TECARNICA, CALENDULA, SYMPHYTUM, RI

"I originally came up with this for my clients who were coming to me with Anterior Cruciate Ligament tears and they didn't want to do surgery.

Because of this, I started doing homeopathic combinations to see what I could find to try and heal these ACLs.

Therefore this formulation was actually created for ACL injuries specifically.

But then people started coming back in and saying "Wow, this did amazing for the ACL joints, but all my dog's joints (like for aged dogs or geriatric dogs), are starting to do a lot better."

Then we thought, well awesome, let's just try it with arthritic dogs and arthritic cats. And we did. And it was incredible!

Like I said, no side effects, easy to give, doesn't taste terrible. It's just an awesome product." - Julie Anne Lee DCH RCSHom, Founder & Formulator at Adored Beast

4-Way Mobility Support to help with:

Stiffness/soreness

### Outcomes - Success!

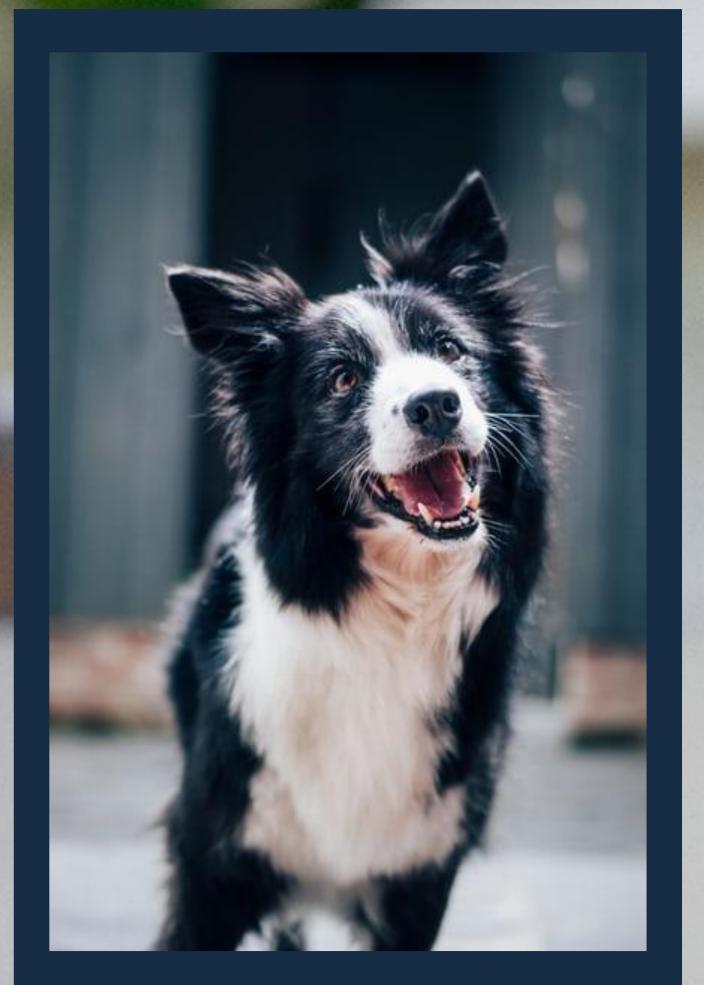

"Maggie is 14! And on Jump for JOYnts Extra Strength.

Thank you so very much for this product. I can't say enough good things about it. I tell everyone about it because I have seen what it does in Maggie. I know she is hurting if it is cold and damp out because she will not walk and she doesn't want to eat. I give her a dose and wait a couple of hours and she is good to go. The best thing is that there are no side effects. Maggie developed pancreatitis and kidney problems after having vaccinations last June. I thought that I was going to lose her but I went to real food and herbal medicine and now I have her back!"
