STREAM 50+ GEOGRAPHY VIDEOS FILMED
AROUND THE WORLD **FOR JUST £99**
.....

WELCOME TO OUR GEOGRAPHY STREAMING LIBRARY

STREAM 50+
GEOGRAPHY
VIDEOS
FOR £99

Do I really get access to all the titles listed in this brochure for just £99?

That's right. Our streaming library of **over 50 video rich geography resources** is available for an annual subscription of **just £99**. From coasts and rivers to tectonics and climate change, and everything in between, our titles cover all the key **curriculum areas from KS3 to KS5**.

Where do you want to take your students today?

From the Amazon rainforest and the Sahara Desert, to Iceland's volcanoes and India's megacities, our case studies are **filmed around the world by our professional team of geographers**, and are designed to engage and inspire, stretch and challenge. All our titles are made in consultation with teaching professionals and created to meet the requirements of the UK's main awarding bodies. Many are **endorsed and recommended by UK exam boards**. They're also accompanied by lesson plans, exciting student activities and extensive supporting materials.

Looking to support critical thinking in a rapidly changing world?

From water shortages and the climate emergency to the challenges of immigration, help your students understand the world around them. Our **content encourages critical thinking**, and our library is constantly updated to reflect the most **current global issues** and the latest in geographical thinking and terminology.

Look out for our new content on water security in California and our new title that considers whether skiing can ever be sustainable.

Why choose our Geography Streaming Subscription?

- Instant access to **50+ resources** for the academic year (Sept 2023 to Aug 2024)
- **New content** released throughout the year
- Speed up lesson planning with **downloadable teaching materials** and student activities created by text book author Bob Digby
- **Perfect for cover lessons**, revision catch up and lessons delivered by non-specialist teachers
- Suitable for **GCSE and A level**
- Links and embed codes to support students' **remote learning and homework**
- Easily embed content into **VLEs and OneNote**

WANT TO TRY BEFORE YOU BUY? VISIT www.pumpkin-interactive.co.uk/collections/geography-streaming-library TO START YOUR 14-DAY FREE TRIAL

But don't just take our word for it!

"The resources are fantastic. Best buy in years. They've really helped us up the challenge with vocabulary and key concepts."

Nathan Moorby, Head of Geography,
Central Lancaster School

"A wonderful catalogue of geography gold."

Steve Paisley, Ralph Allen School

"An amazing resource."

Jenny Ponting, Head of Geography,
Burgess Hill Girls

Read reviews and watch previews of all our titles www.pumpkin-interactive.co.uk

Prefer a digital download?

Create your own bespoke collection with our option to **buy individual digital downloads**. Files come with a site licence and once downloaded can be stored in perpetuity on individual computers or school networks enabling them to be easily shared with students.

California's Water Security challenge

With California suffering its driest three years on record, this title considers the impact of the water shortages on LA and the region's food production. It looks at the physical and human causes of water insecurity including climate change. It then explores the impact of over abstraction on groundwater quality before considering the measures California is putting into place to protect supplies and avert a water security crisis.

25 mins | Age 14-19+ **Digital download: £45**

Suitable for: Water | Climate Change | Geographical Debates | Water Cycles

Can skiing ever be eco-friendly?

Climate change is turning skiing into an endangered pastime, with ski seasons becoming shorter and slopes turning green as temperatures rise. With many resorts only too aware they have only two options, adapt or close, this title asks, is it possible to create a sustainable ski industry while still ensuring year-round employment in the resorts?

25 mins | Age 14-19+ **Digital download: £45**

Suitable for: Climate Change | Geographical Debates | Water Cycles | Fragile Environments | Tourism

Norway: Climate Champions or Hypocrites?

Can Norway ever become the world's first carbon net zero country or is their goal just greenwash? Let your students decide with this resource designed to encourage critical thinking. Norway's location and topography enables it to generate vast quantities of carbon free hydroelectric power. They also lead the world in carbon capture and storage. But can the world's third biggest exporter of natural gas ever really be carbon neutral?

25 mins | Age 14-19+ **Digital download: £45**

Suitable for: Climate Change | Geographical Debates | Carbon Cycles

“Pumpkin’s DVDs are high quality and informative.”

Jacqui Wood, Moira House School

Climate Change

The impact of climate change can be hard to see in the developed world, but as our case studies from the Arctic, Greenland, Iceland, Africa, India and China show, it's already a reality for the poorest and most vulnerable. The resource explores the causes of climate change and asks to what extent these are natural or the result of human activity.

