ABOUT FUSION MESO

HB aesthetics Group was founded with a passion for promoting better skin health and delivering effective skincare products. The founder, with a medical and chemical background, aimed to challenge the beauty market since 2004 by creating skincare products inspired by aesthetic medicine treatments and its active ingredients, a unique idea at the time.

With his experience in biochemistry, he developed science-backed, results-driven products and professional treatments that cater to all skin types, promoting healthy and youthful skin. His mission is to provide only the best products to professionals, leaving no reason to choose any other brand.

Fusion Meso, the brand under HB aesthetics Group, creates both home and professional protocols that focus on promoting healthy skin condition through the use of active ingredients sourced from aesthetic medicine and injectable products.

Fusion Meso is an aesthetic medicine skincare brand that is available in more than 61 countries and 15,000 centers worldwide. The product assortment is divided into sterile vials, skincare for pre- and post-treatments and home care. The sterile vials are designed for non-invasive treatments like micro-needling or transdermal devices, while the skincare products are based on ingredients such as hyaluronic acid, retinol, vitamin C, growth factors, peptides, and more.

We offer comprehensive cosmetic solutions that are highly innovative and scientifically advanced. Our company is ISO 9001 and GMP certified for the production and distribution of skincare products.

- 20 years experience in aesthetic medicine
- More than 15.000 clinics and beauty salons worldwide from which 57% are doctors and dermatologists
- 58 official distributors worldwide and available in 61 countries
- Own production facilities
- GMP and ISO 9001 certifications
- Exclusive formulations

ABOUT MESOTHERAPY

Our research and observations have led us to the conclusion that fibroblast activity is closely linked to young and healthy skin.

In the dermis, fibroblasts are the main source of proteins that make up the extracellular matrix, giving the skin its suppleness, elasticity, and firmness.

Mesotherapy is a well-known technique in the field of aesthetic medicine that stimulates the mesoderm and fibroblasts to improve or repair skin functions. This technique involves superficial micro-injections with solutions rich in active ingredients.

In recent years, mesotherapy has been overshadowed by micro-needling and other technologies that deliver superior results due to their ability to induce higher collagen production. This is achieved by creating more micro-perforations in the skin using needles or through heat or laser energy. They can be performed by a wider range of professionals (such as doctors or estheticians), and have extremely rare side effects.

When creating micro-channels in the skin, it's crucial to use specific products to prevent allergies or infections, as these products penetrate the dermis and go even deeper. Fusion Meso sterile vials have been specially formulated for this purpose and are produced according to pharmaceutical industry standards. Our products ensure effective procedures with significant added value.

Our advanced skincare prepares, complements, and protects these results by helping to prevent future damage, protect healthy skin, and further correct visible signs of aging. By combining a customized at-home regimen with powerful in-office treatments, the result is youthful-looking skin.

PROGRAM

Fusion Meso treatments can be performed as a single procedure or as a series of sessions, depending on the specific indications and the individual's skin condition.

Set-up objectives of the treatment

During your consultation, our therapist will evaluate your skin type and any skin concerns. Based on this assessment, they will recommend a type of product and technique that will best suit your needs.

Skin conditioning (3 to 7 days)

Before any type of treatment, it is recommended to carry out conditioning to keep the skin well-hydrated, nourished, and had reduced exposure to UV rays prior to treatment.

First treatment

The first treatment with the therapist is conservative in order to observe how the skin reacts to the product and the skin stimulation.

Repair (7 to 10 days)

After the treatments, it is recommended to protect the skin with a high protection sunscreen during the day and to apply a cream in the evening that supports skin repair.

Consecutive treatments

The therapist can perform additional treatments as needed, in a safe and controlled manner.

Remodelling (7 to 14 days)

After the last treatment, it is recommended to protect the skin from UV rays by using our SPF and to apply a repair cream at night. A booster may also be recommended, such as Retinol 1.0 or Vitamin C 5.0.

Skincare regimen

The therapist will recommend using Fusion Meso skincare products for maintenance in order to help you keep your skin healthy.

PRODUCT LINE

Our comprehensive product line encompasses a broad selection of sterile vials suitable for various areas and indications. Our skincare is formulated to support the skin both before and after micro-needling procedures. It can also be used to support the skin following other aesthetic procedures, such as laser treatments, Botox, dermaplaning, dermal fillers, and more.

Micro-needling device CE1370

Our micro-needling device is one of the few certified as a Class IIb medical device. In Europe, it is mandatory to use a medically certified device to ensure maximum safety for customers and prevent cross-contamination among them. Our device has TGA (Australia) approval, and we are in the process of obtaining FDA (United States) approval.

Sterile vials

Sterile cosmetic vials are produced in accordance with pharmaceutical standards, utilizing the highest purity grade active ingredients. This ensures the lowest levels of endotoxins, which, when introduced into the body, can induce a fever.

Cleansing and exfoliating the skin

Cleansing products designed to prepare the skin for professional treatments or for at-home use, ensuring perfectly cleansed skin.

Masks

Masks designed for professional treatments or at-home use, ensuring skin is perfectly nourished and hydrated.

Sunscreens, Repair creams, Creams & MOISTURIZERS

Creams formulated to protect the skin from UV rays, aid in skin repair after aesthetic procedures, maintain results, and provide moisture using active ingredients derived from aesthetic medicine.

Specific areas

Products for specific areas such as the eye contour, hair, and body, designed to enhance skin and hair conditions using active ingredients from aesthetic medicine.

BOOSTERS

Ultra-potent products with a high concentration of ingredients created for specific concerns such as acne-prone skin, melasma, or deep wrinkles.

KEY DIFFERENCES

Meet Pen Platinum, the latest meso-needling system with medical CE certification.

Pen Platinum by FUSION MESO pen technologies amalgamate precision with safety. Furthermore, the handpiece and needles, solely manufactured in Italy and Europe, surpasses global standards.

Revolutionary Technology: Utilizing cutting-edge technology, our micro-needling system's fine needles produce micro-channels to the skin. This process not only promotes collagen production but also fosters optimal absorption of sterile products, leading to a firmer and more radiant complexion.

Safety First: Our device adheres to stringent international safety standards. The high-grade, hypoallergenic needles guarantee safe and effective treatment every time, further enhanced with an anti-back flow system to prevent cross-contamination.

Minimal Downtime: Facial treatments no longer require extended home recovery. With our system, you'll experience minimal redness and swelling, allowing for a faster return to your daily activities compared to other treatments.

Versatility: Our system caters to diverse skin types by offering various needle types and precisely adjustable treatment depths. Whether you have sensitive, oily, dry, or combination skin, our system ensures comprehensive benefits for all users.

Expert Support: Fusion Meso offers more than a device; we provide a partnership dedicated to skin health, encompassing extensive training and unwavering customer support.

Pen Platinum by FUSION MESO, the only handpiece for NEEDLING made in Italy and manufactured in Europe. It is THE ONLY DEVICE IN THE WORLD CERTIFIED CE 93/42 of CLASS IIB, surpassing the strictest certification standards of Class II.

