

## AquaSPArkle Spa Fusion Aqua Sachet

### Key Features/Characteristics

- 🔑 35g pre-measured sachet
- 🔑 Dual action oxidiser
- 🔑 Contains clarifier

AquaSPArkle Spa Fusion should be used weekly or after heavy spa use to help remove bather wastes that can build-up in spa water over time resulting in odours, reduced water clarity and unpleasant bathing conditions.

### Application Instructions

1. Whilst the pump is running, empty the whole sachet contents into the spa and run the system for a minimum of one hour leaving the spa cover off.
2. One sachet (35g) will treat spas up to 1,500 litres (330 gallons).
3. Check the chlorine/bromine level after application. If levels have fallen within the recommended range of 3 – 5mg/l for chlorine or bromine the spa may be used after 1 hour.

**Please note:** Use AquaSPArkle Spa Fusion weekly or after heavy spa use.

**Important:** When dosing this product wear eye and face protection and ensure granules are not blown back towards you.

**Note:** As Aqua Sachets cannot be re-sealed, the whole sachet **must** be used in one treatment.