30 mins | Age 14-19+ **Digital download: £45**

Suitable for: Climate Change | Hazards | Environmental Challenges | Geographical Debates

“A very flexible resource. The footage and range of examples is impressive.”

G. Daw, Head of Humanities, Worcester Sixth Form College

Carbon and Water Cycles in Tropical Rainforests

Filmed in the Amazon and Borneo, this resource illustrates and explains the key environmental and land use changes occurring in tropical rainforests and explores the effect they're having on the carbon and hydrological cycles. We accompany scientists up flux towers as they monitor CO₂ emissions and find out why they're digging soil pits to examine decomposition rates. A fantastic case study to deepen students' understanding of carbon and water cycles.

25 mins | Age 14-19+ **Digital download: £45**

Suitable for: Carbon and Water Cycles | Climate Change | Rainforests

"A comprehensive, well thought out and accessible resource that will be of use year after year for the study of Earth's Life Support Systems."

Laura Giles, Head of Geography, Clifton High School

Carbon and Water Cycles in the Tundra

With stunning footage shot in the Canadian arctic, this title identifies and explores the physical and human factors, including climate change, that affect carbon and water cycles in the tundra. We see the research and monitoring techniques scientists are using to identify and record these changes and look at the reasons this data is gathered. The resource shows how these same techniques can be used by students as part of their own fieldwork investigations.

25 mins | Age 14-19+ **Digital download: £45**

Suitable for: Carbon and Water Cycles | Climate Change

"Pumpkin consistently produces high quality educational documentaries."

David Lambert, Professor of Geography Education, IOE

Tropical Storms: Bangladesh's Cyclone Aila

The physical processes that lead to the formation of cyclones are clearly explained and the primary and secondary impacts explored through first hand accounts. Management strategies to reduce long and short-term impacts are assessed including the role of GIS and projects aimed at strengthening livelihoods and reducing vulnerability.

33 mins | Age 14-19+ **Digital download: £41**

Suitable for: Weather | Hazards | Environmental Challenges

Extreme Weather: The UK's 2013 Winter Storms

Storm surges, heavy rainfall, strong winds and high spring tides – this content explores the causes and effects of the UK's extreme weather events of winter 2013, including the East Coast storm surge and the collapse of the railway line at Dawlish on the south coast. With footage shot during the storms, the impacts are clearly illustrated. The contrasting management techniques adopted to reduce future risk are then evaluated.

30 mins | Age 14-19+ **Digital download: £45**

Suitable for: Coastal Landscapes and Processes | Flooding | Weather | Hazards

Extreme Weather: The Somerset Floods

Explore the physical and human causes of the Somerset floods with this engaging resource. Then consider their impact on people's lives, the environment and property, before assessing how both hard and soft engineering options are being used to improve resilience to future flood events.

30 mins | Age 14-19+ **Digital download: £45**

Suitable for: Flooding | Extreme Weather | Hazards | Rivers

The Haiti Earthquake: Impacts and Responses

A great resource to exemplify the effects of a geohazard in an LIC. Using footage filmed straight after the 2010 earthquake and in the three years following, the resource explores the primary and secondary impacts of the quake. This title then looks at a range of short and long term responses, including projects aimed at: reducing the outbreak of cholera, improving the housing situation, reducing vulnerability and strengthening livelihoods.

“Pumpkin’s resources develop students’ deeper conceptual understanding.”

John Lyon, Former Programme Manager, the Geographical Association

45 mins | Age 14-19+ **Digital download: £45**

Suitable for: Tectonics | Hazards | Development

Tectonics: Processes and Landforms

Provide your students with fantastic visual case studies and explanations of the processes and features that occur at different plate margins. With examples drawn from Iceland, Montserrat, Haiti, the Alps and the UK, this resource looks in detail at a range of volcanic processes and landforms. Illustrations are provided of calderas, fissure eruptions and dome, shield and stratocone/ composite volcanoes. The development of plate tectonic theory is also explored.

“The tectonics series is superb.”

Mark Ollis, Head of Geography, St Bees School

30 mins | Age 14-19+ **Digital download: £45**

Suitable for: Hazards | Tectonics

Email us on: orders@pumpkin-interactive.co.uk

Montserrat: Living with Volcanoes

A perfect case study of a volcano in an LIC. The resource provides a clear explanation of the processes causing Montserrat's recent volcanic activity. It then assesses the social, economic and environmental impacts of the continuing eruptions. The likelihood of Montserrat becoming self-sufficient is explored with sections looking at: the potential of Montserrat's tourist industry; strategies for disaster response and preparedness; and projects to improve biodiversity.