DEVICE

The handpiece

Ergonomic design, made of Ergal aluminum an alloy of Aluminum and Zinc distinguished for its excellent mechanical resistance, the best among all. This superior material quality prevents noise, intense vibrations, and efficiency reduction, as it does not expand with heat compared to other devices. Lightweight, handy, quiet, with extremely low vibrations, and at the same time very powerful and precise.

- 6-speed from 6.500 to 7.500 RPM.
- Internal lithium battery.
- Operates wireless technology or with cable.
- Easy Lock System ensuring quick and reliable cartridge insertion.

The cartridges

The cartridges are exclusively crafted in Italy and differ significantly from those already available in the market. The body is constructed from bio-compatible plastic polymers, and the needles are made of AISI304 surgical steel. To eliminate the risk of cross-contamination, the cartridges feature a patented Anti-Back Flow System. This system consists of a silicone sleeve at the back of our cartridges, which collects fluids and prevents them from reaching the handpiece.

9M Cartridges: tailored for meso-needling, for an invasive epidermal stimulation with bleeding and fibroblast rupture for a deep skin rejuvenation. Its special flower design with 9 needles of 33G reach up to 2.5mm depth.

NANO Cartridges: Designed for Nano needling, it offers non-invasive superficial treatment without downtime. Cartridge for Nano needling consisting of 130 round micro-tips of 0.1mm length arranged in a circle, side by side.

ANTI-AGEING & WRINKLES

F-XFC

Sterile and isotonic solution that contains NCTC135. It is designed to rejuvenate the appearance of the skin by providing essential nutrients and promoting cellular activity. NCTC 135 is a mixture of ingredients derived entirely from plant or synthetic sources. Offers protection against radicals, highly effective as a moisturiser and activate cell metabolism, including the respiratory oxygen consumption in the cell's mitochondria, which in turn increases the production of intracellular adenosine triphosphate. This biochemical energy serves as fuel for numerous vital cell functions, such as cell division, and protein synthesis.

Main ingredients: NCTC 135 (4 Minerals, 23 amino acids, 18 vitamins, 6 co-enzymes, 5 nucleic acids, 2 reducing agents).

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-XFC+

Sterile and isotonic solution that contains NCTC135 enhanced with growth factors and hyaluronic acid. It is designed to rejuvenate the appearance of the skin and reduce the appearance of wrinkles by providing essential nutrients and promoting cellular activity and proliferation. It offers protection against radicals, serves as an effective moisturizer, and boosts the proliferation of keratinocytes and fibroblasts. It also activates cell metabolism, including respiratory oxygen consumption in the cell's mitochondria. This, in turn, elevates the production of intracellular adenosine triphosphate. This biochemical energy acts as fuel for various crucial cellular functions, including cell division and protein synthesis.

Main ingredients: NCTC 135 (4 Minerals, 23 amino acids, 18 vitamins, 6 co-enzymes, 5 nucleic acids, 2 reducing agents), EGF growth factor, FGF growth factor, Hyaluronic acid MW.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

F-XFC+ FACE

Sterile and isotonic solution that contains organic silicium, DMAE, and hyaluronic acid. It is designed to diminish the appearance of deep wrinkles by hydrating and aiding the regeneration of the dermal matrix, thereby increasing collagen and elastin levels. Organic silicium is the key ingredient in this formula, offering multiple benefits such as anti-wrinkle, firming, and collagen-boosting properties. DMAE, a derivative of the B vitamin choline, is known for its capability to enhance muscle tone, thus diminishing the appearance of wrinkles and sagging skin. Hyaluronic acid hydrates and aids in restoring skin volume, making it a prime ingredient for combating visible signs of aging.

Main ingredients: Organic silicium, DMAE, Hyaluronic acid HW.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-LIFT+ FACE

Sterile and isotonic solution that contains a high concentration of 4 biomimetic peptides and 3 growth factors (Fibroblast GF, Epidermal GF, Thioredoxin GF). Our most potent product to give the skin a lifted and firmer appearance after just a few treatments. The blend of active ingredients focuses on supporting skin firmness and elasticity by hydrating and aiding the regeneration of the dermal matrix. Growth factors promote the proliferation of skin cells, especially keratinocytes and fibroblasts, thereby increasing levels of collagen and elastin. Hexapeptide-10 boosts the synthesis of proteins strengthening the dermo-epidermal junction. Carcinine, a peptide compound, helps protect collagen from external aggressions.

Main ingredients: Hyaluronic acid MW, EGF+FGF+TRX growth factors, Carcinine, Oligopeptide-24, Oligopeptide-34, Hexapeptide-10.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

ANTI-AGEING & WRINKLES

F-SLIM LIFT

Sterile and isotonic solution that contains NCTC135 enhanced with caffeine and hyaluronic acid. It is designed to rejuvenate the appearance of the skin and give the face a more sculpted appearance. NCTC 135 with hyaluronic acid offer protection against radicals, moisture and activate cell metabolism, including the respiratory oxygen consumption in the cell's mitochondria, which in turn increases the production of intracellular adenosine triphosphate. This biochemical energy serves as fuel for numerous vital cell functions, such as cell division, and protein synthesis. Caffeine when applied topically, may reduce redness, puffiness, stimulate the breakdown of fat cells and assist in draining accumulated fluids giving the face a slimmer and brighter appearance.

Main ingredients: NCTC 135 (4 Minerals, 23 amino acids, 18 vitamins, 6 co-enzymes, 5 nucleic acids, 2 reducing agents), EGF growth factor, FGF growth factor, Hyaluronic acid MW.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-BTX

Sterile and isotonic solution that contains peptides enhanced with hyaluronic acid. Peptides help reduce the appearance of expression wrinkles and lines, while hyaluronic acid provides moisture and volume.

This is the ideal complement to botulinum toxin injections as it can enhance and prolong the effect. The anti-wrinkle impact of F-BTX, when combined with botulinum toxin, is tripled in the frontal region after six months compared to using botulinum toxin alone. Additionally, it slows the return of expression lines in the crow's feet area.

Main ingredients: Octapeptides & Pentapeptides, Hyaluronic acid MW.

Areas: Forehead, crow's feet.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-DMAE

Sterile and isotonic solution that contains DMAE. A natural compound found in our body that has started to be used in external products to produce a lifting and anti-wrinkles effect. The mode of action of DMAE can result in a synergistic combination of actions at different levels, including tension of dermal non-muscle cells, cohesion and displacement of keratinocytes, improvement of hydration and elasticity of the stratum corneum. DMAE has both immediate and long-lasting effects.

Main ingredients: DMAE.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

HYALURONIC ACID LINE

F-HA

Sterile and isotonic solution that contains high molecular weight hyaluronic acid. It is formulated to enhance facial volume, diminish the visibility of deep wrinkles, and impart a lifted and firmer appearance.

Hyaluronic acid effectively combats extreme dryness, deep static wrinkles, and volume loss by enhancing cellular cohesion, preventing transepidermal water loss, and stimulating collagen I synthesis to maintain moisturized and firm skin. It is a natural polysaccharide with incredible properties, which are further enhanced by the specific form used: high molecular weight for immediate and long-lasting results.

