CREATIVE SMOOTH PAPER
320 Matt

Aqua | Latex

Code	g/m²	Width	Length	Cores
3315	320	**32"** 1118mm	12 mtrs	3"

Acid-free, smooth premium cotton paper for fine art prints.

Creative Smooth Matt Cotton Paper 320 is made exclusively from cotton fibres and has a smooth, velvety touch. This paper is extremely resistant and suitable for use with aqueous and latex inks. Creative Smooth Paper is the ideal media for art prints, reproductions, artistic photography and portraits. The natural colouring of the paper is like that of traditional artist paper. Due to its weight of 320 gsm, the product has a high stiffness and is particularly suitable for further processing. Creative Smooth Paper 320 is also suitable for sheet fed printing with DryLab inkjet printers.

- Excellent colour reproduction.
- Contains no optical brighteners.
- Water-resistant.
- Instant dry.

Certified acid-free and ageing resistance in accordance with ISO 9706.

Aqua | Latex

Code	g/m²	Width	Length	Cores
3316	240	**36"** 914mm	12 mtrs	3"

Acid-free, textured premium cotton paper for fine art prints.

Creative Textured Paper 240 is a textured, matt paper for art prints manufactured exclusively from cotton fibres and finished with a special matt coating. This paper is extremely resistant and suitable for use with aqueous and latex inks. Its lightly textured finish makes it ideal for creating distinctive art prints, reproductions and artistic photos. The natural colouring of the paper is like that of traditional artist paper. The material is also suitable for sheet fed printing with DryLab inkjet printers.

- Excellent colour reproduction.
- Contains no optical brighteners.
- Soft transitions
- Water-resistant.
- Instant dry.
- Acid Free

EMBLEM

EMBLEM
Textured Laminate

Code	Mic	Width	Length	Cores
LAMPERSA3	100	**41.3"** 1050mm	50 mtrs	2"

EMBLEM LAMPERSA3 is a sand structured monomeric 100 µm PVC film with anti-flex structure. The solvent-free adhesive is characterised by a high colour neutrality and provides genuine colours. Lamination can be cut right to or over the edges. Usually there is no danger of water moving in between laminate and print. It depends on the printed material if water can get in or not.

Typical Applications: posters, roll ups, pop-up walls, displays.

SiHL

TEXBANNER
Xtreme White

Code	Mic	Width	Length	Cores
3275	320	36" 914mm	45.7 mtrs	2"

3275 TexBanner X

TexBanner is an extremely white, universal, 100% synthetic non-woven banner with a high quality waterfast coating. Developed as an economical alternative to Tyvek.

Advantages: Light, flexible banner with high tensile strength and tear-resistance.

- High Opacity.
- Good Flatness.
- Bright and vivid colours.
- Can be stapled, sewn or used with grommets.
- High water-resistance with pigmented inks.
- PVC free and recyclable.

CLARA
Canvas Plus Matt AQ

Code	g/m²	Width	Length	Cores
3579	320	24" 610mm	12 mtrs	2"
		36" 914mm	12 mtrs	2"
		44" 1118mm	12 mtrs	2"

Universal, white canvas for industrial printing of portraits and Photos.

Clara Canvas Plus Matt is a universal artistic, cotton / polyester blend canvas for waterbased inks. Due to the weak, regular structure of the material, this product is best suited for printing portraits and photos. The white, matt coating hinders disrupting reflections and allows excellent colour reproduction. The printed material shows no white-scoring and is splashproof.

- Real cotton/polyester canvas (1:1 structure)
- Resistant against cracking (90°)
- Increased opacity.
- Brilliant colour reproduction.
- No white scoring.
- Quick dry & splash proof.
- Good flatness for short to mid-term use.

Aqua

ROLL UP FILM PLUS
Matt AQ

Code	Mic	Width	Length	Cores
3597	210	36" 914mm	30 Mtrs	2"

3597 Roll Up Film Plus

Roll-Up Film Plus 210 SB Matt AQ (3597) was designed to produce roll-up and display graphics with waterbased and latex inks. The matt coating on the front ensures excellent scratch resistance and a high print quality and brilliant colour reproduction. The tear-resistant polypropylene/polyester composite guarantees problem-free processing and provides a high level of opacity thanks to the matt silver back. Besides it shows good flatness and constructional stability in roll-up systems.

- Brilliant colour reproduction.
- Anti-refelctive, matt surface.
- Tear-resistant.
- Matt, silver back for for high opacity.
- High ink absorption capacity.
- Greyback for high opacity.
- PVC Free.
- Scratch-resistant, surface and reverse side.

