# ANTI-VACCINOSIS

Anti Vaccinosis helps the body rebalance to its natural state after its been forced into an unnatural immune response.

## ANTI-VACCINOSIS

Anti Vaccinosis helps the body rebalance to its natural state after its been forced into an unnatural immune response.

Anti Vaccinosis also assists
the body in the removal of
preservatives, heavy metals,
toxins, adjutants, antigens
and stabilizers that are
added to vaccines.

# What Is

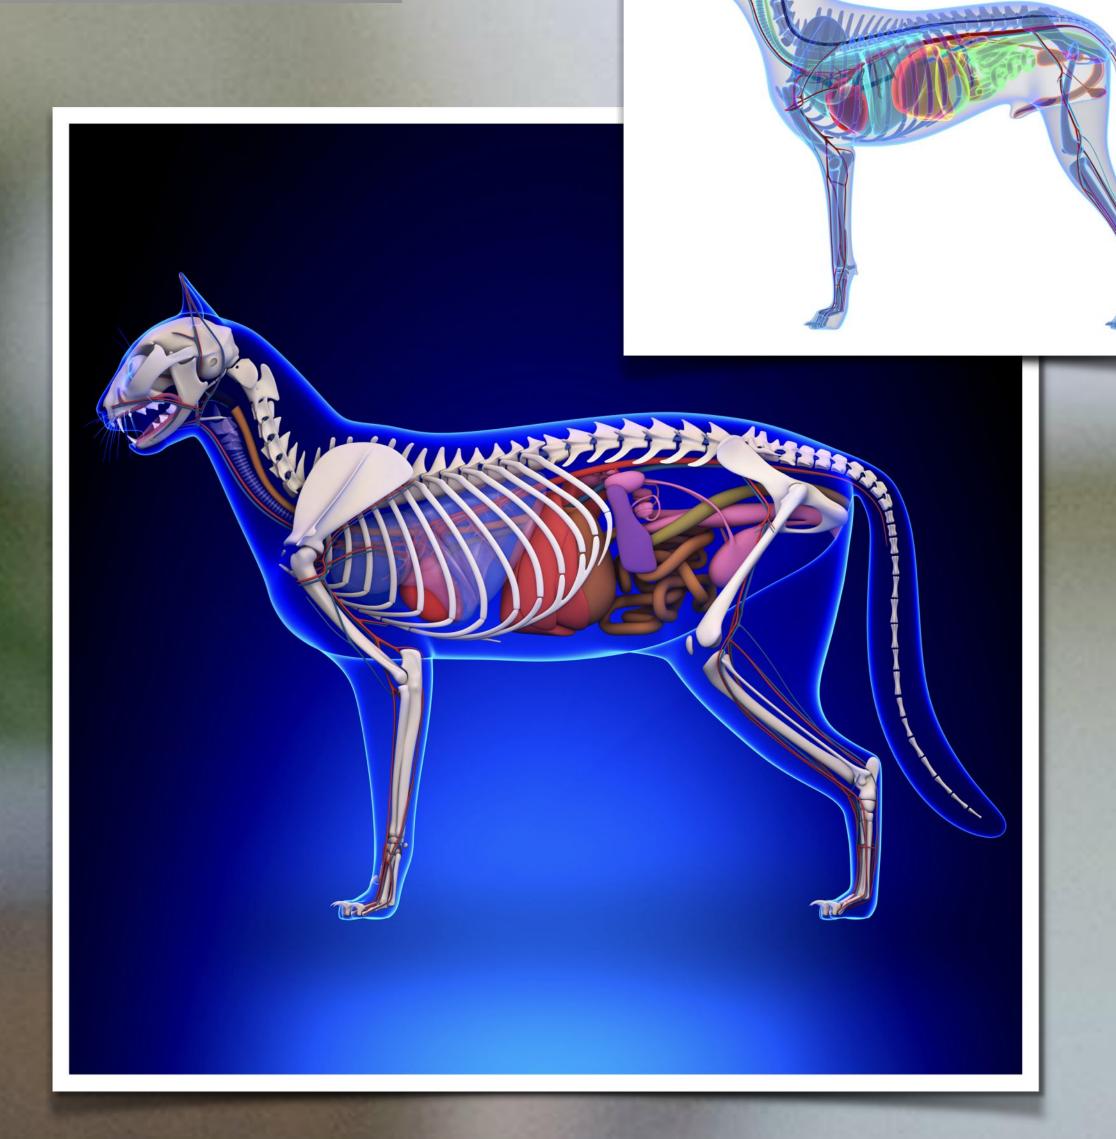

Vaccinosis is known as a set of symptoms that appear after a vaccination.

# Vaccinosis?

There are two types of vaccinosis:

ACUTE and CHRONIC

## VACCINOSIS

#### **Acute Vaccinosis:**

Occurs 5 minutes to 48 hours after a vaccine has been administered.