Main ingredients: Hyaluronic acid HW (1,5%).

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-HA+

Sterile and isotonic solution that contains high molecular weight hyaluronic acid with a higher viscosity compared to F-HA. It is formulated to enhance facial volume, diminish the visibility of deep wrinkles, and impart a lifted and firmer appearance.

Hyaluronic acid effectively combats extreme dryness, deep static wrinkles, and volume loss by enhancing cellular cohesion, preventing transepidermal water loss, and stimulating collagen I synthesis to maintain moisturized and firm skin. It is a natural polysaccharide with incredible properties, which are further enhanced by the specific form used: high molecular weight for immediate and long-lasting results.

Main ingredients: Hyaluronic acid HW (2,2%).

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

F-HA LIFT new launch May 2024

Sterile and isotonic solution, formulated to achieve a comprehensive skin transformation by reducing deep wrinkles and fine lines, enhancing skin volumes, hydrating at the dermal level, promoting revitalization, and providing cellular nutrition. Also, this product even skin tone thanks to Copper Peptide's ability to promote cell turnover.

NCTC, blends essential vitamins, amino acids, coenzymes, and minerals to revitalize the skin, enhance texture, and promote a more youthful appearance. Hyaluronic acid hydrates and plumps the skin, Sodium Succinate boosts cellular metabolism for improved skin health, and Copper Peptide acts as a skincare hero by aiding collagen production, firming the skin, and reducing the appearance of fine lines and wrinkles.

Main ingredients: Hyaluronic acid HW (1,5%), NCTC 135 (4 Minerals, 23 amino acids, 18 vitamins, 6 co-enzymes, 5 nucleic acids, 2 reducing agents), Sodium succinate (1,6%), Copper tripeptide-1.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

F-HA GLOW new launch September 2024

Sterile and isotonic solution formulated for pigmentation, with potent ingredients designed to transform the skin and unlock a radiant, youthful complexion. It features hyaluronic acid for hydration and plumping, a patented peptide (acetyl glycol beta-alanine) with dermal penetration capabilities for skin lightening, Niacinamide for evening out skin tone and reducing dark spots, Tranexamic acid to inhibit melanin production and fade dark spots, and Thioredoxin for cytoprotective and radical-scavenging effects to prevent photo-aging and pigmentation.

Main ingredients: Hyaluronic acid HW (1,5%), EGF growth factor, FGF growth factor.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

STERILE VIALS

HYALURONIC ACID LINE

F-HA ULTRA

Sterile and isotonic solution that contains high molecular weight hyaluronic acid and growth factors. It is formulated to enhance facial volume, diminish the visibility of deep wrinkles, and impart a lifted and firmer appearance. Owing to its growth factor content, F-HA ULTRA is also effective in minimizing the appearance of scars and stretch marks.

Hyaluronic acid effectively combats extreme dryness, deep static wrinkles, and volume loss by enhancing cellular cohesion, preventing transepidermal water loss, and stimulating collagen I synthesis to maintain moisturized and firm skin. It is a natural polysaccharide with incredible properties, which are further enhanced by the specific form used: high molecular weight for immediate and long-lasting results. FGF and EGF stimulate the cellular proliferation of keratinocytes and fibroblasts.

Main ingredients: Hyaluronic acid HW (1,5%), EGF growth factor, FGF growth factor.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

STERILE VIALS

ANTI-PIGMENTATION

F-RADIANCE

A sterile and isotonic solution, formulated to enhance skin radiance and diminish the appearance of pigmentation and dark spots, all without causing irritation. Pigmentation primarily arises from UV radiation's impact on melanocytes. The melanogenesis process encompasses three key stages: the formation of melanosomes, the synthesis of melanin, and the transport of melanosomes. The mature melanosomes, loaded with melanin, are transferred to adjacent keratinocytes migrating to the top skin layer. The combined effects of glutathione, vitamin C, peptides, and growth factor target all these processes for optimal efficacy. Additionally, retinol promotes skin renewal to ensure that melanin-laden keratinocytes are swiftly exfoliated.

Main ingredients: Retinyl palmitate, Oligopeptide-34, Acetyl glycolyl beta-alanine peptide, TRX growth factor, Glutathione, Vitamin C.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-MELACLEAR

A sterile and isotonic solution, formulated for reducing the appearance of dark spots on localized areas with a multi-active synergy of specific ingredients. Tranexamic acid and arbutin both inhibit tyrosinase, the enzyme responsible for melanin production. Glutathione lightens the skin by converting melanin to a lighter shade and also deactivating tyrosinase. Niacinamide aids in reducing redness, and it further diminishes melanin production. Resorcinol assists with mild skin peeling, rejuvenating the skin's surface. These ingredients collectively offer four main benefits: inhibiting tyrosinase activity, lightening melanin, reducing redness, and providing gentle exfoliation for optimal results.

Main ingredients: Niacinamide, Tranexamic acid, Resorcinol, Glutathione, Arbutin.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

ANTI-PIGMENTATION

F-GLOW LIFT

Sterile and isotonic solution, formulated to even out skin tone, minimize deep wrinkles and skin sagging. The coordinated effects of Acetyl Glycyl Beta-Alanine peptide, glutathione, vitamin C, niacinamide, and tranexamic acid address pigmentation. They inhibit melanin-producing enzymes, decrease melanosome transport by down-regulating melanophilin, and reduce skin redness. In addition, hyaluronic acid, FGF, and organic silicium enhance skin hydration, stimulate fibroblast proliferation, and boost the synthesis of proteins such as collagen, leading to significant firming of the dermis. DMAE further amplifies the firming effect, rapidly diminishing the appearance of wrinkles.

Main ingredients: Organic silicium, Hyaluronic acid MW, FGF growth factor, Tranexamic acid, DMAE, Niacinamide, Vitamin C, Glutathione, Acetyl Glycyl Beta-Alanine peptide.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

F-TRANEXAMIC new launch April 2024

Sterile and isotonic solution, formulated to combat a range of skin concerns, including melasma, pigmentation, brown spots and redness for an even complexion. Tranexamic acid takes center stage as a remarkable ingredient addressing hyperpigmentation and melasma. This ingredient operates by inhibiting the overproduction of melanin, the pigment responsible for dark spots and uneven skin tone. With Tranexamic Acid, not only do existing pigmentation irregularities fade, but it also serves as a safeguard against the emergence of new ones, leaving your skin visibly brighter, smoother, and more radiant. Clinical studies provide concrete evidence of Tranexamic acid's effectiveness in treating melasma, post-acne erythema, and even periorbital wrinkles.

Main ingredients: Tranexamic acid (1%).

