Lighting Mode

1. Constant dim light - a dim light is displayed continuously from dusk until dawn.

2. Sensor with dim light - a dim light is displayed continuously from dusk until dawn. When motion is detected the light brightens for 25 seconds before returning to a dim light.

3. Sensor with bright light - the light will remain off until motion is detected then the brightest light setting will be activated.

Product Installation

Masonry install
Using an electric drill (hammer or rotary) drill a hole with a 7mm masonry drill bit, hammer plugs into place then secure the screws.

Timber install
Using an electric drill, drill a pilot hole with a 3mm drill bit to guide the screws (plastic plugs not required).

Ground spike
Push the spike into the base of the solar light until secured then simply push into soft ground in your desired location.

Find a suitable location
Solar lights need access to direct sunlight to enable them to charge during the day. 6-8 hours of sunlight per day is optimal.

Activating the light
Press and hold the white button on the bollard for 3 seconds to turn on the light. To change between lighting modes, simply press the white button to select. To turn the light off, press and hold the white button on the bollard for 3 seconds.

Warning: Do not use this light underwater or in low-lying puddles.
