

TECHNICAL INFORMATION

Info Centre 2 is a trailer mounted diagnostic tool used for reading odometer and fault codes.

Benefits

- › Three button navigation menu
- › Higher resolution LCD
- › Multiple language options
- › Communicates total distance travelled, trip distance, service, distance to next service interval, tyre scale settings, load plate data etc
- › Displays bar graph style visual indicator of the trailer load.

Info Centre 2

Haldex Info Centre 2

The Info Centre 2 is a side of the trailer mounted diagnostic unit used for readout of odometer and diagnostic codes, plus other information available from the EB+ ECU.

It is permanently connected to the ECU's diagnostic 'DIAG' connection. While the ECU is powered from its ISO7638 source information is transferred to the memory of the Info Centre 2 which can be recalled. Power is supplied from the vehicle system via the ECU diagnostics connector.

Info Centre 2

Principal Functions

Odometer:

- › Total distance & trip distance
- › Service interval
- › Distance to next service
- › Tyre scale setting

Diagnostic:

- › Display current fault code
- › Display stored fault codes
- › Sensor/cabling check

Testing:

- › Reset-to-ride (COLAS)
- › Tacho
- › Retarder
- › Trailer load
- › Brake lining wear