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

F-ANTI-OX

Sterile and isotonic solution enriched with powerful free radical scavengers. This advanced product is based on the capabilities of superoxide dismutase (SOD) to combat free radicals, photo-aging, and hyperpigmentation. SOD, an enzyme inherent in all living cells, neutralizes harmful effects of UV's preventing hyperpigmentation. Vitamin C and glutathione, powerful antioxidants, diminish pigmentation and increase collagen production. Augmenting this blend of antioxidants is sodium pyruvate, an energy source for cellular metabolism that also encourages collagen synthesis. The anti-ox concept lies in improving antioxidant defenses, providing protection against photo-aging.

Main ingredients: Super oxide dismutase, Vitamin C, Glutathione, Sodium pyruvate.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-VITAMIN C

Sterile solution that contains high concentration of pure vitamin C. An excellent treatment for preventing skin ageing, combating free radicals, reducing appearance of pigmentation, and achieving skin lightening. Vitamin C is a potent antioxidant that helps prevent free radical damage, the primary cause of skin ageing.

When applied correctly, vitamin C can penetrate the deeper layers of the epidermis, replenishing the vitamin supply. This way, free radicals can be scavenged, collagen synthesis can be restored, melanin can be reduced to reduce the appearance of brown spots, and enlight the skin tone.

Main ingredients: Vitamin C.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

STERILE VIALS

OILY SKIN

F-ACN

Sterile and isotonic solution tailored for acne-prone and impure skin types. This formula integrates vitamins B5 and niacinamide to alleviate acne-associated redness, hyaluronic acid for hydration, and Zinc PCA for oily skin predisposed to acne. Zinc, a mineral extensively researched for its role in acne treatments, offers multiple benefits: it acts as an antibacterial agent, promotes the healing of rashes, serves as an antioxidant, and diminishes sebum secretion by inhibiting 5-alpha-reductase. To enhance its efficacy and cellular bioavailability, we've paired zinc with L-PCA, a naturally occurring skin molecule. PCA is esteemed as a natural moisturizer and is documented for its diverse skincare benefits, making it a key ingredient in topical treatments addressing conditions such as acne, rosacea, eczema, and psoriasis.

Main ingredients: Hyaluronic acid MW, Niacinamide, ZnPCA, Panthenol.

Areas: Face, neck and décolleté.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-VITAMIN ACE

Sterile and isotonic solution enriched with vitamins for oily skin types and combatting signs of photo-aging. Vitamins A, C, and E are potent antioxidants, collectively shielding skin from the free radical damage predominantly responsible for photoaging. Together, these vitamins create a robust defense mechanism against melasma, skin discoloration and brown spots. Retinyl palmitate is an ester of retinol. Once absorbed by the skin, it can transform into retinol, which is recognized for its efficacy in promoting skin renewal and addressing concerns associated with oily and acne-prone skin.

Main ingredients: Retinyl palmitate, Vitamin C, Vitamin E.

Areas: Face, neck and décolleté.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

STERILE VIALS

HYDRATION

F-HYDRALIX

Sterile and isotonic solution with hyaluronic acid, sodium lactate, and acetyl hexapeptide-37. This formulation is dedicated to restore skin volume and elevate hydration for a youthful skin appearance. Hyaluronic acid, a substance naturally present in the skin, plays a pivotal role in moisture retention, enhancing skin volume and elasticity. Sodium lactate serves as a potent humectant, preserving skin's moisture balance. Its subtle exfoliating properties help shed dead skin cells, unveiling a brighter, refined complexion. Acetyl hexapeptide-37 acts on skin hydration by augmenting the expression of aquaporin 3 (AQP3), a pivotal membrane protein that facilitates water movement across tissue layers.

Main ingredients: Acetyl hexapeptide-37, Hyaluronic acid MW, Sodium lactate.

Areas: Face, neck and décolleté.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

STERILE VIALS

ANTI-COUPEROSIS

F-COUPERIX

Sterile and isotonic solution that contains active ingredient to reduce the appearance of couperosis and redness. Our innovative product is designed to specifically decrease the appearance of facial redness and telangiectasia induced by an excessive inflammatory response by combining tetrapeptide, organic silicon, VEGF, phytic acid, and ginkgo extract. VEGF, or vascular endothelial growth factor, is a protein improving micro-circulation and oxygen delivery to the skin. Phytic acid is a natural antioxidant that helps to protect the skin from environmental stressors, while ginkgo extract has properties that can help to soothe and calm irritated skin. Tetrapeptide decreases the appearance of facial redness and telangiectasia caused by an exaggerated inflammatory response. Acetyl tetrapeptide-40 reduces the release of interleukins (IL-6 and IL-8).

Main ingredients: Acetyl tetrapeptide-40, Organic silicon, VEGF growth factor, Phytic acid, Ginkgo extract.

Areas: Face and neck.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

F-NIACINAMIDE new launch March 2024

Sterile and isotonic solution formulated to provide exceptional benefits for the skin, as this product works on multiple fronts to enhance the complexion of the skin. F-Niacinamide offers multiple positive effects, including inhibiting melanin transfer for reduced pigmentation, decreasing melanin production for a brighter complexion, strengthening the skin's barrier to defend against external factors, regulating sebum to prevent acne-related pigmentation, and neutralizing free radicals to maintain an even and youthful skin tone.

Main ingredients: Niacinamide (1,25%).

Areas: Face, neck, décolleté.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

STERILE VIALS

SCARS & STRECH MARKS

F-MELATRIX new launch October 2024

A sterile and isotonic solution, designed specifically to address the treatment of facial pigmented scars caused by acne, promoting skin renewal and a smoother texture. This formula incorporates Organic Silicon for dermal regeneration, Hyaluronic Acid for moisture replenishment and scar visibility reduction, Tranexamic Acid to address hyperpigmentation, Fibroblast Growth Factor for collagen production and scar reduction, and a whitening peptide for targeting pigmented areas and achieving a more uniform and radiant complexion.

Main ingredients: Organic silicon skin (2%), Hyaluronic acid MW (1%), FGF growth factor, tranexamic acid (0,2%), Acetyl glycol beta-alanine peptide (2%).

Areas: Face, neck, décolleté.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

STERILE VIALS

SCARS & STRECH MARKS

F-MESOMATRIX

Sterile and isotonic solution enriched with hyaluronic acid, organic silicium, and growth factors, specifically formulated to diminish the visibility of scars and stretch marks. The epidermal and fibroblast growth factors promote cellular growth, aiding skin regeneration. Centella Asiatica, renowned for its therapeutic properties, expedites the repair of damaged skin, restoring its natural integrity.

Hyaluronic acid provides effective skin hydration and facilitates collagen I synthesis. Organic silicium plays a pivotal role in restructuring and strengthening the dermal matrix, crucial for alleviating the appearance of stretch marks and scars.

Main ingredients: Organic silicium, Hyaluronic acid MW, EGF growth factor, FGF growth factor, Cica - Centella Asiatica extract.

Areas: Face and body.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

F-SILORG

Sterile and isotonic solution enriched with a high concentration of organic silicium. Derived from algae, this polysaccharide is combined with silanol groups, making it water-soluble and biologically active. It is renowned for its restructuring and reparative properties.

