

❧ EASY PEESY PROTOCOL ❧

The Ultimate Support For Healthy Urinary Tract & Bladder Function

Do you have cats experiencing any of these symptoms?

- ❧ Frequent visits to the litter box
- ❧ Frequent licking of genitals
- ❧ Inappropriate urination (urinating anywhere outside the litter box)
- ❧ Not wanting to be touched or acting grumpy when being touched
- ❧ Blood in urine
- ❧ Crying when urinating
- ❧ Overgrooming
- ❧ Being diagnosed with bladder infections
- ❧ Being diagnosed with crystals or stones

Do you have dogs experiencing any of these symptoms?

- ❧ Asking to go outside frequently to urinate
- ❧ Frequent licking of genitals
- ❧ Foul smelling urine
- ❧ Inability to hold urine
- ❧ Dribbling or dripping urine
- ❧ Blood in urine
- ❧ Being diagnosed with bladder infections
- ❧ Being diagnosed with crystals or stones

*If any of these symptoms are present, we always recommend working with your trusted veterinarian. If any animal cannot urinate, this is a medical emergency and needs immediate attention.

EASY PEESY PROTOCOL

The Ultimate Support For Healthy Urinary Tract & Bladder Function

What Is Easy Peesy Protocol?

A 2-product protocol that supports overall bladder health and specific pH to discourage crystal formation.

Who Is This Protocol For?

Any cat or dog who has been recently or previously diagnosed with a Urinary Tract Infection, crystal, or stone formation. This protocol can also be used proactively to help support overall bladder health.

Did You Know?

Historically cats and dogs get their hydration through the blood of their prey. Dry food can be a major contributor to dehydration, which is also known to create urine that is more prone to crystal formation.

Did You Know?

Cats aren't designed to drink water. Compare your cat's tongue to your own, or your dog's... it's easy to see how difficult it would be for your cat to consume the amount of water they need to break down dry food. One of the number one reasons for death in cats is kidney failure, hydration is vital for healthy kidneys.

Did You Know?

Cats and dogs can be more prone to kidney and bladder dysfunction in the Winter months.

Did You Know?

Clay-clumping litter can be a major contributing factor to urinary tract infections.

Pro Tip:

Easy Peesy II can be used as a preventative measure by adding it to your Adored Beast pre and probiotic rotation. (Gut Soothe, Feline Gut Soothe, Healthy Gut, Fido's Flora, Love Bugs) By doing this over the course of a year, you have supported all of your animal's body systems.

Julie's Suggested Use for Dogs:

Include the Easy Peesy II as part of your pre and probiotic rotation throughout the year. Easy Peesy II supports the body's gut foundational health + the bladder and kidney function, by maintaining correct pH balance to prevent urinary tract infections, crystals, and stones.

Julie's Suggested Use for Cats:

Using Easy Peesy II twice a year may help to prevent crystals and stones.

Directions for Use:

Easy Peesy I: Administer orally (4 pumps) twice per day for 30 days

Easy Peesy II: Administer orally once per day (as per weight dosage chart included in the protocol)

EASY PEESY PROTOCOL

The Ultimate Support For Healthy Urinary Tract & Bladder Function

For Maintenance and Support:

Administer orally - 4 pumps once per day for 14 days.

The Easy Peesy Protocol can be used up to 3x per year as a preventative measure for animals that have been previously diagnosed.

Ingredients

Homeopathic Hydrangea

This remedy is well documented in Homeopathic Materia Medica for support with urinary tract problems such as infections of the bladder, urethra, and prostate; enlarged prostate; gravel, crystals, and kidney stones.

Homeopathic Berberis

This remedy is well documented in Homeopathic Materia Medica for the management and prevention of calcification, and the dissolution of stones and crystals. It's also well documented for its ability to support the kidneys and overall bladder health.

Cranberry

May prevent the development of bladder infections. Cranberry ingestion supports a more acidic urine, discouraging crystals.

D-Mannose

It's known to be effective by binding to bad bacteria and carrying it out of the bladder through the urine.

N-acetyl Glucosamine (NAG)

Helps to decrease inflammation and pain in the bladder, urethra, and sphincter.

Marshmallow Root

Protects the tissue and has a soothing effect on the bladder and urethra.

Uva Ursi

Is known to have antiseptic and astringent actions, helping to flush out bacteria.

Nettle Leaf

Nettle is well known to support the kidneys, overall urinary tract health, and has anti-inflammatory effects.

14 Strain Probiotic Blend

Our proprietary blend of 1 billion allergen-free colony forming units is a powerhouse for the immune system, in turn keeping harmful bacteria at bay.

Larch Arabinogalactan

Is a prebiotic that feeds probiotics, helping to keep them healthy and viable, reducing incidents of chronic infection with the added benefits of having anti-cancer and immune-modulating properties.

Beef Liver Glandular

Nutrient-rich glands and organs are superb foods for dogs and cats, and are a vital part of a natural carnivore's diet. We include this in our formula to enhance the flavour for even the pickiest of animals yet has this incredible added nutritional benefit.
