

Upgrade to Extreme Power with **TRAXXAS Power-UP**

The Traxxas Power-Up™ Program allows you to exchange your current Traxxas speed control, nitro engine, or radio system for a brand new upgraded system at special Power-Up Program pricing*. There's no easier, more affordable way to give your model superior performance capability and high speed potential! It's a no-questions-asked deal. No matter what condition your engine, electric power system, or radio system is in, so long as it's complete, it can be exchanged for a new system at the special price. You may also use the Power-Up program to simply replace a worn or damaged Traxxas electric power system, nitro engine, or radio system with new components at this special Power-Up Program pricing. Whether you use the Power-Up Program to enhance the speed and power of your model or simply maintain factory-fresh performance, you'll save both time and money. It's easy and a great deal! You can exchange your old system for a new one at your local hobby store to save shipping and handling charges and get your new components today—see your hobby dealer for details.

To process your Power-Up order online, go to Traxxas.com/powerup

\$70.00

TRX 2.5R

\$85.00

TRX 3.3

\$110.00

2. Preparing the engine or motor and speed control for exchange

Make sure the engine(s) being exchanged is complete. Exchange engines MUST be complete with crankcase, crankshaft, piston, sleeve, connecting rod, cylinder head, backplate, and carburetor. Be sure to KEEP your EZ-Start assembly, header, clutch assembly, flywheel and engine mount; these items are not supplied with new engines.

Make sure the speed control(s) and motor(s) being exchanged are complete. Exchange speed controls MUST be complete with heatsink, motor wires with bullet connectors, and Traxxas connector. Exchange motors MUST be complete with wires with bullet connectors and endcap. Remove the pinion gear from the motor, as a pinion is not supplied when exchanging for a new Velineon brushless system.

Note: Traxxas only accepts complete motor and speed control systems for Power-Up exchange. You may not return a motor by itself in exchange for a new motor or a speed control by itself in exchange for a new speed control.

3. Fill out the online Traxxas Power-Up Form

Fill out and print the online form (from Traxxas.com/powerup) and package it with the engine(s) or motor(s), speed control(s), or radio system(s) being exchanged. Be sure to include payment with the package.

4. Ship to Traxxas

Ship package to Traxxas pre-paid and insured. Ship to: Traxxas, ATTN: Power-Up, 6250 Traxxas Way, McKinney, TX 75070