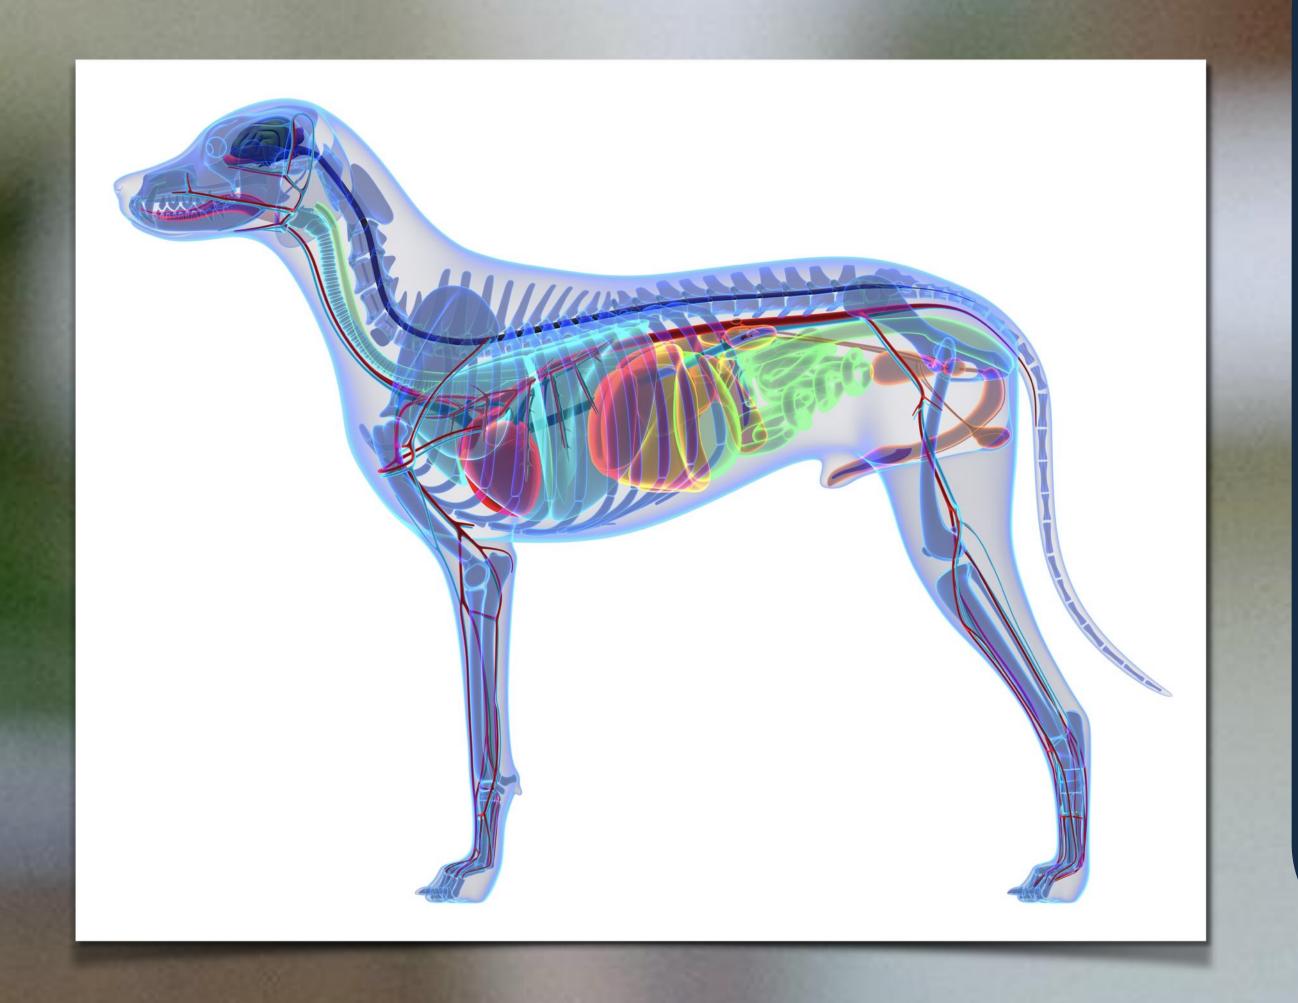

#### **Chronic Vaccinosis:**

Occurs weeks, months, or even years after vaccination.

## ACUTE VACCINOSIS

#### **Acute Vaccinosis:**

When a pet begins showing signs of vaccinosis immediately or shortly after vaccination.

Immediately return to the veterinarian who administered the vaccine, have you animal examined and request documentation.

