

## KIT INTERIOR / EXTERIOR

### Description:

QUICK CLEANER, PROTECTOR AND POLISH SUITABLE FOR ALL SURFACES.

W1 is a fast and effective multi-purpose cleaner, suitable for easy cleaning and protection of the inner and outer surfaces of cars. Its unique formula increases “gloss” and water resistance, with a silky effect to the touch. W1 is a great support during the drying phase as it reduces the risk of limescale stains on the surface.

### Directions for use:

Spray W1 2-3 times directly on the dry or wet surface, or on a microfibre cloth, then spread and wipe with a microfibre cloth. The product is fully activated 7 hours after application.

### Consumption:

100-150 ml/car

### Warnings:

The product should not be applied on hot surfaces or in direct sunlight. To handle the product follow the precautionary advice on the safety data sheet.

### Technical Features:

Appearance and colour: clear yellow liquid

Odour: characteristic

pH: 3,5 ± 0,5

Flash point: > 60°C

Relative density: 0,99 g/cm<sup>3</sup>

Solubility in water: soluble

Solubility in oil: not soluble

### Storage:

Unopened and stored at room temperature away from direct sunlight

### Description:

REGENERATING CLEANER FOR LEATHER AND FABRICS.

X2 is a fast and effective multipurpose cleaner when there is a need to vigorously clean leather and fabrics on vehicles without dehydrating them. Its unique formula recreates a lipid layer of vegetable origin similar to that of leather, to give the driver a delicate feeling in contact with the seat where the product has been applied. X2 has a strong anti-odour and hydrating effect to prevent the formation of unpleasant odours and preserve the original finish of leather and fabrics.

### Directions for use:

**Unscheduled cleaning:** remove dust and dirt. Evenly apply the product directly on the surface, use a paintbrush with soft bristles until foamy and if necessary help yourself with a brush to remove stubborn dirt. Wipe a soft damp microfibre cloth to remove the product.

**Routine cleaning:** dilute the product 1:1 by spraying directly onto the surface and then wiping with a microfibre cloth, first a damp one and then a dry one. To protect treated surfaces, keeping them waterproof and elastic and reducing the risk of cracks, use the specific product, SC2 Dressing for leather and/or SC4 tex coat.

### Consumption:

100 ml/car.

### Technical Features:

Appearance and colour: orange liquid

Odour: characteristic

pH: 9,5 ± 0,5

Flash point: >100°C

Relative density: 1,01 g/cm<sup>3</sup>

Solubility in water: soluble

Solubility in oil: not soluble

### Storage:

Unopened and stored at room temperature away from direct sunlight
