

## LID650 & LID665

**Decoders** 

Last Updated 2022

## LID-650 Decoder/Logger

## LID-665 Decoder/Logger

## Steps

- 1. Download software here https://microchips.com.au/pages/lid-650-665-decoders-support
- 2. Install the software and run the program.
- 3. Use the drop-down list to select the COM port number and click 'Search'. It can take up to a minute to establish a connection (Fig A).
- 4. Once the connection is established, you will see the following screen. Since your decoders are pre-configured, do not change any settings on this page (Fig B).
- 5. Select the 4th tab from the left to access the history page (Fig C).

Please make sure 'Save codes in reader' and 'with date/time' options are ticked.

- 6. To download saved data, click the 'Get codes from reader' button, which will download all saved codes to the software.
- 7. To save the codes to your computer, select the button 'save history database to file.'
- 8. Use the exit button to terminate the connection.