45 mins | Age 14-19+ **Digital download: £45**

Suitable for: Hazards | Tectonics | Geographical Debates

Iceland: Living with Volcanoes

In 2010, Iceland's Eyjafjallajökull volcano erupted causing enormous disruption to air travel across Western Europe and severe problems to people living in the area. This resource explores the impacts of the eruption, both locally and globally. It then examines the responses to it, including the role of emergency planning, early warning systems and the development of better ash forecasting.

42 mins | Age 14-19+ **Digital download: £45**

Suitable for: Tectonics | Hazards | Energy

Geohazards: Monitoring and Prediction

Filmed with scientists working on some of the world's most active plate systems, you'll see how rapid response radar trailers and helicopters are used to record and analyse geohazards using some of the most up to date technology. Explore how this information is used to plan, predict and protect against future hazard events.

30 mins | Age 14-19+ **Digital download: £45**

Suitable for: Hazards | Tectonics | GIS

Global Ecosystems

This title makes use of fantastic footage filmed in the Canadian tundra, the Amazon and Borneo rainforests, as well as in UK deciduous forests and the Sahara Desert. It explores the characteristics of the different ecosystems and the factors affecting their distribution. It then looks at the threats they face and how these impact the ecosystems' dynamic equilibrium.

"A wonderful catalogue of geography gold."

Steve Paisley, Ralph Allen School

26 mins | Age 14-19+ **Digital download: £45**

Suitable for: The Living World | Ecosystems, Sustaining Environments | OCR A level Geographical Debates

The Tropical Rainforest Ecosystem

Explore the physical characteristics of a tropical rainforest with this title. Filmed in the Amazon, it provides fantastic examples of adaptation, stratification and competition. The interdependence of climate, water, soils, plants, animals and people is clearly explained. It then goes on to consider the conditions that help create this biodiversity hotspot.

"Pumpkin's resources are fantastic.

Best buy in years." Nathan Moorby,
Head of Geography, Central Lancaster School

24 mins | Age 14-19+ **Digital download: £45**

Suitable for: Ecosystems | Tropical Rainforests | Biodiversity | Earth's Life Support Systems

Email us on: orders@pumpkin-interactive.co.uk

Tropical Rainforests: Threats & Challenges

This title considers the value of rainforest both locally and globally in terms of their goods and services. It then explores the causes of deforestation including logging, palm oil production and oil extraction. The impacts of deforestation on biodiversity, indigenous communities and climate change are then assessed.

25 mins | Age 14-19+ **Digital download: £45**

Suitable for: Ecosystems | Tropical Rainforests | Biodiversity | Earth's Life Support Systems | Forests Under Threat

Tropical Rainforests: Sustainable Management

Ecuador needs to exploit the Amazon's resources to develop, so leaving it untouched is not an option. This resource considers the challenges of achieving sustainable management. It explores the political and economic factors and the role of businesses, governments, indigenous communities and NGOs. Examples include eco-tourism, bio-reserves, conservation and sustainable agriculture.

24 mins | Age 14-19+ **Digital download: £45**

Suitable for: Ecosystems | Tropical Rainforests | Biodiversity | Tourism

Biodiversity under Threat

With extraordinary footage of man-eating tigers and life in the Sundarban mangroves, this title provides a fantastic introduction to one of the most valuable ecosystems in the world. Exciting visual examples of biodiversity and adaptation will really grab students' attention. The threats facing the mangroves are explored, including climate change. It then evaluates a variety of sustainable management options including tiger conservation and eco-tourism.

42 mins | Age 14-19+ **Digital download: £41**

Suitable for: Ecosystems | Biodiversity | Earth's Life Support Systems | Forests Under Threat

River Processes and Landforms

Explain the fluvial processes of erosion, transportation, and deposition and explore how they change throughout a river's course. With high quality footage filmed both in the UK and abroad, memorable examples are provided of: potholes, rapids, waterfalls, gorges, meanders, braiding, flood plains and deltas.

31 mins | Age 14-19+ **Digital download: £45**

Suitable for: Rivers | UK Landscapes | Distinctive Landscapes

Flooding in Bangladesh: Causes, Impacts & Management

A fantastic resource that explores the impacts of floods in an LIC. Physical and human causes at both a local and regional scale are assessed, as is the effect of climate change. Contemporary thinking about hazards is emphasised and memorable examples of hard and soft management strategies provided.

