

KIT INTERIOR / EXTERIOR

Description:

QUICK CLEANER, PROTECTOR AND POLISH SUITABLE FOR ALL SURFACES.

W1 is a fast and effective multi-purpose cleaner, suitable for easy cleaning and protection of the inner and outer surfaces of cars. Its unique formula increases “gloss” and water resistance, with a silky effect to the touch. W1 is a great support during the drying phase as it reduces the risk of limescale stains on the surface.

Directions for use:

Spray W1 2-3 times directly on the dry or wet surface, or on a microfibre cloth, then spread and wipe with a microfibre cloth. The product is fully activated 7 hours after application.

Consumption:

100-150 ml/car

Warnings:

The product should not be applied on hot surfaces or in direct sunlight. To handle the product follow the precautionary advice on the safety data sheet.

Technical Features:

Appearance and colour: clear yellow liquid

Odour: characteristic

pH: 3,5 ± 0,5

Flash point: > 60°C

Relative density: 0,99 g/cm³

Solubility in water: soluble

Solubility in oil: not soluble

Storage:

Unopened and stored at room temperature away from direct sunlight

Description:

REGENERATING CLEANER FOR LEATHER AND FABRICS.

X2 is a fast and effective multipurpose cleaner when there is a need to vigorously clean leather and fabrics on vehicles without dehydrating them. Its unique formula recreates a lipid layer of vegetable origin similar to that of leather, to give the driver a delicate feeling in contact with the seat where the product has been applied. X2 has a strong anti-odour and hydrating effect to prevent the formation of unpleasant odours and preserve the original finish of leather and fabrics.

Directions for use:

Unscheduled cleaning: remove dust and dirt. Evenly apply the product directly on the surface, use a paintbrush with soft bristles until foamy and if necessary help yourself with a brush to remove stubborn dirt. Wipe a soft damp microfibre cloth to remove the product.

Routine cleaning: dilute the product 1:1 by spraying directly onto the surface and then wiping with a microfibre cloth, first a damp one and then a dry one. To protect treated surfaces, keeping them waterproof and elastic and reducing the risk of cracks, use the specific product, SC2 Dressing for leather and/or SC4 tex coat.

Consumption:

100 ml/car.

Technical Features:

Appearance and colour: orange liquid

Odour: characteristic

pH: 9,5 ± 0,5

Flash point: >100°C

Relative density: 1,01 g/cm³

Solubility in water: soluble

Solubility in oil: not soluble

Storage:

Unopened and stored at room temperature away from direct sunlight

KIT LEATHER

Strong cleaner for vinyl

Description:

Effective on heavily soiled surfaces (eco leather, leatherette, vinyl and plastic)

Cleaner that removes even tough dirt on synthetic leather and plastic parts in cars, furniture and boats. Use the Leather Brush to clean these surfaces.

Artificial leather and grained plastic surfaces are tough and durable materials. These surfaces must be regularly cleaned and protected for hygiene and maintenance purposes.

- Ideal for cleaning and caring for plastics, synthetic leather, vinyl, faux leather and imitation leather
- Also removes stubborn dirt on synthetic leather and plastic parts in cars, furniture and boats
- We recommend using the Colourlock cleaning brush
- Made in Germany

Cleaning cloths set

Description:

Ideal for applying polishes, creams (Leather Protector, Leather Sealer, Altleder Softener, Aniline Cream and others) to leather bags, clothes, sofas, chairs, sofa and leather car seats.

Pure white in color, this fabric is extremely strong and sturdy.

Ideal tool for applying creams, waxes, oils and nutrients on leather sofas, leather car seats, leather bags and garments.

Made of soft material to avoid any scratches on the surface. Thick, soft and durable. Super absorbent and durable. Their low fiber release characteristics make them useful for general cleaning.

- Perfect cloths for applying waxes, creams, oils and balms to leather
- Provides a streak free finish without scratching the surface
- Uses modern viscose fiber technology, which is highly absorbent and collects dirt and dust very quickly
- Highly absorbent. (13% vs. 8% of cotton); Cloth size: 37cm x 32cm
- Made in Germany

Leather cleaning brush

Description:

The leather brush is used in the following cases:

As a complement to mild (Soft) or strong (Strong) cleaner to remove dirt in closed-pore leather

As a supplement to the cleaner for heavily soiled vinyl, synthetic leather and synthetic materials in general

Made in Germany

KIT MICROFIBERS

Gauntlet drying towel
