid\*, Sodium lactate, Nonapeptide-1\* (2%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Photo-aging (skin aging caused by excessive UV exposure).
- Reduce skin pigmentation.
- Reduce brown spots.
- Restore the skin pH gradient.
- Activate exfoliating enzymes.
- Increase overall skin radiance.

Mid-superficial peel to treat photo-aging and pigmentation. This professional treatment combines different acids (AHA, AAHA & PHA) with a high concentration of peptides. It includes our exclusive dmks delivery system for maximum comfort during application, high delivery of free acid, minimal redness, and inflammation.

The treatment creates a pH shock that activates skin renewal functions in the dermis and epidermis. It specifically targets melanocytes to reduce skin pigmentation. The acids in the formula have high and medium molecular weights to limit their penetration beyond the epidermis and specifically target the basal layer.

The skin-whitening effect is achieved through the removal of the horny layer (skin becomes smoother & lighter) and the reduction of melanin synthesis by tranexamic acid and peptides. Just one application can lighten pigmented spots and reduce pigmentation. Besides the whitening effect, tranexamic acid also reduces the translucent reddish color of superficial blood vessels. The result is an even complexion.

#### WHAT IS DIFFERENT?

- Features a blend of 5 different acids.
- Includes peptides.
- Utilizes the DMKS delivery system.
- Alcohol-free.
- Low surface tension for even peeling.
- Minimizes redness and inflammation.
- No burning sensation upon application.
- Free of harmful buffers (sodium hydroxide, ammonia, ammonium hydroxide, etc.).
- Preservative-free.

## PEELINGS

Recommended sessions: 3

Downtime between peels: 7 to 10 days.

#### **HOW TO USE?**

Cleanse and degrease the face and neck. Place 4 to 5 pipettes of product in a glass cup. With a fan brush, apply to the face starting with the less sensitive areas (neck, forehead, cheeks, nose, chin, jawlines, and lip contours). Do not apply close to the eyes.

Wait for the indicated contact time, and if needed, apply more layers. Never exceed the recommended contact time or layers. When the skin becomes slightly pink, neutralize the peeling.

For one-time peel or the first peeling without activation protocol:

We recommend applying a pre-peel when there was no skin conditioning. Cleanse and degrease the face and neck.

Place 4 to 5 pipettes of Soft Touch Peel in a glass cup. With a fan brush, apply to the face starting with the less sensitive areas (neck, forehead, cheeks, nose, chin, jawlines, and lip contours). Do not apply close to the eyes.

Leave for 3 minutes. Remove with a damp towel and dry the skin with a cotton pad.

Then apply the peeling as per the previous protocol.

#### **RECOMMENDED PRODUCTS:**

Activation: all-day shield + ferulic activator .

Repair: all-day shield + ice cream repair or glaciari repair depending on the skin type.

#### **ABOUT FORMULATION:**

The formulation is liquid with DMKS delivery system.

#### **FRAGRANCE:**

Neutral, fragrance-free.

#### **INGREDIENTS:**

Aqua (Water), Gluconolactone, Dimethyl isosorbide, Mandelic acid, Ethoxydiglycol, Phytic acid, Sodium lactate, Lactobionic acid, Tranexamic acid, Nonapeptide-1, Dextran, Butylene glycol, PEG/ PPG-14/ 4 Dimethicone.

## PEELINGS

### ferulic **peptide peel**

#### ACTIVE INGREDIENTS

Total concentration of acids: 19%.

Ferulic acid\*, Lactic acid\*, Sodium lactate, Nonapeptide-1\* (2%), Acetyl hexapeptide-51\* (1%), Palmitoyl Tripeptide-1\* (1%), Palmitoyl Hexapeptide-12\* (1%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

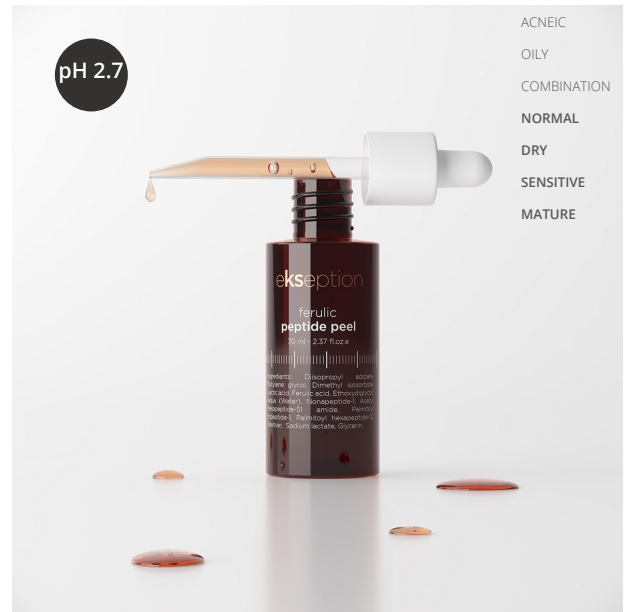

- Photo-aging (skin aging caused by excessive UV exposure).
- Skin sagging and wrinkles.
- Reduce skin pigmentation.
- Reduce brown spots.
- Restore the skin pH gradient.
- Activate exfoliating enzymes.
- Increase overall skin radiance.

Superficial peel to globally treat skin aging (photo & chrono) and neutralize free radicals. Ferulic acid is a potent antioxidant, combined with lactic acid for its keratolytic properties, Acetyl hexapeptide-51 for DNA protection, lipopeptides to reduce wrinkles, and Nonapeptide-1 to decrease blemishes and pigmentation. It includes our exclusive DMKS delivery system for maximum comfort during application, high delivery of free acid, minimal redness, and inflammation.

Due to its composition, it can reduce wrinkles and even out skin tone by diminishing hyperpigmentation and blemishes. The skin regains its natural brightness through the stimulation of skin cell replacement.

The overall skin texture improves, and the treatment reduces transepidermal water loss by increasing ceramide production (essential lipids). The skin becomes hydrated and feels less dry.

This peel is also recommended as a preparation for other aesthetic procedures. The Ferulic Peel System is a very safe peel for sensitive skin. From the first treatment, patients report that their skin feels smoother and tighter, with a lighter and more youthful appearance. The immediate improvement in skin color makes this peel one of the most valuable and beneficial products for sensitive skin.

#### WHAT IS DIFFERENT?

- Features a blend of 3 different acids.
- Includes peptides.
- Utilizes the DMKS delivery system.
- Alcohol-free.
- Low surface tension for even peeling.
- Minimizes redness and inflammation.
- No burning sensation upon application.
- Free of harmful buffers (sodium hydroxide, ammonia, ammonium hydroxide, etc.).
- Preservative-free.

## PEELINGS

### ferulic **peptide peel**

#### THE ACIDS:

Lactic acid: Low molecular weight, to penetrate deep layers and promote keratolysis.

Ferulic acid: Medium molecular weight to treat the intermediate layers with anti-ageing properties.

Sodium lactate: To stabilize the product pH and moisturize the skin.

Please refer to the ingredient glossary for more information on each acid.

#### STRENGTH:

Superficial

#### PROTOCOL:

Contact time between layers: 3 minutes.

Maximum layers: 3

Recommended sessions: 4

Downtime between peels: 7 to 10 days.

#### HOW TO USE?

Cleanse and degrease the face and neck. Place 4 to 5 pipettes of product in a glass cup. With a fan brush, apply to the face starting with the less sensitive areas (neck, forehead, cheeks, nose, chin, jawlines, and lip contours). Do not apply close to the eyes.

Wait for the indicated contact time, and if needed, apply more layers. Never exceed the recommended contact time or layers. When the skin becomes slightly pink, neutralize the peeling.

For one-time peel or the first peeling without activation protocol:

We recommend applying a pre-peel when there was no skin conditioning. Cleanse and degrease the face and neck.

Place 4 to 5 pipettes of Soft Touch Peel in a glass cup. With a fan brush, apply to the face starting with the less sensitive areas (neck, forehead, cheeks, nose, chin, jawlines, and lip contours). Do not apply close to the eyes.

Leave for 3 minutes. Remove with a damp towel and dry the skin with a cotton pad.

Then apply the peeling as per the previous protocol.

#### RECOMMENDED PRODUCTS:

Activation: all-day shield + ferulic activator.

Repair: all-day shield + ice cream repair or glacier repair depending on the skin type.

#### ABOUT FORMULATION:

The formulation is oil-based with DMKS delivery system.

#### FRAGRANCE:

Neutral, fragrance-free.

#### INGREDIENTS:

Diisopropyl adipate, Butylene glycol, Dimethylisobutylidene, Lactic acid, Ferulic acid, Ethoxydiglycol, Aqua (Water), Nonapeptide-1, Acetyl hexapeptide-51 amide, Palmitoyl tripeptide-1, Palmitoyl hexapeptide-12, Dextran, Sodium lactate, Glycerin.

## PEELINGS

### couperix **peptide peel**

#### ACTIVE INGREDIENTS

Total concentration of acids: 11%.

Phytic acid\*, Lactobionic acid\*, Salicylic acid\*, Sodium lactate, Acetyl tetrapeptide-40\* (1%), Pure skin natural blend\* (3%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Couperosis.
- Redness.
- Rosacea.
- Restore the skin pH gradient.
- Activate exfoliating enzymes.
- Increase overall skin radiance.

Superficial peel to treat couperosis and skin redness. This professional treatment combines different acids (AHA, BHA & PHA) with a high concentration of peptides and natural extracts. It features our exclusive DMKS delivery system for maximum comfort during application, optimal delivery of free acid, and minimal redness and inflammation.

The treatment creates a pH shock that activates skin renewal functions in the dermis and epidermis. It specifically targets couperosis and rosacea by restoring a healthy skin microflora.

The anti-redness peptide combats the undesirable effects caused by inflammation, such as skin redness, dilated blood vessels, tissue degradation, post-inflammatory hyperpigmentation, and dull skin.

The organic multi-herbal preparation consists of several plant extracts, including Licorice, Artemisia montana, Ginkgo Biloba, Centella Asiatica, Blueberry, and Rosa canina oil. It offers multiple benefits, such as antioxidant, anti-inflammatory, antimicrobial, and skin-soothing properties.

#### WHAT IS DIFFERENT?

- Features a blend of 3 different acids.
- Includes peptides.
- Includes natural extracts.
- Utilizes the DMKS delivery system.
- Alcohol-free.
- Low surface tension for even peeling.
- Minimizes redness and inflammation.
- No burning sensation upon application.
- Free of harmful buffers (sodium hydroxide, ammonia, ammonium hydroxide, etc.).
- Preservative-free.

PEELINGS

## couperix **peptide peel**

### THE ACIDS:

Phytic acid: Low molecular weight, to penetrate deep layers and reduce dilated blood vessels.

Lactobionic acid: High molecular weight to treat very superficial layers with anti-aging properties.

Salicylic acid: Low molecular weight, to penetrate deep layer with purifying properties and promote keratolysis.

Sodium lactate: To stabilize the product pH and moisturise the skin.

Please refer to the ingredient glossary for more information on each acid.

### STRENGTH:

Superficial

### PROTOCOL:

Maximum layers: 3

Recommended sessions: 4

Downtime between peels: 7 to 10 days.

### HOW TO USE?

Cleanse and degrease the face and neck. Place 4 to 5 pipettes of product in a glass cup. With a fan brush, apply to the face starting with the less sensitive areas (neck, forehead, cheeks, nose, chin, jawlines, and lip contours). Do not apply close to the eyes.

Wait for the indicated contact time, and if needed, apply more layers. Never exceed the recommended contact time or layers. When the skin becomes slightly pink, neutralize the peeling.

For one-time peel or the first peeling without activation protocol:

We recommend applying a pre-peel when there was no skin conditioning. Cleanse and degrease the face and neck.

Place 4 to 5 pipettes of Soft Touch Peel in a glass cup. With a fan brush, apply to the face starting with the less sensitive areas (neck, forehead, cheeks, nose, chin, jawlines, and lip contours). Do not apply close to the eyes.

Leave for 3 minutes. Remove with a damp towel and dry the skin with a cotton pad.

Then apply the peeling as per the previous protocol.

### RECOMMENDED PRODUCTS:

Activation: all-day shield + pure skin activator.

Repair: all-day shield + ice cream repair or glaciari repair depending on the skin type.

### ABOUT FORMULATION:

The formulation is liquid with DMKS delivery system.

### FRAGRANCE:

Neutral, fragrance-free.

### INGREDIENTS:

Aqua (Water), Dimethyl isosorbide, Phytic acid, Sodium lactate, Lactobionic acid, Butylene glycol, PEG/PPG-14/4 Dimethicone, Acetyl tetrapeptide-40, Salicylic acid, Centella Asiatica (Pennywort) extract, Glycyrrhiza Glabra (Licorice) root extract, Artemisia Montana (Mugwort) leaf extract, Vaccinium Corymbosum (Blueberry) fruit extract, Ginkgo Biloba (Ginkgo) leaf extract, Rosa Canina (Rose) fruit oil, Caprylyl glycol.

## PEELINGS

### caviar **peptide peel**

#### ACTIVE INGREDIENTS

Total concentration of acids: 16%.

Lactobionic acid\*, Gluconolactone\*, Sodium lactate, Caviar sevruga extract\* (1%), Palmitoyl Tripeptide-1\* (1%), Palmitoyl Hexapeptide-12\* (1%), Hyaluronic acid XS\* (0.6%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Skin aging.
- Skin sagging and wrinkles.
- Skin hydration.
- Restore the skin pH gradient.
- Activate exfoliating enzymes.
- Overall skin radiance.

A superficial peel designed to address signs of skin aging, such as loss of firmness, sagging, and wrinkles, is ideal for mature and sensitive skin types. This professional treatment utilizes PHA, along with a potent blend of hyaluronic acid, caviar extract, and peptides. Our exclusive DMKS delivery system ensures maximum comfort during application, effective delivery of free acid, and minimal redness and inflammation.

The treatment induces a pH shock that stimulates skin renewal processes in both the dermis and epidermis. Composed solely of polyhydroxy acids, the peel concentrates on swiftly rejuvenating the superficial layers of the epidermis, resulting in optimal skin hydration. Unlike our other anti-aging peels, this caviar peptide peel targets only the most superficial layers, making it an excellent choice for sensitive skin types.

Due to their high molecular weight, PHAs diffuse gradually, remaining confined to the outermost layers of the epidermis, where they retain significant amounts of water. Caviar extract, rich in nutrients such as vitamins and minerals, revitalizes the skin. Hyaluronic acid and peptides work together to diminish deep wrinkles and fine lines.

This premium, gentle peel, when combined with our caviar repair cream, delivers visible improvements in skin texture, wrinkle reduction, hydration, and firmness.

#### WHAT IS DIFFERENT?

- Features a blend PHA.
- Includes peptides.
- Utilizes the DMKS delivery system.
- Alcohol-free.
- Low surface tension for even peeling.
- Minimizes redness and inflammation.
- No burning sensation upon application.
- Free of harmful buffers (sodium hydroxide, ammonia, ammonium hydroxide, etc.).
- Preservative-free.

Repair: all-day shield + caviar repair.

#### **ABOUT FORMULATION:**

The formulation is a gel with hyaluronic acid and DMKS delivery system.

#### **FRAGRANCE:**

Neutral, fragrance-free.

#### **INGREDIENTS:**

Aqua (Water), Dimethyl Isosorbide, Gluconolactone, Lactobionic acid, PEG/ PPG-14/ 4 Dimethicone, Caviar extract, Sodium hyaluronate, Palmitoyl tripeptide-1, Palmitoyl hexapeptide-12, Glycerin, Potassium sorbate.

## PEELINGS

### pure skin **peel**

#### ACTIVE INGREDIENTS

Total concentration of acids: 27%.

Salicylic acid\*, Mandelic acid\*, Gluconolactone\*, Sodium lactate, Pure skin natural blend\* (5%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Oily skin & open pores.
- Acne.
- Rosacea.
- Folliculitis.
- Seborrhoea.
- Restore the skin pH gradient.
- Activate exfoliating enzymes.
- Overall skin radiance.

This superficial peel is designed to treat acne-prone, oily, and impure skin. Our professional treatment combines various acids (AHA, BHA, and PHA) with a high concentration of natural extracts. The exclusive DMKS delivery system ensures maximum comfort during application, effective delivery of free acid, and minimal redness and inflammation.

The synergy of acids and natural extracts effectively addresses impurities, blackheads, oily skin, and enlarged pores. Applying this peel contributes to an improved epidermal structure, enhanced smoothness, and a more even complexion. Salicylic acid provides powerful antiseptic and cleansing properties, normalizing the function of sebaceous glands and resulting in pore contraction. It works in conjunction with mandelic acid and gluconolactone, both of which possess antibacterial properties. Due to their high molecular weight, these acids have limited penetration into the epidermis and act on the skin's surface to purify the microflora.

The herbal preparation consists of licorice, Artemisia Montana, Ginkgo Biloba, Centella Asiatica, blueberry, and rose oil. It offers multiple benefits, including antioxidant, anti-inflammatory, antimicrobial, and skin-soothing effects. This peel is effective not only for treating young, oily skin with significant problems but also for other skin types with impurities or enlarged pores.

#### WHAT IS DIFFERENT?

- Features a blend of 3 different acids.
- Includes natural extracts.
- Utilizes the DMKS delivery system.
- Alcohol-free.
- Low surface tension for even peeling.
- Minimizes redness and inflammation.
- No burning sensation upon application.
- Free of harmful buffers (sodium hydroxide, ammonia, ammonium hydroxide, etc.).
- Preservative-free.

Gluconolactone: High molecular weight to treat very superficial layers with purifying and restructuring properties.

Mandelic acid: Medium molecular weight to treat intermediate layers with anti-aging properties.

Sodium lactate: To stabilize the product pH and moisturize the skin.

Please refer to the ingredient glossary for more information on each acid.

#### **STRENGTH:**

Superficial

#### **PROTOCOL:**

Contact time between layers: 3 minutes.

Maximum layers: 2

Recommended sessions: 3

Downtime between peels: 7 to 10 days.

#### **HOW TO USE?**

Cleanse and degrease the face and neck. Place 4 to 5 pipettes of product in a glass cup. With a fan brush, apply to the face starting with the less sensitive areas (neck, forehead, cheeks, nose, chin, jawlines, and lip contours). Do not apply close to the eyes.

Wait for the indicated contact time, and if needed, apply more layers. Never exceed the recommended contact time or layers. When the skin becomes slightly pink, neutralize the peeling.

For one-time peel or the first peeling without activation protocol:

We recommend applying a pre-peel when there was no skin conditioning. Cleanse and degrease the face and neck.

Place 4 to 5 pipettes of Soft Touch Peel in a glass cup. With a fan brush, apply to the face starting with the less sensitive areas (neck, forehead, cheeks, nose, chin, jawlines, and lip contours). Do not apply close to the eyes.

Leave for 3 minutes. Remove with a damp towel and dry the skin with a cotton pad.

Then apply the peeling as per the previous protocol.

#### **RECOMMENDED PRODUCTS:**

Activation: all-day shield + pure skin activator.

Repair: all-day shield + glacial repair.

#### **ABOUT FORMULATION:**

The formulation is liquid with DMKS delivery system.

#### **FRAGRANCE:**

Neutral, fragrance-free.

#### **INGREDIENTS:**

Aqua (Water), Mandelic acid, Dimethylisobutylidene, Butylene glycol, Ethoxydiglycol, Gluconolactone, Salicylic acid, Centella Asiatica (Pennywort) extract, Glycyrrhiza Glabra (Licorice) root extract, Artemisia Montana (Mugwort) leaf extract, Vaccinium Corymbosum (Blueberry) fruit extract, Ginkgo Biloba (Ginkgo) leaf extract, Rosa Canina (Rose) fruit oil, Sodium lactate, PEG/ PPG-14/ 4 Dimethicone.

## PEELINGS

### retin-oil peel

#### ACTIVE INGREDIENTS

Total concentration of acids: 6%.

Retinol\* (4%), Salicylic acid\* (2%), Vitamin E (2%).

\* EVIDENCE OF CLINICAL EFFICACY

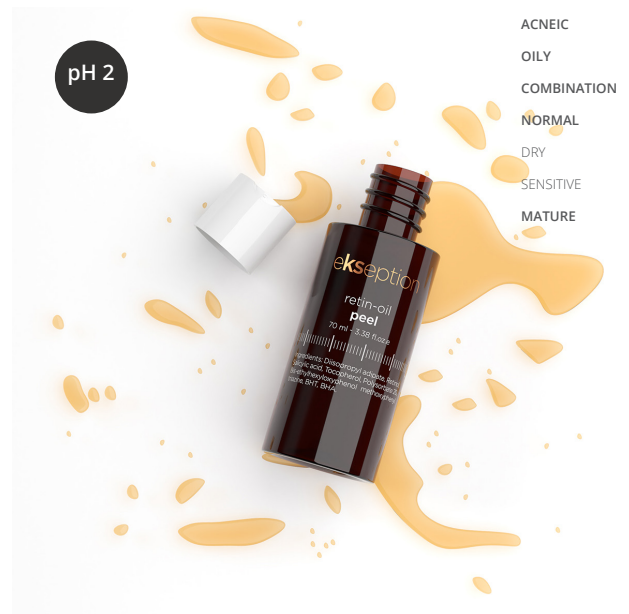

#### INDICATIONS

- Photo-aging (skin aging caused by excessive UV exposure).
- Skin sagging and wrinkles.
- Reduce skin pigmentation.
- Reduce brown spots.
- Oily skin & open pores.
- Acne.
- Restore the skin pH gradient.
- Activate exfoliating enzymes.
- Overall skin radiance.

Our highly keratolytic retinol peel provides comprehensive treatment for skin aging. Retinol enhances the processes of differentiation, proliferation, and intercellular communication. When retinoids enter a cell, they bind with nuclear receptors, which can activate or deactivate specific sections of the cell genome.

Retin-oil does not cause skin damage, and the recovery time is brief with no reported complications. The retinol is combined with salicylic acid for enhanced exfoliation and keratolysis. Salicylic acid contributes to improved epidermal structure, skin texture, and complexion. Its use results in significant skin improvement without the need for additional rejuvenation procedures. Salicylic acid also possesses strong antiseptic and cleansing properties, normalizing sebaceous gland function and leading to pore contraction.

During application, there is no noticeable burning sensation like with other peels. The product, which resembles an oil, should be massaged into the skin until absorbed. The day following application, the skin may exhibit signs of hypersensitivity and minimal redness. Two to three days post-application, the skin will begin to exfoliate for a period of up to seven days.

#### WHAT IS DIFFERENT?

- Features a blend of 2 different acids.
- Includes vitamin E.
- Exclusive oil formulation to stabilize retinol.
- Alcohol-free.
- Low surface tension for even peeling.
- Minimizes redness and inflammation.
- No burning sensation upon application.
- Free of harmful buffers (sodium hydroxide, ammonia, ammonium hydroxide, etc.)
- Preservative-free.

## PEELINGS

### retin-oil **peel**

#### **THE ACIDS:**

Salicylic acid: Low molecular weight, to penetrate deep layer with purifying properties and promote keratolysis.

Retinol: Penetrate deep layers to activate basal cell mitosis and skin renewal.

Please refer to the ingredient glossary for more information on each acid.

#### **STRENGTH:**

Mid-superficial

#### **PROTOCOL:**

Contact time between layers: massage till absorbed.

Maximum layers: 1

Recommended sessions: 2

Downtime between peels: 30 days.

#### **HOW TO USE?**

Cleanse and degrease the face and neck. Dispense 4 to 5 pipettes of product into a glass cup. Using a fan brush, apply the product to the face, beginning with the least sensitive areas (neck, forehead, cheeks, nose, chin, jawline, and lip contours). Avoid applying the product too close to the eyes.

Wearing protective gloves, massage the product into the skin until it is fully absorbed. Then, apply a repair cream or sunscreen, depending on the time of day.

For one-time peel or the first peeling without activation protocol:

We recommend applying a pre-peel when there was no skin conditioning. Cleanse and degrease the face and neck.

Place 4 to 5 pipettes of Soft Touch Peel in a glass cup. With a fan brush, apply to the face starting with the less sensitive areas (neck, forehead, cheeks, nose, chin, jawlines, and lip contours). Do not apply close to the eyes.

Leave for 3 minutes. Remove with a damp towel and dry the skin with a cotton pad.

Then apply the peeling as per the previous protocol.

#### **RECOMMENDED PRODUCTS:**

Activation: all-day shield + pha activator or pure skin activator for oily skin.

Repair: all-day shield + retin-oil booster for more exfoliation, ice cream repair or glacial repair for oily skin types.

#### **ABOUT FORMULATION:**

The formulation is liquid with DMKS delivery system.

#### **FRAGRANCE:**

Neutral, fragrance-free.

#### **INGREDIENTS:**

Diisopropyl adipate, Retinol, Polysorbate 20, Salicylic acid, Tocopheryl acetate, Bis-ethylhexyloxyphenol methoxyphenyl triazine, BHT, BHA.

## PEELINGS

### soft touch **peel**

#### ACTIVE INGREDIENTS

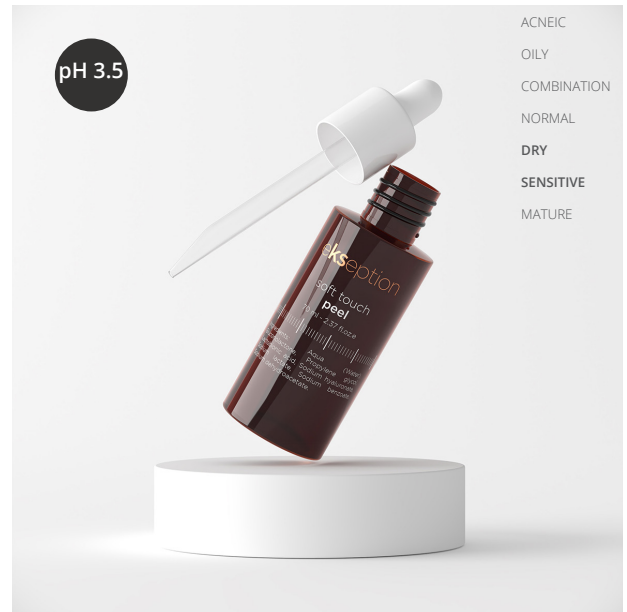

Total concentration of acids: 13%.

Lactobionic acid\*, Gluconolactone\*, Sodium lactate\*,  
Hyaluronic acid XS\* (0.5%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Skin conditioning before stronger peels.
- Hyper-sensitive skin.
- Skin ageing.
- Restore the skin pH gradient.
- Activate exfoliating enzymes.
- Overall skin radiance.

Introducing our revitalizing superficial skin refreshing peel, specifically designed for sensitive and dry skin types. This gentle yet effective peeling solution harnesses the power of polyhydroxy acids, including lactobionic acid and gluconolactone, combined with the hydrating benefits of hyaluronic acid to rejuvenate your skin.

Our unique formula delicately exfoliates the superficial layers of the epidermis, promoting cell renewal and revealing a brighter, more radiant complexion. The polyhydroxy acids, known for their exceptional moisturizing properties, work synergistically to maintain optimal skin hydration while minimizing irritation. Lactobionic acid and gluconolactone, both potent antioxidants, help protect your skin against environmental stressors and free radicals.

Infused with hyaluronic acid, our Superficial Skin Refreshing Peel delivers an intense boost of hydration to your skin, visibly reducing the appearance of fine lines and wrinkles. This carefully crafted blend of ingredients ensures that even the most sensitive and dry skin types can enjoy a refreshed, revitalized complexion with minimal discomfort.

Treat yourself to our gentle yet effective superficial skin refreshing peel and experience the transformative power of polyhydroxy acids and hyaluronic acid. Unveil a smoother, more youthful complexion and rediscover the confidence that comes with healthy, radiant skin.

#### WHAT IS DIFFERENT?

- Features a blend PHA.
- Includes hyaluronic acid.
- Alcohol-free.
- Minimizes redness and inflammation.
- No burning sensation upon application.
- Free of harmful buffers (sodium hydroxide, ammonia, ammonium hydroxide, etc.)
- Preservative-free.

The formulation is gel with hyaluronic acid.

#### **FRAGRANCE:**

Neutral, fragrance-free.

#### **INGREDIENTS:**

Aqua (Water), Gluconolactone, Propylene glycol, Lactobionic acid, Sodium hyaluronate, Sodium lactate, Sodium benzoate, Sodium dehydroacetate.

## PEELINGS

### water infusion **peel**

#### ACTIVE INGREDIENTS

Total concentration of acids: 30%.

Lactic acid\*, Gluconolactone\*, Sodium lactate, Hyaluronic acid XS\* (0.3%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

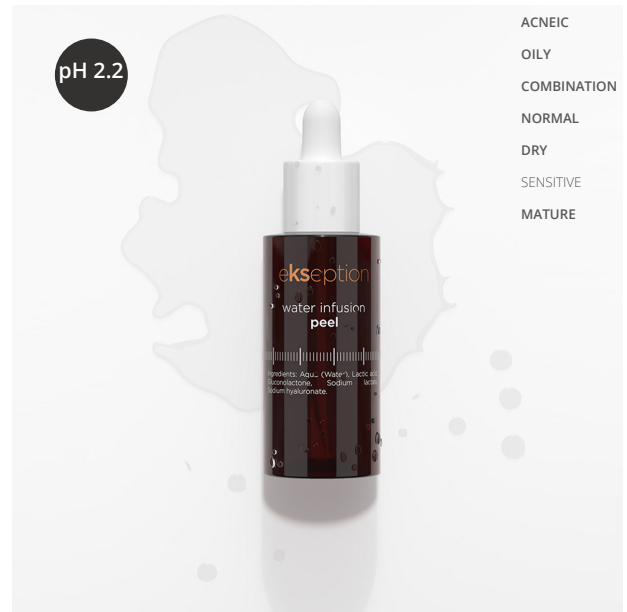

- Intense skin hydration.
- Reduce deep wrinkles.
- Reduce post-acne scars.
- Rough skin.
- Skin ageing.
- Restore the skin pH gradient.
- Activate exfoliating enzymes.
- Overall skin radiance.

