# Balto® Hock

- Achilles tendon/ ligament injury
- Minor tarsal bone fractures
- Tarsus (hock) instability
- Hyperextension or hyperflexion
- Arthritis/arthrosis

The Balto® Hock addresses hock pain, lameness and neuromuscular problems. This canine hock brace is a great solution for dogs suffering from limited mobility following injuries to the hock/Achilles tendon. This breathable compression wrap, made with non-neoprene material, provides stability and support to your dog's rear legs without compromising natural movement.