38 mins | Age 14-19+ **Digital download: £41**

Suitable for: Rivers | Flooding | Hazards | Climate Change | Extreme Weather

Flooding in the UK: Tewkesbury

This resource uses flood events in Tewkesbury to explore the physical and human causes of flooding and their effect on runoff, infiltration rates and storm hydrographs. Students are then encouraged to evaluate the social, environmental and economic impacts of flooding. The pros and cons of hard and soft management strategies are also considered.

37 mins | Age 14-19+ **Digital download: £45**

Suitable for: Flooding | Extreme Weather | Hazards | Environmental Challenges | Rivers

Coastal Processes and Landforms

With an additional section on dunes and fantastic new drone footage, this updated title takes a systems approach to illustrate and explain the coastal processes of erosion, transportation, deposition, weathering and mass movement. Case studies include Lulworth Cove, Durdle Door, Flamborough Cliffs and Slapton Ley.

38 mins | Age 14-19+ **Digital download: £45**

Suitable for: The Coastal System | Landscape Systems | UK Landscapes

Holderness: Sustainable Coastal Management

Fifteen years on, we revisit this ever-changing coastline. We explore the physical processes at work and talk to stakeholders about the challenges they continue to face managing and living with this eroding coastline.

32 mins | Age 14-19+ **Digital download: £36**

Suitable for: Coastal Change and Conflict | Coastal Landscapes and Processes | UK's Changing Landscapes

"An excellent programme which many teachers would find useful." Teaching Geography

Managing the Dorset Coast: Conflicts, Challenges and Opportunities

The Jurassic Coast is one of the UK's most popular stretches of coastline. Explore the values, needs and impacts of the different players who use this area, before assessing the sustainability and success of the different strategies that have been put in place to manage it.

41 mins | Age 14-19+ **Digital download: £41**

Suitable for: Coastal Change and Conflict | Coastal Landscapes and Processes | UK's Changing Landscapes

The UK's Changing Landscapes

Use this programme to explore what makes landscapes distinctive in the UK. It provides an overview of the characteristics and uses of the UK's areas of upland and lowland landscapes. Through the use of case studies, this video contextualises how climate, geology and human activity have worked together in combination with geomorphic processes over millions of years to create the UK's diverse and distinct landscapes.

30 mins | Age 14-19+ **Digital download: £45**

Suitable for: Landscape Systems | UK Landscapes | The Physical Environment | Geomorphic Processes

Glaciation in the UK

How has ice shaped the UK landscape? What were the processes operating at differing scales and how have they been influenced by geology, climate and human activity? With examples drawn from around the UK this resource provides illustrations and explanations for the different landforms and features associated with glaciation in the UK.

30 mins | Age 14-19+ **Digital download: £45**

Suitable for: UK Landscapes | Glaciation | Ice on the Land

Glaciation: Processes and Landforms

For access to the very latest research and current thinking on glaciation, this resource is an absolute must. Using examples filmed in the UK, Iceland and the Alps and with the help of satellite images, graphics and interviews with leading glaciologists, this resource illustrates and explains the processes and landforms associated with glaciers.

40 mins | Age 14-19+ **Digital download: £45**

Suitable for: Landscape Systems | Glaciation | Ice on the Land | UK Landscapes

The Alps: Opportunities and Challenges

Filmed in the honeypot site of Chamonix in the Alps, this programme looks at the social, economic and environmental opportunities and challenges facing the region. The resource explores the variety of activities in the area, including tourism, HEP and farming. It examines their impact, the conflicts that arise between them and how they can be sustainably managed within the context of a fragile environment.

30 mins | Age 14-19+ **Digital download: £45**

Suitable for: Energy | Hazards | Fragile and Cold Environments | Tourism

Hot Deserts: Challenges and Opportunities

Using Morocco's Sahara desert as a case study this title considers the challenges of hot desert environments, including extreme temperatures, lack of water and inaccessibility. It then looks at the opportunities deserts can offer if these challenges can be overcome. Engaging case studies include: the world's largest solar plant, "Hollywood of the desert" film studios where Game of Thrones was filmed, large scale citrus irrigation schemes, mineral extraction and luxury desert tourism.

25 mins | Age 14-19+ **Digital download: £45**

Suitable for: Hot Deserts | Fragile Environments

"Pumpkin's resources are great and the additional on-disc resources are excellent added value."