A powerful lactic peel, expertly formulated with lactic acid and gluconolactone to target two distinct levels of the epidermis. This advanced peeling solution is designed to visibly reduce deep wrinkles and post-acne scars, providing transformative results for a smoother, rejuvenated complexion.

The unique combination of lactic acid and gluconolactone works synergistically to penetrate different layers of the epidermis, thanks to their varying molecular weights. Lactic acid, with its smaller molecular structure, delves into the deeper layers of the skin, promoting collagen production and reducing the appearance of deep wrinkles. Gluconolactone, a polyhydroxy acid with a larger molecular weight, focuses on the skin's surface, gently exfoliating and refining its texture while diminishing post-acne scars.

Infused with low molecular weight hyaluronic acid, our peel not only provides an enhanced gel texture for easier and more even application but also delivers a potent boost of hydration to improve skin moisture. This innovative formulation ensures a comfortable, effective peeling experience for all skin types.

Experience the remarkable benefits of our peeling, and unveil a dramatically improved, youthful complexion. Rediscover your skin's natural radiance and embrace the confidence that comes with flawless, revitalized skin.

At Eskeption, we emphasize the use of natural organic acids in our skincare products, setting ourselves apart from other brands in several key ways. These distinctive characteristics not only showcase our commitment to providing safe and effective skincare solutions but also highlight our dedication to sustainability and environmental responsibility.

**Harnessing the power of nature:** Our naturally-derived organic acids are produced from natural resources such as plants or seeds. By sourcing ingredients directly from nature, we offer products that work in harmony with the skin, minimizing the risk of irritation or adverse reactions.

**Environmentally-friendly practices:** We adopt sustainable and eco-friendly practices throughout our production process. This includes using ethically-sourced, fair-trade ingredients, implementing energy-efficient manufacturing techniques, and utilizing glass packaging materials when possible to reduce our environmental impact.

**Transparency and trust:** We maintain 100% transparency regarding our ingredients and sourcing methods. This allows consumers to make informed decisions and trust that they are choosing products that align with their personal values and skincare needs.

**Free from harmful chemicals:** Our products are formulated without the use of harsh or potentially harmful chemicals, such as parabens, sulfates, or ammonia. Whenever possible, we create almost 100% natural formulations, like our Mixlab products. This commitment to clean beauty ensures that our products are gentle on the skin and suitable for a wide range of skin types, including sensitive and allergy-prone skin.

By choosing Eskeption skincare products, consumers can enjoy the benefits of effective, eco-friendly, and gentle solutions that align with their personal values and promote healthy, radiant skin.

### **What sets ekseption skincare apart?**

- Exclusive use of natural organic acids.
- Inclusion of polyhydroxy acids.
- No risk of hyperpigmentation or side effects.
- Unique sensorial experiences through amazing textures.
- Effective and 100% safe products.
- Multi-active products: cleanse & peel.
- Eco-responsible formulations with powder forms.
- Wide assortment: cleansers, toners, masks, serums, creams, SPF, peelings.
- Premium quality and presentation.
- Made in Spain in our own factory.

## CLEANSERS

### all-in-one **cleanse & peel**

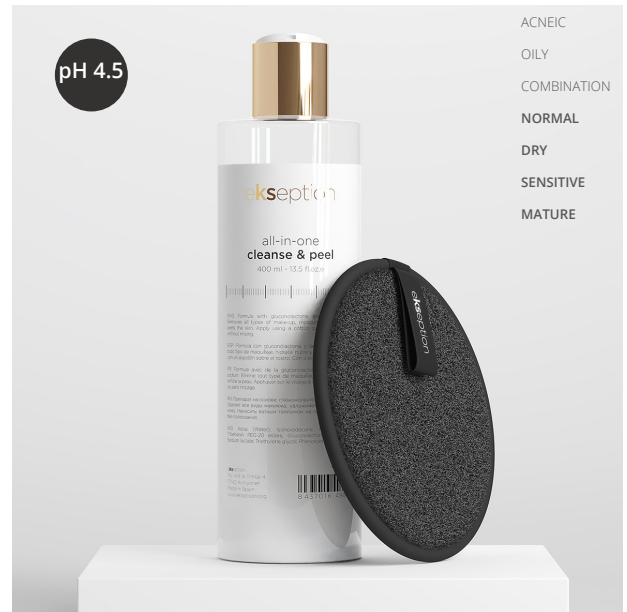

#### ACTIVE INGREDIENTS

Gluconolactone\* (0.5%), Sodium lactate (1,4%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Remove makeup from the face, eyes, and lip contours.
- Nourish and moisturize.
- Eliminate dead cells and impurities.
- Restore optimal skin pH.
- Purify the skin.
- Enhance skin tone and luminosity.

ACNEIC  
OILY  
COMBINATION  
NORMAL  
DRY  
SENSITIVE  
MATURE

A new concept of cleanser and makeup remover for the face, eyes, and lips, featuring polyhydroxy acids. Nourishing and moisturizing, this innovative product is formulated for all skin types. It simultaneously cleanses and exfoliates while respecting the natural skin pH, ensuring optimal skin renewal.

The extreme fineness of the emulsion is crucial for efficiently removing all types of makeup from the face, eyes, and lips. The product completely eliminates even the most resistant makeup without using any detergents or soaps in the formulation. A high-polarity oil dissolves all types of makeup, even the most resistant. It can be used on the face, eyes, and lips without stinging the eyes, and rinses clean without leaving any pore-clogging residue.

Conventional cleansers and soaps often have a pH above 6, which is too alkaline for the skin. They cause a significant increase in the natural acid mantle on the skin's surface that can last for several hours. During this time, enzymatic activity is disrupted, undesirable bacteria can proliferate, and the balance of the skin's microflora can be disturbed, resulting in impure skin. Prolonged use of high-pH cleansers can slow down epidermis renewal, leading to impure skin and a dull complexion.

Gluconolactone is a naturally occurring polyhydroxy acid (PHA) with moisturizing, purifying, and antioxidant properties. Its ability to scavenge free radicals accounts for its antioxidant properties, thereby protecting skin from some of the damaging effects of UV radiation. Gluconolactone offers all the skincare benefits of other AHAs but is gentler on the skin.

Sodium lactate, the sodium salt of lactic acid, has keratolytic properties. It is produced by fermenting a sugar source, such as corn or beets, and then neutralizing the resulting lactic acid. Sodium lactate is a constituent of the skin's Natural Moisturizing Factor (NMF), required for maintaining natural hydration. Sodium lactate is a superior moisturizer, increasing the skin's moisture content by up to 84%. Its water-holding capacity is second only to hyaluronic acid when compared to other commonly used moisturizers. Sodium lactate effectively encourages cells to retain water.

#### WHAT IS DIFFERENT?

- Has a lower pH compared to general makeup removers.
- Completes a thorough cleanse on the face, eyes, and lips.
- Contains polyhydroxy acid.
- Provides both cleansing and micro peeling simultaneously.
- Does not contain any soap or detergent; makeup is gently removed by a polar oil.
- The formulation has a cream-like texture.
- The comfortable and melting texture is due to the absence of polymer thickeners in the formula.
- Does not cause eye irritation.

## CLEANSERS

### all-in-one **cleanse & peel**

#### **HOW TO USE?**

- Moisten your face and neck with lukewarm water.
  - Apply a small amount of cleanser to your fingertips or a soft cotton pad.
  - Gently massage the onto your face and neck using circular motions, paying special attention to the areas with makeup, such as your eyes and lips. Avoid direct contact with your eyes.
  - Rinse thoroughly with lukewarm water or remove with a damp, soft cotton pad or cloth.
  - Follow up with a suitable toner to remove any remaining traces of makeup or impurities.
  - Finish your skincare routine by applying your favorite moisturizer or serum to nourish and hydrate your skin.
- For best results, use our cleanser, both in the morning and at night, to maintain clean, healthy, and radiant skin.

#### **ABOUT FORMULATION:**

We place great importance on the texture and comfort of our formulations, focusing on how they feel and creating a connection between sensoriality and functionality. Our cleanser boasts an unexpected sensory experience with a bright, creamy, and rich appearance, as well as an evanescent feel (light & thin). The cleanser has an ultra-soft touch and spreads easily on the skin, which is an essential requirement.

These characteristics can be attributed to the very fine and homogeneous dispersion of oil droplets, with an average size in the range of one micron. The extreme fineness of the emulsion is one of our key factors for efficiently removing all types of makeup from the face, eyes, or lips without any detergent or soap in the formula.

The emulsion is an oil-in-water micro-emulsion, and the emulsifier is derived from behenic acid, a saturated fatty acid obtained from the seeds of the indigenous Amazon tree species, *Pentaclethra macroloba*. It has emollient and soothing properties, which help to restore the skin's natural oils and improve overall hydration levels. In skincare, behenic acid is most commonly used to provide soothing relief for dry and sensitive skin. These sebaceous fatty acids play a role in maintaining the integrity of the skin barrier, thereby improving moisture retention and enhancing skin hydration.

Another important parameter is the careful selection of the emollient. In our cleanser, we use a highly polar oil that can easily dissolve all types of makeup. The emollient leaves a non-greasy, light, and silky feeling on the skin. It is non-comedogenic, meaning it doesn't clog pores or contribute to the development of blemishes.

Our cleanser offers an excellent tolerance profile for skin and mucous membranes and does not sting the eyes or skin. The product is paraben-free, soap-free, and sulfate-free.

#### **FRAGRANCE:**

Fresh fruits with notes of pear and flowers.

#### **INGREDIENTS:**

Aqua (Water), Isohexadecane, Propylene glycol, Tribehenin PEG-20 esters, Gluconolactone, Cetyl alcohol, Sodium lactate, Triethylene glycol, Phenoxyethanol, Parfum.

## CLEANSERS

### micellar water **cleanse & peel**

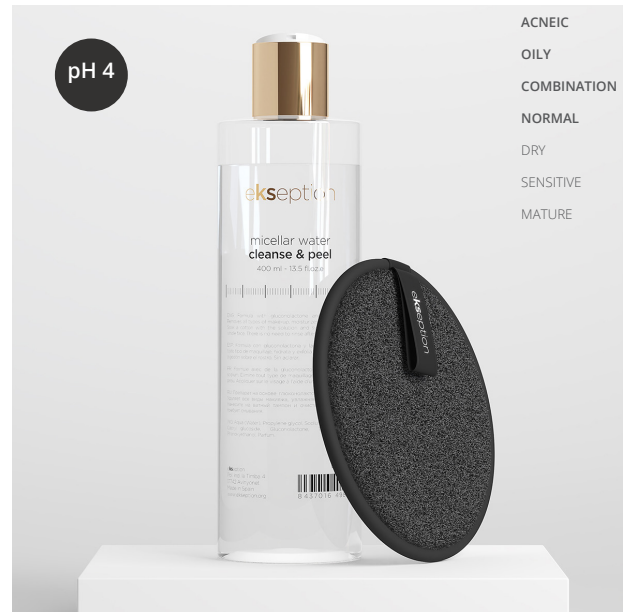

#### ACTIVE INGREDIENTS

Gluconolactone\* (0.5%), Sodium lactate (1%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Remove makeup from the face, eye contours, and lips.
- Provide moisture.
- Eliminate dead cells and impurities.
- Maintain an optimal skin pH.
- Purify the skin.
- Remove excess oil.
- Enhance skin tone and luminosity.

A new concept of micellar water for the face, eyes, and lips, featuring polyhydroxy acids. It simultaneously cleanses and exfoliates while respecting the natural skin pH, ensuring optimal skin renewal. This gentle yet effective solution is perfect for all skin types, including combination and oily skin types, providing a thorough cleanse while offering multiple benefits for a refreshed and radiant complexion.

Our Micellar Water harnesses the power of Gluconolactone, a naturally occurring polyhydroxy acid (PHA) with moisturizing, purifying, and antioxidant properties. Sodium Lactate, a natural moisturizing factor derived from lactic acid, helps maintain skin hydration and support its natural barrier function. The natural cleansing agent Caprylyl/Capryl Glucoside, derived from vegetable sources, effectively removes makeup, dirt, and impurities without stripping the skin of its natural oils.

- Effortlessly removes makeup from the face, eyes, and lips while being gentle on the skin, leaving it feeling clean.
- Moisturizing and hydrating: Gluconolactone and Sodium Lactate work together to boost skin hydration and maintain optimal moisture levels, preventing dryness and irritation.
- Purifying and soothing: The natural cleansing agent Caprylyl/Capryl Glucoside helps to purify the skin and soothe any irritation, leaving your complexion feeling calm and comfortable.
- Antioxidant protection: Gluconolactone's antioxidant properties help to protect the skin from environmental damage and free radicals, promoting a healthy and youthful appearance.
- Regular use of our Micellar Water will enhance your skin's tone and texture, revealing a brighter and more radiant complexion.

Quickly removing excess oil, surface debris, and makeup, it rinses without residue, leaving your skin comfortably clean and ready to receive maximum benefits from the products to follow. With its skin-compatible and environmentally friendly formula, our Micellar Water offers a new standard in cleansing and skincare.

#### WHAT IS DIFFERENT?

- Has a lower pH compared to other micellar waters.
- Contains polyhydroxyacid.
- Combines cleansing and micro-peeling in one step.
- Contains a natural and gentle cleansing agent.
- Does not irritate the eyes.

## CLEANSERS

### micellar water **cleanse & peel**

#### **HOW TO USE?**

- Choose a soft, lint-free cotton pad or cotton ball to apply the micellar water.
- Pour a generous amount of micellar water onto the cotton pad or ball, ensuring it is thoroughly saturated.
- Gently press the cotton pad or ball against your skin, starting with your forehead and working your way down to the cheeks, chin, and neck. Avoid rubbing or scrubbing the skin.
- Use a separate saturated cotton pad or ball for each eye area. Gently press the pad against your closed eyelid, allowing the micellar water to dissolve eye makeup. After a few seconds, gently swipe the cotton pad downward to remove makeup. Avoid getting micellar water directly into your eyes.
- For the lips, use another clean, saturated cotton pad or ball and gently swipe over your lips to remove lipstick or lip gloss.
- Repeat the process with fresh cotton pads or balls until there is no more makeup residue or dirt visible on the pad.
- There is no need to rinse your face after using micellar water, as it is designed to leave your skin clean and refreshed without residue. However, if you prefer, you can gently splash your face with lukewarm water and pat dry with a clean towel.

Follow up with your regular skincare routine, including toner, serum, moisturizer, or any other desired treatments. Remember to always use gentle pressure and avoid rubbing or tugging on the skin, especially around the delicate eye area. Micellar water can be used daily, both morning and night, as a gentle and effective cleanser.

#### **ABOUT FORMULATION:**

Micellar water is a water-like cleanser that contains surfactant molecules in a specific concentration to form "micelles." A micelle is an arrangement of surfactant molecules in a spherical shape, similar to liposomes, capable of capturing oily components.

Our micellar water is gentle on both the skin and the environment. The cleansing agent is obtained from renewable raw materials: fatty alcohols and glucose of vegetable origin. It is an ultra-mild surfactant that is extremely well-tolerated by the skin and eyes.

Our micellar water offers an excellent tolerance profile for skin and mucous membranes and does not irritate the eyes or skin. The product is paraben-free, oil-free, soap-free, and sulfate-free.

#### **FRAGRANCE:**

Energetic, green, fresh leaves.

#### **INGREDIENTS:**

Aqua (Water), Propylene glycol, Sodium lactate, Caprylyl/ Capryl glucoside, Gluconolactone, Triethylene glycol, Phenoxyethanol, Parfum.

## CLEANSERS

### salicylic foam **cleanse & peel**

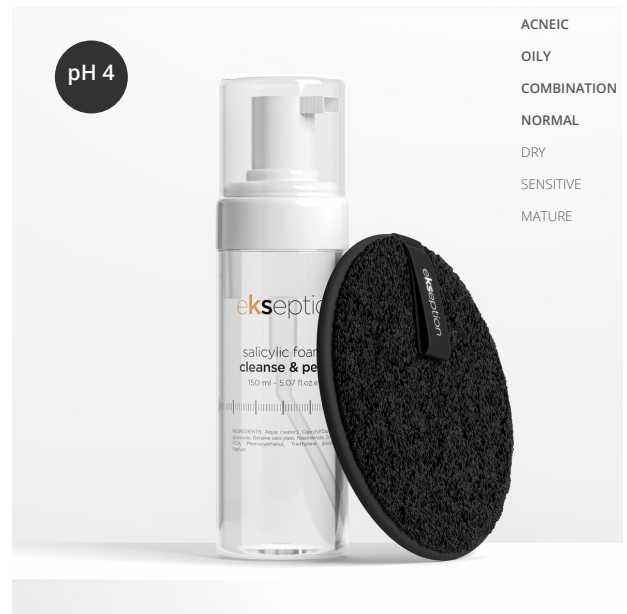

#### ACTIVE INGREDIENTS

Betaine salicylate\* (1%), Zinc PCA\* (0,2%), Niacinamide\* (0,5%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Removes makeup from the face.
- Eliminates dead cells and impurities.
- Restores optimal skin pH.
- Purifies the skin.
- Eliminates excess oil.
- Enhances skin tone and luminosity.

This cleansing foam effectively removes makeup and impurities from the face and neck while providing refreshment and hydration. Specifically formulated for oily and acne-prone skin types, this innovative product both cleanses and exfoliates simultaneously, promoting optimal skin renewal and maintaining a balanced skin pH.

The foam gently and swiftly removes excess oil, surface debris, and makeup, leaving the skin refreshed and comfortably clean. After rinsing, no residue or pore-clogging substances remain, allowing the skin to readily absorb the maximum benefits from subsequent products.

The cleansing agent, a liquid non-ionic surfactant, is derived from vegetable-based fatty acids and glucose. It is gentle on the skin, environmentally friendly, and 100% biodegradable. With moderate wetting properties and a mild cleansing action, this surfactant preserves essential skin lipids, ensuring compatibility and respect for the skin's natural barrier.

Conventional cleansers with a pH over 6 can disturb the skin's natural balance, leading to impurities and a dull complexion. Our cleansing foam, however, supports a healthy skin environment.

Key active ingredients include betaine salicylate, niacinamide, and ZincPCA:

- Betaine salicylate, a gentle BHA, improves skin tone and texture by resurfacing the skin, helping to prevent blackheads and clogged pores.
- Niacinamide improves skin elasticity, reduces redness and pigment spots, and stabilizes the skin barrier. It also has anti-inflammatory properties, providing relief for various skin issues such as aging, acne, rosacea, and atopic dermatitis.
- Zinc, combined with L-PCA, offers anti-inflammatory and antibacterial properties, aiding in acne treatment, sebum regulation, and overall skin health.

Experience the benefits of this unique cleansing foam for a rejuvenated, radiant complexion.

#### WHAT IS DIFFERENT?

- Features a lower pH compared to other cleansers.
- Contains a variety of active ingredients tailored to improve oily and acne-prone skin types.
- Simultaneously cleanses and performs a gentle micro-peeling.
- Incorporates a natural and mild cleansing agent.

## CLEANSERS

### salicylic foam **cleanse & peel**

#### **HOW TO USE?**

- Wet your face: Start by splashing your face with lukewarm water to moisten your skin, which helps the cleansing foam work more effectively.
- Dispense the foam: Squeeze a small amount of the cleansing foam (about the size of a pea or a dime) into the palm of your hand.
- Lather up: Rub your hands together to create a rich lather. If the foam is not lathering well, you can add a little more water to your hands.
- Apply to your face: Gently massage the lather onto your face using circular motions, being careful to avoid the delicate eye area. Spend a few moments working the foam into your skin to help dissolve makeup, dirt, and excess oil.
- Rinse: your face thoroughly with lukewarm water, ensuring all the foam is removed. Be cautious not to use hot water, as it can strip the skin of its natural oils and cause irritation.
- Pat dry: Gently pat your face dry with a clean, soft towel. Avoid rubbing or pulling on the skin, as this can cause irritation and damage.
- Follow up with skincare: After cleansing, continue with your regular skincare routine, applying toner, serum, moisturizer, and any other desired products.

Remember to cleanse your face at least once a day, preferably in the evening to remove makeup and impurities accumulated throughout the day. If your skin is oily or prone to breakouts, you may want to cleanse twice a day, both morning and night.

#### **ABOUT FORMULATION:**

Salicylic Foam Cleanse & Peel is a gentle foaming cleanser that utilizes surfactant molecules to effectively remove makeup and impurities from the skin.

Our environmentally-conscious product is formulated with a cleansing agent derived from renewable raw materials, such as vegetable-origin fatty alcohols and glucose. This ultra-mild surfactant is highly compatible with both skin and eyes.

Our product boasts an excellent tolerance profile for skin and mucous membranes, ensuring it does not sting the eyes or irritate the skin. Free from parabens, oils, soap, and sulfates, this cleanser offers a gentle yet effective cleansing experience.

#### **FRAGRANCE:**

Energetic, green, fresh leaves.

#### **INGREDIENTS:**

Aqua (water), Caprylyl/Capryl glucoside, Betaine salicylate, Niacinamide, Zinc PCA, Phenoxyethanol, Triethylene glycol, Parfum.

## CLEANSERS

### monsoon mist **tone & peel**

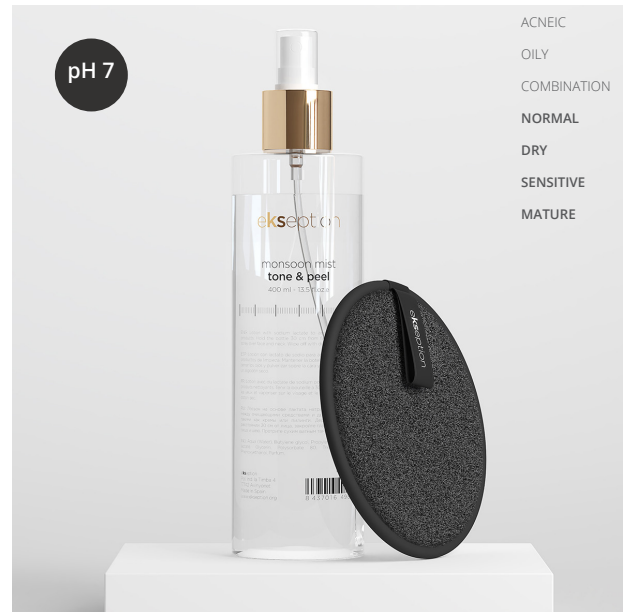

#### ACTIVE INGREDIENTS

Sodium lactate (0,5%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Hydrate the skin.
- Remove excess oil.
- Enhance skin tone and luminosity.
- Thoroughly cleanse.

Ultra-refreshing and hydrating lotion designed to complete the cleansing process and to be applied before skin care creams. The mist lotion has a neutral pH, yet it is slightly more alkaline compared to the superficial skin pH due to the presence of sodium lactate. It does not sting the eyes and leaves no pore-clogging residue.

Sodium lactate, the sodium salt of lactic acid, possesses keratolytic properties. It is produced through the fermentation of a sugar source, such as corn or beets, followed by neutralizing the resulting lactic acid.

Sodium lactate is a constituent of the skin's Natural Moisturizing Factor (NMF), essential for maintaining natural hydration. As a superior moisturizer, sodium lactate increases the skin's moisture content by up to 84%. Its water-holding capacity is second only to hyaluronic acid when compared to other commonly used moisturizers. Sodium lactate effectively encourages cells to retain water.

Additionally, sodium lactate is included in the formula for its buffering properties. It complements our cleansers containing acids, as the sodium lactate neutralizes any remaining free acids on the skin's surface after using an all-in-one cleanser or micellar water.

A slightly alkaline pH in lotions is beneficial because it causes corneocytes to swell, significantly enhancing the penetration of products and treatments applied afterward.

The formula is suitable for all skin types and works in harmony with other products. It does not contain alcohol.

#### WHAT IS DIFFERENT?

- Powerful moisturizing properties.
- Free of alcohol.
- Does not irritate the eyes.
- Stimulates skin renewal.

## CLEANSERS

### monsoon mist **tone & peel**

#### **HOW TO USE?**

- Cleanse your face: Before applying the moisturizing lotion, ensure your skin is clean and free of makeup or impurities.
- Shake the bottle: Gently shake the spray bottle to ensure the lotion is well-mixed.
- Hold the bottle at a distance: Position the spray bottle 6-8 inches (15-20 cm) away from your face. Close your eyes and mouth to avoid contact with sensitive areas.
- Spray evenly: Press the spray nozzle to release a fine mist, and evenly cover your entire face and neck with the lotion. Make sure to use a sweeping motion to ensure even coverage.
- Allow the lotion to absorb: Wait a few seconds for the lotion to absorb into your skin. You can gently pat your face with your fingertips to help the absorption process.
- Follow up with additional skincare: If desired, you can apply your regular serums, creams, or facial oils after the moisturizing lotion has absorbed.

Remember to use the moisturizing spray lotion as part of your daily skincare routine, both in the morning and at night, for optimal results.

#### **ABOUT FORMULATION:**

Monsoon Mist is a lightweight, water-like lotion that provides excellent tolerance for both skin and mucous membranes, without causing irritation to the eyes or skin. This product is free of parabens, oils, and alcohol.

#### **FRAGRANCE:**

Energetic, green, fresh leaves.

#### **INGREDIENTS:**

Aqua (Water), Butylene glycol, Propylene glycol, Sodium lactate, Glycerin, Polysorbate 80, Triethylene glycol, Phenoxyethanol, Parfum.

## CLEANSERS

### matcha tea mist

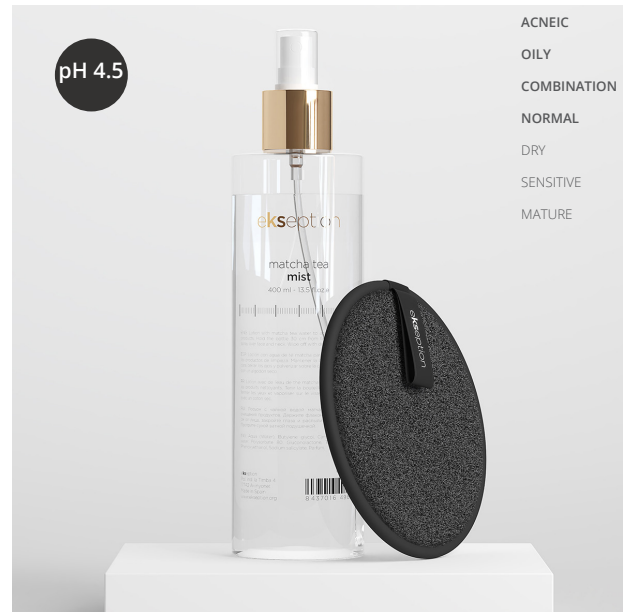

#### ACTIVE INGREDIENTS

Matcha tea leaf water\* (5%), Gluconolactone\*, Sodium salicylate.

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Purifies and removes excess oil.
- Hydrate the skin.
- Enhance skin tone and luminosity.
- Thoroughly cleanse & exfoliate.
- Protects skin from pollution damage.
- Stimulates cutaneous microcirculation.

Ultra-refreshing and hydrating lotion designed to complete the cleansing process and to be applied before skin care creams. The mist lotion has an acidic pH and contains Matcha Tea leaf water, gluconolactone, and sodium salicylate. It does not sting the eyes and leaves no pore-clogging residue behind.

Matcha Tea leaf water is an aqueous extract obtained through steam distillation. As a highly regarded health plant, it not only prevents oxidative stress but also stimulates microcirculation to detoxify the skin and slow down premature skin aging. Matcha tea mist is rich in amino acids, polyphenols, minerals, and caffeine.

Often described as the 'green gold of Japan,' Matcha Tea has a rich history rooted in both luxury and tradition. Although originating in China, Matcha Tea gained its reputation in Japan in the 16th century when it was introduced into the Tea Ceremony, emphasizing harmony, respect, purity, and peace of mind. Produced exclusively from Tencha Tea, its leaves undergo meticulous and ancestral techniques before being transformed into a fine, green, shimmering powder that captivates the eye.

Gluconolactone is a naturally occurring polyhydroxy acid (PHA) that offers moisturizing, purifying, and antioxidant activity. Its ability to scavenge free radicals contributes to its antioxidant properties, protecting the skin from some of the damaging effects of UV radiation. Gluconolactone provides all the skincare benefits of other AHAs while being gentler on the skin. It has been observed to be as effective as benzoyl peroxide in treating acne.

Sodium salicylate, a sodium salt of salicylic acid, helps minimize the accumulation of sebaceous lipids and strengthens the skin barrier function.

The formula is suitable for all skin types, but primarily for normal to oily skin. It is alcohol-free.

#### WHAT IS DIFFERENT?

- Powerful moisturizing properties.
- Free of alcohol.
- Does not irritate the eyes.
- Stimulates skin renewal.