In aesthetic medicine, organic silicium is primarily utilized for its ability to fortify the skin's connective tissue, collagen, and elastin fibers, thereby enhancing skin elasticity and firmness. Moreover, its moisturizing effects aid also in diminishing the visibility of scars, stretch marks, and wrinkles.

Main ingredients: Organic silicium.

Areas: Face and body.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

STERILE VIALS

SPECIFIC AREAS

F-EYE CONTOUR

A sterile and isotonic solution designed specifically for addressing concerns related to the sensitive eye area, including eye bags, dark circles, wrinkles, sagging, and dryness. Hyaluronic acid boosts hydration, while Hexapeptide-10 enhances the synthesis of essential proteins that bond skin cells, thereby strengthening the dermo-epidermal junction. Together, they work to diminish the appearance of wrinkles and fine lines. Applied topically, caffeine can reduce redness and puffiness and aids in draining excess fluids, alleviating the look of eye bags. Organic silicium, combined with vitamin C, fortifies the dermal matrix. Additionally, acetyl tetrapeptide-5 combats edema-forming mechanisms, offering a decongestant effect to ensure lasting results.

Main ingredients: Acetyl tetrapeptide-5, Organic silicium skin, Hexapeptide-10, Hyaluronic acid MW, Vitamin C, Caffeine.

Areas: Eye countour.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

STERILE VIALS

SPECIFIC AREAS

F-EYE GLOW new launch February 2024

A sterile and isotonic solution designed specifically for addressing concerns related to the sensitive eye area, including eye bags, dark circles, wrinkles, sagging, and dryness. Hyaluronic acid boosts hydration, while FGF growth factor plays a pivotal role in stimulating collagen production, thereby addressing fine lines and wrinkles. The tetrapeptide at the heart of this formulation combats glycation, vascular permeability, and lipid accumulation—the trifecta responsible for under-eye issues, particularly dark circles. This remarkable ingredient works diligently to restore vitality to the delicate under-eye region.

Main ingredients: Hyaluronic acid MW(0,5%), FGF growth factor, Acetyl tetrapeptide-5 (2%).

Areas: Eye contour.

Content per box: 5 vials of 3 ml - 15 ml / 0.5 fl.oz.

F-PERFECT LIPS

A sterile and isotonic solution, dedicated to improving the definition, volume, and color of the lips. The volume and hydration of the lips are increased with hyaluronic acid and acetyl hexapeptide-38. The peptide has a targeted action that enhances the rate of adipogenesis, leading to a higher lipid accumulation and volume growth in the lips. VEGF boosts superficial micro-circulation to provide intense coloration of the lips.

«Perfect lips» is a natural alternative to dermal fillers. It does not contain harmful reticulation agents such as DVS or BDDE, and it does not accumulate in the lips. «Perfect lips» can also be used to complement dermal filler injections, resulting in a more natural look, although it may require more frequent application.

Main ingredients: Hyaluronic acid MW, Acetyl hexapeptide-38, VEGF growth factor.

Areas: Lips.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

STERILE VIALS

STERILE CREAM

SMART MIX

Smart Mix is a patented formula, an exclusive concept that facilitates the crafting of personalized sterile creams from any sterile solution. Based on a micro-emulsion of 100% natural emulsifiers and emollients. Applying a sterile cream when the skin barrier is compromised significantly reduces the risk of infection. Standard cosmetics often have trace pathogens that can infiltrate the tiny openings created by meso-needling. Once inside the skin, these pathogens can trigger redness, inflammation, or even infections.

Main ingredients: Natural emulsifier, Emollients.

Areas: Face, neck, décolleté and hands.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

HAIR CARE

F-HAIR

Sterile and isotonic solution that is designed to improve the look of hair. This innovative product utilizes a combination of advanced technologies and high-performance ingredients to provide effective and long-lasting results. Contains natural extracts, minerals, organic silicium, biotin, pyruvic acid and peptides to nourish and preserve the hair follicles. Hyaluronic acid and panthenol help to moisturize the scalp and hair shaft.

Suitable for both men and women who are experiencing hair loss or thinning hair. It is safe, non-invasive, and produces visible results in just a few sessions. With regular treatments, patients can expect to see improvements in hair density, texture, and overall quality.

Main ingredients: Dexpanthenol, Hyaluronic acid MW, Carnosine, Organic silicium, Biotin, Pyruvic acid, Cica - Centella Asiatica extract, Ginkgo extract, Copper, Iron, Magnesium, Zinc.

Areas: Hair, scalp and eye lashes.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-HAIR MEN

Sterile and isotonic solution that is designed to improve the look of hair. This innovative product utilizes a combination of advanced technologies and high-performance ingredients to provide effective and long-lasting results. Contains growth factors, clover extract, peptides, organic silicium to nourish and preserve the hair follicles. Hyaluronic acid and panthenol help to moisturize the scalp and hair shaft.

Suitable for both men and women who are experiencing hair loss, androgenic alopecia or thinning hair. It is safe, non-invasive, and produces visible results in just a few sessions. With regular treatments, patients can expect to see improvements in hair density, texture, and overall quality.

Main ingredients: Acetyl tetrapeptide-3 & Clover extract, EGF growth factor, FGF growth factor, VEGF growth factor, Copper tripeptide-1, Decapeptide-4, Organic silicium, Carnosine, Dexpanthenol, Hyaluronic acid MW.

Areas: Hair, scalp and eye lashes.

Content per box: 5 vials of 5 ml - 25 ml / 0.85 fl.oz.

SLIMMING

F-XBC

Sterile and isotonic solution to minimize the appearance of cellulite and promote lipolysis, resulting in a smoother and more toned skin. Our advanced formula brings together potent ingredients for a comprehensive solution to all types of cellulite. Caffeine, L-carnitine, taurine, and vectorized lipase amplify fat breakdown, while hyaluronidase alleviates blood vessel compression by dissolving hyaluronic acid in the dermis. Natural extracts optimize fluid drainage, coumarin addresses cellulite-related inflammation, and troxerutin expertly diminishes the visibility of varicose veins.

Main ingredients: Caffeine, Carnitine, Taurine, Vectorized lipase and hyaluronidase, Cica - Centella Asiatica extract, Ginkgo extract, Artichoke extract, Coumarin, Troxerutin.

Areas: Body.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-MAGISTRAL

Sterile and isotonic solution concentrated in organic silicium, artichoke, coumarin, and troxerutin to provide a targeted approach to body contouring. Specially formulated to improve skin texture and tone while reducing the appearance of cellulite.

Organic silicium, a key ingredient in our product, is known for its ability to improve skin elasticity and firmness. It helps to stimulate collagen production, which in turn supports healthy skin cells and reduces the appearance of body skin sagging.

Artichoke promotes lymphatic drainage, while Coumarin is helpful against inflammation related to cellulite. Troxerutin is a flavonoid that is known for its ability to improve micro-circulation too and for reducing the appearance varicose veins.

Main ingredients: Organic silicium, Artichoke extract, Coumarin, Troxerutin.

