

Diagnostics Collection

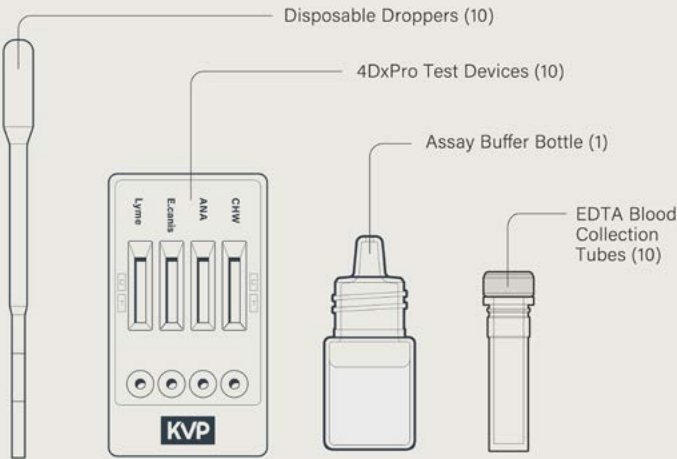

4DxPro™

- 4-in-1 Testing: Screens for Lyme, Ehrlichia canis, Anaplasma, and heartworm with a single sample.
- Delivers accurate results in just 5–10 minutes using whole blood, serum, or plasma.
- Includes all necessary components, no special equipment required for in-clinic use.
- Directions for Use Languages: EN, ES, FR, DE, DA, IT, NL, SV.

The 4DxPro™ Test is a fast, reliable in-clinic diagnostic tool that detects four common vector-borne diseases in dogs: Lyme, Ehrlichia canis, Anaplasma, and heartworm, from a single blood sample. Designed for use with whole blood, serum or plasma, the test provides clear visual results in just 5 to 10 minutes. Ideal for general practices, emergency clinics, or mobile units, each kit includes everything needed for efficient diagnostics (cassette, buffer, EDTA tube, dropper, and instructions) making it a trusted solution for timely disease detection and improved patient care.
