CAULK *and glide*™

INSTRUCTIONS FOR USE

STEP 1

Slide Ball onto caulk tube. Trim tube to top of ball.

NOTE: On squeeze tubes, trim tube opening at rib first before sliding Ball into place.

STEP 2

Select Tip based on desired bead size and snap Tip in place on the ball.

STEP 3

Place Tip into joint.

NOTE: During first use, run tip along joint without applying caulk to get a feel for the tool.

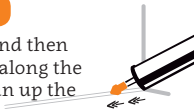

STEP 4

Squeeze caulk until you see it nearly exit around Tip but don't let caulk exit around the tip. Continue applying caulk while gliding Tip along joint to apply the caulk bead.

STEP 5

Clean Tip and then run the tip along the bead to clean up the bead.

NOTE

Clean Tip frequently for best application results.