## CLEANSERS

## CLEANSERS

### ultim eyes & lips cleanser

#### ACTIVE INGREDIENTS

Panthenol\* , Biotinoyl tripeptide-1\* (1%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Remove eye and lip makeup.
- Enhance eyelashes.
- Hydrate the eye contour area.
- Moisturize the lips.

An exclusive eye and lip cleanser featuring Biotinoyl Tripeptide-1 and Panthenol to enhance eyelashes. This revolutionary eye cleansing formula has a soft, melting cream texture that gently and efficiently removes all types of makeup, even the most resistant. It does not sting the eyes and leaves the eye contour area without any oily or dry sensation.

Biotinoyl Tripeptide-1 makes eyelashes appear longer, thicker, and stronger. It promotes the proliferation of keratinocytes in the hair bulb and ensures optimal anchoring of the hair by stimulating the synthesis and organization of adhesion molecules laminin-5 and collagen IV.

Eye makeup, especially when not removed properly, can cause irritation, redness, and even infections. Makeup particles can accumulate on the eyelids and in the tear film, which can lead to eye irritation or infections such as conjunctivitis.

Makeup can clog the pores around the eye area, leading to the formation of milia (small, white bumps) or other skin issues. Thoroughly removing eye makeup can help prevent these problems.

Makeup residue, especially from mascara, can make eyelashes dry, brittle, and prone to breakage. Removing eye makeup helps maintain the health and strength of your eyelashes.

Biphasic eye cleansers are makeup removers that contain two distinct layers: one oil-based and one water-based. These products effectively remove stubborn makeup, including waterproof mascara and long-wearing formulas. However, they can leave a greasy residue: This residue may need to be removed with a separate cleanser, which can be an extra step in your skincare routine. Some users may find the biphasic eye cleansers irritating to their eyes, especially those with sensitive eyes or contact lens wearers.

#### WHAT IS DIFFERENT?

- Water-in-oil balm texture.
- Contains ingredients beneficial for eyelashes.
- Nourishes the eye area like a cream.
- Avoids the oily sensation common with biphasic makeup removers.
- Alcohol-free.
- Gentle and non-irritating for the eyes.

## CLEANSERS

### ultim eyes & lips **cleanser**

#### **HOW TO USE?**

- Dispense a small amount: Take a small amount of the eye makeup remover on a cotton pad.
- Apply gently: Close your eyes and gently apply the cream to your eyelids and lashes. Gently press the pad against your closed eyelid for a few seconds to help dissolve the makeup.
- Massage: Using your fingertip or the cotton pad, carefully massage the cream over your eyelids and lashes in a circular motion. Be gentle to avoid irritating your eyes or pulling on your eyelashes.
- Wipe away makeup: Use a clean cotton pad or a soft, damp cloth to gently wipe away the cream and dissolved makeup. If needed, fold the pad or cloth to a clean section and continue wiping until all makeup is removed.
- Rinse: Use a damp cloth to remove any remaining cream.
- Pat dry: Gently pat your eye area dry with a clean, soft towel.
- Follow with your skincare routine: After removing your eye makeup, proceed with your usual skincare routine, including cleansing the rest of your face, toning, and moisturizing.

Remember to always be gentle with the delicate skin around your eyes and to use a product specifically designed for eye makeup removal to minimize irritation.

#### **ABOUT FORMULATION:**

An innovative ice cream-like texture never seen before in eye cleansers. It offers superior comfort for the delicate eye area, outperforming conventional biphasic cleansers that may irritate the eyes. With its nourishing texture, it acts as both a cleanser and an eye cream simultaneously.

The texture is a water-in-oil emulsion containing various esters and waxes that melt at skin temperature. The cleansing agent used creates a highly effective and gentle micro-emulsion, easily rinsed away without leaving residue. This mild surfactant maintains the ideal hydro-lipophilic balance required for high-performance cleansing systems. Water-in-oil cleansers effectively remove long-wear and waterproof makeup while leaving the skin feeling refreshed, smooth, and soft to the touch.

#### **FRAGRANCE:**

Perfume free with a neutral scent and slight coconut notes.

#### **INGREDIENTS:**

Aqua (Water), Stearyl dimethicone, Stearyl heptanoate, Cera microcristallina, PEG-20 Glyceryl triisostearate, Stearyl caprylate, Glycerin, Panthenol, Biotinoyl tripeptide-1, Cetyl PEG/ PPG-10/1 Dimethicone, Hydroxyethyl acrylate/ Sodium acryloyldimethyl taurate copolymer, Phenoxyethanol, Triethylene glycol.

## CLEANSERS

### enzyme powder **cleanse & peel**

#### ACTIVE INGREDIENTS

Papaya enzymes\* (0,7%), Sorbitol.

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Gently exfoliate the skin.
- Remove dead cells and impurities.
- Reduce skin pigmentation and brighten the skin tone.
- Enhance skin softness and texture.
- Remove makeup.

Facial foaming powder is a must-try for many reasons. Apart from its excellent ecological profile, being preservative, sulfate, and PEG-free, it takes care of your skin like no other facial cleanser.

When combined with water, the powder transforms into a rich and creamy foam. It offers outstanding exfoliation and cleansing, leaving the skin feeling silky smooth. This unique cleanser is suitable for all skin types, from normal to sensitive, due to its mildness and formulation that respects the skin's natural balance.

This highly effective, enzyme-based brightening exfoliator avoids harsh ingredients or abrasive particles. The exfoliating cleanser helps brighten and even out skin tone without chemicals. Natural papaya enzymes work to eliminate dry and dull surface cells, revealing a soft and smooth complexion. It also enhances the penetration of other treatment products by removing dead surface cells.

The enzyme powder further improves skin hydration, thanks to sorbitol. Derived from fruits, corn, and seaweed, this sugar alcohol acts as a humectant to retain moisture.

#### WHAT IS DIFFERENT?

- Powder formulation.
- More economical compared to liquid cleansing gels.
- 100% eco-friendly and preservative-free.
- Low carbon footprint product.
- Sulfate-free.
- PEG free.
- Travel friendly.
- Long shelf-life.
- Adjust to your desired strength by varying the amount of water added.

## CLEANSERS

### enzyme powder **cleanse & peel**

#### HOW TO USE?

- Wet your face with lukewarm water.
- Pour a small amount of powder cleanser into the palm of your hand or a small bowl.
- Add a few drops of water to the powder and mix until it forms a creamy foam.
- Apply the foam to your face and gently massage in circular motions for about 30 seconds to 1 minute, avoiding the eye area.
- Rinse your face thoroughly with lukewarm water and pat dry with a clean towel.

It's important to note that the amount of powder and water used can be adjusted to achieve the desired consistency and level of exfoliation. Also, powder cleansers should be stored in a dry place to prevent clumping and prolong their shelf life.

#### ABOUT FORMULATION:

Powder cleansers are a skin-friendly option as they are 100% preservative and chemical-free. They are highly concentrated, requiring a very small amount for each use, and contain no water, making them more economical compared to other cleansing products. In fact, one bottle of cleansing powder can replace approximately 10 bottles of conventional cleanser, making it a cost-effective and eco-friendly solution that helps reduce CO2 footprint in transport and plastic waste.

The cleansing agents in the product are carefully selected for their mildness and environmental impact:

Sodium Cocoyl Isethionate is a high-purity, anionic surfactant made from coconut fatty acids that has excellent surface activity and creates a rich lather. It is exceptionally mild, leaving the skin feeling soft and smooth, and has good biodegradability.

Sodium Cocoyl Glycinate is an anionic surfactant with an amino acid skeleton that is particularly mild and gentle on the skin. It is commonly used in sulfate-free cleansing formulations and has good biodegradability.

Sodium Lauroyl Glutamate is an anionic surfactant that has excellent foaming performance and is also mild to the skin. It creates a slightly acidic aqueous solution that respects the skin's natural pH balance and has good biodegradability.

Using a powder cleanser is easy and convenient. Simply mix a small amount of powder with water to create a creamy foam, apply to the face and massage gently in circular motions, then rinse thoroughly with water. The result is soft, clean, and refreshed skin.

#### FRAGRANCE:

Perfume free with a neutral scent.

#### INGREDIENTS:

Microcrystalline cellulose, Sorbitol, Sodium lauroyl glutamate, Sodium cocoyl glycinate, Mannitol, Sodium cocoyl isethionate, Magnesium stearate, Papain, Ethylcellulose.

## CLEANSERS

### salicylic powder **cleanse & peel**

#### ACTIVE INGREDIENTS

Papaya enzymes\* (0,7%), Salicylic acid\* (0,5%), Sorbitol.

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Can help reduce acne and other impurities.
- Gently exfoliate the skin.
- Remove dead cells and impurities.
- Reduce skin pigmentation and brighten the skin tone.
- Enhance skin softness and texture.
- Remove makeup.

Facial foaming powder is a must-try for many reasons. Apart from its excellent ecological profile, being preservative, sulfate, and PEG-free, it takes care of your skin like no other facial cleanser.

When combined with water, the powder transforms into a rich and creamy foam. It offers outstanding exfoliation and cleansing, leaving the skin feeling silky smooth. This highly effective, enzyme-based brightening exfoliator avoids harsh ingredients or abrasive particles. Suitable for all skin types, this unique cleanser contains salicylic acid, which is known for its keratolytic and anti-septic properties, making it especially useful for reducing acne and other impurities.

In addition to salicylic acid, this enzyme-based exfoliator contains natural papaya enzymes that work to eliminate dry and dull surface cells, revealing a brighter, more even complexion. It also enhances the penetration of other treatment products by removing dead surface cells.

The enzyme powder further improves skin hydration, thanks to sorbitol. Derived from fruits, corn, and seaweed, this sugar alcohol acts as a humectant to retain moisture.

#### WHAT IS DIFFERENT?

- Powder formulation.
- More economical compared to liquid cleansing gels.
- 100% eco-friendly and preservative-free.
- Low carbon footprint product.
- Sulfate-free.
- PEG free.
- Travel friendly.
- Long shelf-life.
- Adjust to your desired strength by varying the amount of water added.

## CLEANSERS

### black powder **cleanse & peel**

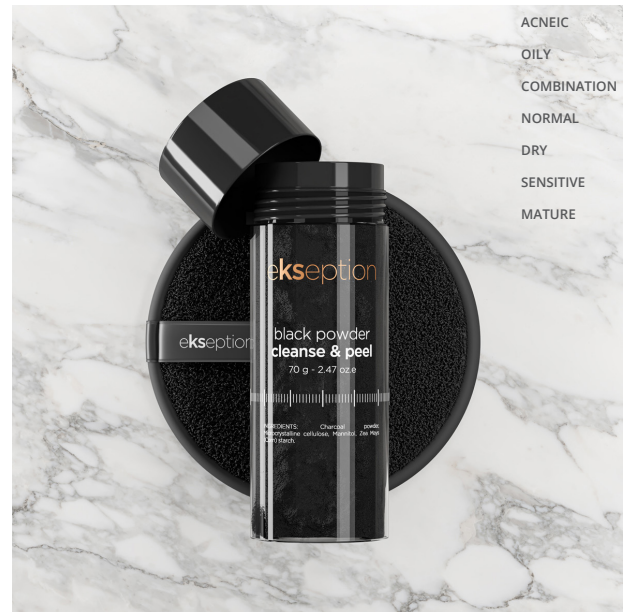

#### ACTIVE INGREDIENTS

Activated charcoal (35%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Detox and purify.
- Gently exfoliate the skin.
- Remove dead cells and impurities.
- Reduce skin pigmentation and brighten the skin tone.
- Enhance skin softness and texture.

The black powder exfoliator is undoubtedly one of the most unique and surprising products you will ever come across. Not only is it preservative, sulfate, and PEG-free, but it also offers unmatched skin care benefits. This gentle scrub in powder form detoxifies, exfoliates, and purifies the skin to reveal its ultimate softness.

The micro charcoal spheres present in the formula dissolve on contact with water and gently exfoliate the skin through mechanical action, without causing any irritation. Being perfectly round in shape, these spheres are particularly gentle on the skin. Additionally, the bamboo charcoal present in the formula helps to absorb impurities and toxins. The product is easily rinsed off, leaving the skin feeling incredibly soft and supple. This revolutionary exfoliator cares for your skin and the environment equally.

#### WHAT IS DIFFERENT?

- Powder exfoliator.
- Gentle on the skin compared to physical exfoliants with particles.
- More economical compared to exfoliating creams.
- 100% eco-friendly and preservative-free.
- Low carbon footprint product.
- Sulfate-free.
- PEG free.
- Travel friendly.
- Long shelf-life.

## CLEANSERS

### black powder **cleanse & peel**

#### **HOW TO USE?**

- Wet your face with lukewarm water.
- Pour a small amount of powder into the palm of your hand.
- Add water to the powder and rub your hands.
- Apply to your face and gently massage in circular motions for about 1 minute, avoiding the eye area.
- Rinse your face thoroughly with lukewarm water and pat dry with a clean towel.

It's important to note that the amount of powder and water used can be adjusted to achieve the desired consistency and level of exfoliation. Also, powder cleansers should be stored in a dry place to prevent clumping and prolong their shelf life.

Charcoal powder, Microcrystalline cellulose, Mannitol, Zea Mays (Corn) starch.

## SUNSCREENS

### all-day shield

#### ACTIVE INGREDIENTS

Ferulic acid\* (0,5%), Helioguard 365\* (2%), UVA/UVB filters (18,5%), Vitamin E (0,2%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Sunscreen with SPF 50+ protection.
- Neutralizes free radicals caused by UV radiation.
- Protects against photoaging, including wrinkles and dark spots caused by sun exposure.
- Helps prevent damage to the cellular DNA from UVB radiation, reducing the risk of skin cancer.

**RATINGS:** SPF50 / Critical wavelength: 380 nm / UVA-PF=21.4 / Boot stars: 4\* / PA++++ / Blue light reduction: 72,5% / Free radical reduction: 95,6%.

A new generation of protective day cream SPF50 with ferulic acid, UVA/UVB filters and Helioguard 365, a mycosporine-like amino acid extracted from sea algae to protect the skin against photo-ageing. Despite the high protection offered by the cream, the texture is light and refreshing. All-day shield is a novel generation of daily and highly protective skin care. It is conveniently packaged in an airless tube, making it easy to carry with you throughout the day. This protective daily cream is an innovation at different levels.

The formulation creates a long-lasting film over the skin, resisting sweating, providing a base for makeup and avoiding the penetration of sunscreens into the skin. All-day shield offers optimal protection against UVA and UVB rays thanks to ferulic acid (UVB) and helioguard 365 (UVA), a natural UV-screening synergy.

It does not sting the eyes and is suitable for even the most sensitive skin. It was specially formulated for post-peel procedures.

The most important factor in UV protection products is ensuring the same level of protection against UVA and UVB without breaching the radiation spectrum that could leave certain types of UV to reach and damage the skin. An "ideal sunscreen" must perform like a uniform density filter with the same protection at any wavelength.

Our formulation uses 4 types of UV filters to achieve the best ratio and protection against UVA and UVB. Our sunscreen utilizes the latest and most efficient UV filters on the market that are not classified as endocrine disruptors. The efficiency of our SPF is extremely high compared to other SPF, with an effective ratio of 2.9 points of SPF for 1% of UV filter.

#### WHAT IS DIFFERENT?

- Has a lower pH compared to other sunscreens.
- Contains natural SPF (such as micosporines, amino acids, and ferulic acid).
- Does not contain endocrine disruptor filters (such as Benzophenones, Octocrylene, and Camphor derivatives).
- Does not contain derivatives of salicylic acid or filters that cause skin irritation (such as Ethylhexyl Salicylate and Homomenthyl Salicylate).
- Does not sting the eyes.
- Oil-in-water light formulation with excellent spreadability.
- Does not leave any white residue.
- Combines active ingredients in an SPF formula.
- Uses a 100% natural emulsifier based on phospholipids, skin-identical molecules, and essential constituents of cellular membranes, providing unique technological and physiological properties.

SUNSCREENS

all-day **shield**

#### **HOW TO USE?**

- Apply sunscreen generously to all exposed skin areas before going outdoors, at least 15-20 minutes before sun exposure.
- Make sure to cover all areas of the skin that will be exposed to the sun, including the face, ears and neck.
- Reapply sunscreen every 4 hours, or immediately after swimming or excessive sweating.
- Use enough sunscreen to cover the skin thoroughly.
- Be sure to apply sunscreen even on cloudy or overcast days, as harmful UV rays can penetrate through clouds and cause damage to the skin.

Remember, sunscreen is an essential part of protecting your skin from the harmful effects of the sun, but it should not be the only method of sun protection. It's also important to seek shade, wear protective clothing, and avoid sun exposure during peak hours (between 10 am and 4 pm).

#### **ABOUT FORMULATION:**

An oil-in-water emulsion with a light texture that provides high SPF protection without leaving the skin feeling oily or white after application. The emollient used in the formula has been carefully selected for its high molecular weight, which prevents it from penetrating the skin and helps maintain the sunscreens on the skin's surface for maximum protection. Additionally, the emollient improves the skin's smoothness and prevents dry, flaky skin by protecting the skin's natural barrier.

Our formulation uses a 100% natural emulsifier based on phospholipids, which are skin-identical molecules and essential constituents of cellular membranes. This natural emulsifier provides unique technological and physiological properties, including a strong biocompatibility and biomimicry for optimal skin tolerance. The phospholipids create a sensory and delightful texture that leaves a light and soft skin feel with an amazing cooling effect. Furthermore, the phospholipids provide active properties to the skin, such as hydration, restructuring, and soothing.

#### **FRAGRANCE:**

Aloe Vera, fresh and light.

#### **INGREDIENTS:**

Aqua (Water), C12-15 alkyl benzoate, Ethylhexyl methoxycinnamate, Methylene bis-benzotriazolyl tetramethylbutylphenol, Butylene glycol, Dimethicone, Bis-ethylhexyloxyphenol methoxyphenyl triazine, Diethylamino hydroxybenzoyl hexyl benzoate, Decyl glucoside, Sodium acrylates copolymer, Porphyra Umbilicalis extract, Tocopherol, Sodium lactate, Ferulic acid, Lecithin, Propylene glycol, Xanthan gum, Alcohol, Hydroxyethyl acrylate/ Sodium acryloyldimethyl taurate copolymer, Phenoxyethanol, Triethylene glycol, Parfum, Hexyl cinnamal, Linalool, Benzyl salicylate.

## SUNSCREENS

### all-day **shield fluid**

#### ACTIVE INGREDIENTS

Ferulic acid\* (0,2%), Helioguard 365\* (1%), UVA/UVB filters (11,5%), Vitamin E (0,2%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Sunscreen with SPF 25+ protection.
- Neutralizes free radicals caused by UV radiation.
- Protects against photoaging, including wrinkles and dark spots caused by sun exposure.
- Helps prevent damage to the cellular DNA from UVB radiation, reducing the risk of skin cancer.

**RATINGS:** SPF25 / Critical wavelength: 381 nm / UVA-PF=23.7 / Boot stars: 5\* / PA+++ / Blue light reduction: 66.2%  
Free radical reduction: 94.1%.

A new generation of protective day cream SPF25 with ferulic acid, UVA/UVB filters and Helioguard 365, a mycosporine-like amino acid extracted from sea algae to protect the skin against photo-ageing. Despite the high protection offered by the cream, the texture is light and refreshing. All-day shield fluid is a novel generation of daily and highly protective skin care. ### all-day shield serum

#### ACTIVE INGREDIENTS

Hyaluronic acid XS (0,1%)\*, ET-vitamin C\* & E (0,5%), Niacinamide\* (0,3%), Ferulic acid\* (0,2%), Helioguard 365\* (2%), UVA/UVB filters (6,25%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Sunscreen with SPF 15+ protection.
- Neutralizes free radicals caused by UV radiation.
- Protects against photoaging, including wrinkles and dark spots caused by sun exposure.
- Helps prevent damage to the cellular DNA from UVB radiation, reducing the risk of skin cancer.

**RATINGS:** SPF15 / Critical wavelength: 381 nm / UVA-PF=13,1 / Boot stars: 5\* / PA+++ / Blue light reduction: 49,2% / Free radical reduction: 89,1%

This SPF15 serum contains ferulic acid, hyaluronic acid, ET-vitamin C, Vitamin E, niacinamide, UVA/UVB filters, and Helioguard 365, a mycosporine-like amino acid extracted from sea algae to protect against photo-aging. Its light and refreshing texture makes it ideal to apply before powder make-up. The airless tube packaging is convenient for easy carrying. The formulation creates a long-lasting film over the skin, resisting sweating, providing a base for makeup, and avoiding penetration of sunscreens into the skin. All-day shield serum offers optimal protection against UVA and UVB rays, thanks to ferulic acid (UVB) and helioguard 365 (UVA), a natural UV-screening synergy. It is suitable for sensitive skin and is specially formulated for post-peel procedures.

The all-day shield serum's innovation lies in combining sunscreens with antioxidant vitamins E and ET-vitamin C, niacinamide, and hyaluronic acid. These ingredients offer multiple benefits for the skin beyond sun protection. Vitamin E and C are powerful antioxidants that protect the skin from damage caused by free radicals and UV radiation. Niacinamide has anti-inflammatory properties to soothe and calm the skin. Hyaluronic acid helps to retain moisture in the skin, keeping it hydrated. ET-vitamin C and niacinamide also reduce the appearance of dark spots and hyperpigmentation.

For UV protection, it's crucial to ensure the same level of protection against UVA and UVB without breaching the radiation spectrum, which could lead to certain types of UV penetrating and damaging the skin. Our formulation uses four types of UV filters to achieve the best ratio and protection against UVA and UVB. Our sunscreen utilizes the latest and most efficient UV filters on the market, which are not classified as endocrine disruptors. The SPF's efficiency is extremely high compared to others, with an effective ratio of 2.4 points of SPF for 1% of UV filter.

### urban D pollution

#### ACTIVE INGREDIENTS

Phytic acid\* (0,2%), Urban D pollution blend\* (2%), UVA/UVB filters (8.5%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Sunscreen with SPF 20+ protection.
- Neutralizes free radicals caused by UV radiation.
- Protects against photoaging, including wrinkles and dark spots caused by sun exposure.
- Helps prevent damage to the cellular DNA from UVB radiation, reducing the risk of skin cancer.
- Protect against all types of atmospheric pollution.

**RATINGS:** SPF20 / Critical wavelength: 382 nm / UVA-PF=20.5 / Boot stars: 5\* / PA++++ / Blue light reduction: 65.6%/ Free radical reduction: 93.1%

Introducing Urban D-pollution, a new generation of protective day cream with SPF20, phytic acid, natural extracts, and UVA/UVB filters. This light, refreshing cream offers daily protection against pollution, free radicals, and blue light. Packaged in a convenient airless, it creates a long-lasting film over the skin, resisting sweat, and providing a base for makeup. Our innovative formulation uses a natural emulsifier based on lecithin, ensuring even UVA and UVB protection.

Our natural active ingredients, including ivy and sunflower extracts and phytic acid from rice bran, protect the skin cells against all types of atmospheric pollution, including tobacco, harmful gases, and heavy metals. Urban D-pollution does not sting the eyes and is suitable for even the most sensitive skin types, making it ideal for post-peel procedures and for oily skin.

It does not sting the eyes and is suitable for even the most sensitive skin. It was specially formulated for post-peel procedures.

## SUNSCREENS

### about SPF

#### **Why is UV Radiation Harmful to Skin?**

Although ultraviolet (UV) radiation only accounts for a small percentage of total solar radiation, it is the most damaging because shorter wavelengths of light contain more energy. Chromophores, such as DNA and melanin, absorb UV radiation in the skin. UV radiation can cause DNA damage, which can lead to genetic mutations and skin cancer if not corrected by the body's natural defenses. UVA and UVB rays damage DNA in different ways. UVB rays are directly absorbed by DNA, whereas UVA rays cause indirect DNA damage through the generation of free radicals.

#### **Why Does UV Radiation Cause Tanning?**

Melanin acts as a natural defense against UV radiation by absorbing UV radiation and reducing the transmission of UV rays into the nucleus to be absorbed by DNA. The more melanin in the skin, the better the skin's natural protection.

#### **Why Does UV Radiation Cause Premature Aging?**

UV radiation causes the generation of free radicals that activate enzymes that degrade collagen and elastin, which are contained within the dermis. UVA can penetrate the dermis, so the premature aging associated with UV radiation is predominantly due to UVA.

#### **How Do Sunscreens Protect Against UV Radiation?**

Sunscreens absorb UV radiation instead of the natural chromophores, reducing the amount of UV radiation able to enter the skin and be absorbed by DNA and melanin.

#### **How Is Sunscreen Tested?**

The effectiveness of sunscreen against UV radiation has traditionally been measured by the sun protection factor (SPF), which is a measure of a sunscreen's ability to protect skin from UVB radiation. However, UVA-induced skin damage has been overlooked until recently, so there is no standardized measure of UVA protection.

#### **SPF**

SPF measures a sunscreen's ability to protect skin from UVB radiation. A higher SPF theoretically provides more protection than a lower SPF. SPF is measured as a ratio of the amount of UVB radiation required to burn protected skin compared to unprotected skin. Sunscreen needs to be applied in the correct amount (2mg/cm<sup>2</sup>), reapplied frequently (every 2 hours), and reapplied after swimming or excessive sweating to achieve and maintain the stated SPF.

#### **UVA Protection**

The in vivo methods that have been suggested to measure UVA protection are Immediate Pigment Darkening (IPD), Persistent Pigment Darkening (PPD), and UVA Protection Factor (UVA-PF). The IPD method measures the amount of UVA radiation required to produce a darkening of the skin with a clearly defined margin, observed immediately after exposure. The IPD protection factor (IPD-PF) is the ratio of the UVA dose required to produce IPD when skin is protected with the sunscreen to the dose required when the skin is not protected.

**PPD** stands for Persistent Pigment Darkening, which is a skin response to UV radiation that occurs after exposure to UVB and UVA radiation. It lasts around 3-5 days and is particularly sensitive to the UVA spectrum. The PPD response requires large doses of UVA (>10 J/cm<sup>2</sup> – the equivalent of 40 minutes of midday summer sunlight), which means that the PPD method can also challenge a sunscreen's stability. The PPD method measures the amount of UVA radiation required to produce the first unambiguous pigmented reaction. The PPD protection factor (PPD-PF) is the ratio of the minimal UVA dose to produce PPD when the skin is protected with the sunscreen (MPDp) to the dose required when the skin is not protected (MPDu). European Union (COLIPA), and one from the United Kingdom (Boots).

**UVA-PF** stands for UVA protection factor and is a measure of how much UVA protection is offered by a sunscreen. There are three different in vitro methods for assessing UVA-PF; one from the United States (FDA), one from the European Union (COLIPA), and one from the United Kingdom (Boots).

In vitro testing determines the amount of protection a sunscreen offers by spreading the sunscreen onto a quartz, acrylic, or plastic (PMMA) slide and measuring how much UV radiation passes through the slide. The less radiation that passes through the slide, the higher the protection factor.

## SUNSCREENS

### about SPF

#### US FDA Critical Wavelength Method:

The FDA uses the critical wavelength method to determine whether a sunscreen can be classified as broad-spectrum. The critical wavelength method measures the breadth of protection of a sunscreen across the UV spectrum (290-400nm). For a sunscreen to be considered broad-spectrum, **it must have a critical wavelength of 370nm or more**. This means that at least 90% of the protection that the sunscreen offers has to be for wavelengths above 370nm [4].

However, the critical wavelength method does not provide information about the level of UVA protection offered by a sunscreen, only that it offers some UVA protection.

#### EU COLIPA Method UVA-PF/SPF Ratio:

The EU COLIPA method requires that the UVA-PF offered by a sunscreen be at least 1/3 of the stated SPF, in addition to requiring a critical wavelength of 370nm and above. For example, a sunscreen with an SPF of 50 must have at least a UVA-PF of 16.

#### UK Boots Method UVA/UVB Ratio:

The UK Boots method classifies products into categories from 0-5 stars based on the initial mean UVA/UVB ratio and the post-exposure mean UVA/UVB ratio, using the final UVA-PF value and the SPF value (UVA-PF/SPF). This method provides a better idea of how stable the UVA protection is. To achieve the highest rating (5 stars), the UVA/UVB ratio must be at least 0.9. In other words, a sunscreen would have to offer a UVA-PF of more than 90% of the stated SPF. (80-90% would be 4 stars and 60-80% would be 3 stars).

#### What does PA system mean?

The PA System categorizes sunscreens into groups based on their PPD value, which stands for Persistent Pigment Darkening. The more plus signs (+), the higher the PPD value. This means that you can determine the minimum PPD value as follows:

PA+ = PPD/UVA-PF 2-4

PA++ = PPD/UVA-PF 4-8

PA+++ = PPD/UVA-PF 8-16

PA++++ = PPD/UVA-PF 16+

PPD and UVA-PF values are highly correlated and are usually roughly the same.

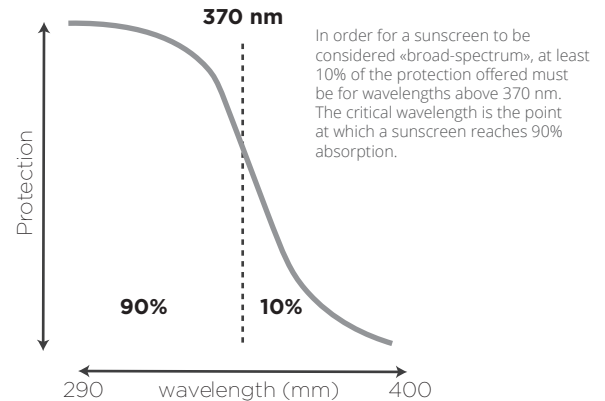

#### Summary

Unlike SPF, there is no internationally universal method for measuring a sunscreen's protection against UVA radiation. However, if a sunscreen is labeled as broad-spectrum, it has to offer both UVA and UVB protection. Some measurement methods help us determine a sunscreen's UVA protection better than others.

