

M-SERIES

T300 >>>

Tubular T300 batteries deliver premium cost-efficient power, and are more durable and dependable

than traditional flat-plate designs. T300 batteries are the right choice for every day, conventional use and are ideal for opportunity charging operations. Featuring round tubular technology, which provides longer run times than competitive square tube designs, T300 batteries can achieve up to 1800 cycles at 80% depth-of-discharge (DOD).
