Balto[®] Neck Eco

Feline

- Breathable, but not waterproof, fabric
- The brace can be worn before and after surgery
- Excellent wearability
- Hand washable

The Balto[®] Neck Eco for felines is a comfortable alternative to the traditional e-collar. It can be used to prevent cats from disturbing sutures following surgery and discourage unwanted obsessive-compulsive behaviors, such as licking or scratching. It provides body-only coverage and should not be used to protect a cat's paws, ears, or eyes.
