About JTAG Live BuzzPlus

Benefits

- · Unlimited sense pins
- · Works without a netlist
- · Includes 'watch' pin sample feature

With BuzzPlus you can find all the boundary-scan connections for two drivers simultaneously. If connections are missing, or if shorts occur between these two nets, those can easily be seen.

Features

- . Manual seek and discover mode (2 nodes)
- Works without a netlist
- · Support for multiple boundary-scan chains
- · Scan chain infrastructure test
- Sample pin activity
- Pin-to-pin (p2p) continuity testing
- . Multi-pin-to-multi-pin (np2np) continuity testing
- Multi-hardware support Explorer/USB, Altera, Xilinx