The PA system of measuring UVA protection through a PPD response is consistent, meaning any sunscreen with a rating of PA++++ offers at least a PPD-PF (UVA-PF) of 16. The UVA seal and star rating systems of measuring UVA protection are relative to the sunscreen's SPF and, as such, require more understanding. However, sunscreens with SPF 50 and a five-star UVA-PF rating are considered to offer very close to ideal protection currently available.

#### CRITICAL WAVELENGTH

Method for determining whether a sunscreen meets the «broad-spectrum requirement».

## ACTIVATORS

### PHA activator

#### ACTIVE INGREDIENTS

Tranexamic acid\* (1%), Gluconolactone\* (4%), Sodium lactate (0,85%), Lactobionic acid\* (0,15%), Vitamin E (0,35%), Hexyl-resorcinol\* (0,25%), Exfoliating enzymes \*(0,25%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Skin preparation prior to peels.
  - Diminish pigmentation and dark spots.
  - Reduce the appearance of wrinkles.
  - Enhance skin texture and softness.
  - Restore the skin's natural pH.
  - Activate exfoliating enzymes.
  - Nourish and hydrate.
- \*Clinical study results available.

The Activator is a micro-exfoliating cream that prepares the skin for professional peelings or can be used alone for a soft and progressive skin resurfacing at home. Applied at night for 3 weeks with an Ekseption sunscreen in the morning, it gradually reduces skin pH, exfoliates, replenishes moisture, and reduces wrinkles, pigmentation, and brown spots for a smooth, radiant complexion.

The water-in-oil formula is suitable for dry and normal skin types. The PHA Activator uses exclusive technology with PHA acids, enzymes, and active ingredients, which improve skin texture and reduce wrinkles while tranexamic acid and hexyl-resorcinol reduce pigmentation problems.

In our clinical study, no redness or inflammation occurred after 3 weeks of treatment. After 3 weeks, the skin becomes smoother (29 to 51% improvement), pores are tightened (28 to 43% improvement), wrinkles depth is reduced (7 up to 33%), overall pigmentation is reduced (9 up to 16%), and pigmentation spots are reduced up to 21%, for a more uniform and illuminated skin.

#### WHAT IS DIFFERENT?

- Clinically proven.
- Does not cause skin redness and inflammation.
- Rich water-in-oil formulation with acids.
- High concentration of active ingredients.
- Double exfoliation system with enzymes and acids.
- Double whitening system with tranexamic acid and hexyl-resorcinol.
- Isotonic water phase.

## ACTIVATORS

### PHA **activator**

#### **HOW TO USE?**

- Cleanse your face: Start by cleansing your face with a gentle cleanser to remove any dirt, oil, and makeup.
- Tone your skin: Apply a toner to your face to balance your skin's pH level and prepare it for the activator.
- Apply the activator: Take a small amount of product and dot it on your forehead, cheeks, nose, and chin. Then, gently massage it into your skin using upward circular motions, avoiding the eye area.
- Let it absorb: Allow the cream to absorb into your skin for a few minutes before going to bed.

For best results, use your activator every night as part of your skincare routine during 3 weeks.

Remember to choose an activator that is suitable for your skin type that can help rejuvenate and nourish your skin while you sleep.

#### **ABOUT FORMULATION:**

The PHA activator is an oil-in-water emulsion with a fluid texture and a nutritive after-feel. It creates a protective film on the skin surface that prevents transepidermal water loss.

The water phase of the PHA activator is isotonic and balanced in salt to optimize water transfer into the skin. Water-in-oil emulsions are highly recommended for dry and sensitive skin, as they provide a good balance between nutrition and hydration, long-lasting protection, and high water diffusion into the skin.

The first type of emollient in the formulation is a mixture of long-chain fatty acid esters that melt at skin temperature, creating a soft, pleasant, and smooth skin feel. They have high levels of re-fattening potential and strong water-repellent properties to form a film that protects the skin from drying out. The other main emollient is a non-comedogenic ester that provides a rich feel and improves the spreadability on the skin. The product is certified natural by ECOCERT.

#### **FRAGRANCE:**

Coffee arabica & bourbon vanilla.

#### **INGREDIENTS:**

Aqua (Water), Octyldodecyl myristate, Gluconolactone, Stearyl heptanoate, Propylene glycol, Stearyl caprylate, Cetyl PEG/ PPG-10/ 1 Dimethicone, Tranexamic acid, Sodium chloride, Lactobionic acid, Hexylresorcinol, Bacillus ferment, Sodium lactate, Tocopheryl acetate, Glycerin, Disodium EDTA, Potassium sorbate, Triethylene glycol, Phenoxyethanol, Parfum, Linalool, Limonene, Hydroxycitronellal, Hexyl cinnamal, Coumarin.

## ACTIVATORS

### ferulic **activator**

#### ACTIVE INGREDIENTS

Lactic acid\* (3%), Ferulic acid\* (0,5%), Tranexamic acid\* (0,5%), Palmitoyl tripeptide-1\* (1%), Palmitoyl hexapeptide-12\* (1%), Acetyl hexapeptide-51\* (1%), Nonapeptide-1\* (1%), Vitamin E (1%), Exfoliating enzymes\* (0,3%), Natural glycerin (20%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Skin preparation prior to peels.
- Diminish pigmentation and dark spots.
- Enhance skin texture and softness.
- Restore the skin's natural pH.
- Activate exfoliating enzymes.
- Nourish and hydrate.

\*Clinical study results available.

The Activator is a micro-exfoliating cream that prepares the skin for professional peelings or can be used alone for a soft and progressive skin resurfacing at home. Applied at night for 3 weeks with an Ekseption sunscreen in the morning, it gradually reduces skin pH, exfoliates, replenishes moisture, and reduces wrinkles, pigmentation, and brown spots for a smooth, radiant complexion.

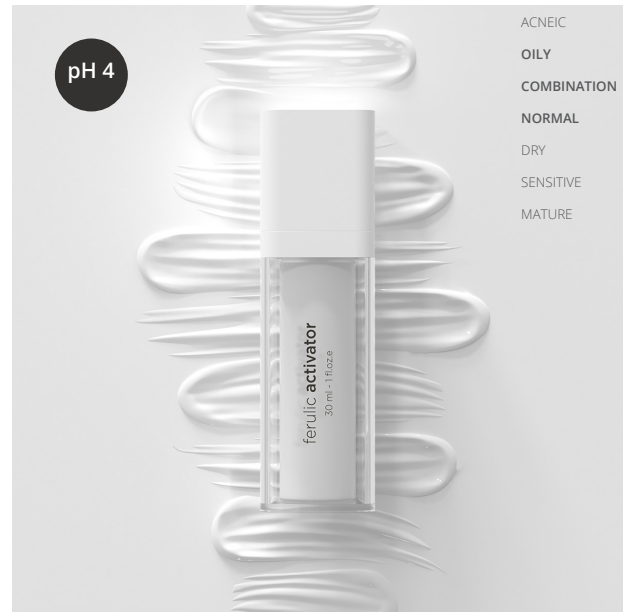

This activator is formulated to gradually reduce the skin pH, while simultaneously exfoliating, replenishing moisture, reducing wrinkles, pigmentation, and brown spots, resulting in a smooth, radiant complexion. The oil-in-water formula is particularly suited for normal to oily skin types.

The ferulic activator is a revolutionary resurfacing cream that uses an exclusive technology of formulation with acids, enzymes, and active ingredients. The selected acids are ferulic acid, known for its activity against free radicals, and lactic acid, which stimulates skin renewal. Lactic acid, enzymes, and peptides improve skin texture and reduce wrinkles, while tranexamic acid and peptides reduce pigmentation problems. The ferulic activator is an effective treatment even for sensitive skin types, and does not cause any redness or inflammation after three weeks of treatment.

In our clinical study, no redness or inflammation occurred after 3 weeks of treatment. After 3 weeks, the skin becomes smoother (4 to 22% improvement), pores are tightened (11 to 25% improvement), overall pigmentation is reduced (up to 10%), and pigmentation spots are reduced up to 10%, for a more uniform and illuminated skin.

#### WHAT IS DIFFERENT?

- Clinically proven.
- Does not cause skin redness and inflammation.
- Light oil-in-water formulation with acids.
- High concentration of active ingredients.
- Double exfoliation system with enzymes and acids.
- Double whitening system with tranexamic acid and nonapeptide-1.
- High concentration of anti-ageing and anti-wrinkles peptides.

## ACTIVATORS

### ferulic **activator**

#### HOW TO USE?

- Cleanse your face: Start by cleansing your face with a gentle cleanser to remove any dirt, oil, and makeup.
- Tone your skin: Apply a toner to your face to balance your skin's pH level and prepare it for the activator.
- Apply the activator: Take a small amount of product and dot it on your forehead, cheeks, nose, and chin. Then, gently massage it into your skin using upward circular motions, avoiding the eye area.
- Let it absorb: Allow the cream to absorb into your skin for a few minutes before going to bed.

For best results, use your activator every night as part of your skincare routine during 3 weeks.

Remember to choose an activator that is suitable for your skin type that can help rejuvenate and nourish your skin while you sleep.

#### ABOUT FORMULATION:

The ferulic activator is a water-in-oil emulsion with a fluid texture and a light after feel. It is recommended for normal to oily skin types as it does not leave an oily film on the skin surface.

The emulsion technology in the ferulic activator is emulsifier-free. The oil droplets are only stabilized by a thickening polymer. To provide maximum hydration, the formula is rich in vegetable glycerin.

Glycerin is a natural component of healthy skin, also known as glycerine or glycerol. It is highly hygroscopic, meaning it attracts water. Glycerin mimics what is known as the skin's natural moisturizing factor (NMF), making it suitable for all skin types, including oily and sensitive skin. Glycerin has numerous skin benefits, primarily serving to hydrate the skin and help it retain moisture.

The main emollient in the formula is a non-comedogenic ester that provides a rich feel and improves the spreading on the skin. The product is certified natural by ECOCERT.

#### FRAGRANCE:

Rose and moka roast coffee.

#### INGREDIENTS:

Aqua (Water), Glycerin, Octyldodecyl myristate, Propylene glycol, Hydroxyethyl acrylate/ Sodium acryloyldimethyl taurate copolymer, Lactic acid, Tocopheryl acetate, Ferulic acid, Tranexamic acid, Bacillus ferment, Acetyl hexapeptide-51 amide, Palmitoyl tripeptide-1, Palmitoyl hexapeptide-12, Nonapeptide-1, Dextran, Butylene glycol, Triethylene glycol, Phenoxyethanol, Potassium sorbate, Parfum.

## ACTIVATORS

### pure skin **activator**

#### ACTIVE INGREDIENTS

Pure skin natural blend\* (3%), Gluconolactone\* (5%), Salicylic acid\* (0,15%), Tea tree essential oil (0,15%), Lime essential oil (0,1%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Skin preparation prior to peels.
  - Reduction of acne, oily skin and open pores.
  - Reduction of couperosis and rosacea.
  - Reduction of seborrhea.
  - Enhance skin texture and softness.
  - Restore the skin's natural pH.
  - Activate exfoliating enzymes.
- \*Clinical study results available.

The Activator is a micro-exfoliating cream that prepares the skin for professional peelings or can be used alone for a soft and progressive skin resurfacing at home. Applied at night for 3 weeks with an Ekseption sunscreen in the morning, it gradually reduces skin pH, exfoliates, and reduces acne, impurities, pigmentation, and brown spots for a smooth, radiant complexion. The oil-in-water formula is suitable for normal to oily and acne-prone skin types.

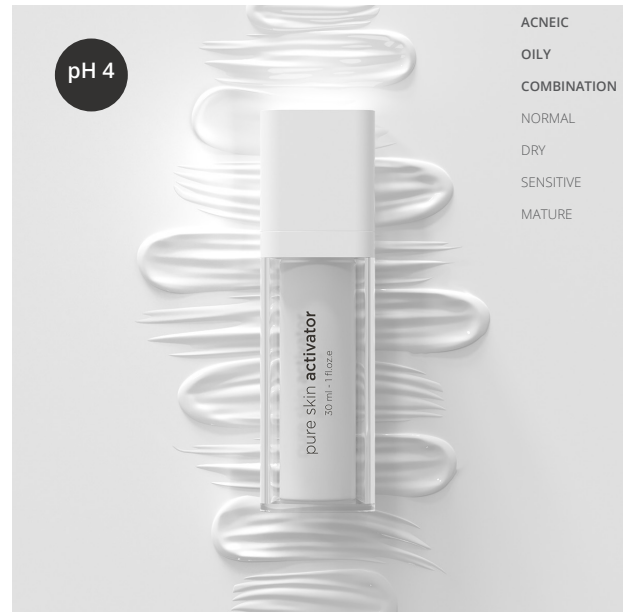

The Pure Skin Activator is a revolutionary resurfacing cream that uses an exclusive formulation technology with acids and natural active ingredients. Salicylic acid and gluconolactone have been selected for their purifying and keratolytic properties. The Pure Skin Activator contains a transdermal booster for salicylic acid to optimize its skin penetration and efficiency. Salicylic acid has strong antiseptic and cleansing properties. It normalizes the sebaceous gland function and results in pore contraction. The synergy of acids and natural extracts has a wide range of indications, including impurities, blackheads, oily skin, acne, open pores, rosacea, couperosis, and seborrhea.

Tea tree is an essential oil obtained from the Australian tea tree *Melaleuca alternifolia*. It possesses antifungal, antibacterial, and antimicrobial benefits. The herbal preparation is composed of licorice, *Artemisia montana*, *Ginkgo biloba*, *Centella asiatica*, blueberry, and rose oil. It has multiple functions such as antioxidant, anti-inflammatory, antimicrobial, and skin-soothing effects.

In our clinical study, no redness or inflammation occurred after 3 weeks of treatment. After 3 weeks, the skin becomes smoother (26 to 33% improvement), pores are tightened (22 to 25% improvement), overall pigmentation is reduced (7 up to 16%), and pigmentation spots are reduced up to 31%, for a more uniform and illuminated skin.

#### WHAT IS DIFFERENT?

- Clinically proven.
- Does not cause skin redness and inflammation.
- Light oil-in-water formulation with acids.
- High concentration of active ingredients.
- Transdermal booster for salicylic acid.
- Natural active ingredients to treat acne.

## ACTIVATORS

### pure skin **activator**

#### HOW TO USE?

- Cleanse your face: Start by cleansing your face with a gentle cleanser to remove any dirt, oil, and makeup.
- Tone your skin: Apply a toner to your face to balance your skin's pH level and prepare it for the activator.
- Apply the activator: Take a small amount of product and dot it on your forehead, cheeks, nose, and chin. Then, gently massage it into your skin using upward circular motions, avoiding the eye area.
- Let it absorb: Allow the cream to absorb into your skin for a few minutes before going to bed.

For best results, use your activator every night as part of your skincare routine during 3 weeks.

Remember to choose an activator that is suitable for your skin type that can help rejuvenate and nourish your skin while you sleep.

#### ABOUT FORMULATION:

The Pure Skin Activator is a water-in-oil emulsion with a fluid texture and light after-feel. This type of emulsion is more suitable for normal to oily skin types as it does not leave any oily film on the skin surface. The emulsion technology used in the Pure Skin Activator involves a polymer emulsifier in very low concentration, with a reduced oil phase adapted to oily skin types.

The main emollient is a highly polar oil with a unique soft feel, lightness and hydration-boosting capacity. It is combined with a very light silicone oil with an extremely low surface tension that creates a non-tacky semi-permeable moisture barrier. These emollients have been selected for their ultra-light feel to avoid creating an oily after-feel, while preserving the skin's hydration.

#### FRAGRANCE:

Lime and tea tree essential oils.

#### INGREDIENTS:

Aqua (Water), Dimethyl isosorbide, Gluconolactone, Dimethicone, Hydroxyethyl acrylate/ Sodium acryloyldimethyl taurate copolymer, Butylene glycol, Isohexadecane, Salicylic acid, Centella Asiatica (Pennywort) extract, Glycyrrhiza Glabra (Licorice) root extract, Artemisia Montana (Mugwort) leaf extract, Vaccinium Corymbosum (Blueberry) fruit extract, Ginkgo Biloba (Ginkgo) leaf extract, Rosa Canina (Rose) fruit oil, Bis-PEG/ PPG-20/ 5 PEG/ PPG-20/ 5 dimethicone, Methoxy PEG/ PPG-25/ 4 dimethicone, Caprylic/Capric triglyceride, Sodium benzoate, Sodium dehydroacetate, Melaleuca Alternifolia (Tea tree) oil, Citrus Aurantifolia (lime) peel oil, Limonene, Citral.

## ACTIVATORS

### caviar **activator**

#### ACTIVE INGREDIENTS

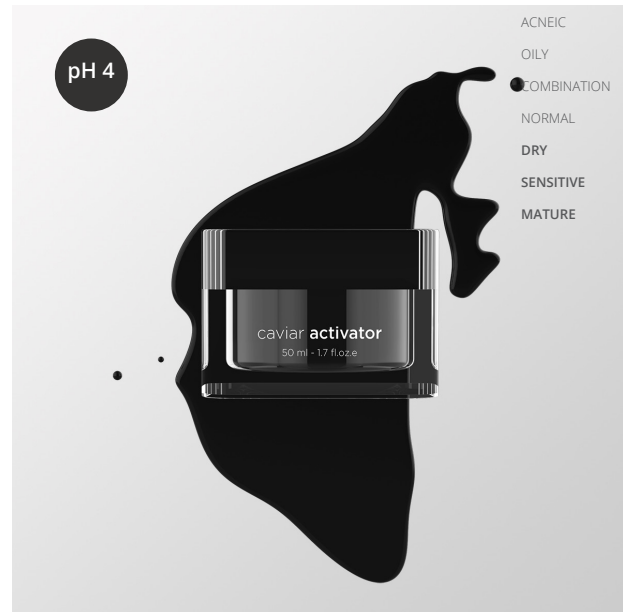

Caviar sevruga extract\* (5%), Lactobionic acid\* (2%),  
Tranexamic acid\* (0,2%), Natural glycerin (5%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Skin preparation prior to peels.
- Diminish pigmentation and dark spots.
- Reduce the appearance of wrinkles.
- Enhance skin texture and softness.
- Restore the skin's natural pH.
- Activate exfoliating enzymes.
- Nourish and hydrate.

\*Clinical study results available.

The Activator is a micro-exfoliating cream that prepares the skin for professional peelings or can be used alone for a soft and progressive skin resurfacing at home. Applied at night for 3 weeks with an Ekseption sunscreen in the morning, it gradually reduces skin pH, exfoliates, replenishes moisture, reduces wrinkles, pigmentation, and brown spots for a smooth, radiant complexion. The water-in-oil formula is particularly suitable for dry and mature skin types.

Caviar activator is a revolutionary resurfacing cream that uses an exclusive technology of formulation with lactobionic acid, tranexamic acid, and caviar extract in high concentrations. The selected acid is a PHA that avoids causing redness and inflammation, as demonstrated in our clinical study where no redness or inflammation was caused after three weeks of treatment. Lactobionic acid improves the skin texture and reduces wrinkles, while tranexamic acid reduces pigmentation problems.

Caviar Sevruga Extract is designed to bring a touch of luxury to skin care products. Sevruga caviar is one of the highest valued and most expensive delicacies. Rich in omega-3 fatty acids and vitamins D, B2, and B12, it acts as a natural antioxidant with anti-inflammatory, anti-aging, and revitalizing effects.

In our clinical study, no redness or inflammation occurred after 3 weeks of treatment. After 3 weeks, the skin becomes smoother (13 to 22% improvement), wrinkles depth is reduced from 7 up to 45%, pores are tightened (11 to 26% improvement), overall pigmentation is reduced (9 up to 16%), and pigmentation spots are reduced 12 up to 19%, for a more uniform and illuminated skin.

#### WHAT IS DIFFERENT?

- Clinically proven.
- Does not cause skin redness and inflammation.
- Rich water-in-oil formulation with lactobionic acid.
- High concentration of caviar extract.
- Isotonic water phase.

## ACTIVATORS

Aqua (Water), Caprylic/Capric triglyceride, Glycerin, Stearyl heptanoate, Stearyl caprylate, Cetyl PEG/ PPG-10/ 1 Dimethicone, Caviar extract, Lactobionic acid, Tranexamic acid,, Sodium chloride, Triethylene glycol, Phenoxyethanol, Potassium sorbate, Parfum, Hexyl cinnamal, Linalool, Benzyl salicylate.

## REPAIR CREAMS

### caviar **repair**

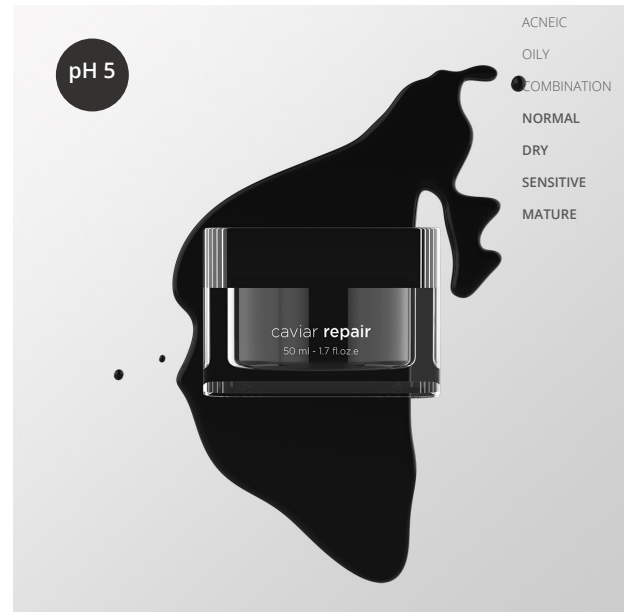

#### ACTIVE INGREDIENTS

Caviar sevruga extract\* (5%), Repair complex with ATP and amino acids\* (5%), Retinol\* (0,1%), Vitamin E (0,25%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Repair and regulate the skin renewal process after peelings.
- Restore essential lipids to treat dry and delicate skin.
- Improve skin firmness.
- Reduce the appearance of wrinkles.
- Soothe the skin and reduce redness.

Repair creams play a crucial role in promoting healthy skin proliferation and cellular differentiation, especially after chemical peels. It is essential to use the right product to restore the skin structure and regulate processes like differentiation, proliferation, and intercellular communication. Repair creams should be rich in soothing active ingredients and nutrients. They are also effective treatments for skin soothing and nutrition when used alone. The repair cream should be applied at night and followed by sunscreen in the morning.

This caviar repair cream is formulated to maintain an optimal skin pH, simultaneously repairing and regenerating the skin. The oil-in-water formula is especially suitable for dry and mature skin types. Caviar repair combines an important amount of essential nutrients to boost cellular activity, vitamin E as an antioxidant, and retinol to stimulate skin renewal.

Caviar Sevruga Extract adds a touch of luxury to the cream. Sevruga caviar is one of the most expensive and highly valued delicacies. It is rich in omega-3 fatty acids, vitamins D, B2, and B12, which provide natural antioxidant, anti-inflammatory, anti-aging, and revitalizing effects.

The repair complex in the cream accelerates the healing process by reducing redness and inflammation up to 37% after only 24 hours and 52% after 48 hours compared to a placebo. It also acts at the DNA level to reverse damages caused by UV exposure.

#### WHAT IS DIFFERENT?

- Contains a high amount of nutrients, antioxidants, and retinol.
- Nutritive water-in-oil cream.
- High concentration of caviar extract.
- Maintains optimal skin pH.
- Specifically formulated to repair the skin after peeling.

## REPAIR CREAMS

### caviar **repair**

#### **HOW TO USE?**

- Before applying your night cream, ensure that your face is clean and free from any makeup or impurities. Use a cleanser to remove any dirt or oil from your skin, then pat dry with a clean towel.
- Take a small amount of your night cream and gently apply it onto your face and neck, using your fingertips. Use circular motions to massage the cream into your skin, working from the center of your face outwards.
- If you have specific areas of concern, such as fine lines or dark spots, spend extra time massaging the night cream into those areas. Once you have applied the night cream, allow it to absorb into your skin for a few minutes before going to bed. Avoid touching your face or applying any other products on top of the night cream.

In the morning, rinse your face with water and a gentle cleanser to remove any residue from the night cream. Remember to choose a night cream that is appropriate for your skin type and concerns. Night creams are usually richer and more nourishing than day creams, as they are designed to provide deep hydration and repair while you sleep.

#### **ABOUT FORMULATION:**

This is a water-in-oil emulsion with a fine, bright appearance and a nourishing after-feel. The specific composition of this cream provides optimal emulsion stability while ensuring a smooth and velvety skin feel. The cream has a pleasant, fresh feel upon application and is easily absorbed by the skin.

The formulation contains only one type of emollient, in high concentration. It is made using vegetable glycerol and medium-chain fatty acids from coconut oil, which is a natural, non-greasy emollient. It possesses good dermatological compatibility, moisturizing and conditioning properties, and penetrates easily into the skin, offering nourishing benefits and making the skin soft and supple.

#### **FRAGRANCE:**

Aloe Vera, fresh and light.

#### **INGREDIENTS:**

Aqua (Water), Caprylic/Capric triglyceride, Butylene glycol, Cetyl alcohol, Hydroxyethyl Acrylate/ Sodium Acryloyldimethyl Taurate Copolymer, Caviar extract, Retinol, Acetyl tyrosine, Proline, Hydrolyzed vegetable protein, Adenosine triphosphate, Tocopheryl acetate, Glycerin, Bis-PEG/ PPG-20/ 5 PEG/ PPG-20/ 5 Dimethicone, Methoxy PEG/ PPG-25/ 4 Dimethicone, Polysorbate 20, BHT, BHA, Triethylene glycol, Phenoxyethanol, Potassium sorbate, Parfum, Hexyl cinnamal, Linalool, Benzyl salicylate.

## REPAIR CREAMS

### ice cream **repair**

#### ACTIVE INGREDIENTS

Bio-placenta\* (5 growth factors + folic acid + acetyl glutamine) (5%), Repair complex with ATP and amino acids\* (5%), Retinol\* (0,1%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Repair and regulate the skin renewal process after peelings.
- Restore essential lipids to treat dry and delicate skin.
- Improve skin firmness.
- Reduce the appearance of wrinkles.
- Soothe the skin and reduce redness.

Repair creams play a crucial role in promoting healthy skin proliferation and cellular differentiation, especially after chemical peels. It is essential to use the right product to restore the skin structure and regulate processes like differentiation, proliferation, and intercellular communication. Repair creams should be rich in soothing active ingredients and nutrients. They are also effective treatments for skin soothing and nutrition when used alone. The repair cream should be applied at night and followed by sunscreen in the morning.

This ice cream repair is formulated to maintain optimal skin pH, simultaneously repair and regenerate the skin. This water-in-oil formula with an ice cream texture will suit in particular dry and mature skin types. Ice cream repair combines important amounts of essential nutrients and growth factors to boost cellular activity and retinol to stimulate the skin renewal process.

The rejuvenation complex has a similar composition to placenta, rich in growth factors, folic acid, and acetyl glutamine. A global anti-aging solution, with multiple effects: skin repair, stimulation of cell growth, anti-wrinkles, skin firming, and moisturizing.

The repair complex accelerates the healing process by reducing redness and inflammation up to 37% after only 24 hours and 52% after 48 hours compared to placebo. It also acts at the DNA level to reverse damages, particularly those caused by UV exposure.

#### WHAT IS DIFFERENT?

- Contains a high amount of essential nutrients, growth factors, and retinol.
- Exclusive water-in-oil ice cream texture.
- High concentration of bio-placenta.
- Maintains optimal skin pH.
- Specifically formulated to repair the skin after peeling.

## REPAIR CREAMS

### ice cream **repair**

#### **HOW TO USE?**

- Before applying your night cream, ensure that your face is clean and free from any makeup or impurities. Use a cleanser to remove any dirt or oil from your skin, then pat dry with a clean towel.
- Take a small amount of your night cream and gently apply it onto your face and neck, using your fingertips. Use circular motions to massage the cream into your skin, working from the center of your face outwards.
- If you have specific areas of concern, such as fine lines or dark spots, spend extra time massaging the night cream into those areas. In the morning, rinse your face with water and a gentle cleanser to remove any residue from the night cream. Remember to choose a night cream that is appropriate for your skin type and concerns. Night creams are usually richer and more nourishing than day creams, as they are designed to provide deep hydration and repair while you sleep.

#### **ABOUT FORMULATION:**

The cream has a delightful ice-cream texture that melts upon application, leaving an ultra-comfortable and nutritive after-feel. The scent of caramel and vanilla adds an additional comforting feeling to the experience.

The ice cream is a water-in-oil cream that combines two innovative technologies - the ice cream texture and water-in-oil emulsion. The polymeric emulsifiers used in the formulation ensure maximum stability of this critical system.

The main emollients in the cream are silicone waxes that offer excellent skin protection without forming an occlusive film. They are effective in protecting and soothing the skin, and their melting point has been adjusted to be close to skin temperature, providing a refreshing sensation upon application.

It is important to store the cream at a temperature below 25 degrees Celsius at all times. If the cream is exposed to high temperatures, it should be placed in the fridge to restore its original ice cream texture.

