By following a few simple cleaning tips, your sprinkler should provide years of reliable service.

• Clean the water inlet filter by removing it and rinsing.
• Use the provided cleaning pin to clear any clogged spray nozzles. Then run water through with cleaning pin removed to flush the system.

Assembly Guide

Step 1
Screw the Hoselink Accessory Connector into the sprinkler.

Step 2
Connect to a water supply by attaching your Hoselink-fitted hose end to the Accessory Connector on the sprinkler.

Components

Press to turn on/off
Slide tabs to adjust range
Turn to adjust water flow

Maintenance Tips

• If sprinkler does not operate properly, remove the Cleaning Pin from the end and flush water through.
• Drain the sprinkler after use.
• Do not allow water to freeze in the sprinkler.
• Store out of direct sunlight.

Using the Oscillating Sprinkler

Width Control
The Oscillating Sprinkler is easily adjusted to suit any rectangular watering area.

Range Control
Slide the tabs as required to adjust the oscillation range.

Flow Control
Turn the Flow Control dial to increase or decrease water flow through the sprinkler.
