

Rehabilitation Collection

Balto® Neck Eco

- Protects healing sites, open wounds, and allergy flares from self-harming behaviors (should not be used for paws, ears, and eyes protection; body-only)
- Unobstructed vision for behavioral alternatives to the traditional e-collar

The Balto® Neck Eco is a comfortable alternative to the traditional E-collar. It provides body-only coverage and should not be used to protect a pet's paws, ears, or eyes. The brace can comfortably be used alongside the dog's personal harness for daily walks.