Can occur in animals and humans

# ACUTE VACCINOSIS SYMPTOMS

# Immediately Return To Your Vet

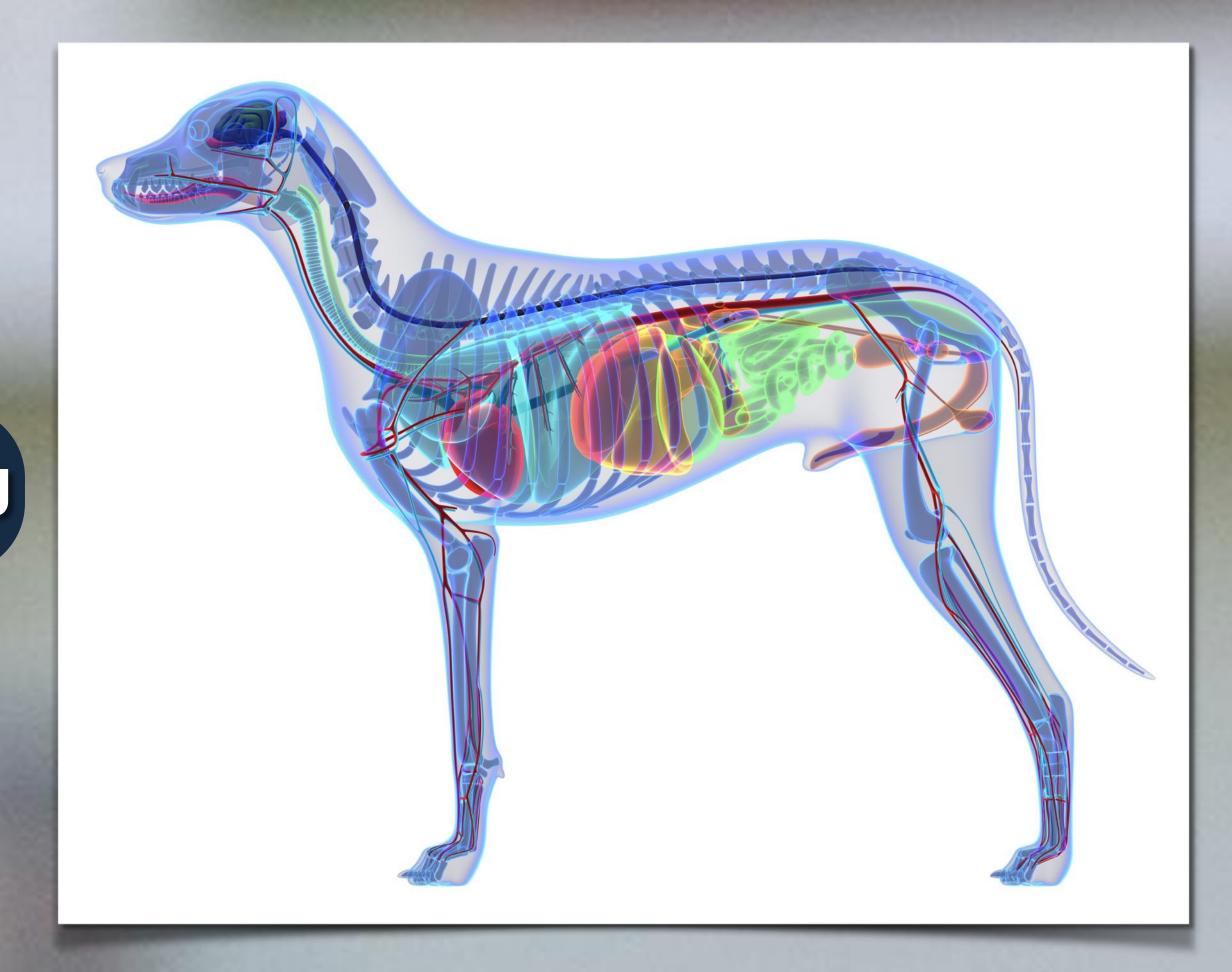

Lethargy

Anaphylaxis

Difficulty Breathing

**Lack Of Interest** 

Aggression

Muscle Pain

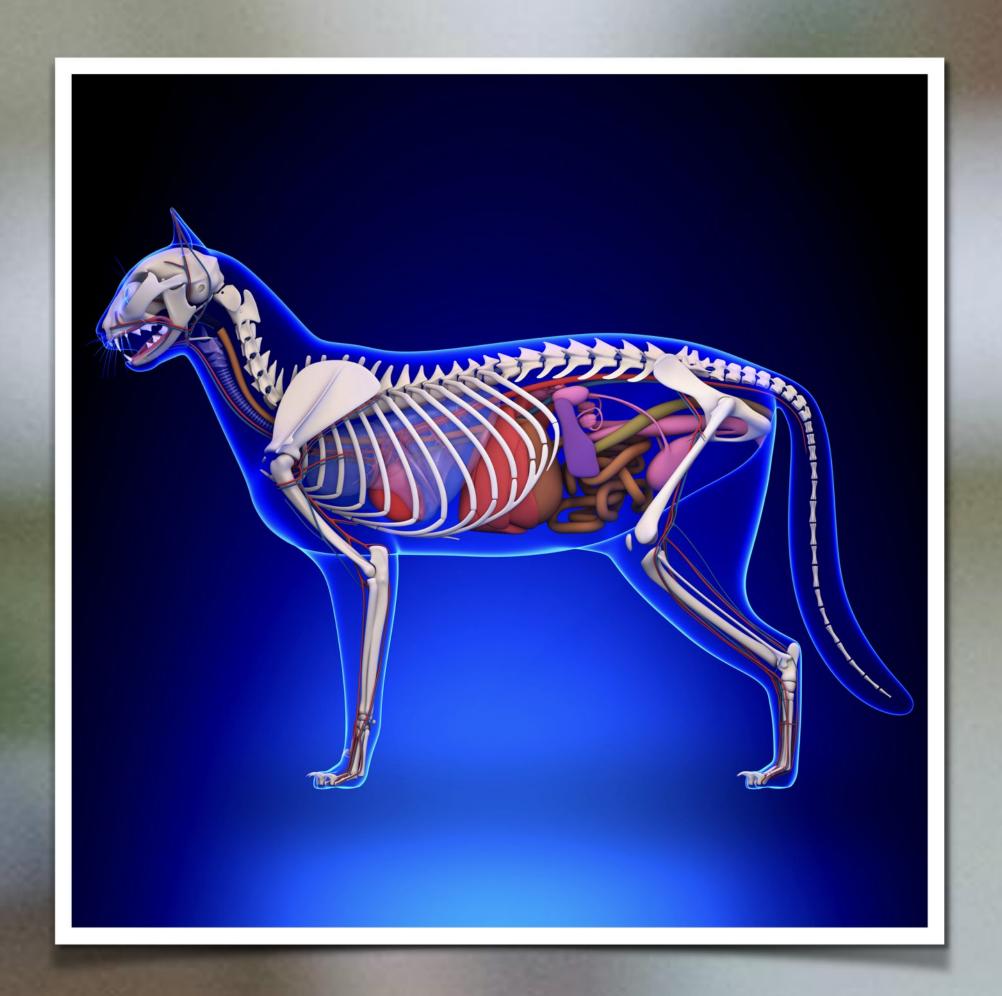

Diarrhea

Vomiting

Convulsions

Hives

### CHRONIC VACCINOSIS

#### **Chronic Vaccinosis:**

The condition can be recurring or in a chronic state.

Can manifest into a myriad of symptoms: allergies, autoimmune disease, inflammatory bowel disease, behaviour issues, arthritis, etc.

Can occur in animals and humans

# CHRONIC VACCINOSIS SYMPTOMS

Allergies

**Food Sensitivities** 

Inflammatory Bowel
Disease

**Hair Loss** 

**Tumors** 

**ACL** Issues

Stiffness/Arthritis

Recurrent Ear Infections

Seizures

## INGREDIENTS

Thuja
Origin: Northern White
Cedar/Tree of Life

A well documented vaccinosis remedy

THUJA TIP: Is known to be extremely helpful for canine papilloma.