#### **FRAGRANCE:**

Caramel & vanilla.

#### **INGREDIENTS:**

Aqua (Water), Bis-stearyl dimethicone, C30-45 Alkyldimethylsilyl polypropylsilsesquioxane, Cetyl PEG/ PPG-10/ 1 Dimethicone, Hexyl laurate, Acetyl glutamine, sh-Oligopeptide-2, sh-Polypeptide-1, sh-Oligopeptide-1, sh-Polypeptide-9, sh, Polypeptide-11, Bacillus/folic acid ferment filtrate extract, Sodium hyaluronate, Acetyl tyrosine, Proline, Hydrolyzed vegetable protein, Adenosine triphosphate, Lecithin, Caprylyl glycol, Butylene glycol, 1,2-Hexanediol, Dimethicone, PEG/PPG-18/18, Dimethicone, Polyglyceryl-4 isostearate, Polyacrylate-13, Polyisobutene, Retinol, Polysorbate 20, BHT, BHA, Phenoxyethanol, Triethylene glycol, Parfum, Linalool, Limonene, Hydroxycitronellal, Hexyl cinnamal, Coumarin.

### glaciar **repair**

#### ACTIVE INGREDIENTS

Glacier water from Mont Blanc\* (30%), Multi-mineral complex with Zinc, Magnesium, copper and calcium\* (2%), alpha-bisabolol\* (0,25%), Neodermyl\* (3%), Moisture release system\* (2%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Repair and regulate the skin renewal process after peelings.
- Restore mineral balance in oily and combination skin types.
- Improve skin firmness.
- Reduce the appearance of wrinkles.
- Soothe the skin and reduce redness.

Repair creams play a crucial role in promoting healthy skin proliferation and cellular differentiation, especially after chemical peels. It is essential to use the right product to restore the skin structure and regulate processes like differentiation, proliferation, and intercellular communication. Repair creams should be rich in soothing active ingredients and nutrients. They are also effective treatments for skin soothing and nutrition when used alone. The repair cream should be applied at night and followed by sunscreen in the morning.

Formulated to maintain an optimal skin pH, simultaneously repair and regenerate the skin. This oil-in-water formula with an ultra-cooling texture will suit normal to oily skin types. Glaciar repair combines important amounts of essential minerals and Neodermyl to boost cellular activity and Bisabolol to reduce redness and irritations.

- Mont Blanc water is specifically selected from alpine glaciers, collected on the French side of Mont Blanc, and has a very high level of minerals, especially calcium and silicium, which provide restructuring properties at the dermal and epidermal level. Mineral-rich waters possess numerous medicinal properties, such as anti-inflammatory, soothing, anti-irritating, sebo-regulating, and repairing effects.
- The multi-mineral complex (zinc, copper, magnesium synergy) optimizes cellular respiration to stimulate energy (ATP) and metabolic (DNA proteins) mediators. It is an active ingredient booster with a radical scavenging effect that inhibits cellular free radical formation. It is an energizer for clear, fresh skin. The high amount of zinc helps to normalize oily skin types.
- Neodermyl is a pure source of bio-energy that can naturally diffuse into the skin, re-energizing senescent fibroblasts and triggering essential elements to produce collagen and elastin. Neodermyl shows high clinical efficacy within 15 days, resulting in a visible reduction of deep wrinkles and improvement of skin firmness.
- Alpha-bisabolol is a new agent for skin whitening and oily skin. It is one of the most famous oily skin soothing active ingredients. It shows a strong melanogenesis inhibition effect, and skin whitening efficacy has been proven by clinical evaluations.

#### WHAT IS DIFFERENT?

- Provides essential minerals to revitalize and regulate oily skin types.
- Exclusive ultra-cooling glacier texture with a moisture release system.
- High concentration of minerals and neodermyl.
- Optimal pH.

REPAIR CREAMS

## glaciar **repair**

### HOW TO USE?

- Before applying your night cream, ensure that your face is clean and free from any makeup or impurities. Use a cleanser to remove any dirt or oil from your skin, then pat dry with a clean towel.
- Take a small amount of your night cream and gently apply it onto your face and neck, using your fingertips. Use circular motions to massage the cream into your skin, working from the center of your face outwards.
- If you have specific areas of concern, such as fine lines or dark spots, spend extra time massaging the night cream into those areas. Once you have applied the night cream, allow it to absorb into your skin for a few minutes before going to bed. Avoid touching your face or applying any other products on top of the night cream.

In the morning, rinse your face with water and a gentle cleanser to remove any residue from the night cream. Remember to choose a night cream that is appropriate for your skin type and concerns. Night creams are usually richer and more nourishing than day creams, as they are designed to provide deep hydration and repair while you sleep.

### ABOUT FORMULATION:

The cream is an oil-in-water emulsion with a glacier skin cooling texture that soothes the skin upon application. The texture is highly hydrating, refreshing and provides a cooling effect on the skin.

The emulsion uses a specific polymeric emulsifier at a very low concentration and a water-absorbing powder to fix all the water in the emulsion by osmotic pressure. The trapped water and active ingredients are gradually diffused to improve efficiency and hydration, while the soft-focus effect reduces the appearance of imperfections.

The emollients in the formula are a mixture of high molecular weight silicones selected for their mattifying and sebum-absorbing properties. Additionally, the cream is enriched with minerals from Mont Blanc water, including calcium and silicium, to revitalize the skin and regulate oily skin types.

The optimal pH of the formula ensures that it effectively maintains the skin's natural pH balance.

### FRAGRANCE:

Aloe Vera, fresh and light.

### INGREDIENTS:

Aqua (Water), Dimethicone, Dimethicone/ Vinyl dimethicone crosspolymer, Sodium acrylates crosspolymer-2, Sodium acrylate/ Acryloyldimethyltaurate/ Dimethylacrylamide crosspolymer, Zinc gluconate, Magnesium aspartate, Copper gluconate, Calcium gluconate, Bisabolol, Methyl-alpha-D-glucoside-6-phosphate, Copper lysinate/ prolinatate, Glycerin, Caprylic/Capric triglycerides, Bis PEG/ PPG-20/ 5 PEG/ PPG-20/ 5 Dimethicone, Methoxy PEG/ PPG-25/ 4 Dimethicone, Isohexadecane, Polysorbate 60, Butylene glycol, Triethylene glycol, Phenoxyethanol, Sodium benzoate, Potassium sorbate, Citric acid, Parfum, Hexyl cinnamal, Linalool, Benzyl salicylate.

## CREAMS

### ice cream lift

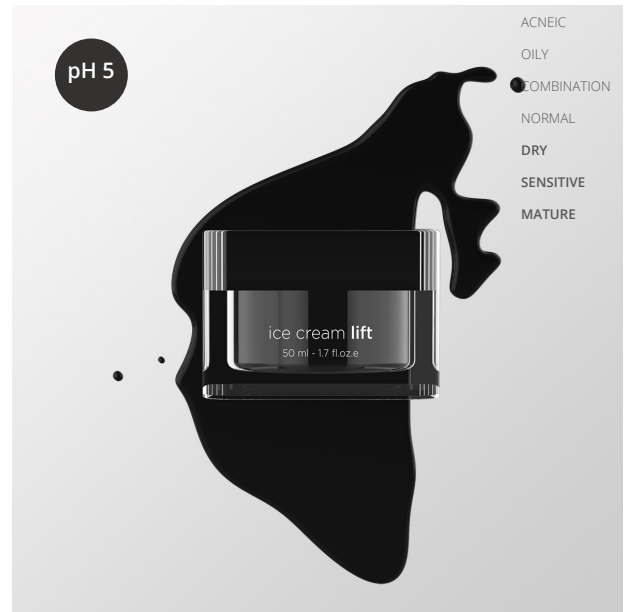

#### ACTIVE INGREDIENTS

Bio-placenta\* (5 growth factors + folic acid + acetyl glutamine) (5%), Acetyl hexapeptide-51\* (5%), Palmitoyl hexapeptide-12\* (5%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Skin lifting.
- Improve skin firmness.
- Reduce the appearance of wrinkles.
- Intense nutrition.
- Soothe the skin and reduce redness.

This lifting cream has an ice cream texture and is applied at night for optimal results. The innovative ice cream formulation enhances the effect of active ingredients, producing an intense cooling sensation and leaving a long-lasting protective layer over the skin.

The cream is highly concentrated in peptides and growth factors to reduce wrinkles and skin sagging while providing intense nourishment.

The ice cream lift is formulated to maintain optimal skin pH, lift, and reduce wrinkles. This water-in-oil formula with an ice cream texture is particularly suitable for dry and mature skin types.

The rejuvenation complex has a composition similar to placenta, rich in growth factors, folic acid, and acetyl glutamine. It is a global anti-aging solution with multiple effects, including skin repair, stimulation of cell growth, anti-wrinkles, skin firming, and moisturizing.

The Acetyl Hexapeptide-51 Amide peptide solution is specifically designed to enhance natural mechanisms to diminish the DNA damage that several factors produce as we age, protecting genomic integrity. It can reduce existing cellular DNA damage and delay cell senescence, thereby helping to obtain younger-looking skin.

Palmitoyl hexapeptide-12 is a lipopeptide, conjugated with a long-chain fatty acid to improve skin penetration. Peptides are miniature fragments of skin protein, signaling messengers that signal the dermis to synthesize the material necessary for the skin. Palmitoyl hexapeptide-12 is the spring fragment of elastin; it stimulates fibroblasts in the elastin synthesis. This peptide is used for skin repair and protection against oxidation.

#### WHAT IS DIFFERENT?

- Contains a high concentration of peptides and growth factors.
- Exclusive water-in-oil ice cream texture.
- High concentration of bio-placenta.
- Maintains optimal skin pH.

CREAMS

## ice cream **lift**

### HOW TO USE?

- Before applying your night cream, ensure that your face is clean and free from any makeup or impurities. Use a cleanser to remove any dirt or oil from your skin, then pat dry with a clean towel.
- Take a small amount of your night cream and gently apply it onto your face and neck, using your fingertips. Use circular motions to massage the cream into your skin, working from the center of your face outwards.
- If you have specific areas of concern, such as fine lines or dark spots, spend extra time massaging the night cream into those areas. Once you have applied the night cream, allow it to absorb into your skin for a few minutes before going to bed. Avoid touching your face or applying any other products on top of the night cream.

In the morning, rinse your face with water and a gentle cleanser to remove any residue from the night cream. Remember to choose a night cream that is appropriate for your skin type and concerns. Night creams are usually richer and more nourishing than day creams, as they are designed to provide deep hydration and repair while you sleep.

### ABOUT FORMULATION:

The cream has a delightful ice-cream texture that melts upon application, leaving an ultra-comfortable and nutritive after-feel. The scent of coffee and vanilla adds an additional comforting feeling to the experience.

The ice cream is a water-in-oil cream that combines two innovative technologies - the ice cream texture and water-in-oil emulsion. The polymeric emulsifiers used in the formulation ensure maximum stability of this critical system.

The main emollients in the cream are silicone waxes that offer excellent skin protection without forming an occlusive film. They are effective in protecting and soothing the skin, and their melting point has been adjusted to be close to skin temperature, providing a refreshing sensation upon application.

It is important to store the cream at a temperature below 25 degrees Celsius at all times. If the cream is exposed to high temperatures, it should be placed in the fridge to restore its original ice cream texture.

### FRAGRANCE:

Arabica coffee & bourbon vanilla.

### INGREDIENTS:

Aqua (Water), Bis-stearyl dimethicone, C30-45 Alkyldimethylsilyl polypropylsilsesquioxane, Cetyl PEG/PPG-10/1 Dimethicone, Hexyl laurate, Acetyl hexapeptide-51 amide, Palmitoyl hexapeptide-12, Acetyl glutamine, sh-Oligopeptide-1, sh-Oligopeptide-2, sh-Polypeptide-1, sh-Polypeptide-9, sh-Polypeptide-11, Bacillus/folic acid ferment filtrate extract, Sodium hyaluronate, Lecithin, Glycerin, Caprylyl glycol, Butylene glycol, 1,2-Hexanediol, Dimethicone, PEG/PPG-18/18 Dimethicone, Polyglyceryl-4 Isostearate, Polyacrylate-13, Polyisobutene, Polysorbate 20, Phenoxyethanol, Triethylene glycol, Parfum, Linalool, Limonene, Hydroxycitronellal, Hexyl cinnamal, Coumarin.

## CREAMS

### age less **cocoon**

#### ACTIVE INGREDIENTS

Acetyl hexapeptide-51\* (5%), Palmitoyl tripeptide-1\* (2,5%), Palmitoyl hexapeptide-12\* (2,5%), Lactobionic acid\* (0,25%), Gluconolactone\* (0,25%), Natural glycerin (8%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Improve the skin firmness.
- Reduce the appearance of wrinkles.
- Maintain optimal skin pH gradient.
- Activate exfoliating enzymes.
- Improve the skin texture and softness.
- Nourish and moisturise.

Age-less cocoon is a nourishing and moisturizing cream that not only improves the skin texture but also maintains a healthy skin pH, reduces the signs of aging, and minimizes wrinkles. It contains a powerful blend of three peptides and polyhydroxyacids (lactobionic and gluconolactone), which promote continuous skin renewal and provide extreme comfort.

For optimal results, Age-less cocoon should be used in combination with the all-day shield to protect the skin from UV damage. The peptides in the formulation stimulate the production of extracellular matrix components by activating fibroblasts, while the other peptide protects cellular DNA from damage and stimulates natural repair pathways. The PHAs in the formula regulate skin pH and stimulate cellular renewal, making it particularly effective for use after peeling programs.

Acetyl Hexapeptide-51 Amide peptide solution is designed to enhance natural mechanisms to diminish DNA damage caused by several factors, protecting genomic integrity. This peptide can reduce existing cellular DNA damage and delay senescence of cells, thereby promoting a youthful appearance.

Lipopeptides, conjugated with long-chain fatty acids, improve skin penetration, and serve as miniature messengers that signal the dermis to synthesize necessary skin components.

Palmitoyl hexapeptide-12 is a spring fragment of elastin that stimulates fibroblasts in elastin synthesis. This peptide is used for skin repair and to protect against oxidation.

Palmitoyl Tripeptide-1 contains three amino acids: glycine, histidine, and lysine. It initiates the stimulation of collagen and hyaluronic acid synthesis, which strengthens connective tissue, reduces wrinkles, and restores natural skin firmness.

#### WHAT IS DIFFERENT?

- Contains a high concentration of peptides.
- Contains PHAs.
- Ultra comfortable texture.
- Maintains optimal skin pH.

CREAMS

age less **cocoon**

### HOW TO USE?

Day use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Give your skin a few minutes to absorb the cream before applying any makeup.

Night use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of night cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Allow the night cream to work on your skin overnight.

Here are some additional tips to keep in mind when using day and night creams:

Always start with a clean face to maximize the benefits of the cream.

Use a gentle cleanser that is appropriate for your skin type.

Apply the cream in a gentle, circular motion to help improve blood circulation and ensure even distribution.

Use a sunscreen with an SPF of at least 30 during the day to protect your skin from harmful UV rays.

### ABOUT FORMULATION:

The cream has a lustrous white appearance and a luxurious, ultra-comfortable texture that leaves the skin feeling smooth and velvety.

The emulsion is an oil-in-water formula with a specific polymeric emulsifier used at a very low concentration. To deliver maximum hydration, the formula is enriched with vegetable glycerin, a natural component of healthy skin known for its humectant properties. Glycerin mimics the skin's natural moisturizing factor (NMF), making it suitable for all skin types, including oily and sensitive skin. It primarily serves to hydrate skin and help it retain moisture.

The main emollient in the formula is a non-comedogenic ester that provides a rich feel and enhances spreadability on the skin. It is certified natural by ECOCERT, ensuring that it meets high standards of sustainability and quality.

### FRAGRANCE:

Aloe Vera, fresh and light.

### INGREDIENTS:

Aqua (Water), Octyldodecyl myristate, Glycerin, Hydroxyethyl Acrylate/ Sodium Acryloyldimethyl Taurate Copolymer, Bis-PEG/ PPG-20/ 5 PEG/ PPG-20/ 5 Dimethicone, Methoxy PEG/ PPG-25/ 4 Dimethicone, Gluconolactone, Lactobionic acid, Acetyl hexapeptide-51 amide, Palmitoyl tripeptide-1, Palmitoyl hexapeptide-12, Butylene glycol, Caprylic/Capric triglyceride, Triethylene glycol, Phenoxyethanol, Parfum.

CREAMS

## white-up sorbet

### ACTIVE INGREDIENTS

Tranexamic acid\* (1,5%), Lactobionic acid\* (0,5%),  
Nonapeptide-1\* (5%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Brighten and even out the skin tone.
- Reduce pigmentation and dark spots.
- Improve skin texture and softness.
- Maintain optimal skin pH gradient.
- Activate exfoliating enzymes.
- Improve the skin texture and softness.-
- Nourish and moisturise.

Nourishing and moisturizing cream designed to improve skin texture, maintain a healthy pH balance, and reduce signs of photoaging. White-up sorbet is formulated with a powerful blend of anti-pigmentation peptides, tranexamic acid, and lactobionic acid, providing intense nourishment, moisture, and comfort to the skin. This product is highly effective in promoting continuous skin renewal and should be combined with the all-day shield for optimal protection against UV damage.

Nonapeptide-1 works to prevent melanin synthesis by inhibiting the activation of tyrosinase, thus preventing unwanted pigmentation and providing better control over skin tone.

Lactobionic acid in the formula regulates the skin's pH and stimulates cellular renewal, particularly after peeling programs, to maintain healthy skin.

Tranexamic acid, a synthetic derivative of lysine with a structure partially similar to that of tyrosine, has been clinically proven to be suitable for all skin types. It can effectively reduce pigmentation, lighten spots such as sun damage, dark spots (chloasma, freckles, senile lentils, etc.), and post-inflammatory hyperpigmentation caused by acne or inflammation.

### WHAT IS DIFFERENT?

- Contains tranexamic acid and whitening peptide.
- Contains lactobionic acid.
- Ultra comfortable texture.
- Maintains optimal skin pH.

CREAMS

white-up **sorbet**

### HOW TO USE?

Day use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Give your skin a few minutes to absorb the cream before applying any makeup.

Night use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of night cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Allow the night cream to work on your skin overnight.

Here are some additional tips to keep in mind when using day and night creams:

Always start with a clean face to maximize the benefits of the cream.

Use a gentle cleanser that is appropriate for your skin type.

Apply the cream in a gentle, circular motion to help improve blood circulation and ensure even distribution.

Use a sunscreen with an SPF of at least 30 during the day to protect your skin from harmful UV rays.

### ABOUT FORMULATION:

The cream has a lustrous white appearance and a luxurious, ultra-comfortable texture that leaves the skin feeling smooth and velvety. The emulsion is an oil-in-water formula with a specific polymeric emulsifier used at a very low concentration.

This formulation features two types of emollients. The first type is a blend of long-chain fatty acid esters that melt at skin temperature, creating a soft, pleasant, and smooth feel. They have high re-fatting potential and strong water repellent properties to form a protective film that prevents the skin from drying out.

The second emollient is derived from vegetable glycerin and medium-chain fatty acids from coconut oil. This natural, non-greasy emollient is highly compatible with the skin, offering moisturizing and conditioning properties. It easily penetrates the skin, providing nourishment and leaving it soft and supple.

### FRAGRANCE:

Aloe Vera, fresh and light.

### INGREDIENTS:

Aqua (Water), Caprylic/Capric triglyceride, Butylene glycol, Stearyl heptanoate, Stearyl caprylate, Hydroxyethyl Acrylate/ Sodium Acryloyldimethyl Taurate Copolymer, Tranexamic acid, Bis-PEG/ PPG-20/ 5 PEG/ PPG-20/ 5 Dimethicone, Methoxy PEG/ PPG-25/ 4 Dimethicone, Lactobionic acid, Nonapeptide-1, Dextran, Triethylene glycol, Phenoxyethanol, Parfum, Hexyl cinnamal, Linalool, Benzyl salicylate.

CREAMS

## hydration **sparkle**

### ACTIVE INGREDIENTS

Lactic acid (0,5%), Natural glycerin (5%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Moisturize with lactic acid.
- Evens out skin tone.
- Restore high skin hydration.
- Improve skin texture and softness.
- Maintain optimal skin pH gradient.
- Activate exfoliating enzymes.

Refresh and hydrate your skin with this lactic acid-infused cream. The unique texture is refreshing and light at application, but a protective and nourishing film remains on the surface of the skin for hours. This film helps prevent transepidermal water loss, while maintaining a high level of hydration for optimal comfort.

Lactic acid is a popular alpha hydroxy acid that promotes cellular renewal and helps exfoliate the skin. It dissolves bonds between older, dull cells, revealing brighter, smoother and softer skin. It can also stimulate collagen renewal, firm the skin, and reduce signs of aging such as hyperpigmentation, fine lines and wrinkles.

Unlike other AHAs, lactic acid helps to improve the skin's natural moisture factor, keeping it hydrated by binding high levels of water. This cream is suitable for all skin types and is especially designed to immediately reduce fine lines and plump-up the skin.

The water-drop formulation is exclusive to this cream and ensures maximum absorption and effectiveness. Use regularly for a more radiant and youthful-looking complexion.

### WHAT IS DIFFERENT?

- Contains lactic acid.
- Water-drop formulation.
- Fresh and long-lasting moisture.
- Ultra comfortable texture.
- Maintains optimal skin pH.

CREAMS

## hydration **sparkle**

### **HOW TO USE?**

Day use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Give your skin a few minutes to absorb the cream before applying any makeup.

Night use:

Start by washing your face with a gentle cleanser and patting it dry with a clean towel. Take a small amount of night cream and apply it on your face, neck, and décolletage area. Gently massage it into your skin using circular motions until it is fully absorbed. Allow the night cream to work on your skin overnight.

Here are some additional tips to keep in mind when using day and night creams:

Always start with a clean face to maximize the benefits of the cream.

Use a gentle cleanser that is appropriate for your skin type.

Apply the cream in a gentle, circular motion to help improve blood circulation and ensure even distribution.

Use a sunscreen with an SPF of at least 30 during the day to protect your skin from harmful UV rays.

### **ABOUT FORMULATION:**

A water-in-oil cream based on Japanese technology, this cream has a matte appearance and consists of an oil phase saturated with ultra-fine water droplets. The result is a cream that breaks upon contact with the skin, releasing water droplets that provide a unique refreshing sensation upon application. However, after application, the skin is nourished by the oil phase that remains on the skin, thanks to the external phase composed of oil, which creates a lipid protective film on the skin.

The main emollient has been selected for its high molecular weight, which is too large to penetrate the skin. This emollient maintains water on the surface for better hydration, while improving smoothness and preventing the appearance of dry and flaky skin, thus protecting the skin's natural barrier.

### **FRAGRANCE:**

Aloe Vera, fresh and light.

### **INGREDIENTS:**

Aqua (Water), Isohexadecane, Glycerin, Sodium chloride, Lactic acid, Cetyl PEG/ PPG-10/ 1 Dimethicone, Triethylene glycol, Phenoxyethanol, Parfum, Hexyl cinnamal, Linalool, Benzyl salicylate.

CREAMS

## ultim-eyes cream

### ACTIVE INGREDIENTS

Repair complex with ATP and amino acids\* (5%), Lactobionic acid\* (0,2%), Natural glycerin (5%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Minimize the appearance of fine lines and wrinkles, leaving skin looking smoother and more youthful.
- Address under-eye puffiness and reduce the appearance of dark circles, giving the eyes a refreshed and revitalized look.

Say goodbye to signs of aging around the eyes with this luxurious, water-in-oil hydrating cream. Formulated with lactobionic acid and a powerful repairing complex, it specifically targets three key signs of aging: moisture loss, skin laxity, and free radical damage.

Lactobionic acid stimulates skin renewal and increases dermal density, effectively reducing the appearance of wrinkles. By improving the maintenance of blood vessels under the eyes, it also helps to prevent the formation of eye bags and dark circles.

The repairing complex is rich in amino acids and ATP, effectively counteracting UV-induced damage, including collagen breakdown and inflammation. The skin around the eyes is particularly sensitive to UV radiation, which activates enzymes responsible for the degradation of elastin and collagen. This repairing complex helps to protect and nourish the skin, reducing the visible signs of aging.

The cream's formulation includes a specific isotonic water phase, enriched with glycerin, to provide the highest level of hydration to this delicate area. After just one application, fine lines are visibly reduced and the eye contours feel protected for hours on end.

### WHAT IS DIFFERENT?

- Features a water-in-oil formulation that spreads easily and evenly, leaving no greasy residue behind.
- Enriched with lactobionic acid.
- High concentration of active ingredients.
- Isotonic water phase ensures maximum hydration.
- Fragrance-free eye cream, which is gentle on delicate skin and reduces the risk of irritation or allergic reactions.

## CREAMS

### ultim-eyes **cream**

#### **HOW TO USE?**

- Cleanse your face thoroughly and gently pat the eye area dry with a clean towel.
- Twist off the cap and squeeze a small amount of eye cream onto the cooling applicator.
- Gently glide the applicator over the skin under and around your eyes, using a light pressure. Start from the inner corner and move outwards, following the natural contours of your eye area.
- After each use, wipe the cooling applicator with a clean, damp cloth and replace the cap securely.
- Use the eye cream twice daily, in the morning and evening, for best results.
- Store the tube in a cool, dry place, away from direct sunlight and heat.

Using the cooling applicator can help soothe puffiness and reduce under-eye bags, while the eye cream itself can provide hydration and improve the appearance of fine lines and wrinkles. By following these simple steps, you can enjoy the full benefits of this eye cream packed in a tube with a cooling applicator.

#### **ABOUT FORMULATION:**

The Ultim-eyes cream features a water-in-oil emulsion with a cream texture and a highly nutritive after-feel. This type of emulsion creates a protective film on the skin surface that prevents transepidermal water loss, keeping the skin hydrated and moisturized.

The water phase of the cream is isotonic and balanced in salt to optimize water transfer into the skin. To deliver maximum hydration, the water phase is boosted with vegetable glycerin, which mimics the skin's natural moisturizing factor (NMF). Glycerin is a skin-friendly ingredient suitable for all skin types, including sensitive areas. It primarily serves to hydrate the skin and help it hold on to moisture.

Water-in-oil emulsions are highly recommended for delicate areas such as the eye contour, as they provide better, long-lasting hydration and protection. Our Ultim-eyes cream has a limited spreading compared to facial creams to ensure better comfort upon application.

The cream contains two main emollients. The first is a mixture of long-chain fatty acid esters that melt at skin temperature, creating a soft, pleasant, and smooth skin feel. They also have high levels of re-fattening potential and strong water repellent properties that form a film to protect the skin from drying out.

The second emollient is made with vegetable glycerol and medium-chain fatty acids from coconut oil. It is a natural, non-greasy emollient that offers good dermatological compatibility, moisturizing, and conditioning properties. It penetrates easily into the skin, providing nourishing benefits and leaving it soft and supple.

#### **FRAGRANCE:**

Perfume free with a neutral scent.

#### **INGREDIENTS:**

Aqua (Water), Caprylic/Capric triglyceride, Glycerin, Stearyl heptanoate, Stearyl caprylate, Cetyl PEG/ PPG-10/ 1 dimethicone, Lactobionic acid, Acetyl tyrosine, Adenosine triphosphate, Hydrolyzed vegetable protein, Proline, Butylene glycol, Sodium chloride, Triethylene glycol, Phenoxyethanol.

## CREAMS

### body resurfacing **micro-peel & milk**

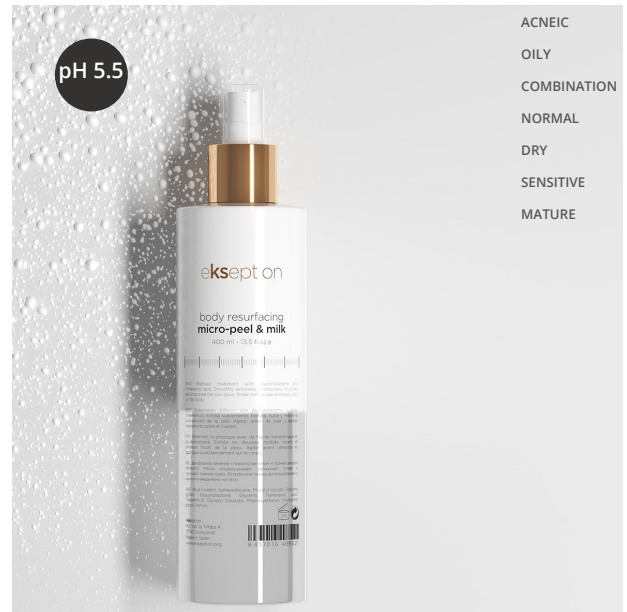

#### ACTIVE INGREDIENTS

Lactic acid ester (10%), Gluconolactone (2%), Tranexamic acid (0,5%), Natural glycerin (2%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Nourish and moisturize the skin.
- Improve the firmness and elasticity.
- Prevent dryness and flakiness.
- Experience smoother, softer skin.
- Reduce the appearance of pigmentation and uneven skin tone.

A revolutionary new way to moisturize your body: this unique treatment provides the benefits of both a rich milk and a micro-peeling in a single product. While many people focus on exfoliating and moisturizing their face, the skin on the body is just as prone to signs of aging and dryness due to sun exposure and other factors.

