Product specification

| Product name | Door/window magnetic sensor |
|---------------------|--|
| Product model | ZSS-X-GWM-C |
| Battery type | CR2032 |
| Working temperature | - 10°C~50°C |
| Working humidity | 0%~95%RH(no condensation) |
| Wireless protocol | Zigbee |
| Product size | main part 25.2x40.2x12.4mm magnet 26.0x10.0x9.0mm |
| Product weight | main part about 11.0g magnet about 6.0g |

Packing list

Reset pin × 1

Device reset

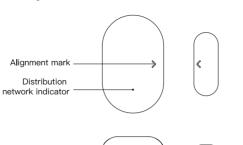

• Use the reset pin to insert the reset hole(as the following picture) for more than 5 seconds until the indicator flashes, then add the device according to the App instructions:

Product information

The door and window magnetic sensor can detect the opening or closing of doors and windows. Implement intelligent application scenarios by combining with other devices

Make sure that the small part of the door sensor is on the side of the alignment mark.

Preparation for use

1) Download MOES App on App store or scan the QR code.

Moes application is much more compatible than Tuva smart / smart life application. It also provides a new customized service for controlling scenes through Siri, widgets and scene recommendation. (Note: Tuya smart / Smart Life app is still working, but moes app is highly recommended)

- 2 Registration or Log in.
- Download "MOES" Application
- Enter the Register/Login interface; tap "Register" to create an account by entering your phone number to get verification code and "Set password". Choose "Log in" if you already have a MOES account.

network

Method One

1. Make sure your Smart Life/Tuya Smart APP has successfully connected to a Zigbee gateway.

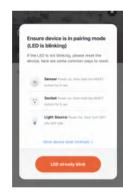

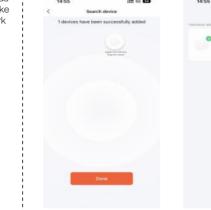

2.Use the reset pin to insert the reset hole (as the following picture) for more than 5 seconds until the indicator flashes, then add the device according to the App instructions:

3.Enter the gateway.Please follow the picture below to finish as "Add subdevice LED already blink, and the connecting will take about 10-120 secondsto complete depending on your network condition

4.Add the device successfully, you can edit the name of the device to enter the device page by click "Done"

5.Click"Done" to enter the device page to enjoy your smart life

RECYCLING INFORMATION

1) Storage:

Products should be put in the warehouse where the temperature is between the range -10°C ~ +50°C, and the relative humidity ≤90%RH, indoor environment with no acid, alkali, salt and corrosive, explosive gas, flflammable matter, protected from dust, rain and snow.

2 Security Information

- 1. Do not disassemble, reassemble, modify, or attempt to repair the product by yourself. Such products may cause electric shock, which may cause serious injury or death.
- 2. The battery of the product should be recycled, and it must be recycled or disposed of separately from household waste. Dispose of batteries in accordance with local environmental regulations.

③ Troubleshooting measures

- 1 Why does the device fail to link to the APP?
- a. ZigBee products work with the MPES/TUYA ZigBee gateway needed;
- b. Check whether the router connected to the gateway is connected to the external network. Ensure that the Wi-Fi signal of the gateway is good and try to connect the gateway again.
- c. Check whether the device is too far away from your gateway or other ZigBee devices to form a mesh network. Keep the ZigBee gateway and the ZigBee device close as recommended, where the distance should be moderate (less
- d. Check whether the device enters the network distribution

2. Why doesn't the indicator flash after the device is power-on?

Steps for connecting the APP to the device

Ensure that the product is within effective coverage of the smart

host (Gateway) ZigBee network to ensure that the product is

1.Make sure your Smart Life/Tuya Smart APP has successfully

effectively connected to the smart host (Gateway) ZigBee

Scan the QR code to configure the network guide.

connected to a Zigbee gateway.

- a. The indicator will flash after the product is powered on. If not,
- please check whether the battery power is sufficient b.Check whether the device is in good contact and in normal APP configuration state before checking its indicator status. If the indicator does not blink yet, you may please contact our after-sales service.
- 3. What to do if the smart linkage can not work between devices?
- a.Please confirm the device has been connected to the network which is under normal connection state.
- b.Please confirm whether you have updated your APP to newest c.Please confirm whether the smart scene set in the APP works
- with no conflict to other scenes. 4. What if my device breaks down and doesn't respond for a long
- a. Hello, you may please try to reset the device by removing from he APP for new APP configuration.
