

# WRAITH

**A compelling sci-fi adventure with a darkly humorous storyline that engages Young Adult readers to contemplate modern environmental issues**

## Superman never had this problem

James can fly, though his landings need some work. However, that's the least of his problems when he crash lands into a city in the clouds. Soon James is drawn into a race against time to find the SAFFIRE, a new technology designed to save the city from the effects of climate change. Finding his way home seems impossible but with the help of Aureole, a young girl determined to save her city, James just might be able to fly away and help save the city in the process.

### About the authors