Areas: Body.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-ARTICHOKE

Sterile and isotonic solution that contains concentrated artichoke extract. Cynarin, a compound found in artichoke, has demonstrated properties against oxidative stress induced by inflammatory mediators. In addition, it helps in controlling lipolysis by favouring the synthesis of energy-transporting enzymes. It also acts as a diuretic and vasoconstrictor, stimulating the lymphatic drainage system. Artichoke extract is sometimes combined with other ingredients like caffeine and L-carnitine to enhance its lipolytic effects.

Main ingredients: Artichoke extract.

Areas: Body.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-MELIRUTIN

Sterile and isotonic solution that contains coumarin and troxerutin. The beneficial effects of these ingredients are centred on the lymphatic and venous levels. Troxerutin is a flavonoid with antioxidant properties. It helps in reducing the appearance of varicose veins. Coumarin, on the other hand, addresses cellulite-related inflammation.

Main ingredients: Coumarin, Troxerutin.

Areas: Body.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

STERILE VIALS

SLIMMING

F-CARNITINE

Sterile solution that contains L-carnitine, a compound consisting of two essential amino acids, lysine and methionine, that naturally occur in cells and play a role in lipid metabolism. L-carnitine helps to reduce the aspect of cellulite and fat deposits, some practitioners also believe that L-Carnitine can help improve skin texture and tone.

Main ingredients: L-carnitine.

Areas: Body.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

F-GINKGO

Sterile and isotonic solution enriched with ginkgo extract. The primary constituents of ginkgo leaves are flavonoids and terpenes, which underlie its beneficial effects. Research indicates that ginkgo extracts surpass beta-carotene and vitamin E in mitigating UV-induced oxidative stress in epidermal cells. Ginkgo not only enhances skin firmness but also diminishes the visibility of varicose veins.

Main ingredients: Ginkgo extract.

Areas: Body.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

STERILE VIALS

BODY FIRMING

F-LIFT+ BODY

Sterile and isotonic solution to reduce the appearance of skin sagging. With age, not only does the skin on the face lose firmness and elasticity, but skin sagging on the body is also a major concern for customers over 40, particularly under the arms and inside the legs. Our advanced formula contains a potent blend of hyaluronic acid, DMAE, FGF growth factor, and organic silicon, which work together to provide a comprehensive solution for skin firming and tightening.

Our product is easy to use and can be applied topically to areas of concern, such as the arms, legs, and abdomen. With regular use, you can expect to see visible improvements.

Main ingredients: Organic silicon, FGF growth factor, DMAE, Hyaluronic acid MW.

Areas: Body.

Content per box: 5 vials of 10 ml - 50 ml / 1.69 fl.oz.

MAKE-UP REMOVERS

Deep cleanser

Melting micro-emulsion with hyaluronic acid, formulated to remove makeup and impurities while nourishing and moisturizing the skin. It can be used on the face, eyes, and lips. The feel of the product is light and cool.

Main ingredients: Hyaluronic acid
Skin types: Normal, dry, sensitive and mature
Natural ingredients: 84,25% | Vegan
Content: 250 ml / 8.45 fl.oz.

Vit C micro-water

Ultra-refreshing and hydrating 2-in-1 micellar water and lotion designed to cleanse and tone the skin. Formulated with stabilized Vitamin C, this product offers excellent skin benefits, even the skin tone, avoid free radicals damage, and reduce the appearance of pigmented spots.

Main ingredients: ET-vitamin C
Skin types: All skin types
Natural ingredients: 98,55% | Vegan
Content: 250 ml / 8.45 fl.oz.

Glycolic B3 cleansing foam

Face-washing foam specifically formulated to gently exfoliate dead skin cells and promote a healthy skin barrier. Formulated with Glycolic acid to reveal a smoother and more even complexion, and Niacinamide to avoid redness and regulate sebum production.

Main ingredients: Glycolic acid, Niacinamide
Skin types: Acneic, oily, combination and normal
Natural ingredients: 92,95% | Vegan
Content: 150 ml / 5.07 fl.oz.

CLEANSING AND EXFOLIATING THE SKIN

LOTION

Essential lotion

Face lotion with hyaluronic acid formulated to deliver long-lasting hydration while also plumping and firming the skin. The essential lotion can be personalized by incorporating Fusion Meso vials for face, hair or body use.

Main ingredients: Hyaluronic acid, Natural glycerin

Skin types: All skin types

Natural ingredients: 98,9% | Vegan

Content: 245 ml / 8.3 fl.oz.

CLEANSING AND EXFOLIATING THE SKIN

PEELING

Hyaluronic peel

Peeling solution enriched with a powerful combination of gluconolactone and hyaluronic acid. This advanced formula offers gentle yet effective exfoliation, leaving the skin feeling refreshed, rejuvenated, and deeply hydrated.

Main ingredients: Gluconolactone, Hyaluronic acid, Natural glycerin

Skin types: All skin types

Natural ingredients: 99,25% | Vegan

Content: 250 ml / 8.45 fl.oz.

HOME USE MASKS

Lift sleeping mask

Overnight mask with a nutritive powerhouse that helps enhance skin firmness, reduce the look of deep wrinkles, and improve skin volume. It contains a rejuvenation complex, formulated with hyaluronic acid, growth factors, glutamine, and folic acid - ingredients commonly used in aesthetic medicine. The mask's rich water-in-oil texture delivers intense overnight nourishment.

Main ingredients: Bio-placenta, Hyaluronic acid, Lactic acid ester, Natural glycerin

Skin types: Normal, dry, sensitive, mature

Natural ingredients: 93,57% | Vegan

Content: 100 ml / 3.38 fl.oz.

Glow sleeping mask

Overnight mask that helps improve the skin tone and reduce the appearance of pigmentation, leaving the skin looking brighter, more even-toned, and nourished. Niacinamide brightens and revitalizes the skin, tranexamic acid effectively diminishes the appearance of dark spots promoting a brighter skin, while glycerin acts as a powerful humectant, keeping the skin hydrated.

Main ingredients: Tranexamic acid, Niacinamide, HMC Flavonoids, Lactic acid ester, Natural glycerin

Skin types: Normal, dry, sensitive, mature

Natural ingredients: 89,48% | Vegan

Content: 100 ml / 3.38 fl.oz.

Hyaluronic cryo-mask

Facial mask formulated with hyaluronic acid to prevent the signs of ageing, reduce the appearance of wrinkles and fine lines. With a fresh and unique texture that leaves the skin ultra-soft, this cryo-mask also incorporates skin-cooling technology, which significantly reduces the skin's temperature.

Main ingredients: Hyaluronic acid XS, Moisture release system

Skin types: All skin types

Natural ingredients: 94,44% | Vegan

Content: 100 ml / 3.38 fl.oz.

M A S K S

PROFESSIONAL MASKS

Meso-T masks

A compacted cellulose and silk mask that is perfect for post-aesthetic treatments. This mask is activated just before application by adding 15-25 ml of sterile saline solution and 1-2 ml of meso solution. It does not contain any preservatives or chemicals, making it a safe and natural option for your skin.