Traditional body lotions and scrubs often contain irritating particles that can be harsh on the skin and fail to deliver the desired results. That's why we created this exclusive and innovative body milk in spray, which combines a rich milk with an ester of lactic acid and a micro-peeling featuring polyhydroxyacids and tranexamic acid.

The micro-peel is the transparent phase, while the milk is the white phase on top. Before use, simply shake the bottle and spray the product all over your body. The convenient spray application makes it easy to use daily to help prevent the appearance of dry skin flakes and other signs of aging.

Gluconolactone produces gentle exfoliation day after day, while tranexamic acid reduces spots and evens skin pigmentation. The ester of lactic acid provides deep hydration and nourishment to the skin. After just a few days of use, your skin will feel softer, smoother, and deeply moisturized.

This product is perfect for busy women who don't have time for home body treatments like exfoliation. With its innovative formulation, this body milk in spray delivers a real improvement in the condition of your skin, leaving it looking and feeling healthier and more youthful.

#### WHAT IS DIFFERENT?

- Biphasic formulation with a peel and a milk.
- Body milk in spray.
- Bifunctional product.
- Time-saving product.
- Body exfoliator without irritating particles.

CREAMS

## body resurfacing **micro-peel & milk**

### HOW TO USE?

- Before using the product, shake the bottle well to ensure that the two phases (the micro-peeling and the rich milk) are mixed together.
- Hold the bottle a few inches away from your body and spray the product all over the area you want to moisturize. You can also spray the product onto your hands and then apply it to your skin, if you prefer.
- Rub the product into your skin using circular motions, making sure to cover the entire area. You don't need to use a lot of product - a little goes a long way.
- Allow the product to absorb fully into your skin before getting dressed. The spray formula is quickly absorbed and leaves a long-lasting protective barrier.

Use the body milk in spray daily or as often as needed to keep your skin feeling soft, smooth, and nourished. This product is perfect for busy individuals who want a time-saving body moisturizer that provides deep hydration and gentle exfoliation without any irritating particles.

### ABOUT FORMULATION:

This biphasic product is a true innovation in skincare, combining a micro-peeling and a nourishing milk in one easy-to-use formula. When mixed together, the product transforms into an oil-in-water emulsion that is quickly absorbed by the skin, leaving a long-lasting protective barrier.

The emulsifier used in this product is based on glyceryl stearate, a biodegradable and safe ingredient that offers numerous benefits to the skin. Not only does it help to improve the texture and feel of the product, but it also hydrates and protects the skin, leaving it soft and glowing.

Glyceryl stearate is a naturally derived fatty acid that is commonly used as a thickener and emollient in cosmetic and skincare products. It is a biocompatible ingredient that mimics the skin's own lipids, making it gentle and non-irritating.

The ester used in this formulation is a fatty acid chain combined with lactic acid, which provides superior moisturizing and skin-renewing properties compared to other emollients. This ester creates a soft, smooth, and pleasant skin feel, while also promoting skin renewal and hydration.

This product is perfect for those who want a time-saving body exfoliator without any irritating particles. The micro-peeling phase gently removes dead skin cells and impurities, while the rich milk phase nourishes and hydrates the skin, leaving it feeling soft, smooth, and rejuvenated.

### FRAGRANCE:

Ceylan tea and citrics, a fresh and energizing scent.

### INGREDIENTS:

Aqua (Water), Isohexadecane, Myristyl lactate, Butylene glycol, Gluconolactone, Glycerin, Tranexamic acid, Cetearth-15, Glyceryl stearate, Phenoxyethanol, Triethylene glycol, Parfum.

SERUMS

## retin-oil booster

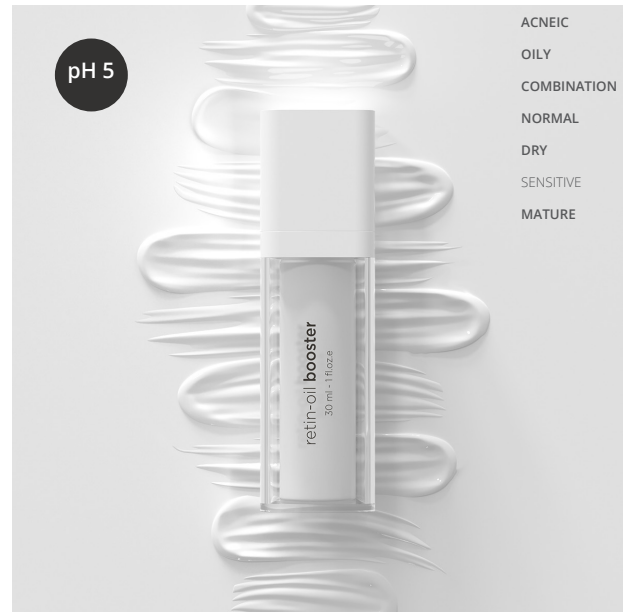

### ACTIVE INGREDIENTS

Retinol\* (0.3%), Vitamin E (1%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Boost exfoliation after peelings
- Reduce fine lines and wrinkles.
- Reduce skin roughness.
- Reduce pigmentation and brown spots.
- Nourish and moisturize the skin.

Our exclusive peeling booster is specially formulated to deliver a powerful dose of retinol (0.3%) and vitamin E (1%) to the skin, providing multiple benefits in one unique product. With a cushiony and powdery after-feel, this serum can be applied after peeling treatments or as a serum to reduce the appearance of fine lines, wrinkles, and pigmentation.

This formula is designed to provide extreme comfort during and after application, with a unique skin feeling that sets it apart from other retinol products. Our retinol is stabilized in a specific oil blend to preserve its effectiveness over time, ensuring that you get the maximum benefits from this potent ingredient.

Unlike other skincare products that use derivatives of retinol, such as retinyl palmitate, we use only the purest and most active form of retinol available. This ensures maximum efficacy in reducing the appearance of wrinkles, fine lines, and skin discoloration, while minimizing breakouts and the appearance of pores.

Our serum is formulated with an exclusive texture to increase skin penetration and minimize the risk of irritation that is commonly associated with retinol creams. With regular use, our retinol serum can help to reveal smoother, more radiant-looking skin.

To use, apply a small amount of the serum to clean, dry skin in the evening, avoiding the eye area. For best results, follow with a moisturizer. As with any retinol product, it is important to start with a low concentration and gradually increase use as your skin tolerates it.

### WHAT IS DIFFERENT?

- Use the pure form of retinol.
- Stabilization of retinol.
- Extremely cocooning texture.
- Does not cause any irritation or skin inflammation.

SERUMS

## retin-oil **booster**

### HOW TO USE?

- Cleanse your face: Start with a clean, dry face. Use your usual cleanser to remove any dirt, oil, or makeup from your skin. Make sure your face is completely dry before applying the serum.
- Apply a small amount: Take a small amount of serum, typically a pea-sized amount, onto your fingertips. This is enough for the entire face. You can also apply a small amount to your neck and décolletage if desired.
- Apply the serum: Gently massage the serum into your skin, starting at the center of your face and working outwards. Avoid the eye area.
- Wait for the serum to absorb: Allow the serum to fully absorb into your skin before applying any other products. This usually takes a few minutes.
- Use sunscreen: Because retinol can make your skin more sensitive to the sun, it's important to use sunscreen during the day to protect your skin. Apply a broad-spectrum sunscreen with an SPF of at least 30 before going outside.
- Use at night: Retinol is best used at night as it can be degraded by sunlight, and because it can cause sensitivity to the sun. Use your serum before your night cream or moisturizer.

Remember that retinol can be irritating to some skin types, so start by using it once or twice a week, then gradually increase frequency as your skin adjusts. Be patient, as it may take a few weeks to see visible results.

As post-peel booster: apply at night instead of the repair cream during 3 consecutive days.

### ABOUT FORMULATION:

Our oil-in-water emulsion has a fluid texture and light after-feel that makes it perfect for everyday use. Unlike other emulsion technologies, our formula is emulsifier-free and only stabilized by a thickening polymer, resulting in a gentle and non-irritating product.

Retinol is a highly sensitive ingredient that can easily oxidize and lose its effectiveness. To prevent this, we use multiple technologies in our formulation:

We add a high amount of vitamin E to the formula to act as an oil-soluble free radical scavenger, preventing the oxidation of the oily components.

The retinol is encapsulated in a silicone copolymer network to protect it from oxidation. This transparent gel provides a pleasant sensory experience during and after application.

We use vacuum emulsification to remove oxygen from the formulation during production.

Our product is immediately filled into airless containers, which also play an important role in preserving the retinol's potency.

In addition to retinol, our formula also contains an emollient made from vegetable glycerol and medium-chain fatty acids from coconut oil. This natural, non-greasy emollient penetrates easily into the skin, providing nourishment and leaving the skin soft and supple.

### FRAGRANCE:

Fresh fruits with notes of pear and flowers.

### INGREDIENTS:

Aqua (Water), Dimethicone, Caprylic/Capric triglyceride, Dimethicone/ Vinyltrimethylsiloxysilicate crosspolymer, Sodium acrylate/ Acryloyldimethyltaurate/ Dimethylacrylamide crosspolymer, Isohexadecane, Tocopheryl acetate, Retinol, Polysorbate 20, Polysorbate 60, BHT, BHA, Triethylene glycol, Phenoxyethanol, Parfum, Limonene, Linalool.

SERUMS

## spotless **ultraserum**

### ACTIVE INGREDIENTS

Niacinamide\* (3%), Gluconolactone\* (2%), Hexyl-resorcinol\* (1%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Reduce fine lines and wrinkles.
- Reduce skin roughness.
- Reduce pigmentation and brown spots up to 30% in 3 weeks.
- Reduce skin redness.
- Tighten pores.

\*Clinical study results available.

The Spotless Ultra Serum is an exclusive, highly concentrated formula that quickly reduces brown spots and evens out skin tone. It combines gluconolactone, a polyhydroxyacid, with hexyl-resorcinol and niacinamide for maximum effectiveness.

The formula offers a light and silky skin feel that is comfortable during and after application. The serum contains a transdermal booster to increase the penetration of active ingredients. The synergy of active ingredients produces impressive results after just a few days of application, not only on brown spots but also on pore size, skin texture, and wrinkles due to the gentle exfoliation provided by gluconolactone.

Despite containing acids, the product does not cause redness or inflammation. In fact, niacinamide is incorporated into the formula to reduce redness.

Hexyl-resorcinol is four times more effective than hydroquinone in improving skin lightening without any downsides. It is also an excellent anti-aging and antibacterial ingredient. The clinical effect of hexyl-resorcinol is due to the stimulation of Glutathione and Glutathione Enzymes.

Hexyl-resorcinol has a synergistic effect with niacinamide, also known as vitamin B3 or nicotinamide. Niacinamide is a water-soluble vitamin that works with the natural substances in your skin to visibly improve enlarged pores, uneven skin tone, fine lines and wrinkles, dullness, and a weakened surface.

In our clinical study, no redness or inflammation occurred after 3 weeks of treatment. After 3 weeks, the skin becomes smoother (15 to 32% improvement), pores are tightened (13 to 22% improvement), redness is reduced (up to 22%), depth of wrinkles is reduced (up to 19%), overall pigmentation is reduced (up to 3%), and pigmentation spots are reduced up to 33%, for a more uniform and illuminated skin.

### WHAT IS DIFFERENT?

- Clinically proven.
- Does not cause skin redness and inflammation.
- High concentration of active ingredients.
- Double whitening system with niacinamide and hexyl-resorcinol.
- Suits all skin types even the most sensitive.
- Very effective on spots and also on wrinkles.

SERUMS

## spotless **ultraserum**

### HOW TO USE?

- Cleanse your face thoroughly with a gentle cleanser and pat dry.
- Apply toner if you use one.
- Take a small amount of the serum on your fingertips or palms and gently massage it onto your face, focusing on areas with brown spots or pigmentation.
- Be careful not to apply too much serum, as it can be too concentrated for the skin.
- Allow the serum to be absorbed into your skin for a few minutes.
- Apply your regular moisturizer or sunscreen over the serum.
- It is recommended to use the serum once or twice a day.

If you experience any redness, irritation or discomfort, stop using the product immediately and consult a dermatologist.

### ABOUT FORMULATION:

The oil-in-water emulsion offers an ultra-soft touch and easy spreading on the skin, thanks to the very fine and homogeneous dispersion of the oil droplets. The emulsion is uniform, with an average droplet size in the range of one micron. Despite this, the feel is light and cool, providing a melting sensation upon application. The residue is fine yet noticeable, non-greasy, and non-tacky. The product contains a transdermal booster that helps to deliver the active ingredients to the deeper skin layers.

The micro-emulsion emulsifier is derived from behenic acid, a saturated fatty acid obtained from the seeds of the indigenous Amazon tree species *Pentaclethra macroloba*. It has emollient and soothing properties that help to restore the skin's natural oils and improve overall hydration levels. Behenic acid is commonly used in skincare to provide relief for dry and sensitive skin. Sebaceous fatty acids play a crucial role in maintaining the skin barrier's integrity, enhancing moisture retention, and improving skin hydration.

The formulation's primary emollient is derived from vegetable glycerol and medium-chain fatty acids from coconut oil. This natural, non-greasy emollient has excellent dermatological compatibility, moisturizing and conditioning properties. It penetrates the skin easily, nourishing and softening it.

### FRAGRANCE:

Mandarin essential oil.

### INGREDIENTS:

Aqua (Water), Dimethyl isosorbide, Caprylic/Capric triglyceride, Niacinamide, Tribehenin PEG-20 esters, Gluconolactone, Hydroxyethyl acrylate/ Sodium acryloyldimethyl taurate copolymer, Hexylresorcinol, Cetyl alcohol, Triethylene glycol, Phenoxyethanol, Citrus nobilis (Mandarin) peel oil, Limonene.

## SERUMS

### probio-T **ultraserum**

#### ACTIVE INGREDIENTS

Pre & pro-biotic complex\* (5%), Lactic acid ester (3%) , Natural glycerin (2%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Optimize skin microflora.
- Reduce skin dryness.
- Strengthen biological defenses.
- Reduce redness and hypersensitivity.
- Nourish and moisturize the skin.

A nourishing serum helps restore a healthy skin microbiome. Microorganisms, predominantly gram-positive bacteria, inhabit various layers of skin and hair follicles. They thrive despite the skin's dry, salty, and acidic conditions, aided by nutrients from sweat glands. Notable among these are *Cutibacterium acnes*, generally harmless but with strains that can cause acne, and gram-negative bacteria like *E. coli*, found in moist areas.

Fungi, such as *Malassezia furfur* and *Candida albicans*, are less common but part of the normal skin flora. Leave-on products can alter the skin microbiome by changing the skin's pH, which can encourage pathogenic growth. Cleaning practices and environmental factors like sunlight and weather can also affect the skin's microbial diversity.

Beneficial microorganisms on the skin suppress pathogen growth by outcompeting them for resources. For instance, *Cutibacterium acnes* digests sebum to create an acidic environment hostile to pathogens, while *S. epidermidis* produces antimicrobial peptides and reinforces skin cell junctions.

The pre/pro-biotic complex in this product, derived from plant substrates and *Lactobacillus* bacteria, optimizes skin flora and strengthens biological defenses. This improves skin radiance and reduces discomfort in sensitive and dry skin. The serum's unique structure promotes balance in the skin microbiome, improving the skin's appearance and comfort.

#### WHAT IS DIFFERENT?

- This product is 100% dedicated to sensitive skin.
- It features a nutritive formula enriched with lactic acid ester.
- The formula promotes the growth of beneficial bacteria.

SERUMS

## probio-T **ultraserum**

### HOW TO USE?

- Cleanse your face thoroughly with a gentle cleanser and pat dry.
- Apply toner if you use one.
- Take a small amount of the serum on your fingertips or palms and gently massage it onto your face.
- Allow the serum to be absorbed into your skin for a few minutes.
- Apply your regular moisturizer or sunscreen over the serum.
- It is recommended to use the serum once or twice a day.

If you experience any redness, irritation or discomfort, stop using the product immediately and consult a dermatologist.

### ABOUT FORMULATION:

The oil-in-water emulsion provides an ultra-soft touch and easy spread on the skin. It is rich and nutritive, forming a protective layer on the skin's surface to prevent transepidermal water loss.

The emulsifier is based on Glyceryl Stearate, a biodegradable, safe ingredient that softens and smoothens your skin, enhancing the feel of your products. Glyceryl Stearate, a naturally derived fatty acid, serves as a thickener and emollient in various cosmetics and skincare products. While its primary function is to improve texture and sensory feel, it also hydrates and protects the skin, imparting a glow.

Glyceryl Stearate, also known as glycerol monostearate, is naturally present in the human body. When synthetically produced, it is made by reacting glycerin with stearic acid, a natural fatty acid derived from vegetable oil. In fact, stearic acid is one of the most common saturated fatty acids found in nature. Glyceryl Stearate benefits the skin by enhancing hydration and supporting the Natural Moisturising Factors found in the skin, thanks to its glycerol component.

The primary emollient in the formulation is an ester derived from a fatty acid chain and lactic acid. It imparts a soft, pleasant, and smooth feel to the skin. Due to the presence of the lactic acid component in the ester, it has superior moisturizing and skin-renewing properties compared to other emollients.

### FRAGRANCE:

Coffee arabica & bourbon vanilla.

### INGREDIENTS:

Aqua (Water), Myristyl lactate, Glycerin, Isohexadecane, Dimethicone, Cetearth-15, Glyceryl stearate, Cetyl alcohol, Alpha-glucan oligosaccharide, Polymnia sonchifolia root juice, Maltodextrin, Lactobacillus, Hydroxyethyl acrylate/ Sodium acryloyldimethyl taurate copolymer, Triethylene glycol, Phenoxyethanol, Parfum, Linalool, Limonene, Hydroxycitronellal, Hexyl cinnamal, Coumarin.

## SERUMS

### skin relief **fluid**

#### ACTIVE INGREDIENTS

Olive oil squalane\* (7%), Panthenol\* (2%), Tasmannia Lanceolata extract\* (2%), Niacinamide\* (0,5%), HMC flavonoid\* (0,3%, Hyaluronic acid MW\* (0.2%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Soothe and immediately reduce inflammation.
- Reduce redness and hypersensitivity.
- Reduce the appearance of couperosis.
- Promote wound healing.
- Nourish and moisturize the skin.

This revolutionary serum is designed for sensitive skin. The formula reduces redness, inflammation, and weakened capillaries. Specifically formulated to provide immediate soothing, the product can be used in the evening, regularly, or after peelings in addition to repair creams. This serum is a concentrate of active ingredients, including panthenol, niacinamide, flavonoids, hyaluronic acid, and natural extract.

- Provitamin B5 (panthenol) is known for its restorative, healing, anti-inflammatory, soothing, and regenerating actions. When applied locally, panthenol hydrates the stratum corneum. It also strengthens the hydrolipidic film, fighting against water loss and dehydration. Furthermore, panthenol repairs the skin barrier, accelerates healing by stimulating fibroblast proliferation, and promotes rapid cell renewal.
- Hyaluronic Acid, derived from a safe biotechnological process free of contaminants and GMOs, helps restore and maintain maximum levels of skin hydration.
- Niacinamide, an enzyme, improves skin elasticity, reduces the appearance of fine lines, wrinkles, redness, pigment spots, and sebum secretion. Topical application stabilizes the skin barrier and improves the moisture content of the stratum corneum. It also aids in the DNA repair of keratinocytes damaged by UV exposure. It's essential in cosmetology and dermatology for combating various disorders and treating many skin problems like aging, acne, rosacea, atopic dermatitis, and dryness.
- Hesperidin, a bioflavonoid found in large concentrations in citrus fruits, is antioxidant, anti-inflammatory, healing, whitening, and improves micro-circulation. Its most important effect is its positive impact on fragile capillaries. HMC is a powerful anti-inflammatory that fights free radicals, soothes inflammation caused by oxidative stress, prevents cellular damage, accelerates skin healing, reduces redness, and has strong positive effects on blood vessels.
- Tasmanian pepper berry extract from Australia decreases pro-inflammatory cytokines and acts immediately to reduce skin itching and relieve burning sensations related to inflammation. It reduces itching by up to 79% and burning sensations by 58% in just 5 minutes.

#### WHAT IS DIFFERENT?

- Provides immediate relief.
- Contains a natural, phospholipid-based emulsifier.
- Non-sticky texture.
- Highly concentrated with active ingredients.
- Friendly to both skin and environment.
- Free of perfume.
- Minimalist formulation.

SERUMS

skin relief **fluid**

#### **HOW TO USE?**

- Cleanse your face thoroughly with a gentle cleanser and pat dry.
- Apply toner if you use one.
- Take a small amount of the serum on your fingertips or palms and gently massage it onto your face.
- Allow the serum to be absorbed into your skin for a few minutes.
- Apply your regular moisturizer or sunscreen over the serum.
- It is recommended to use the serum once or twice a day.

If you experience any redness, irritation or discomfort, stop using the product immediately and consult a dermatologist.

#### **ABOUT FORMULATION:**

This minimalist formula is tailor-made for sensitive and highly reactive skin. It employs an oil-in-water emulsion based on a phospholipid emulsifier, similar to those found in cell membranes, for a refreshing and soothing effect upon application.

The only emollient in the formula is squalane, a stable derivative of naturally occurring squalene in sebum. Squalane's similarity to the hydrolipidic film secreted by the epidermis makes it a popular ingredient for formulations targeting atopic skin. Its anti-inflammatory properties make it sought after by customers with acne, eczema, and various sensitizing conditions.

Squalane is non-comedogenic, implying it doesn't clog pores and is suitable for oily and/or acne-prone skin. Olive squalane is fully biodegradable, doesn't accumulate in the environment, and poses no threat to fauna or flora. Furthermore, olive squalane aligns with sustainable development goals and adheres to the principles of green chemistry.

#### **FRAGRANCE:**

Perfume free with a neutral scent.

#### **INGREDIENTS:**

Aqua (Water), Squalane, Panthenol, Glycerin, Sodium acrylates copolymer, Niacinamide, Hesperidin methyl chalcone, Sodium hyaluronate, Tasmannia lanceolata fruit/leaf extract, Lecithin, Phenoxyethanol, Triethylene glycol.

## SERUMS

### super salicylic fluid

#### ACTIVE INGREDIENTS

Betaine salicylate\* (2%), Hyaluronic acid XS & MW\* (1,4%), Zinc PCA\* (1%), Niacinamide\* (1%), Natural glycerin (4%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Reduce acne.
- Reduce redness and inflammation.
- Improve skin softness.
- Reduce post-acne scars.
- Moisturize the skin.

Introducing a game-changing serum tailored for acne-prone skin. This innovative formula targets active acne, oily skin, and open pores, offering a comprehensive skincare solution. Designed for evening use, this serum can be used regularly and pairs perfectly with a daytime sun protector. This serum harnesses the power of a potent cocktail of active ingredients: betaine salicylate, niacinamide, ZincPCA, and hyaluronic acid.

- Betaine Salicylate, a gentle yet effective beta hydroxy acid (BHA), resurfaces the skin to improve tone and texture. This ingredient's keratolytic (peeling) effect helps reduce the occurrence of blackheads, prevent clogged pores, and thereby curb acne formation. Additionally, it inhibits the growth of skin microorganisms, creating an unfavourable environment for acne-causing bacteria.
- Hyaluronic Acid, a supremely hydrating biopolymer, serves as a connective tissue organizer and moisture-retention agent. This ingredient is derived from a safe, GMO-free, biotechnological process, ensuring maximum skin hydration.
- Niacinamide, an enzyme essential in cosmetology and dermatology, enhances skin elasticity, reduces redness, pigment spots, and sebum secretion. By improving the moisture content of the stratum corneum and aiding in DNA repair of UV-damaged keratinocytes, it provides anti-inflammatory action and itch relief. Niacinamide also helps manage various skin disorders, such as aging, acne, rosacea, atopic dermatitis, and dryness. It particularly inhibits the growth of *C. acnes*, a bacteria linked to visible skin changes.
- Zinc, when combined with L-pyrrolidone carboxylic acid (L-PCA), a natural physiological molecule, offers powerful skin benefits. Zinc is known for its anti-inflammatory, antibacterial properties, and its ability to regulate sebum secretion. L-PCA boosts zinc's bio-availability and also strengthens the skin's barrier, enhancing its moisture-retention ability. This combination results in ZincPCA, a potent agent that controls acne, reduces sebum production, and maintains skin hydration.

This all-in-one serum is the ultimate solution for individuals battling with acne, offering relief from inflammation, excessive oiliness, and open pores.

#### WHAT IS DIFFERENT?

- Free from synthetic thickeners.
- Contains no emulsifiers, oils, silicones, or alcohol.
- Non-sticky texture.
- Highly concentrated with active ingredients.
- Friendly to both skin and environment.
- Free of perfume.
- Minimalist formulation.

SERUMS

## super salicylic **fluid**

### HOW TO USE?

- Cleanse your face thoroughly with a gentle cleanser and pat dry.
- Apply toner if you use one.
- Take a small amount of the serum on your fingertips or palms and gently massage it onto your face.
- Allow the serum to be absorbed into your skin for a few minutes.
- Apply your regular moisturizer or sunscreen over the serum.
- It is recommended to use the serum once or twice a day.

If you experience any redness, irritation or discomfort, stop using the product immediately and consult a dermatologist.

### ABOUT FORMULATION:

An emulsifier-free and thickener-free formulation meticulously designed for acne-prone skin. Its unique texture is derived from the utilization of two types of hyaluronic acid, one with a low molecular weight and the other high. To further enhance the efficacy of the active ingredients, we've integrated a transdermal booster, ensuring optimal absorption and performance.

### FRAGRANCE:

Perfume free with a neutral scent.

### INGREDIENTS:

Aqua (Water), Butylene glycol, Glycerin, Ethoxydiglycol, Betaine salicylate, Sodium lactate, Niacinamide, Zinc PCA, Sodium hyaluronate, Phenoxyethanol, Triethylene glycol.

## SERUMS

### super retinol **fluid**

#### ACTIVE INGREDIENTS

Retinol in liposomes\* (1%), Natural bakuchiol\* (0,2%), ET-Vitamin C\* (1%), Niacinamide\* (1%), HMC flavonoid\* (0,2%), Olive oil squalane (2,5%), Natural alpha-bisabolol\* (0,2%), Vitamin E (0,5%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Reduce wrinkles and pigmentation.
- Prevent redness and inflammation caused by retinol.
- Improve skin softness.
- Reduce oily skin and acne.

A groundbreaking rejuvenating serum, rich in encapsulated retinol. This product, best used in the evenings and paired with sun protection during the day, is perfect for those seeking a smoother, more youthful complexion. It markedly enhances skin elasticity, firmness, pigmentation, and hydration, without the adverse effects of redness, dryness or flakiness. The active ingredient blend includes Retinol Liposomes and Bakuchiol.

- Bakuchiol, an antioxidant and anti-inflammatory agent derived from Bakuchiol seeds, is ideal for targeting wrinkles and aging skin. Sourced from the babchi plant (*Psoralea corylifolia*), prevalent in Eastern Asia, Bakuchiol has long been used in Ayurvedic and Chinese medicine to treat various skin conditions and wounds. Bakuchiol is well-tolerated by the skin, can be used during the day, and exhibits similar anti-aging benefits to retinol, without the associated side effects.
- Retinol Liposomes improve retinol stability and bioavailability to the skin, causing less irritation and enhancing efficacy compared to free retinol.
- Et-Vitamin C is a stable vitamin C derivative with potent anti-inflammatory, free-radical scavenging, and collagen-boosting properties. It strengthens the dermis, curbs inflammatory cytokines, and counteracts free radical production.
- Niacinamide, plays a crucial role in cell metabolism and energy production. It's extensively studied for its skin benefits, which include clinically-proven efficacy in skin brightening, acne reduction, skin barrier improvement, and skin micro-biome rebalancing.
- HMC flavonoid, a citrus-based bioflavonoid, offers antioxidant, anti-inflammatory, healing, whitening properties, and enhances micro-circulation.
- Natural alpha-Bisabolol, a primary component of Chamomile, possesses anti-inflammatory, wound-healing, and antibacterial effects. It's particularly potent against fungi, *Candida albicans*, and gram-positive bacteria.
- Vitamin E, a fat-soluble antioxidant, supports cell function and skin health, is effective in combatting free radicals, reducing UV damage, and alleviating symptoms of atopic dermatitis.

#### WHAT IS DIFFERENT?

- Infused with Bakuchiol and Retinol Liposomes.
- Non-sticky texture.
- Highly concentrated with active ingredients.
- Friendly to both skin and environment.
- Minimalist formulation.

SERUMS

## super retinol **fluid**

### HOW TO USE?

- Cleanse your face thoroughly with a gentle cleanser and pat dry.
- Apply toner if you use one.
- Take a small amount of the serum on your fingertips or palms and gently massage it onto your face avoiding the eye area.
- Allow the serum to be absorbed into your skin for a few minutes.
- Apply your regular moisturizer over the serum.
- It is recommended to use the serum at night, once or twice a week.

If you experience any redness, irritation or discomfort, stop using the product immediately and consult a dermatologist. Always use SPF 50 when using super retinol fluid.

### ABOUT FORMULATION:

This minimalist formula is highly concentrated in retinol. The oil-in-water emulsion is crafted using a phospholipid emulsifier similar to those found in cell membranes, offering a refreshing feel upon application for optimal soothing effect.

The formula utilizes squalane as an emollient, a stable derivative of naturally occurring squalene found in sebum. Owing to its similarity with the hydrolipidic film secreted by the epidermis, squalane is a frequent ingredient in formulations aimed at managing atopic skin conditions.