SUPERDRY
Satin Roll Up Film

Code	Mic	Width	Length	Cores
3471	190	36" 914mm	30 Mtrs	2"

Sihl SuperDry Roll Up Film 3471

Opaque white, microporous SuperDry coated greyback PET (polyester) film impervious to light, with a satin finish. With its special anti-static back, this film is ideal for premium quality printed images, such as those required for photo-realistic posters, displays for the POS sector, high-quality photo reproductions, pop-up displays, short-term advertising and indoor signs. The rigidity makes the product resistant to mechanical stress and is easily processed without the loss of properties. The satin SuperDry coating guarantees a unique high-quality colour representation and combined with modern pigment inks achieves photographic qualities never to have been seen before.

- Brilliant colour reproduction.
- Very high resolution.
- Quick dry.
- Excellent flatness.
- Greyback for high opacity.
- PVC free.

TRISOLV PRIMEART
Glossy Paper

Code	g/m²	Width	Length	Cores
3686	200	54" 1372mm	50 Mtrs	3"

Premium, glossy poster paper with high stiffness for outdoor and indoor applications.

This multi-coated, weatherproof paper with high wet-strength and a gloss finish is suitable for printing with solvent, latex and UV-curing inks. The photorealistic prints impress with high colour brilliance and very good image definition. The material dries quickly even with high ink densities and displays good flatness. TriSolv Poster Paper Prime 200 qualifies for outdoor billboard applications and displays very good resistance to scratches. The weight of 200 g/m² lends the material high opacity and stiffness and thus enables optimum handling.

Solv UV Latex

Code	Mic	Width	Length	Cores
3598	205	36" 914mm	50 Mtrs	3"

Roll-Up Film Plus 205 SB Satin is suitable for the creation of high quality roll-up and display graphics using solvent, latex and UV inks. An increase in general productivity is possible thanks to the good printing results achieved with fast print mode (HP Latex up to 6 pass).

- Brilliant colour reproduction
- Matt, silver back for high opacity
- Good flatness
- Tear resistant
- Scratch resistant
- Anti-reflective, satin surface
- PVC free

POLYSOL
Satin Pop-Up Film

Solv UV Latex

Code	Mic	Width	Length	Cores
3516	310	42" 1067mm	20 Mtrs	3"

PolySOL Pop-Up Film is for the production of premium quality graphics for mobile exhibition systems and indoor POS applications. The satin finish enables exceptional reproduction of colours and is optimised for printing with solvent, latex and UV inks. The roughened greyback guarantees high opacity and printability. The material's particular rigidity and dimensional stability make it ideal for long-term use in pop-up systems. Its innovative, waterproof coating makes it ideal for prolonged periods of outdoor use.

- Brilliant colour reproduction.
- Excellent contour sharpness.
- Quick dry.
- Greyback for high opacity.
- Very good lamination capability.
- PVC free.

3517	240	54" 1372mm	25 Mtrs

Self-adhesive, opaque polyester fabric for interior decoration. Wallgrafx Prime is dimensionally-stable with a coating, suitable for printing with solvent, latex and UV inks. It is excellent for the decoration of walls, exhibition stands, walls, furniture and for advertising applications.

The material can be easily applied to smooth and lightly structured substrates, it can be repositioned and is removable without leaving residue.

- Excellent print quality.
- Self adhesive.
- Suitable for Solvent, UV and Latex inks.
- Satin surface finish.
- Removable without leaving residue.
- Treated with flame retardant.
- M1 certified.
- PVC Free.

SiHL
DESIGN2WALL
FR 10 Satin

Code	gsm	Width	Length
2517	210	42" 1067mm	51 Mtrs

High quality satin finish non-woven wallpaper for busy areas.

The Non-woven design2wall FR 210 satin is a high quality non-woven wallpaper for printing with solvent, latex and UV inks and is characterised by high colour brilliance and dimensional stability. This product is flame retardant and certified with the classification C-s1, d0 which is particularly important for use in public spaces. Due to its scratch resistant surface, this wallpaper is suitable for long-term use in busy areas.

- Wide colour gamu.
- High opacity for good coverage.
- Scratch resistant surface
- Good lightfastness
- Dimensionally stable.
- Dry strippable
- Good coverage of uneven surfaces
- PVC free
- FSC® certified
- Hang using standard non-woven wallpaper paste

*Flame retardant and C-s1, d0 certified according to European Standard EN.*

EMBLEM
EMBLEM
Event Table Cloth

Code	g/m²	Width	Length
ETCTB	350	54" 1370mm	25 Mtrs

EMBLEM Event Table Cloth Textile Back is based on a textile fabric with a soft PVC coating. This product design enables a high dimensional stability and production reliability during printing.

Used to decorate tables for product launches, exhibitions, weddings etc.

