About JTAG Live AutoBuzz

Benefits

- Automatic seek & discover mode
- Unlimited net compare
- No CAD data required
- Quick and simple to use

Applications

Since the user requires no boundary-scan technical knowledge and with only a basic scan chain input needed, AutoBuzz is the perfect tool for repair and rework technicians, especially when design data is missing or incomplete.

Features

- Automatic seek & discover mode
- Unlimited net compare
- Works without a netlist
- Support for multiple boundary-scan chains
- Scan chain infrastructure test
- Sample pin activity
- Pin-to-pin (p2p) continuity testing
- Multi-pin-to-multi-pin (np2np) continuity testing
- Multi-hardware support Explorer/USB, Altera, Xilinx
