

SP Tools USA and NGK Spark Plugs (U.S.A.), Inc., Announce Strategic Partnership

Robertsdale, Alabama / MANUFACTURING NEWS– SP Tools USA, a leading supplier of high-quality automotive tools and NGK Spark Plugs (U.S.A.), Inc., the world's leading ignition and sensor specialist, is pleased to announce the development of a strategic partnership. The partnership will combine the expertise and product offerings of both companies to provide automotive professionals and enthusiasts access to an expanded range of products, services, educational resources, technical support, and training.

"We are thrilled to be partnering with NGK Spark Plugs," said Lee Locklear, President of SP Tools USA. "This partnership will allow us to offer our wide range of customers industry-leading spark plug technology that, in keeping with our motto, is truly "Manufactured for The Professional."

"We are always looking to expand our reach, and this partnership is a great fit," said Mark Boyle, NGK Spark Plugs General Manager, Product. "We will combine our technical resources to produce best practices and educational video content to ensure proper installation procedures and tech tips. Aligning with SP Tools USA, we will show how using the right quality tools, and the right quality replacement parts go hand in hand to ensure the job is done the first time correctly."

The partnership will take effect immediately, and customers can expect to see the partnership results in the coming months.
