# Balto® Ligatek

- Cranial Cruciate Ligament (CCL) Injuries
- Luxating Patella
- Advanced knee support
- Alternate to TPLO, TTA, ELSS, and MPL surgeries
- Severe arthritis/ arthrosis

The Balto® Ligatek is carefully designed to stabilize your dog’s post-traumatic or acquired knee joint deficiency. With its adjustable hinges, the user can control the ROM, and lock the joint into full immobilization or controlled degrees of flexion/extension. The brace’s width and length can be adjusted thanks to our trimmable straps, and the upper and lower padding can be extended or shortened to ensure an excellent fit around the leg