#### INGREDIENTS

#### Silicea (silica)

Origin: Pure flint, silicon dioxide - a natural chemical compound found in the earth.

Assists the body in the removal of the toxic components found in vaccines.

#### **SILICA TIPS:**

Helps the body expel foreign objects

Helps with boils/abscesses/slivers.

Useful for blocked tear ducts and salivary glands.

# SOURCING & DEVELOPMENT

#### ANTI-VACCINOSIS

Can be used for dogs, cats and horses.

Assists in removing the negative effects of vaccines without disrupting the beneficial formation of antibodies.

Can be used immediately after vaccination, or years later to help rebalance the body from the symptoms of vaccinosis.

## SUCCESS STORIES

#### SUCCESS STORIES

I have a dog and 2 cats. All three of them received this product. For my dog, the difference was noticeable after a week. She was less bossy at the dog park.

For my cats, I had read about a possible connection between kidney disease and vaccines. This is the best preventative step I can take for them. And their increase in energy told me I did the right thing. - Leah

#### SUCCESS STORIES

She became sick shortly after receiving her vaccinations. She was fatigued, had stopped eating, grooming, and playing and had visible weight loss. You recommended giving the Adored Beast Anti-Vaccinosis a try and I am amazed by the results.

The first day we gave Callie the two recommended doses and by the next morning she came down from her cat tower to at least act interested in food. She got visibly better each day and within 5-7 days she was eating twice a day and gaining her strength back. By days 9-10 she had gained her weight back and had returned to her normal self. We can't thank you all enough for caring and for keeping such wonderful products like this at your store to help our pets live happier and healthier lives naturally. - Lisa