Main ingredients: Silk, Cellulose

Skin types: All skin types

Natural ingredients: 100% | Vegan

Content: 48 pcs.

Hyaluronic mix mask

A new generation of professional face mask that can be customized by blending the powder with water and then adding 1-2 ml of any meso solution. The resulting mask has a firm, jelly-like, refreshing, and highly moisturizing texture, thanks to its low molecular weight hyaluronic acid and sorbitol content. This mask is safe to use after any medical or aesthetic procedures, as it does not cause inflammation or allergies.

Main ingredients: Hyaluronic acid XS

Skin types: All skin types

Natural ingredients: 90,42% | Vegan

Content: 25 x 3.35 g / 0.11 fl.oz.

SUNSCREENS

SUNSCREEN

Meso shield 50

High-protection sunscreen specially formulated to be applied after aesthetic medicine procedures. It offers a remarkably light texture while providing 50+ protection against UVA/UVB. The formulation creates a long-lasting film over the skin, which resists sweating, provides a smooth base for makeup, and prevents sunscreen penetration into the skin. It is gentle on the eyes and suitable for even the most sensitive skin types.

Main ingredients: Four types of UV filters with the highest efficiency ratio, not classified as endocrine disruptors

Skin types: All skin types

Natural ingredients: 67,07% | Vegan

Content: 50 ml / 1.7 fl.oz.

REPAIR CREAMS

REPAIR CREAMS

Meso repair

Facial cream formulated with ingredients for effective skin repair after aesthetic procedures. The bio-placenta is a global anti-aging solution combined with the repair complex to accelerate the recovery process and provides essential nutrients to the skin. With its unique ice cream-like texture, it melts on the skin, reducing skin temperature, redness, and soothing the skin.

Main ingredients: Repair blend (ATP, Amino acids, Proline, Acetyl tyrosine), Bio-placenta (Growth factors, Acteyl glutamine, Folic acid).

Skin types: Normal, dry, sensitive, mature

Natural ingredients: 74,72% | Vegan

Content: 50 ml / 1.7 fl.oz. | 100 ml / 3.38 fl.oz.

CICA post-care

Facial cream that promotes skin recovery after aesthetic procedures, reduces redness, accelerates the repair of damaged skin, supports skin remodeling and redensifies. It contains the most effective grade available of CICA extract to repair damaged skin faster and restore its integrity by boosting vital proteins. The Provitamin B5 (panthenol), known for its moisturizing and repairing effects is the perfect complement to CICA.

Main ingredients: **Pharmaceutical grade** CICA extract (Asiaticoside, Madecassic acid, Asiatic acid , Panthenol (B5)

Skin types: Normal, dry, sensitive, mature

Natural ingredients: 90,1% | Vegan

Content: 50 ml / 1.7 fl.oz.

CREAMS

Essential cream

Cream formulated with a water-in-oil emulsion and enriched with Vitamin E, specifically designed for preparing personalized treatments with Fusion Meso vials. Provides intense nutrition, long-lasting protection and vitamin E neutralize free radicals, thus preventing them from causing damage to the skin.

Main ingredients: Vitamin E

Skin types: Normal, dry, sensitive, mature

Natural ingredients: 96,8% | Vegan

Content: 45 ml / 1.5 fl.oz.

Meso lift

Facial cream formulated to reduce the appearance of skin sagging and wrinkles. It is enriched with bio-placenta and cross-linked hyaluronic acid derived from dermal fillers. This cream helps redefine facial contours, promoting a more youthful and firm appearance, while offering multiple anti-aging benefits, including skin repair and improved skin hydration.

Main ingredients: Cross-linked hyaluronic acid, Bio-placenta (Growth factors, Acteyl glutamine, Folic acid), Natural glycerin

Skin types: Normal, dry, sensitive, mature

Natural ingredients: 76,02% | Vegan

Content: 50 ml / 1.7 fl.oz. | 100 ml / 3.38 ft.oz.

Radiance cream

Refreshingly light gel cream formulated with active ingredients derived from aesthetic medicine for an intensive skin-lightening and moisturizing effect. This gel cream contains hexyl-resorcinol and niacinamide, boosted by a transdermal delivery system, quickly helping to reduce the appearance of brown spots and hyperpigmentation. The moisture release system helps to improve the hydration level, refreshes the skin and even the skin tone.

Main ingredients: Niacinamide, Hexyl-resorcinol, Moisture release system

Skin types: Acneic, oily, combination, normal, dry, sensitive

Natural ingredients: 87,29% | Vegan

Content: 50 ml / 1.7 fl.oz. | 100 ml / 3.38 ft.oz.

Probiotix cream

Rich and nutritive cream specifically designed to for dry and sensitive skin. Enriched with a Probiotic complex, this cream promotes the balance of the skin's microbiota to reinforce the skin's natural defenses. Thanks to its richness in natural sugars, it improves the appearance and comfort of the skin, enhancing the radiance of the complexion and alleviating the sensations of discomfort characteristic of sensitive and dry skin. Hyaluronic acid enhances water retention, improving significantly skin hydration to reduce the appearance of wrinkles.

Main ingredients: Hyaluronic acid, Probiotic complex, Natural glycerin

Skin types: Combination, normal, dry, sensitive, mature

Natural ingredients: 96,6% | Vegan

Content: 50 ml / 1.7 fl.oz. | 100 ml / 3.38 ft.oz.

MAINTENANCE CREAMS

CREAMS

Hyaluronic drops

Refreshingly light cream formulated with hyaluronic acid to provide maximal skin hydration. This exclusive water-drop formulation immediately reduces the appearance of fine lines and plumps up the skin. Its hyaluronic acid, with a very low molecular weight, serves as a connective tissue organizer and water-holding substance. The cream is extremely refreshing, melting and light at application but still provides a long lasting protective film on the skin to retain moisture.

Main ingredients: Hyaluronic acid, Natural glycerin

Skin types: Acneic, oily, combination, normal, dry, sensitive

Natural ingredients: 89,3% | Vegan

Content: 50 ml / 1.7 fl.oz. | 100 ml / 3.38 fl.oz.

MOISTURIZERS

MOISTURIZERS

Ceramid moisturizer

A rich and nutritive cream specifically formulated to restore the lipid barrier and treat dry and sensitive skin. Formulated with Vegan Ceramides, known for their powerful hydrating and barrier-restoring properties, it helps moisturize the skin, regulate trans-epidermal water flow, and protect the skin.

Main ingredients: Vegan ceramids, Natural glycerin

Skin types: Normal, dry, sensitive, mature

Natural ingredients: 93,73% | Vegan

Content: 50 ml / 1.7 fl.oz.

Hyaluronic moisturizer

Cream that helps achieve high levels of skin hydration while reducing the appearance of fine lines and wrinkles. The low molecular weight hyaluronic acid in our formula, derived from aesthetic medicine, penetrates deep into the skin, leaving it smooth, soft, and intensely hydrated.

