Product Introduction
Touch key operation:
1. After power on, the button will flash and the machine is in standby state.
2. Touch the switch button to enter the working state at fan speed 1. Touch the fan icon lightly to adjust to the desired speed.
3. The negative ion button will turn off the display when the machine is turned on. Touch the negative ion button, and the white light on the button will indicate that the negative ion is on. The anion button shows filter life. When the filter expires, the red light at the bottom of the button flashes. After replacing the filter, long press the button for 3 seconds to reset the filter indicator.
