Assembly Instructions

Step 1 – Drill the screws holes

Before assembling the shelf, mark and drill holes for mounting.

a) Using the Backing Plate as a template, mark the first hole location and drill.

b) Once the first hole is drilled, realign the Backing Plate and mark the second hole. This will ensure the holes are in the correct position. See instructions below for mounting on masonry and timber.

c) When screwing in the screws, ensure you leave ½ cm of the screw out of the wall. This is to hang the bracket over once assembled.

<table>
<thead>
<tr>
<th>Masonry</th>
<th>Use a 6mm masonry drill bit. First insert plugs then the screws.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Timber</td>
<td>Use a 3mm drill bit to make a pilot hole. This will guide the screws in easily.</td>
</tr>
</tbody>
</table>

Step 2 – Assemble the Handy Shelf parts

a) Attach the Shelf to the Backing plate by inserting the tabs into the slots.

b) Attach the Hanging bracket to the Backing plate by inserting the tabs into the slots.

Step 3 – Mount the Handy Shelf on the wall

Simply place the mounting holes of the Handy Shelf over the screws and push down.

The bracket will hang on the screws and can be removed if desired.

Kit Contents:

1x Backing plate
1x Shelf
1x Hanging bracket
2x Masonry plugs
2x Screws (self-tapping stainless steel)