Steven Vaux, Marlborough College

Desertification: Causes, Impacts and Management

Yahya's nomadic family has been forced off their land on the fringes of the Sahara, because of desertification. Through his story, this title considers the impacts of desertification and its causes, including: climate change, population pressure, over abstraction of water, overgrazing and salinisation. It then considers a range of responses including tree planting, the use of appropriate technology and the introduction of sustainable water and soil management strategies.

25 mins | Age 14-19+ **Digital download: £45**

Suitable for: Hot Deserts | Desertification | Fragile Environments | Climate Change

"Well targeted to geography syllabuses and the interviews with experts and practitioners are a real strength."

David Anderson, Head of Geography, Eton College

Global Energy Security

What makes some countries more energy secure than others and what are the strategies that can be pursued to improve security? With case studies from the EU, Iceland, China, India, Canada and the US, this title provides students with a wealth of contrasting examples. Find out how Eastern European geopolitics is affecting EU energy policy. In China, growing energy needs are being met through an increasing reliance on coal, but at what environmental cost? And with new technology opening up previously untapped reserves, we ask what are the potential risks and rewards?

30 mins | Age 14-19+ **Digital download: £45**

Suitable for: Resource Management |
Consuming Energy Resources |
Energy Security

The Greening of Energy

Although renewable energies are seen as 'clean and green', their development can often be cause for conflict. This resource encourages students to examine the pros and cons of renewable energy. It draws on examples from the UK, India and Europe. The de-carbonisation of energy is discussed and tidal, HEP, wind, solar, biomass and biogas are all considered.

30 mins | Age 14-19+ **Digital download: £45**

Suitable for: Resource Management |
Environmental Challenges | Consuming
Energy Resources | Energy Security

Debating Energy Futures - Coal, Gas and Nuclear

How important will coal, gas and nuclear be in the future global energy mix? What are the pros and cons of fracking in the US and in the UK? Can coal, the dirtiest fossil fuel, be cleaned up? And why is nuclear still an attractive option for some countries?

“Provides a wide variety of viewpoints and interviews to help students understand the complex analysis of energy futures in the UK.”

Maria Demosthenous, Head of Geography,
Heritage School, Cyprus

45 mins | Age 14-19+ **Digital download: £45**

Suitable for: Resource Management |
Environmental Challenges | Consuming
Energy Resources | Energy Security

Energy Security: India's Sustainable Solutions

As India struggles to meet its growing energy needs, this resource assesses the pros and cons of two renewable energy options. Explore the benefits of large-scale electricity generation schemes like Asia's biggest wind farm and see how appropriate biogas technology can help close the development gap.

28 mins | Age 14-19+ **Digital download: £45**

Suitable for: Resource Management |
Consuming Energy Resources |
Energy Security

Urbanisation and Megacities: Mumbai

Using Mumbai as a case study this title explores the reasons for rapid urbanisation in LICs/NEEs and the emergence of megacities. It looks at the location and importance of Mumbai, nationally, regionally and internationally and considers the causes of urban growth, from both natural increase and rural to urban migration. It then goes on to illustrate the challenges, opportunities and inequalities found within a megacity.

25 mins | Age 14-19+ **Digital download: £45**

Suitable for: Megacities | Urban challenges | Changing places | Inequality

Mumbai's Slum Redevelopment: Bottom up or top down?

The challenge for Mumbai's planners is to improve the conditions for the urban poor while at the same time making sure social communities in the slums are protected. This programme evaluates the pros and cons of different strategies used in this megacity to improve the lives of its slum dwellers including; incremental housing improvements, re-settlement and re-development.

15 mins | Age 14-19+ **Digital download: £45**

Suitable for: Megacities | Urban growth | Changing places | Inequality

Inside Dharavi – Life in India's largest slum

Using Mumbai, this title looks at the challenges created by urban growth. It provides a clear visual illustration of life inside India's largest slum, Dharavi, and the struggle residents face accessing adequate housing, clean water, sanitation, electricity as well as services like education and health. It also considers the opportunities created by urban growth in terms of improved access to jobs, services and a better education.

30 mins | Age 14-19+ **Digital download: £45**

Suitable for: Megacities | Urban challenges | Changing places | Inequality

Mumbai: Managing a Megacity

Waste management and traffic congestion are two of the biggest environmental issues facing Mumbai's urban planners as they struggle to meet the challenge of this megacity's rapid growth. This title looks at the steps Mumbai is taking to make the city more sustainable and asks can a new Metro system be the answer to the city's traffic problems?

