

SC370

# Compact, easy-to-operate, walk-behind scrubber

# Effortless cleaning in congested areas and tight spaces

The SC370 walk-behind scrubber adds productivity to your daily floor care. This medium scale walk-behind scrubber offers intuitive controls, versatile performance with lowered water and power requirements to clean your floors more productively.

# Versatility to clean in a variety settings

**Highly maneuverable** Easily navigate around objects and maneuver in tight spaces with the integrated squeegee, attached directly to scrub deck.

**Clean anytime** Ability to clean day or night, and in noise sensitive areas, with Silent Mode greatly reducing noise levels.

**Minimal operator training** Intuitive control panel features one-button start-up, in addition to primary controls, reducing operator training time.

**Fast and Simple** Tool-free elastic strap system allows for quick and easy removal, cleaning, and reinstall of squeegee blades.

**EcoMode™ technology** Reduces vacuum and brush speed, and lowers solution flow, to extend battery life in light cleaning applications.

**More time scrubbing between refills** Fewer dump/refill cycles using adjustable solution-flow rate to reduce water consumption in lighter cleaning applications.

**Increased Operator Comfort** Adjustable ergonomic handle, along with stable yet nimble 3-wheel design, increases operator comfort and control.

# Clean anytime, anywhere

## Technical specifications

| Description                                     | Unit                                   | SC370 43B       |
|---|--|-----------------|
| Reference number                                |  | 50000627        |
| Scrub deck type                                 |  | Disc            |
| Scrub brush size                                | in (mm)                                | 17 (430)        |
| Productivity rate theoretical                   | ft <sup>2</sup> /h (m <sup>2</sup> /h) | 18,500 (1,720)  |
| Min. aisle turn                                 | in (cm)                                | 41 (103)        |
| Brush motor power                               | W                                      | 400             |
| Solution / recovery tank capacity               | gal (L)                                | 6.6/6.6 (25/25) |
| Sound pressure level                            | dB(A) +/-3                             | 67              |
| Sound pressure level in EcoMode™ or Silent mode | dB(A) +/-3                             | 63              |
| Voltage   | V                                      | 24              |
| Brush speed in normal / EcoMode™                | RPM                                    | 140/100         |
| Weight (GVW)                                    | lb (kg)                                | 295 (134)       |
