User Manual

Model: L290 | Wall-mount Compact Floodlight 20LED

Compact in size but ultrabright. Light includes builtin sensor and 3 different light settings. With various mounting options available, you can use this light anywhere in your yard!

Lighting Modes

To indicate which setting you are on; the green light will flash one, two or three times.

- No light until motion is detected, then a bright light will emit for 10-15 seconds.
- Dim light will shine until motion is detected then a bright light will emit for 10-15 seconds before returning to a dim light until dawn.
- Dim light with no sensor. Dim light (20 lumens) will remain on continuously until dawn.

Product Installation - Option 1

Adhere using Hoselink Outdoor Acrylic Double-sided Tape (SKU L100).

Product Installation - Option 2

Follow these steps to mount to a wall or fence using the supplied plugs and screws:

Step 1 - Find a suitable location Solar lights need access to direct sunlight, preferably 6-8 hours per day.

Step 2 - Mount the solar light.

Use a 6mm drill piece for masonry installation. Gently hammer the plugs into place and then secure the screws tightly. For timber, drill a 3mm pilot hole to guide screws into place. Plastic plugs are not required.

Product Installation - Option 3

Use the included cable ties to mount the light on to a post or railings. Make sure the solar panel is facing up.

Activating the Light

Press and hold the white button on the light for 3 seconds to turn on. To change between lighting modes, simply press the white button to select. A green light will flash 1, 2 or 3 times to indicate which setting is selected. To turn the light off, press and hold the white button for 3 seconds.

Warning

Do not use this light under water or in low-lying puddles.
