

Wall Stencil Instructions: How to Stencil Large All The Angles 6135L

This **Large All The Angles Allover** stencil uses dashed line registration marks to align the pattern both horizontally and vertically. The dashed registration lines are shown in **red**. They are for registration purposes only, and correspond to certain elements that are stenciled within the pattern.

The Large All The Angles stencil comes with easy registration marks “built in” and a BONUS! We’ve included a FREE Ceiling Filler Stencil that allows you to easily fill in that pesky little stencil area where the wall meets the ceiling.

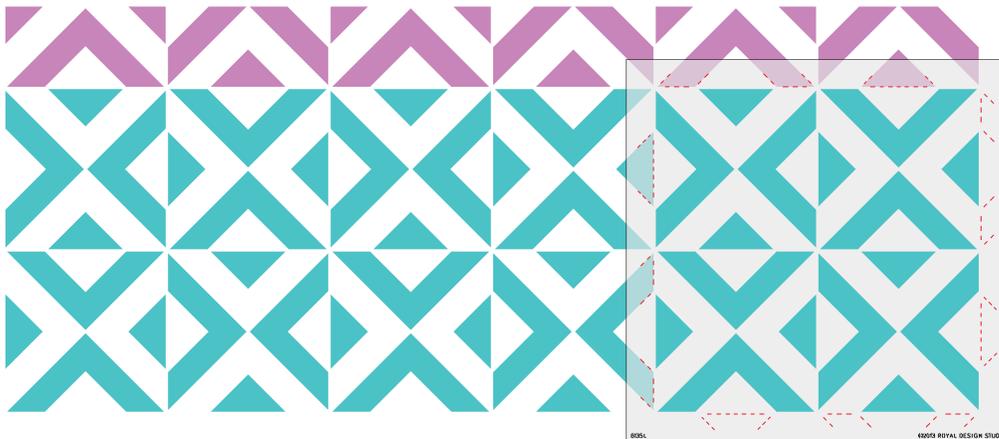

CEILING LINE

Begin with the Ceiling Filler Stencil for Easy Registration

1. Run a strip of low tack Blue Painter’s Tape around the ceiling where it meets the wall. This will keep the stencil paint used in this next step from bleeding onto the ceiling and will give you a nice crisp edge. You will notice that we have added a ½” strip of mylar to hold the pattern together at the top edge. You can simply push the stencil into the corner with one hand, allowing that ½” margin to bend onto the ceiling while stenciling with your free hand. We recommend using a smaller stencil brush in this area to get a nice, clean look. Use a light mist of low tack spray adhesive on the back of the stencil, if desired, to help hold it in place.

2. Move the stencil left or right along the ceiling line, using the registration elements for perfect alignment as you go.

Using the Main Repeat

1. Continuing with the main stencil design positioned so that the laser cut writing is face up and at the bottom. Align the registration elements to the already painted ceiling filler design. The stencil contains a few elements on each side that are laser cut with dashed line registration (indicated in **red**).

2. After stenciling your first repeat, move the pattern down or over and use the **dashed line** registration elements to align the pattern exactly. Continue around your wall or room until all of the pattern is completed.

Managing Corners

If you are repeating this pattern around a room, you will have to deal with the corners. Using spray adhesive will help in this situation.

1. When you get close to a corner, run a strip of low tack Blue Painter’s tape down the opposite wall.
2. Push the stencil into the corner and use a small stencil brush to fill in the pattern on the first wall into the corner. Secure the stencil to the wall you are working on, but let it hang free from the other wall so you can manipulate it easily.
3. After you have completed the first wall, transfer the tape to the “just stenciled” wall and pick up the pattern where you left off onto the next wall, pushing the stencil into the corner from the opposite side.
