### **This limited warranty is void if the product is:**

Installed or used improperly or otherwise not in accordance with the installation instructions or the product's performance specifications (whether intentionally or not, including without limitation, if the product is used at any time in an environment or operating range or subjected to electrical values in excess of those specified in the product's performance specifications or subject to power surges or spikes or corrosive environments) or not in accordance with any other instructions or restrictions prescribed by Lux Logic or any applicable standards or codes, such as, without limitation, those standards of codes of the National Electrical Code, Local Safety Authority or the Canadian Standards Association.

Altered or repaired other than as authorized in writing by LuxLogic.

Damaged due to Acts of God.

Damaged in transit or handling.

This limited warranty period is based on the rated lamp life of the luminaire and the operating hours of the luminaire. For example, a luminaire rated at 50,000 hours equates to 5,000 operating hours per year (approximately 13.6 hours per day) at the product approved operating temperature. Therefore, the warranty is only valid for up to a luminaire's rated lamp life (50,000) vs. the operating hours or the standard 6 years Warranty, whichever comes first.

Please note that the accepted industry standard is that LED lighting fixtures will have a light loss factor of approximately 12-20% at the maximum operating time over the course of the warranty period.