Main ingredients: Hyaluronic acid, Natural glycerin

Skin types: All skin types

Natural ingredients: 93,9% | Vegan

Content: 50 ml / 1.7 fl.oz. | 100 ml / 3.38 fl.oz.

SPECIFIC AREAS

EYE CREAM

Eye sorbet

Ultra-refreshing eye cream formulated with active ingredients derived from aesthetic medicine that help to erase the look wrinkles, eye bags and dark circles. The cooling effect of the cream stimulates micro-circulation, accelerating the drainage of accumulated fluids, and reducing the appearance of eye bags and dark circles. Cross-linked hyaluronic acid acts as a 'micro-reservoir', continuously delivering water to the skin. Additionally, the bio-placenta serves as a global anti-aging solution.

Main ingredients: Cross-linked hyaluronic acid, Bio-placenta (Growth factors, Acteyl glutamine, Folic acid), Moisture release system, Natural glycerin

Skin types: All skin types

Natural ingredients: 85,68% | Vegan

Content: 30 ml / 1 fl.oz

SPECIFIC AREAS

HAIR CARE

Hair mist

Hair serum designed for thinning, hair loss, and dandruff. Applied on the scalp and hair, it contains essential nutrients for damaged and weak hair. The unique blend of active ingredients, including panthenol, hyaluronic acid, carnosine, organic silicium, along with essential minerals is the same as used in our famous meso solution F-HAIR. It will perfectly complements and enhance the results of professional treatments with the therapist.

Main ingredients: Panthenol (B5), Hyaluronic acid, Carnosine, Organic silicium, Zinc, Calcium, Copper, Magnesium

Skin types: Scalp

Natural ingredients: 96,50% | Vegan

Content: 75 ml / 2.54 fl.oz

Hair men mist

Hair serum designed for thinning, hair loss, and dandruff. Applied on the scalp and hair, it contains essential nutrients for damaged and weak hair. The addition of peptides and growth factors makes it the perfect product for people suffering from androgenic alopecia. The formulation is the same as our famous F-HAIR MEN meso solution. It will perfectly complements and enhance the results of professional treatments with the therapist.

Main ingredients: Hyaluronic acid, Acetyl tetrapeptide-3, Clover extract, Bio-placenta (Growth factors, Acteyl glutamine, Folic acid), Carnosine, Organic silicium, Panthenol (B5), Zinc, Calcium, Copper, Magnesium

Skin types: Scalp

Natural ingredients: 96% | Vegan

Content: 75 ml / 2.54 fl.oz

SPECIFIC AREAS

BODY

PPC+ cream

Body cream formulated with PPC (phosphatidylcholine and Sodium deoxycholate) vectorized in nanosomes to reduce the appearance of fat deposits and cellulite. It contains a unique blend of active ingredients, including PPC, L-carnitine, and caffeine, commonly used in aesthetic medicine to reduce fat deposits and cellulite. With regular use, it can reduce the appearance of orange peel skin and make the skin look more even and firm.

Main ingredients: PPC+ nanosomes, L-carnitine, Caffeine

Skin types: Body

Natural ingredients: 100% | Vegan

Content: 100 ml / 3.38 fl.oz.

BOOSTERS

SERUMS FOR ACCELERATED RESULTS

Retinol 1.0

Highly effective serum with 1% retinol, the ultimate solution for achieving smoother, firmer, and more youthful-looking skin. This lightweight, fast-absorbing formula delivers powerful results thanks to its formulation with stabilized pure form of retinol by a specific blend of oils and antioxidants. It is recommended for acneic skin types as well as for people with pigmentation concerns or ageing skin.

Main ingredients: Cross-linked hyaluronic acid, Natural glycerin

Skin types: Acneic, oily, combination, normal, mature

Natural ingredients: 78,63% | Vegan

Content: 30 ml / 1 fl.oz.

Vitamin C 5.0

Facial serum that efficiently diminish the appearance of pigmentation, brown spots, and photo-aging. Our stabilized vitamin C in high concentration (5%) is an excellent anti-oxidant to neutralize free radicals, protecting collagen, and promoting even skin tone. Et-Vitamin C is a stable derivative of Vitamin C that maintains its effectiveness in the formulation over time.

Main ingredients: ET-vitamin C, Hyaluronic acid

Skin types: Acneic, oily, combination, normal, mature

Natural ingredients: 85,21% | Vegan

Content: 30 ml / 1 fl.oz.

SERUMS FOR ACCELERATED RESULTS

Niacinamide 5.0

Serum formulated with Niacinamide (5%) and squalane. Together, these ingredients are highly effective in addressing various skin concerns, including dryness, uneven skin tone, fine lines, and wrinkles. Squalane is a type of oil that is similar in structure to the natural oils found in our skin, making it an effective moisturizer. Niacinamide has been shown to reduce redness and irritation due to dry skin, while also helping to regulate oil production and reduce the appearance of pores and acne.

Main ingredients: Niacinamide, Olive oil squalane

Skin types: All skin types

Natural ingredients: 92,75% | Vegan

Content: 30 ml / 1 fl.oz.

HA deep filler

Facial serum specifically designed to prolong the effects of hyaluronic acid filling injections with a light, silky touch and long-lasting after-feel. It incorporates soft-focus technology and cross-linked hyaluronic acid to reduce the appearance of wrinkles, brighten the skin tone and preserve skin hydration. Cross-linked hyaluronic acid is a polymer derived from natural hyaluronic acid (HA), as used in dermal fillers. It can bind more water molecules due to its cross-linked structure compared to hyaluronic acid. It acts like a «micro- reservoir,» continuously delivering water to the skin.

Main ingredients: Cross-linked hyaluronic acid, Natural glycerin, Soft focus technology

Skin types: All skin types

Natural ingredients: 90,55% | Vegan

Content: 30 ml / 1 fl.oz.

Mela drops

This serum is an intensive treatment for people with pigmentation concerns and in particular brown spots. The glycolic acid creates a soft exfoliation to lighten and even out skin tone supported by tranexamic acid, hexyl-resorcinol and niacinamide well-known for their properties against pigmentation. Vitamin E, and squalane provide intense hydration and nourishment.

Main ingredients: Tranexamic acid, Hexyl-resorcinol, Glycolic acid, Niacinamide, Vitamin E, Olive oil squalane

Skin types: All skin type

Natural ingredients: 89,97% | Vegan

Content: 30 ml / 1 fl.oz.

ACN corrector

This serum is an intensive treatment for acneic skin types, or oily skin with imperfections. It combines the hydrating power of hyaluronic acid, panthenol and acetyl-glucosamine to promote skin moisture and suppleness. Betaine salicylate is a gentle exfoliant that helps to unclog pores and reduce the appearance of blemishes, without causing irritation or dryness. ZincPCA and niacinamide are beneficial for the skin microbiota to reduce the appearance of pores and acne.

Main ingredients: Hyaluronic acid, Acetyl-glucosamine, ZincPCA, Niacinamide, Betaine salicylate, Panthenol (B5)

Skin types: Acneic, oily, combination

Natural ingredients: 91,9% | Vegan

Content: 30 ml / 1 fl.oz.
