IDC5 MARINE 18.1.0

IDC5 MARINE is the practical software that guides the mechanic through all the diagnostic operations in a practical and safe way. It provides important information to support the diagnosis, such as nominal values associated with errors, technical data sheets and interactive wiring diagrams. It allows you to work on many models of inboard and outboard marine engines, industrial engines and generators, personal watercraft, and covers **50 makes** and over **900 models**.

Some of the major news introduced as follows:

MERCUISER

The diagnosis has been updated. The diagnosis of injection system for MERCUISER 4.5L, 6.2L, 8.2L MAG MPI, 8.2L MAG HO MPI MY20 and up has been included.

MERCURY

The diagnosis of injection system for MERCURY SeaPro 350 (V10) MY22, SeaPro 500 (V12) MY22, Verado 600 (V12) MY21 has been included .

MERCURY RACING

The diagnosis of injection system for MERCURY RACING Verado 450 R (V8) MY19, Verado 500 R (V8) MY23 has been included.
