## Quick>Connect Air Brake - Brass & Composite

### Assembly

1. Using a tube cutter, make a square cut edge (maximum 15° cutting angle allowed).

2. Insert tubing straight into connector until a solid stop is felt. The tubing grip and seal (on o-ring) is now accomplished.

3. Gently tug on tubing to ensure tubing is secure.

### Disassembly

1. Check to be sure there isn't any air pressure.

2. Depress collet head using fingers or tube-release tool to release grip on tubing.

3. With the collet depressed, pull the tubing from the connector.
