

Rehabilitation Collection

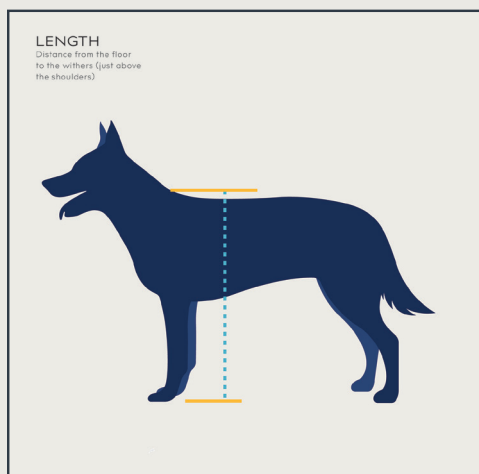

Balto[®] Lux

- Shoulder dysplasia
- Joint laxity or hypermobility
- Instability of the shoulder joint
- Shoulder inflammation
- Shoulder dislocation in dogs
- Arthritis/ arthrosis

The Balto[®] Lux is designed to limit the overall abduction of the shoulders. It aids in minor issues, such as inflammation, as well as shoulder diseases that require limiting movement of the joint. It can also be used as a post-operative device to promote gradual rehabilitation.