EFFECTIVE IDEAS, POWERFUL IMPACT.
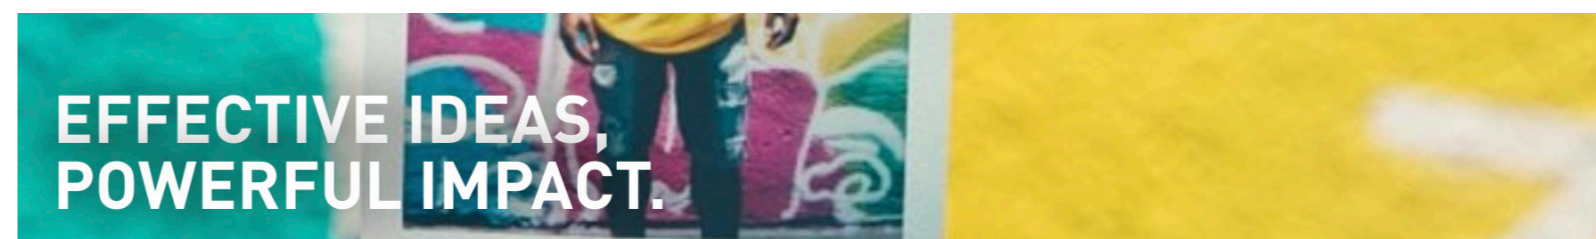

VINCENT
Satin Canvas

Code	g/m²	Width	Length	Cores
3385	380	36" 914mm	15 Mtrs	3"
		42" 1067mm	15 Mtrs	3"
		60" 1524mm	15 Mtrs	3"

Vincent Canvas Plus Satin is a universal artistic, cotton / polyester blend canvas for solvent, latex and UV inks. The satin finish enables prints with excellent colour reproduction. The printed surface shows no signs of white-scoring and is splashproof.

The material was developed specifically with industrial printing of framed art and photo application in mind and can therefore be used in automated framing machines

- Brilliant colour reproduction.
- Quick dry.
- No white-scoring.
- Splashproof.

Solv | UV | Latex

Code	Mic	Width	Length
5052	80	48" 1220mm	50 Mtrs
	80	54" 1372mm	50 Mtrs

POLI-ETCH 5052 Silver Frosty is a polymeric PVC-Film (translucent, 80 µ)

Laminated with a PE-coated silicone paper (141 g/m²) and equipped with a clear solvent acrylic adhesive (permanent). Suitable for bonding various surfaces for example on commercial slabs, glass, metal and plastic. Especially developed to achieve a sand blasting or frosty effect on glass and mirrors as well as transparent plastic sheets. Suitable for the use on smooth as well as slightly curved surfaces.

POLI-ETCH 5052 Silver Frosty is ideal for mid to long term applications.

POLI-ETCH
Silver Frosty Air Free

Solv | UV | Latex

Code	Mic	Width	Length
5055	80	54" 1372mm	50 Mtrs

As above but with a clear micro structured permanent solvent based acrylic adhesive. The special embossed micro structure adhesive avoids any bubbles and reduces the time required for the application on the substrate.

POLI-PRINT
One Way Vision

Solv | UV | Latex

Code	Mic	Width	Length
5051	175	54" 1372mm	50 Mtrs
	175	60" 1524mm	30 Mtrs

POLI-PRINT One Way Vision SV/UV is a monomeric, perforated PVC-Film with black interlayer (translucent, 175mic). Especially designed for decoration of vehicles windows and shop windows with perfect visibility due to 60-40 balance between vinyl and holes with 1.6mm perforation.

Clear solvent acrylic removable adhesive.

Once applied it can be removed without leaving adhesive residues.

SIMPLE, EFFECTIVE, BENEFICIAL.

POLI-TAPE
TURBO-PRINT
4036 Matt

Code	Mic	Width	Length
4036	100	500mm	25 Mtrs
		750mm	25 Mtrs

TURBO PRINT 4036 MATT is a heat-sealable, printable PU textile transfer film (opaque white, 100 μ) suitable for light and dark textiles.

- *It offers a high print resolution with a matt finish and has a pleasant soft textile touch.*
- *Due to a special top coat, the film offers an excellent washing-resistance.*
- *The transfer film is used for motifs and logos on sport, leisure and work wear.*
- *Suitable for transfer to textiles like cotton, polyester, uncoated nylon, mixtures of polyester/cotton and polyester/acrylic.*
- *For application to nylon that is treated with any kind of coating, please test for suitability.*

TURBO PRINT 4036 MATT is compatible with all current printers using ECO-solvent, solvent and latex inks. Due to a newly developed, self-adhesive PET film liner, even very small letters and motifs can be easily cut by all current CAD/CAM plotters after the printing process.

We recommend using POLI-TACK 854 as a transfer tape and as a protection cover during the heat transfer.

Biancoflash, the original brand from Favini, is the Italian word for whiteness and quality.

Biancoflash paper is a hugely versatile range for design and high-end print. Suitable for all major print and finishing processes. Applications include, books, brochures, catalogues, packaging, stationery, diaries, calendars menus and hotel stationery suites.

With Biancoflash, the ink doesn't just sit on the surface and look shiny, nor does it sink in and lose definition. It provides the optimum surface for a perfectly-balanced result.