30 mins | Age 14-19+ **Digital download: £45**

Suitable for: Megacities | Urban growth | Changing places | Inequality

Regenerating a City: The Rebranding of Glasgow

From COP26 to the Commonwealth Games, explore the re-branding and regeneration strategies used by Glasgow to transform itself from economic and social decline in the 70s, to modern day international conference centre, sporting venue and sustainable city.

31 mins | Age 14-19+ **Digital download: £45**

Suitable for: Dynamic Cities | Changing Cities | Urban Challenges | Changing Places

The 2012 Olympics and East London's Regeneration

Use this resource to investigate whether the Games has helped regenerate East London and to what extent it has benefitted socially, environmentally and economically. A fantastic case study for urban geography, that talks to local residents, businesses and politicians and asks: what is the legacy of the London 2012 Olympics?

40 mins | Age 14-19+ **Digital download: £26**

Suitable for: Dynamic Cities | Changing Cities | Urban Challenges | Changing Places

Challenges of Urbanisation: Inequalities in Bangalore

A fantastic case study of an Indian megacity, that creates a real sense of place. This video examines the causes of urban growth, including migration and the opportunities and challenges this has created. The development of slums and the pressure on water supplies, sanitation and health services are all covered.

27 mins | Age 14-19+ **Digital download: £45**

Suitable for: Changing Cities | Urban Futures | Megacities | Urbanisation | Globalisation

Emerging Superpower: India's Booming Bangalore

Known as the Silicon Valley of India, what are the causes of this megacity's success? Globalisation, government deregulation and education are all considered. The video then examines the social, economic and environmental impacts of this growth, before exploring how pollution, traffic congestion and access to services are being improved.

37 mins | Age 14-19+ **Digital download: £45**

Suitable for: Suitable for: Changing Cities | Globalisation | Changing Economic World

Issues in Globalisation: Environmental Impacts and Sustainability

Contrast the environmental impacts of the textile industry in two countries of differing economic development. In Bangladesh, slum residents explain how industrial pollution damages their environment and health. In the UK, a company sited in a national park demonstrates how it reduces pollution by recycling energy and waste.

25 mins | Age 14-19+ **Digital download: £41**

Suitable for: The Changing Economic World | Globalisation

Issues in Globalisation: How Fair is Fashion?

Using the international textile industry as a case study this resource asks: what is globalisation, what are the causes and effects, who benefits and what is the role played by TNCs? The working and living conditions of textile factory workers in Dhaka are compared with those employed by a small Bangladeshi fair trade fashion initiative.

26 mins | Age 14-19+ **Digital download: £41**

Suitable for: The Changing Economic World | Globalisation

India's rural challenges: Inequalities and development

Examine the development dilemmas facing India and the causes and impacts of the rural/urban divide. Food security, globalisation, the role of women, land ownership and urban migration are all considered, before we evaluate the different strategies used to help overcome the barriers to economic development.

35 mins | Age 14-19+ **Digital download: £41**

Suitable for: Food Security | Development | Globalisation

Population Change: Migration to the UK

This resource explores the causes and impacts of migration to the UK. A Latvian farm worker, Kurdish asylum seeker and an illegal immigrant from West Africa explain their different reasons for migrating to the UK. This resource encourages students to look beyond the headlines and gain a deeper understanding of migration.

40 mins | Age 14-19+ **Digital download: £36**

Suitable for: Global Connections | Population | Migration

Ageing Populations

Examine the issues surrounding the UK's ageing population with this resource that highlights the causes of the changing dependency ratio and then looks in detail at the consequences. It assesses the impact this ageing population is having on health services, transport, housing, pensions and the growing crisis of care. It then illustrates how NGOs, governments and individuals are meeting these challenges at a national and local scale.

28 mins | Age 14-19+ **Digital download: £41**

Suitable for: Population | The UK's Evolving Human Landscape

Managing Youthful Populations: An African Case Study

Gambians are among the poorest people in the world, and until recently cultural and economic imperatives combined to give them one of the highest birth rates as well. This resource uses the Gambia to study the impact of a large youthful population on a country's infrastructure, service provision and environment. The video then highlights successful campaigns to increase the uptake of contraception, manage natural resources and increase educational opportunities for girls.

31 mins | Age 14-19+ **Digital download: £41**

Suitable for: Population | Resources | Development