Thanks to its anti-inflammatory properties, squalane is popular among customers dealing with acne, eczema, and a variety of sensitizing skin conditions. As squalane is non-comedogenic, it doesn't clog pores, making it suitable for oily and/or acne-prone skin.

Sourced from olives, squalane is completely biodegradable. It doesn't accumulate in the environment and poses no risk to fauna or flora. Olive squalane aligns with sustainable development practices and adheres to the principles of green chemistry.

### FRAGRANCE:

Ceylan tea and citrics.

### INGREDIENTS:

Aqua (Water), Diisopropyl Adipate, Ethoxydiglycol, Squalane, Retinol, Bakuchiol, Niacinamide, Ethyl ascorbic acid, Hesperidin methyl chalcone, Alfa bisabolol, Tocopherol acetate, Polysorbate 20, Triethylene glycol, Sodium acrylates copolymer, Lecithin, Phenoxyethanol, BHT, BHA, Hydroxyethyl acrylate/ Sodium acryloyldimethyl taurate copolymer, Parfum.

## MASKS

### caviar **liquid mask**

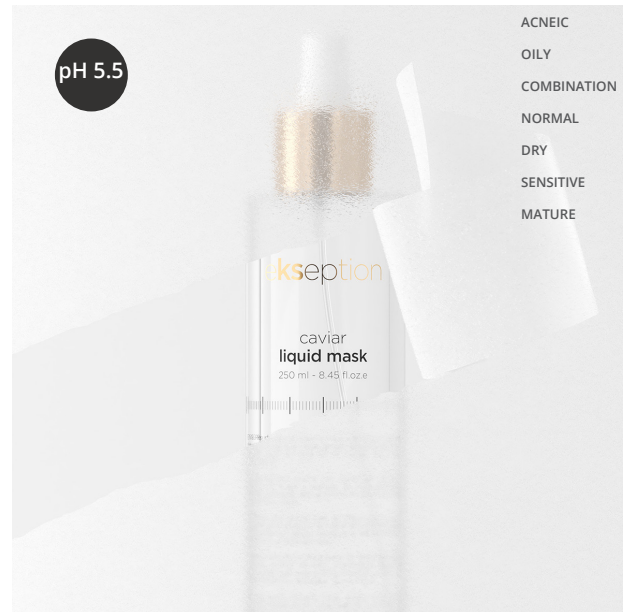

#### ACTIVE INGREDIENTS

Caviar sevruga extract\* (5%), Retinol\* (0,1%), Hyaluronic acid XS\* (0,5%), Natural glycerin (30%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Restore optimal skin hydration.
- Improve skin texture.
- Reduce wrinkles and fine lines.
- Even out skin tone.

This innovative formula combines the power of caviar extract, hyaluronic acid, and retinol to accelerate skin renewal. This transformative mist mask can be applied post-peeling or used as a regular hydrating mask at home. Its unique film-forming technology offers the same benefits as traditional masks but without the need for rinsing. A moisturizer can be applied directly after using the mask. The result is a skin that feels deeply hydrated and soft for extended hours.

Sevruga Caviar Extract, known for its luxurious appeal and high value, adds a touch of opulence to our skincare products. Rich in Omega-3 fatty acids and vitamins D, B2, and B12, this extract functions as a natural antioxidant with anti-inflammatory and anti-aging effects. Studies have shown that caviar extract can accelerate the natural production of collagen by up to 67%, significantly reducing protein cross-linking (fibronectin).

Our product also incorporates the superior grade of Hyaluronic Acid Oligo, which doesn't merely rest on the skin's surface but penetrates deep into the stratum corneum, providing hydration from within. Traditional hyaluronic acid, which only resides on the skin's surface, can be easily washed off. However, this low-molecular-weight hyaluronic acid permeates the stratum corneum, resulting in products that deliver superior hydration and soothing effects.

#### WHAT IS DIFFERENT?

- The first facial mask that can be sprayed onto the skin as a mist.
- Contains a high concentration of caviar extract.
- Ideal for treating dehydrated skin.
- Non-sticky texture.
- Highly concentrated with active ingredients.
- Friendly to both skin and environment.
- Minimalist formulation.

SERUMS

## caviar **liquid mask**

### **HOW TO USE?**

- Start by cleansing your face with your regular cleanser and pat it dry.
- Shake the spray bottle well to ensure that the ingredients are evenly mixed.
- Hold the spray bottle approximately 15-20 cm away from your face and spray the mist evenly over your entire face, avoiding the eye area.
- Let the mist sit on your face for the recommended amount of time according to the product instructions.
- Once the recommended time is up, you can either gently pat the product into your skin or simply let it absorb naturally.
- No rinsing is required, so you can follow up with your regular moisturizer or serum.

Use the facial mist mask as often as recommended by the product instructions or your skincare professional.

### **ABOUT FORMULATION:**

A revolutionary mask concept featuring a liquid formulation. The product is sprayed directly onto the skin, forming a thin layer that enhances the penetration of active ingredients. There's no need to rinse it off; a cream can be applied directly after using the mask.

The mist is enriched with glycerin, a natural component of healthy skin. Also known as glycerine or glycerol, it's highly hygroscopic or, in other words, a humectant. Glycerin mirrors skin's Natural Moisturizing Factor (NMF), making it suitable for all skin types, including oily and sensitive skin. The numerous skin benefits of glycerin primarily revolve around hydration and moisture retention.

### **FRAGRANCE:**

Aloe Vera, fresh and light.

### **INGREDIENTS:**

Aqua (Water), Glycerin, Polysorbate 80, Caviar extract, Retinol, Sodium hyaluronate, Polysorbate 20, BHT, BHA, Triethylene glycol, Phenoxyethanol, Potassium sorbate, Parfum, Hexyl cinnamal.

## MASKS

### triple acid **peeling mask**

#### ACTIVE INGREDIENTS

Gluconolactone\* (6%), Lactobionic acid\* (2%), Lactic acid\* (2%), Lactic acid ester (4,5%), Natural glycerin (4%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Strong exfoliation.
- Smooth skin texture.
- Diminish the appearance of fine lines and wrinkles.
- Brighten uneven skin tone.

Introducing our powerful Intensive Peeling Mask with a blend of 3 organic acids that work together to effectively exfoliate your skin. This mask provides a deep exfoliation that can last up to 7 days, helping to reduce roughness, wrinkles, and pigmentation spots. To achieve even better results for pigmentation and wrinkles, we recommend using specific skin care products at home after applying the mask.

Our unique peeling mask formula contains an oil phase, which makes it more effective than traditional peeling solutions. It has a higher affinity with the skin and delivers the acids much deeper into the epidermis. When applied, the mask provides better coverage of the skin, delivering more acid for enhanced results. We have also incorporated a transdermal booster that increases the penetration of acids for maximum effectiveness.

The combination of three acids allows for even treatment of all layers of the epidermis. The two polyhydroxyacids (gluconolactone and lactobionic acid) mainly target the superficial layers of the epidermis, while the AHA (lactic acid), which has a smaller molecular weight, can penetrate the deeper layers up to the dermis. For optimal results, we recommend using this mask once every 15 days.

#### WHAT IS DIFFERENT?

- A cream-based peeling formulation with a very low pH.
- Provides strong exfoliation despite a limited concentration of acids.

## MASKS

### triple acid **peeling mask**

#### **HOW TO USE?**

Apply it once every two weeks at the maximum. Use a brush to apply a layer over the face and neck, being careful to avoid the eye contours. Leave it on for 5 to 10 minutes, depending on your skin type. If you have normal skin, leave it on for 5 minutes, but for thick or oily skin, leave it on for up to 10 minutes.

After the recommended time, rinse the mask off thoroughly with water to avoid leaving any free acid on your skin. If you're using the mask in a professional setting, you can spray a neutralizer afterwards.

After rinsing off the mask, apply a repair cream directly to your skin. In the days following the treatment, use an all-day shield to protect your skin from UV rays during the day, and a repair cream at night.

#### **ABOUT FORMULATION:**

The mask offers an ultra-soft touch, spreads easily on the skin, and dries slowly. It is an oil-in-water micro-emulsion with very fine and homogeneous dispersion of the oil droplets, with an average droplet size in the range of one micron.

The micro-emulsion emulsifier is derived from behenic acid, a saturated fatty acid obtained from the seeds of the indigenous Amazon tree species, *Pentaclethra macroloba*. Behenic acid has emollient and soothing properties that help to restore the skin's natural oils and improve overall levels of hydration. In skincare, behenic acid is commonly used to provide soothing relief for dry and sensitive skin. These sebaceous fatty acids play a crucial role in maintaining the integrity of the skin barrier, thereby improving moisture retention and enhancing skin hydration.

The principal emollient in the formulation is an ester made from a fatty acid chain and lactic acid. It creates a soft, pleasant, and smooth skin feel. Due to the presence of the lactic acid radical in the ester, it has superior moisturizing and skin-renewing properties compared to other emollients.

#### **FRAGRANCE:**

Mandarin essential oil.

#### **INGREDIENTS:**

Aqua (Water), Dimethylisobutyl succinate, Gluconolactone, Isohexadecane, Myristyl lactate, Glycerin, Tribehenin PEG-20 esters, Hydroxyethyl acrylate/ Sodium acryloyldimethyl taurate copolymer, Lactic acid, Lactobionic acid, Cetyl alcohol, Triethylene glycol, Phenoxyethanol, Citrus nobilis (Mandarin) peel oil, Limonene.

## MASKS

### post-peel **glaciar mask**

#### ACTIVE INGREDIENTS

Glacier water from Mont Blanc\* (30%), Multi-mineral complex with zinc, magnesium, copper and calcium\* (2%), Moisture release system\* (3%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Repair and control the skin renewal after peels.
- Restore the mineral balance of oily and combination skin types.
- Restore optimal skin hydration.
- Soothe the skin and reduce redness.

This ultra-refreshing glaciar mask is designed for normal to oily skin types and can be used at home or after peeling procedures. For an even more intense cooling sensation, the mask can be stored in the fridge prior to use.

Our glaciar mask is enriched with a powerful synergy of minerals and water from Mont Blanc, providing the skin with an instant cooling and soothing effect that reduces redness and inflammation following a peel. The unique glaciar texture of the mask creates a refreshing and revitalizing experience for the skin, leaving a light protective film after application.

The Mont Blanc Water used in our formula is specifically selected from alpine glaciers, which contain high levels of minerals such as calcium and silicium, that provide restructuring properties to the dermal and epidermal layers of the skin. The minerals-rich water also possesses several medicinal properties including anti-inflammatory, soothing, anti-irritating, sebo-regulating, and repairing.

Our multi-mineral complex, consisting of zinc, copper, and magnesium, works together to optimize cellular respiration and stimulate energy (ATP) and metabolic (DNA proteins) mediators. It is an active ingredient booster that has a radical scavenging effect, inhibiting the formation of cellular free radicals. The high amount of zinc in the formula also helps to normalize oily skin types, restoring the skin's mineral balance and improving its firmness while reducing the appearance of wrinkles.

#### WHAT IS DIFFERENT?

- A unique texture that decreases the skin temperature.
- A rich combination of active ingredients known for their high concentration in minerals.
- Does not contain any powders like kaolin to avoid drying the skin, for easy application and rinsing.
- A formulation closer to a cream with a slow dry compared to standard masks.

MASKS

## post-peel **glaciar mask**

### **HOW TO USE?**

- Begin by cleansing your face with a gentle cleanser to remove any makeup, dirt or oil from your skin.
- Use a toner to balance your skin's pH levels and prepare it for the mask.
- Apply a thin, even layer of the gel mask onto your face, using your fingertips or a clean brush. Be sure to avoid the eye and lip areas.
- Leave the mask on for the recommended amount of time, which can range from 5-20 minutes depending on the product and your skin type.
- Once the time is up, rinse off the mask with water and gently pat your face dry with a clean towel.
- Follow up with your usual skincare routine, such as applying a moisturizer or serum.

### **ABOUT FORMULATION:**

The product is formulated as an innovative oil-in-water emulsion with a low concentration of emollients. Unlike traditional emulsions, there is no emulsifier present, and the oil droplets are solely stabilized by a thickening polymer.

To enhance hydration and efficacy, a specific water-absorbing powder is added to the formula to create an osmotic pressure that fixes the water in the emulsion. This results in trapped water capsules that remain on the skin surface upon application.

The gradual diffusion of water and active ingredients improves hydration and enhances the cooling effect on the skin, while the soft-focus effect helps reduce the appearance of imperfections.

The emollient is derived from vegetable glycerol and medium-chain fatty acids from coconut oil, making it a natural and non-greasy emollient. Its good dermatological compatibility, moisturizing, and conditioning properties make it easily penetrable into the skin, nourishing and softening it.

### **FRAGRANCE:**

Aloe Vera, fresh and light.

### **INGREDIENTS:**

Aqua (Water), Caprylic/Capric triglyceride, Sodium acrylates crosspolymer-2, Magnesium aspartate, Zinc gluconate, Copper gluconate, Calcium gluconate, Sodium acrylate/ Acryloyldimethyltaurate/ Dimethylacrylamide crosspolymer, Isohexadecane, Polysorbate 60, Triethylene glycol, Phenoxyethanol, Citric acid, Sodium benzoate, Potassium sorbate, Parfum, Hexyl cinnamal, Linalool, Benzyl salicylate.

## MASKS

### urban D pollution **mask**

#### ACTIVE INGREDIENTS

Urban D pollution blend\* (2%), Phytic acid\* (0,2%), Moisture release system\* (2%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Protect against free radicals
- Provide protection against various types of atmospheric pollution
- Restore optimal skin hydration.
- Soothe the skin and reduce redness.

Urban D-pollution mask is an ultra-refreshing mask formulated for sensitive to normal skin types. It can be applied at home or after peeling procedures. For a more intensive cooling sensation, the mask can be stored in the fridge. This novel generation of skin care targets skin decontamination due to environmental conditions to prevent the appearance of skin aging.

The natural active ingredients in the mask protect the skin cells against all types of atmospheric pollution, including tobacco, harmful gases, and heavy metals. The effectiveness of the mask is based on phenolic acids contained in the ivy and sunflower extracts associated with phytic acid, which provides a global free radical protection.

Phytic acid, an AHA, is a very gentle exfoliator and is commonly used in skincare for its antioxidant properties. Like other antioxidants, phytic acid can help to neutralize free radical damage, making it an effective ingredient in products designed to brighten pigmentation and treat conditions like melasma.

Phytic acid also has the ability to absorb (or chelate) certain heavy metals. Dermatologists suggest that phytic acid “appears to work mechanistically to absorb iron molecules in the skin, which are responsible for causing damage to DNA.”

In terms of exfoliating strength, glycolic acid is the strongest AHA, followed by lactic acid, and then phytic acid as the mildest option. However, for a de-pollution formulation, phytic acid’s antioxidant properties tend to be more effective than other AHAs.

#### WHAT IS DIFFERENT?

- A unique texture that decreases the skin temperature.
- A rich combination of natural active ingredients.
- Does not contain any powders like kaolin to avoid drying the skin, for easy application and rinsing.
- A formulation closer to a cream with a slow dry compared to standard masks.

MASKS

## urban D pollution **mask**

### **HOW TO USE?**

- Begin by cleansing your face with a gentle cleanser to remove any makeup, dirt or oil from your skin.
- Use a toner to balance your skin's pH levels and prepare it for the mask.
- Apply a thin, even layer of the gel mask onto your face, using your fingertips or a clean brush. Be sure to avoid the eye and lip areas.
- Leave the mask on for the recommended amount of time, which can range from 5-20 minutes depending on the product and your skin type.
- Once the time is up, rinse off the mask with water and gently pat your face dry with a clean towel.
- Follow up with your usual skincare routine, such as applying a moisturizer or serum.

### **ABOUT FORMULATION:**

The product is formulated as an oil-in-water emulsion. For this formulation, we have selected a 100% natural emulsifier based on phospholipids, which are skin-identical molecules and essential components of cellular membranes, providing unique technological and physiological properties. When applied topically, phospholipids have a strong biocompatibility and biomimicry with the skin, resulting in optimal tolerance. They create highly sensory and delightful textures with a unique signature: a light and soft skin feel with an amazing cooling effect. Phospholipids also provide active properties to the skin, such as hydration, restructuring, and soothing.

A specific water-absorbing powder is also added to fix all the water in the emulsion by osmotic pressure. The water is trapped in capsules that remain on the skin surface upon application.

The water and active ingredients are gradually diffused to improve efficiency and hydration. This technology provides a cooling effect on the skin upon application and a soft-focus effect that reduces the appearance of imperfections.

The emollient is made using vegetable glycerol and medium-chain fatty acids from coconut oil. It is a natural, non-greasy emollient that possesses good dermatological compatibility, moisturizing, and conditioning properties. It easily penetrates into the skin, offering nourishing benefits and making it soft and supple.

### **FRAGRANCE:**

Fresh fruits with notes of pear and flowers.

### **INGREDIENTS:**

Aqua (Water), Caprylic/Capric triglyceride, Sodium acrylates crosspolymer-2, Sodium acrylates copolymer, Glycerin, Helianthus Annuus (Sunflower) seed extract, PPG-1-PEG-9 Lauryl Glycol ether, Butylene glycol, Hedera Helix (Ivy) leaf/stem extract, Phytic acid, Sodium polyacrylate, PEG-8, Caprylyl glycol, Lecithin, Triethylene glycol, Phenoxyethanol, Parfum, Limonene, Linalool.

## MASKS

### ultim-eyes mask

#### ACTIVE INGREDIENTS

ET-vitamin C\* (0,5%), HMC flavonoid\* (0,8%), Olive oil squalane (2%), Natural glycerin (5%).

\* EVIDENCE OF CLINICAL EFFICACY

#### INDICATIONS

- Reduce eye bags.
- Reduce dark circles.
- Hydrate the eye contour.
- Reduce wrinkles and fine lines.

This eye cream is the most effective formulation we have created in our 25 years of experience to reduce dark circles and eye bags. With impressive results after only 3 applications, it contains a synergy of active anti-inflammatory, decongestant, and micro-circulation strengthening ingredients to improve the eye contour.

Vitamin C is a powerful active ingredient that stimulates the production of extracellular matrix proteins to strengthen the dermis around the eye area. Our formulation uses Et-Vitamin C, a multi-functional vitamin C derivative with excellent anti-inflammatory, free radical-scavenging, and collagen-boosting effects. Its stability is superior to other ascorbic acid derivatives, and it exhibits a strong boosting effect on collagen to fortify the dermis.

Another key ingredient in our formulation is hesperidin, a bioflavonoid found in citrus fruits that has a high concentration of antioxidants, anti-inflammatory, and micro-circulation improving properties. Hesperidin is known to improve fragile capillaries and reduce dark circles.

Our formulation also contains HMC, a strong anti-inflammatory ingredient that fights free radicals and soothes inflammations caused by oxidative stress. It accelerates skin healing, reduces redness, and has a positive effect on blood vessels. HMC can reduce blood leakage from vessels by 45%, reducing inflammatory messengers. This unique property makes it an excellent ingredient to treat rosacea, couperosis, and redness in a short period of time.

In addition, our eye cream is enriched with squalane to nourish and protect the eye area, resulting in a reduction of fine lines and wrinkles.

#### WHAT IS DIFFERENT?

- Emulsifier-free.
- Does not contain PEG, silicone, or alcohol.
- Non-sticky texture.
- High concentration of active ingredients.
- Friendly to both skin and environment.
- Free of perfume.
- Minimalist formulation.

MASKS

## ultim-eyes **mask**

### **HOW TO USE?**

- Cleanse your face and eye area thoroughly before going to bed.
- Take a small amount of the eye sleeping mask on your ring finger and gently dab it around your eye area, avoiding direct contact with your eyes.
- Massage the eye area gently with your ring finger in a circular motion until the cream is absorbed.
- Leave the cream on overnight and let it work its magic.
- In the morning, rinse your face with lukewarm water and pat dry.

Note: Cream eye sleeping masks are designed to be used at night before going to bed. Do not apply the cream during the daytime or under makeup. Also, be careful not to apply too much of the cream as it may cause irritation or discomfort.

### **ABOUT FORMULATION:**

The eye cream is specially formulated for sensitive skin, with an emulsifier-free oil-in-water cream. The oil droplets are stabilized by a thickener, providing a non-sticky texture.

It does not contain PEG, silicone, or alcohol, making it suitable for even the most delicate skin types. Instead, the high concentration of active ingredients focuses on providing nourishment and hydration to the delicate skin around the eyes.

The emollient used in this formulation is squalane, a stable derivative of squalene that is naturally found in sebum. Squalane has anti-inflammatory properties that make it an excellent choice for customers with acne, eczema, and other sensitizing skin conditions. Additionally, squalane is non-comedogenic, making it safe for use on oily and acne-prone skin.

The use of olive squalane in this formula aligns with sustainable development principles and green chemistry practices. It is completely biodegradable and does not accumulate in the environment, making it safe for both fauna and flora. Overall, this eye cream provides a nourishing and sustainable option for those with sensitive skin around the eyes.

### **FRAGRANCE:**

Perfume free with a neutral scent.

### **INGREDIENTS:**

Aqua (Water), Glycerin, Squalane, Hydroxyethyl acrylate/sodium acryloyldimethyl taurate copolymer, Hesperedine methyl chalcone, 3-O-Ethyl ascorbic acid, Phenoxyethanol, Triethylene glycol.

Personalized skincare has emerged as a significant trend in the beauty market in recent years due to the growing demand for tailored products that cater to specific skin concerns. With the rise of social media and beauty influencers, people are more informed about the significance of skincare and are ready to invest in products that will deliver the desired results.

Brands have been quick to respond to this trend by offering personalized skincare solutions that include virtual skin consultations and customized product recommendations based on a person's skin type, concerns, and preferences. One such brand that stands out is Mixlab, which offers customized serums in a simple and efficient way based on the professional's expertise. Professionals can easily adapt the formula based on the skin's evolution or the season.

Mixlab's customers can receive a customized product on a regular basis, based on their specific skin concerns and preferences. This allows them to experiment with different formulas without committing to full-sized products. What sets Mixlab apart is their focus on technology and high concentrations of natural active ingredients that respect the environment and the skin. They offer freshly made serums and masks that are both effective and 100% safe, suitable for both professional and home use.

### **What sets mixlab apart?**

- High concentrations of active ingredients.
- Natural formulations.
- can be customized.
- Freshly made serums and masks.
- Professional and home use.
- Effective and 100% safe products.
- Wide assortment with water and oil based serums.
- Made in Spain in our own factory.

DEVICES

## SKINCARE BLENDER

### TECHNICAL INFORMATIONS

- Available in 110 & 220 V.
- CE certified.

### KEY FEATURES

- Container with dosage indication.
- Turbo-mix agitator as the one used in laboratory.
- Effective blending.
- Fine dispersion.

The Mixlab skin care blender is a revolutionary device in the beauty industry that effectively mixes skin care products, allowing you to prepare personalized serums and much more. The device is ergonomic and user-friendly, with a graduate container for precise dosage of each product used in the formulation.

### HOW TO USE?

The blender can be used directly in the jar with the essential cream.  
To prepare the essential cream, add 1 to 5 ml of meso solution into the base.  
The cream base must be at room temperature and not too cold.  
Extract the meso solution using a syringe of 5 ml.  
Proceed in 2 to 3 times to incorporate the meso solution into the cream.  
Mix until the texture is completely uniform.

Please read the instruction manual carefully before use, to ensure the correct use of the device and to achieve the best results.

DEVICES

## MASK BLENDER

### TECHNICAL INFORMATION

- Available in 110 & 220 V.
- CE certified.

### KEY FEATURES

- Heat the product up to 70C degree.
- Magnetic mixing system.
- Easy to clean.
- Short operation time.
- Cold or hot mixing.

The Mixlab mask blender is a revolutionary device in the beauty industry that prepares exclusive and unique masks for professional treatments or home use. It's the first device of its kind and offers an ergonomic and user-friendly design with an efficient heating and magnetic mixing system. The device's quick preparation time and competitive price (less than 1 euro per mask) make it an excellent alternative to collagen sheets or alginates masks.

Our masks are based on 100% natural ingredients and hyaluronic acid, providing nourishing and moisturizing benefits for the skin. They can also be enhanced by adding any mixlab serum to provide additional skin benefits that are tailored to your unique needs.

With Mixlab mask blender, you can create a personalized and professional-grade mask in the comfort of your own home, or use it in a professional setting for a unique treatment experience. Enjoy the benefits of a natural and effective mask that's tailored to your unique skincare needs.

### HOW TO USE?

1. Put the blending accessory without spring into the cup.
2. Put 100 ml of water into the cup.
3. Press the function button once so that it lights red.
4. Add the powder in one time.
5. Wait about 90 seconds till the device stops.
6. Check that the mixture is homogeneous, otherwise repeat the operation.
7. If needed add 1 ml of meso solution and mix with the spatula.
8. Wait 30 seconds for the air to go out of the liquid to avoid bubbles in the mask.
9. Unplug the appliance, and pour the liquid into a mould.
10. Place the mould into a fridge for 5 minutes.

MIXLAB SERUMS

## hyaluronic PEPTIDES mixlab serum

### ACTIVE INGREDIENTS

Palmitoyl hexapeptide-12\* (2,5%), Palmitoyl tripeptide-1\* (2,5%), Hyaluronic acid XS\* (2%), Fruity acids blend (1%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Skin lifting.
- Reduce fine lines and wrinkles.
- Collagen booster.
- Improve the skin texture.
- Micro-exfoliate.

An active serum designed to reduce wrinkles, lift, and boost collagen, with 2% XS hyaluronic acid and 5% peptides. This serum can be used as a standalone treatment against wrinkles and skin sagging, or mixed with other serums to create a more specific and personalized product.

Hyaluronic Acid is the most hydrated biopolymer known and serves as a connective tissue organizer and water-holding substance. The XS Hyaluronic acid in this serum has a very low molecular weight, which increases permeation through the skin compared to high molecular weight hyaluronic acid. It rejuvenates the skin by improving its viscoelastic properties and significantly reduces deep wrinkles.

Lipopetides are peptides conjugated with long-chain fatty acids to improve skin penetration. Peptides are miniature fragments of skin protein; they are messengers that signal the dermis to synthesize the material necessary for the skin. Palmitoyl hexapeptide-12 stimulates fibroblasts in elastin synthesis and is used for skin repair and protection against oxidation. Palmitoyl Tripeptide-1 initiates the stimulation of collagen and hyaluronic acid synthesis and strengthens the connective tissue.

This serum can be mixed in any proportion with other Mixlab serums to create a personalized formulation with additional benefits. It can also be added (2 doses) to the hyaluronic mix-mask.

### WHAT IS DIFFERENT?

- No synthetic thickener.
- Does not contain emulsifier, oil, silicone, or alcohol.
- Can be mixed to prepare personalised formulations.
- Non-sticky texture.
- High concentration of active ingredients.
- Friendly to both skin and environment, 100% Renewable sourced ingredients.
- Natural preservative system.
- Low pH.
- Minimalist formulation.
- No over-packaging to reduce waste.
- Large format.

MIXLAB SERUMS

## hyaluronic PEPTIDES **mixlab serum**

### HOW TO USE?

- Cleanse your face thoroughly with a gentle cleanser and pat dry.
- Apply toner if you use one.
- Take a small amount of the serum on your fingertips or palms and gently massage it onto your face.
- Allow the serum to be absorbed into your skin for a few minutes.
- Apply your regular moisturizer or sunscreen over the serum.
- It is recommended to use the serum once or twice a day.

If you experience any redness, irritation or discomfort, stop using the product immediately and consult a dermatologist.

### ABOUT FORMULATION:

This formulation is among the most skin and eco-friendly available. All ingredients in the product originate from renewable sources, and it is packaged in a simple, 75 ml bottle to minimize waste. This is an ecological and responsible skincare product that delivers impressive results without compromising on sustainability or skin health.

It contains only active ingredients, making it a simple and effective solution for your skincare needs.

The formulation is a water-based gel that is thickened using only low molecular weight hyaluronic acid. No additional thickeners or gums are added to achieve the desired viscosity, resulting in a soft and non-sticky texture that feels rich and nourishing despite being oil-free.

To preserve the formulation, we created an environmentally and skin-friendly preservative system. It is an aqueous dispersion of organic acids and natural fruit acids that exhibit broad-spectrum activity against bacteria, yeast, mold, and fungi. This preservative system is alcohol and solvent-free, making it safe and gentle for the skin.

We designed this preservative system specifically for low pH formulations to ensure that it is skin-friendly. Additionally, the preservative system contains naturally sourced, GMO-free Propanediol, which provides improved skin moisturization and boosts the efficacy of the preservative.

Overall, Mixlab's serum formulation is an excellent choice for those seeking a natural, skin-friendly, and effective solution for their skincare needs.

### FRAGRANCE:

Ceylan tea & citrics.

### INGREDIENTS:

Aqua (Water), Glycerin, Sodium hyaluronate, Palmitoyl hexapeptide-12, Palmitoyl tripeptide-1, Lactic acid, Propanediol, Citric acid, Tartaric acid, Gluconic acid, Polysorbate 80, Sodium benzoate, Sodium dehydroacetate, Parfum, Citral, Limonene.

MIXLAB SERUMS

## hyaluronic VIT C mixlab serum

### ACTIVE INGREDIENTS

ET-vitamin C\* (5%), Hyaluronic acid XS\* (2%), Fruity acids blend (1%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Prevent photo-ageing.
- Reduce pigmentation and brown spots.
- Reduce fine lines and wrinkles.
- Collagen booster.
- Reduce free radicals.
- Improve the skin texture.
- Micro-exfoliate.

