

## Wall Stencil Instructions: How to Stencil Large Elsabet Trellis 7211L

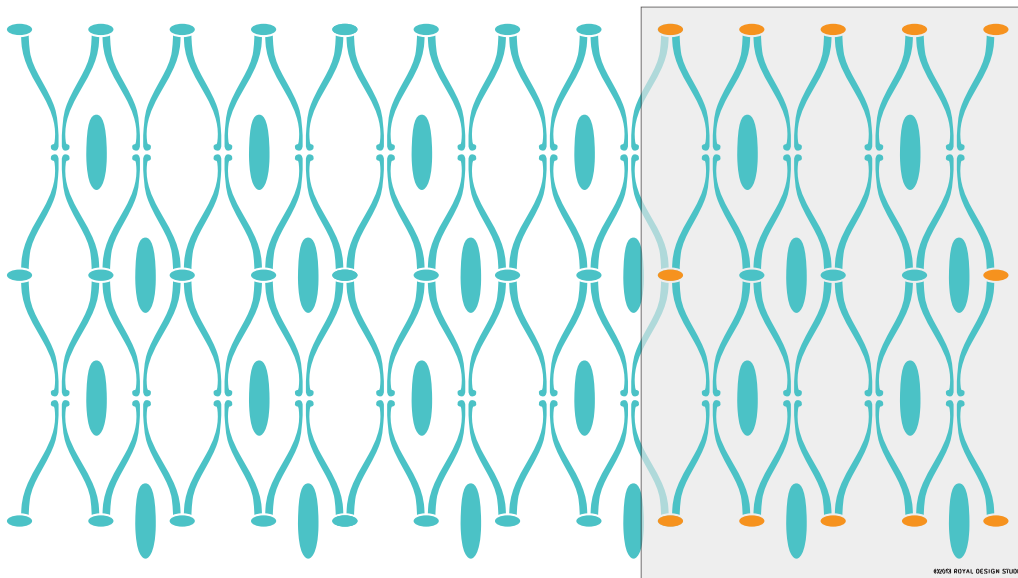

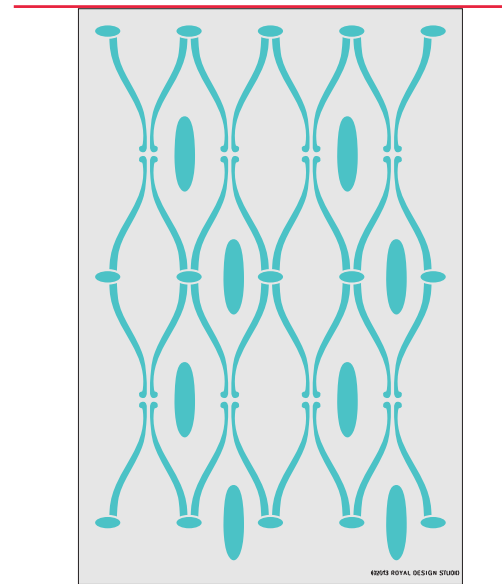

This [Large Elsabet Trellis stencil](#) uses window registration marks to align the pattern both horizontally and vertically. The registration elements are shown in **orange**. They aid in precise alignment, and correspond to certain elements that are stenciled within the pattern.

### CEILING LINE

#### Using the Main Repeat

1. Start with the main stencil design positioned so that the laser cut writing is face up and at the bottom. Push the top edge of the stencil into the ceiling line. The stencil contains a few elements on each side that are laser cut with registration marks (indicated in **orange** in step 2).

2. After stenciling your first repeat, move the pattern down or over and use the **registration** elements to align the pattern exactly. Continue around your wall or room until all of the pattern is completed.

#### Managing Corners

If you are repeating this pattern around a room, you will have to deal with the corners. Using spray adhesive will help in this situation.

1. When you get close to a corner, run a strip of low tack Blue Painter's tape down the opposite wall.
2. Push the stencil into the corner and use a small stencil brush to fill in the pattern on the first wall into the corner. Secure the stencil to the wall you are working on, but let it hang free from the other wall so you can manipulate it easily.
3. After you have completed the first wall, transfer the tape to the "just stenciled" wall and pick up the pattern where you left off onto the next wall, pushing the stencil into the corner from the opposite side.