An active serum that targets pigmentation, wrinkles, and boosts collagen with 2% of XS hyaluronic acid and 5% ET-vitamin C. This serum can be used as a standalone treatment against photo-ageing or mixed with other serums to create a more specific and personalized product.

Hyaluronic Acid is the most hydrated biopolymer known, serving as a connective tissue organizer and water-holding substance in living tissues. The sodium hyaluronate used in our formulation comes from a biotechnological safe process that is free of contaminants and GMO. XS Hyaluronic acid has a low molecular weight that increases permeation through the skin, rejuvenating it by improving its viscoelastic properties and significantly decreasing deep wrinkles.

ET-Vitamin C is a multi-functional vitamin C derivative with excellent whitening, anti-oxidation, free radical scavenging, and collagen-boosting effects. Its stability is superior to other ascorbic acid derivatives. Ethyl ascorbic acid is a molecule produced by modifying ascorbic acid, commonly known as vitamin C. This modification is done to increase the molecule's stability and enhance its transport through the skin, as pure vitamin C is easily degraded. It exhibits a strong inhibition effect on melanogenesis, reduces dark spots and age spots, fights photoageing by interfering with inflammatory cytokines and reverse ROS production, to achieve free radical scavenging purposes.

Our serum can be mixed in any proportion with other Mixlab serums to create a personalized formulation with additional benefits. It can also be added (2 doses) to the hyaluronic mix-mask.

### WHAT IS DIFFERENT?

- No synthetic thickener.
- Does not contain emulsifier, oil, silicone, or alcohol.

### FRAGRANCE:

Ceylan tea & citrics.

### INGREDIENTS:

Aqua (Water), 3-O-Ethyl ascorbic acid, Sodium hyaluronate, Lactic acid, Propanediol, Citric acid, Tartaric acid, Gluconic acid, Polysorbate 80, Parfum, Citral, Limonene, Geraniol.

MIXLAB SERUMS

## hyaluronic PHA **mixlab** serum

### ACTIVE INGREDIENTS

Gluconolactone & lactobionic acid\* (5%), Sodium lactate (1%), Hyaluronic acid XS\* (2%), Fruity acids blend (1%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Skin renewal.
- Improve the skin texture.
- Reduce pores size.
- Reduce fine lines and wrinkles.
- Micro-exfoliate.

An active serum to reduce roughness, pores size and wrinkles with 2% XS hyaluronic acid and 5% PHA. The serum can be used pure as a treatment to improve skin texture and softness, or mixed with other serums to prepare a more specific and personalized product.

Hyaluronic acid is the most hydrated biopolymer known. In living tissues, it serves as a connective tissue organizer and water-holding substance. The sodium hyaluronate used in this product is obtained from a biotechnological safe process, and is free of contaminants and GMO. XS hyaluronic acid has a very low molecular weight that increases permeation through the skin compared to high molecular weight hyaluronic acid. It rejuvenates the skin by improving its viscoelastic properties and significantly reduces deep wrinkles.

PHA (polyhydroxy acids) have numerous skin care benefits and do not cause irritation to the skin. Due to their multiple hydroxyl groups, they are strong humectants that keep the skin glowing and plumped. PHA treat the skin very gently without affecting deeper layers, and the effect is very similar to that of AHAs (alpha hydroxy acids or fruit acids like glycolic or lactic acid), but as a type of polyhydroxy acid, they are more beneficial. Since it is a larger molecule, they penetrate the skin slowly without burning it like other exfoliating agents.

The serum can be mixed in any proportion with other Mixlab serums to create a personalized formulation with additional benefits. It can also be added (1 dose) to the hyaluronic mix-mask for an enhanced effect.

### WHAT IS DIFFERENT?

Aqua (Water), Gluconolactone, Sodium hyaluronate, Lactobionic acid, Sodium lactate, Lactic acid, Propanediol, Citric acid, Tartaric acid, Gluconic acid, Polysorbate 80, Sodium benzoate, Sodium dehydroacetate, Parfum, Citral, Limonene.

MIXLAB SERUMS

## hyaluronic ZnPCA mixlab serum

### ACTIVE INGREDIENTS

ZincPCA\* (1%), Hyaluronic acid XS\* (2%), Fruity acids blend (1%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Reduce oily skin and open pores.
- Reduce Acne.
- Rosacea.
- Improve the skin texture.
- Micro-exfoliate.

An active serum to address oily skin, acne, and rosacea with 2% XS hyaluronic acid and 1% Zinc PCA. The serum can be used pure as a targeted treatment or mixed with other serums to create a customized skincare solution.

Zinc is a mineral widely studied and used in acne treatments due to its anti-inflammatory and antibacterial properties. Zinc helps heal rashes, rejuvenate skin, ward off itchy scalp, and works as an antioxidant. Scientific research has shown that Zinc can reduce sebum secretion by inhibiting 5-alpha-reductase, an enzyme that converts testosterone into dihydroxytestosterone (DHT), causing stimulation of the sebaceous gland and resulting in increased sebum production.

To increase Zinc's effectiveness and bio-availability to cells, we combine Zinc with L-pyrrolidone carboxylic acid (L-PCA), a natural physiological molecule with a fundamental role in the biochemistry of the skin. PCA is a physiological moisturizer used in cosmetology for several skincare benefits, including topical treatments like acne, rosacea, warts, eczema, and psoriasis. Zinc PCA controls acne, reduces the secretion of sebum, and helps retain skin moisture by strengthening the skin barrier. XS Hyaluronic acid with its very low molecular weight further enhances the effectiveness of Zinc PCA by boosting hydration.

The serum can be mixed in any proportion with other mixlab serums to create a personalized formulation with additional benefits. It can also be added (2 doses) to the hyaluronic mix-mask for a targeted skincare routine.

### WHAT IS DIFFERENT?

- No synthetic thickener.
- Does not contain emulsifier, oil, silicone, or alcohol.
- Can be mixed to prepare personalised formulations.
- Non-sticky texture.

This is an ecological and responsible skincare product that delivers impressive results without compromising on sustainability or skin health.

It contains only active ingredients, making it a simple and effective solution for your skincare needs.

The formulation is a water-based gel that is thickened using only low molecular weight hyaluronic acid. No additional thickeners or gums are added to achieve the desired viscosity, resulting in a soft and non-sticky texture that feels rich and nourishing despite being oil-free.

To preserve the formulation, we created an environmentally and skin-friendly preservative system. It is an aqueous dispersion of organic acids and natural fruit acids that exhibit broad-spectrum activity against bacteria, yeast, mold, and fungi. This preservative system is alcohol and solvent-free, making it safe and gentle for the skin.

We designed this preservative system specifically for low pH formulations to ensure that it is skin-friendly. Additionally, the preservative system contains naturally sourced, GMO-free Propanediol, which provides improved skin moisturization and boosts the efficacy of the preservative.

Overall, Mixlab's serum formulation is an excellent choice for those seeking a natural, skin-friendly, and effective solution for their skincare needs.

### **FRAGRANCE:**

Ceylan tea & citrics.

### **INGREDIENTS:**

Aqua (Water), Sodium hyaluronate, Zinc PCA, Lactic acid, Propanediol, Citric acid, Tartaric acid, Gluconic acid, Polysorbate 80, Parfum, Citral, Limonene, Geraniol.

MIXLAB SERUMS

## hyaluronic NIACIN **mixlab serum**

### ACTIVE INGREDIENTS

Niacinamide\* (5%), Hyaluronic acid XS\* (2%), Fruity acids blend (1%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Reduce pigmentation and improve skin tone.
- Regulate the skin microbiome.
- Reduce acne and imperfections.
- Reduce redness and inflammation.
- Improve skin softness.
- Moisturize the skin.
- Revitalise hair and minimize hair loss.

An active serum to reduce redness, inflammation, pigmentation, and acne while improving skin texture with 2% of XS hyaluronic acid and 5% niacinamide. The serum can be used pure as a treatment against pigmentation and acne or mixed with other serums to prepare a more specific and personalized product.

Niacinamide is one of the most widely studied topical skincare ingredients. Numerous peer-reviewed studies have revealed its many benefits on the skin, which include clinically proven efficacy to brighten the skin, reduce acne and blemishes, improve the skin barrier, and rebalance the skin's microbiome.

- Niacinamide has a positive effect in reducing skin pigmentation to deliver a more uniform skin tone appearance. It helps to stop the transfer of existing melanin from melanocytes to keratinocytes.
- Niacinamide provided a significant positive effect on AQP3 expression, thus improving skin hydration. In our serum, hydration is boosted by the low molecular weight hyaluronic acid in addition to niacinamide.
- Niacinamide has a positive effect on the expression of multiple proteins critical to forming and maintaining the skin barrier, including filaggrin, involucrin, and keratin. Furthermore, niacinamide has been shown to improve the lipid composition of the epidermal barrier by increasing the amount of ceramides produced by keratinocytes.
- Niacinamide reduces the level and growth of *C. acnes*.

The serum can be mixed in any proportion with other Mixlab serums to create a personalized formulation with additional benefits. It can also be added (2 doses) to the hyaluronic mix-mask.

### WHAT IS DIFFERENT?

- No synthetic thickener.
- Does not contain emulsifier, oil, silicone, or alcohol.
- Can be mixed to prepare personalised formulations.
- Non-sticky texture.
- High concentration of active ingredients.
- Friendly to both skin and environment, 100% Renewable sourced ingredients.
- Natural preservative system.
- Low pH.
- Minimalist formulation.
- No over-packaging to reduce waste.
- Large format.

MIXLAB SERUMS

## hyaluronic NIACIN **mixlab serum**

### HOW TO USE?

- Cleanse your face thoroughly with a gentle cleanser and pat dry.
- Apply toner if you use one.
- Take a small amount of the serum on your fingertips or palms and gently massage it onto your face.
- Allow the serum to be absorbed into your skin for a few minutes.
- Apply your regular moisturizer or sunscreen over the serum.
- It is recommended to use the serum once or twice a day.

If you experience any redness, irritation or discomfort, stop using the product immediately and consult a dermatologist.

### ABOUT FORMULATION:

This formulation is among the most skin and eco-friendly available. All ingredients in the product originate from renewable sources, and it is packaged in a simple, 75 ml bottle to minimize waste. This is an ecological and responsible skincare product that delivers impressive results without compromising on sustainability or skin health.

It contains only active ingredients, making it a simple and effective solution for your skincare needs.

The formulation is a water-based gel that is thickened using only low molecular weight hyaluronic acid. No additional thickeners or gums are added to achieve the desired viscosity, resulting in a soft and non-sticky texture that feels rich and nourishing despite being oil-free.

To preserve the formulation, we created an environmentally and skin-friendly preservative system. It is an aqueous dispersion of organic acids and natural fruit acids that exhibit broad-spectrum activity against bacteria, yeast, mold, and fungi. This preservative system is alcohol and solvent-free, making it safe and gentle for the skin.

We designed this preservative system specifically for low pH formulations to ensure that it is skin-friendly. Additionally, the preservative system contains naturally sourced, GMO-free Propanediol, which provides improved skin moisturization and boosts the efficacy of the preservative.

Overall, Mixlab's serum formulation is an excellent choice for those seeking a natural, skin-friendly, and effective solution for their skincare needs.

### FRAGRANCE:

Ceylan tea & citrics.

### INGREDIENTS:

Aqua (Water), Niacinamide, Sodium hyaluronate, Lactic acid, Propanediol, Citric acid, Tartaric acid, Gluconic acid, Polysorbate 80, Sodium benzoate, Sodium dehydroacetate, Parfum, Citral, Limonene.

MIXLAB SERUMS

## hyaluronic TRX **mixlab serum**

### ACTIVE INGREDIENTS

Tranexamic acid\* (1%), Hyaluronic acid XS\* (2%), Fruity acids blend (1%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Reduce pigmentation and improve skin tone.
- Reduce redness and inflammation.
- Improve skin softness.
- Moisturize the skin.

This potent serum is designed to diminish pigmentation, formulated with 2% XS Hyaluronic Acid and 1% Tranexamic Acid. It can be applied directly as a targeted treatment for pigmentation and dark spots, or blended with other serums to create a more customized skincare solution.

Hyaluronic Acid is renowned as the most hydrating biopolymer. It functions as a connective tissue organizer and water-retention substance in living tissues. XS Hyaluronic Acid, with its low molecular weight, enhances skin permeation compared to its high molecular weight counterpart. It revitalizes the skin by enhancing its viscoelastic properties and significantly reduces deep wrinkles.

Tranexamic Acid is listed on the World Health Organization's list of Essential Medicines. However, in 1979, its skin-lightening benefits were discovered accidentally when a patient taking it for chronic urticaria reported a noticeable lightening of their skin. Tranexamic acid is a synthetic lysine analog known for its powerful ability to brighten skin complexion and improve the appearance of melasma. It works by blocking the interaction between melanocytes, the cells that produce melanin (responsible for skin pigment), and keratinocytes, the surface skin cells. Our product contains the optimal concentration for daily application to prevent potential skin damage. It's considered safe for use during pregnancy and breastfeeding.

This serum can be mixed with other Mixlab serums in any proportion to create a personalized formulation with additional benefits. Alternatively, it can be added (2 doses) to the Hyaluronic Mix-Mask.

### WHAT IS DIFFERENT?

MIXLAB SERUMS

## hyaluronic FLAVONOIDS mixlab serum

### ACTIVE INGREDIENTS

ET-Vitamin C\* (0,5%), HMC flavonoid\* (1%) , Hyaluronic acid XS\* (2%), Fruity acids blend (1%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Reduce rosacea and couperosis.
- Improve skin micro-circulation.
- Reduce redness and inflammation.
- Moisturize the skin.
- Reduce eye bags and dark circles.
- Reduce free radical damage.
- Reduce pigmentation.

Our active serum is designed to improve skin micro-circulation, with a potent blend of 2% XS Hyaluronic Acid, 1% Hesperidin Methyl Chalcone (HMC), and 0.5% ET-Vitamin C. This serum can be applied directly as a targeted treatment for conditions involving inflammation and micro-circulation, or it can be mixed with other serums to create a more customized skincare solution.

While skincare ingredients like retinol, vitamin C, and niacinamide often take center stage, HMC tends to be overlooked. Yet, it's a component in many of the most prestigious and costly eye creams. Perhaps HMC is a well-guarded secret for effective eye contour care. HMC's benefits start with its powerful antioxidant activity, which provides robust protection to skin cells. It can lessen UV-induced damage, reducing the effects of both UVA and UVB radiation on the skin. In fact, research shows that over 76% of cells survive UVB exposure when hesperidin is applied beforehand. HMC is also a common ingredient in skin lightening products, as it regulates melanin content. Like tranexamic acid and niacinamide, HMC also possesses anti-melanogenic effects, reducing melanin transfer to skin cells. Application of just 0.2% HMC over 14 days can decrease pigment levels by nearly 25%, brightening the skin and providing a more radiant complexion. Intriguingly, HMC's anti-inflammatory properties are particularly noteworthy. As it fights free radicals, HMC can alleviate inflammations caused by oxidative stress, preventing skin cell damage. This not only accelerates skin healing and reduces redness, but it also has a significant positive impact on blood vessels. HMC can decrease blood leakage from vessels by 45%, reducing inflammatory messengers. This unique property, found only in HMC, can effectively treat conditions like rosacea, couperosis, eye bags, and dark circles in a remarkably short period. In our serum, HMC is complemented by other active ingredients, such as XS Hyaluronic Acid and ET-Vitamin C. XS Hyaluronic Acid for its moisturizing properties and ET-Vitamin C for its superior whitening, anti-oxidation, free radical-scavenging, and collagen-boosting effects.

This serum can be mixed with other Mixlab serums in any proportion to create a personalized formulation with additional benefits. Alternatively, it can be added (2 doses) to the Hyaluronic Mix-Mask.

MIXLAB SERUMS

## hyaluronic B5 mixlab serum

### ACTIVE INGREDIENTS

Panthenol\* (5%), Tasmannia Lanceolata extract\* (4%), Hyaluronic acid XS\* (2%), Fruity acids blend (1%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Reduce rosacea and couperosis.
- Improve skin micro-circulation.
- Reduce redness and inflammation.
- Moisturize the skin.
- Reduce eye bags and dark circles.
- Reduce free radical damage.
- Reduce pigmentation.

Our active serum is designed to immediately reduce redness and inflammation, featuring a potent combination of 2% XS Hyaluronic Acid, 5% Panthenol, and natural extracts. This serum can be applied directly as a treatment for redness, or mixed with other serums to create a more specific and personalised skincare product.

Panthenol is a normal constituent of skin and hair and is essential for metabolism. It is readily absorbed by the skin, where it transforms into pantothenic acid, promoting cellular growth. A deficiency of vitamin B5 in the skin can lead to severe dermatological disorders, underscoring the importance of this ingredient in maintaining healthy skin. Panthenol's unique humectant properties mean it not only draws water to the skin's surface, but it also penetrates deep into the epidermis, infusing cells with moisture and retaining hydration deep within the tissues. Known as a super moisturiser due to its emollient properties, it can reduce scars and stretch marks, promote wound healing, and leave the skin soft, smooth, and supple. When used regularly over a period of four weeks or more, Panthenol takes on an anti-inflammatory role, relieving systemic itching and soothing dry skin.

At 5%, Panthenol boosts skin healing by about 30%. It has shown favourable results in several inflammatory skin disorders, including burns and eczema. Panthenol-based formulations can significantly increase skin hydration, positively impacting the barrier function by decreasing transepidermal water loss. Even just 1% Panthenol added to a formulation enhances the skin's protective properties, attributing to its moisturising effects.

XS Hyaluronic Acid, with its low molecular weight, pairs well with Panthenol. It increases skin hydration with its water-binding properties and promotes healing by regenerating the dermal layer. Tasmannia Lanceolata extract, is an anti-inflammatory active ingredient that soothes and calms reactive skin. It instantly reduces itching and burning sensations and diminishes the appearance of skin redness.

This serum can be mixed with other Mixlab serums in any proportion to create a personalized formulation with additional benefits. Alternatively, it can be added (2 doses) to the Hyaluronic Mix-Mask.

### WHAT IS DIFFERENT?

MIXLAB SERUMS

## squalane VIT F mixlab serum

### ACTIVE INGREDIENTS

Olive oil squalane (20%), Vitamin F fortel\* (3%), Vitamin E (0,5%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Anti-inflammatory properties.
- Restore the skin's lipid barrier.
- Nourish and prevent dehydration.
- Improve dry and thinning hair.

This revitalizing serum is designed to nourish and restore the natural lipid barrier of the skin. Formulated with 20% vegan squalane and 3% vitamin F, it can be used undiluted as an effective treatment for dryness, or blended with other serums to create a more customized skincare product.

Vegan squalane is a remarkable humectant that closely mimics the skin's natural squalene, offering exceptional hydration and aiding in ingredient absorption. Unlike squalene, which is unstable and can potentially clog pores, squalane has additional hydrogen in its molecular structure, making it lighter and non-comedogenic. Olive squalane, a transparent, odorless natural emollient, is known to smooth the skin and retain moisture. Its lightweight nature and easy absorption make it an excellent carrier for other beneficial ingredients, such as vitamins.

Vitamin F, a blend of essential fatty acids including Linoleic Acid and Linolenic Acid, is primarily derived from soybean oil. These essential fatty acids, particularly linoleic acid, play a crucial role in maintaining a healthy lipid barrier and its physiological functions. A deficiency in linoleic acid can result in dry, scaling skin and a compromised lipid barrier, manifesting in increased Transepidermal Water Loss (TEWL). Topical application of linoleic acid can restore the lipid barrier within a few days. Vitamin F is therefore highly beneficial in treating conditions such as dry skin, sebaceous gland hypertrophy, hyperkeratosis, weakened capillary vessels, atopic dermatitis, psoriasis, and even acne.

This serum can be combined with other Mixlab serums to create a personalised formulation with additional benefits. However, when preparing a serum with squalane-based serums, ensure that the proportion of squalane serums is less than half. Due to their oily composition, squalane serums are not recommended to be added to hyaluronic mix-masks.

### WHAT IS DIFFERENT?

- Can be mixed to prepare personalised formulations.
- High concentration of active ingredients.
- Friendly to both skin and environment, 100% Renewable sourced ingredients.
- Minimalist formulation.
- No over-packaging to reduce waste.
- Large format.
- Oil-based serum.
- Non-greasy after-feel.

MIXLAB SERUMS

## squalane VIT F **mixlab serum**

### **HOW TO USE?**

- Cleanse your face thoroughly with a gentle cleanser and pat dry.
- Apply toner if you use one.
- Take a small amount of the serum on your fingertips or palms and gently massage it onto your face.
- Allow the serum to be absorbed into your skin for a few minutes.
- Apply your regular moisturizer or sunscreen over the serum.
- It is recommended to use the serum once or twice a day.

If you experience any redness, irritation or discomfort, stop using the product immediately and consult a dermatologist.

### **ABOUT FORMULATION:**

This formulation is among the most skin and eco-friendly available. All ingredients in the product originate from renewable sources, and it is packaged in a simple, 75 ml bottle to minimize waste. This is an ecological and responsible skincare product that delivers impressive results without compromising on sustainability or skin health.

It contains only active ingredients, making it a simple and effective solution for your skincare needs.

This oil-based formulation seamlessly emulsifies with hyaluronic acid-based serums, creating an oil-in-water micro-emulsion. Unlike many beauty oils, the feel of our serum is soft and non-greasy, while still feeling rich and nourishing on the skin.

Since it has a 100% oil composition, there's no need for added preservatives. We've only included Vitamin E in our formulation, which serves to protect the oils and retinol from oxidation, ensuring the product's longevity and efficacy.

### **FRAGRANCE:**

Perfume free with a neutral scent.

### **INGREDIENTS:**

Octyldodecyl myristate, Squalane, Linoleic acid, Linolenic acid, PEG-40 sorbitan peroleate, Tocopheryl acetate.

MIXLAB SERUMS

## squalane RETINOL mixlab serum

### ACTIVE INGREDIENTS

Olive oil squalane (20%), Retinol\* (0,3%), Vitamin E (0,5%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Promote skin lifting.
- Reduce fine lines and wrinkles.
- Minimize free radicals.
- Prevent photo-ageing.
- Diminish pigmentation and brown spots.
- Nourish the skin.

Introducing an active serum designed to nourish the skin while reducing signs of ageing and photo-ageing. With 20% vegan squalane and 0.3% retinol, this serum can be used undiluted as a targeted treatment against wrinkles and pigmentation, or mixed with other serums to create a more specific and personalised skincare solution.

Vegan squalane is a remarkable humectant that closely mirrors skin's natural squalene, offering excellent moisture and improved ingredient penetration. While natural squalene can be heavy and pore-clogging, squalane is modified by adding hydrogen to the molecular structure, resulting in a lighter formulation that doesn't clog pores. This olive-derived squalane is a clear, odourless, natural emollient that helps smooth the skin and retain its moisture. It's extremely lightweight and easily absorbed, making it an excellent carrier for other potent ingredients like retinol.

Our retinol treatment is perfect for addressing wrinkles and sun-damaged skin. Due to our 100% oil formulation, the retinol in our serum is stabilised, preserving the product's effectiveness over time. We use the purest, most active form of retinol in this formulation. Unlike derivatives such as retinyl palmitate found in other skincare products – which offer less efficiency but are more stable and easier to incorporate – our retinol ensures the highest level of impact.

This serum can be combined with other Mixlab serums to create a personalised formulation with additional benefits. However, when preparing a serum with squalane-based serums, ensure that the proportion of squalane serums is less than half. Due to their oily composition, squalane serums are not recommended to be added to hyaluronic mix-masks.

### WHAT IS DIFFERENT?

- Can be mixed to prepare personalised formulations.
- High concentration of active ingredients.
- Friendly to both skin and environment, 100% Renewable sourced ingredients.
- Minimalist formulation.
- No over-packaging to reduce waste.
- Large format.
- Oil-based serum.
- Non-greasy after-feel.

MIXLAB SERUMS

## squalane RETINOL **mixlab serum**

### **HOW TO USE?**

- Cleanse your face thoroughly with a gentle cleanser and pat dry.
- Apply toner if you use one.
- Take a small amount of the serum on your fingertips or palms and gently massage it onto your face.
- Allow the serum to be absorbed into your skin for a few minutes.
- Apply your regular moisturizer or sunscreen over the serum.
- It is recommended to use the serum once or twice a day.

If you experience any redness, irritation or discomfort, stop using the product immediately and consult a dermatologist.

### **ABOUT FORMULATION:**

This formulation is among the most skin and eco-friendly available. All ingredients in the product originate from renewable sources, and it is packaged in a simple, 75 ml bottle to minimize waste. Since it has a 100% oil composition, there's no need for added preservatives. We've only included Vitamin E in our formulation, which serves to protect the oils and retinol from oxidation, ensuring the product's longevity and efficacy.

### **FRAGRANCE:**

Perfume free with a neutral scent.

### **INGREDIENTS:**

Diisopropyl adipate, Squalane, PEG-40 sorbitan peroleate, Retinol, Tocopheryl acetate, Polysorbate 20, BHT, BHA.

MIXLAB MASKS

## hyaluronic **mix-mask**

### ACTIVE INGREDIENTS

Sorbitol, Hyaluronic acid XS\* (0,3%).

\* EVIDENCE OF CLINICAL EFFICACY

### INDICATIONS

- Hydrate the skin.
- Reduce deep wrinkles and fine lines.
- Personalized masks.

Our product is a 100% natural powder designed to craft unique hyaluronic acid masks. Simply combine the powder with water in our Mixlab mask blender, and enhance its effectiveness by adding 1 to 2 doses of Mixlab hyaluronic serum. The resulting mask is firm, refreshing, and highly moisturizing, offering a new generation of facial treatment that can be personalized for each skin type and specific treatment needs. It contains low molecular weight hyaluronic acid and sorbitol, both potent boosters for skin hydration.

These masks are safe for application following any medical or aesthetic procedures, with no risk of causing inflammation or allergic reactions. Experience the freshness of these incredible masks, prepared on the spot for each individual customer, at an exceptionally cost-effective price.

Sorbitol is a type of sugar alcohol that acts as a humectant in skincare products. Humectants are substances that help the skin to retain moisture by attracting water molecules from the surrounding environment and from the deeper layers of the skin. This helps to hydrate the skin, keeping it moist and supple. Sorbitol also has skin-conditioning properties, which means it helps to soften and smooth the skin.

Hyaluronic Acid is a naturally occurring substance in the skin that can hold up to 1,000 times its weight in water, making it a powerful hydrator. When applied topically, hyaluronic acid helps to replenish the skin's moisture content, improve its elasticity, and reduce the appearance of fine lines and wrinkles. Furthermore, due to its large molecular size, it forms a breathable film on the skin's surface that helps to lock in moisture. This hydration support can lead to a plumper, smoother, and more radiant complexion.

Both ingredients are typically well-tolerated and suitable for all skin types, including sensitive skin. Their combined effect in a skincare product can provide enhanced hydration, resulting in softer, smoother, and more youthful-looking skin.

### WHAT IS DIFFERENT?

- Free from preservatives.
- Contains no synthetic thickeners.
- Devoid of emulsifiers, oils, silicones, or alcohol.
- Suitable for mixing to create personalized masks.
- Friendly to both skin and the environment.
- Made from 100% renewable sourced ingredients.
- More cost-effective than alginate masks, offering a more refreshing and exclusive experience.
- Allows for further customization by using different types of water to prepare the mask. For instance, water rich in minerals can be beneficial for oily skin types.

MIXLAB SERUMS

## hyaluronic **mix-mask**

### **HOW TO USE?**

Place the mixing tool, without the spring, in the Mixlab blender. Add 100 ml of water into the blender. Start the blender and then quickly add the entire contents of the sachet. Once the mixing process ends, wait for about 30 seconds to allow any bubbles to rise and prevent air from being incorporated into the mask.

If desired, you can add Mixlab serums after the mixing process. Add 1 to 2 ml maximum and stir with the spatula. Then, pour the gel into the mould. Place the mould into the refrigerator for approximately 5 minutes. After this, your mask is ready to be applied to the skin.

Avoid leaving the mask in the refrigerator for an extended period. If the mask becomes too cold, it can lose elasticity and may potentially break during application.

### **ABOUT FORMULATION:**

Our hyaluronic mix-mask formulation is among the most natural and skin-friendly options available on the market. It is composed of carefully selected natural gums, hyaluronic acid, sorbitol, and potassium.

The gel formed by this mix is thermoreversible, which means it becomes fluid at high temperatures and solidifies into a firmer gel as the temperature decreases. If the mask is disrupted during application, it can be reheated to reform into a new mask.

Unlike similar products that come in compressed tablets, our formulation is presented as a loose powder. This approach allows us to avoid including sodium bicarbonate and citric acid, which are typically used to facilitate tablet disintegration.

Our mask provides the perfect balance between elasticity and firmness, offering optimal skincare benefits.

### **FRAGRANCE:**

Perfume free with a neutral scent.

### **INGREDIENTS:**

Sorbitol, Carrageenan, Ceratonia siliqua gum, Xanthan gum, Potassium chloride, Sodium hyaluronate.

"Over the years, we've built various brands and concepts, all guided by a single objective: to stand apart, innovate, and enhance the condition of our customers' skin. I believe this commitment to distinctiveness and progress is what has cemented our reputation and driven our success over the past 18 years."
